FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 85
Monday, May 2, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL SERVICE IMPASSES PANEL

5 CFR Parts 2470 and 2471

Procedures of the Panel

AGENCY: Federal Service Impasses Panel.

ACTION: Final rules.

SUMMARY: The Federal Service Impasses Panel (Panel) is amending its regulations with respect to the submission and service of documents as well as hearing procedures. These amendments are designed to: (1) Clarify requirements concerning copies of documents to be submitted to the Federal Service Impasses Panel (Panel) and service of such documents, and (2) delete current unnecessary provisions concerning transcripts of hearings and compliance with Panel decisions. In addition, the Panel is redefining the term "quorum" to clarify that a quorum of the Panel consists of a majority of its members.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Linda A. Lafferty, Deputy Executive Director, Federal Service Impasses Panel, 500 C Street, SW., Washington, D.C. 20424, (202) 382-0981.

SUPPLEMENTARY INFORMATION: Effective January 28, 1981, the Panel published, beginning at 45 FR 3520, final rules and regulations to govern the processing of cases under Chapter 71 of Title 5 of the United States Code. The regulations are required by 5 U.S.C. 7134.

Proposed amendments to the Panel's rules were published on pages 5568 and 5569 of the **Federal Register** of February 7, 1983, inviting written comments by March 10, 1983. Written comments concerning the proposed amendments were received from three parties. One party offered comments concerning the proposed amendment to § 2471.8(c) of the Panel's regulations; another's comments pertained to § 2471.11(e); and the remaining party commented on both sections.

Section 2471.8(c) of the Panel's regulations provides that an official reporter shall make an official transcript of Panel hearings. In view of the Panel's budgetary constraints and the fact that the transcription of Panel hearings is not required by the Federal Service Labor-Management Relations Statute, 5 U.S.C. Chapter 71 (Statute), the Panel proposed to delete the regulatory requirement. Although both comments submitted with respect to this section supported the proposed amendment, one party stated that transcripts should continue to be used in certain disputes; the other requested that the final regulations indicate that in the absence of Panel-provided transcription, either party would be permitted to arrange for transcription or mechanically record the proceedings at its own expense. After careful consideration of these comments, the Panel has determined that the amendment should be finalized as proposed. As amended, § 2471.8(c) enables the Panel to determine the necessity for a transcript on a case-by-case basis; a party's request to record the proceedings in the absence of a Panel-provided transcription will be handled on the same basis.

The other comments concerned the Panel's proposed deletion of § 2471.11(e) of its current regulations which requires parties to submit evidence of compliance with Panel decisions. One party objected to the deletion of the provision, arguing that it establishes a clear deadline beyond which compliance is expected and as such, provides a mechanism other than an unfair labor practice charge for determining whether a party intends to comply with a Panel decision. The other party did not oppose the proposed amendment but requested that the final rules provide that Panel decisions are enforceable through the unfair labor practice procedures of the Statute. With respect to the former comment, the Panel lacks enforcement authority over its decisions and, having considered the comment, has determined that the potential benefit to be derived from retention of the requirement is outweighed by the confusion it generates. With respect to the latter comment, the Federal Labor Relations Authority (Authority) has found that failure to comply with a Panel decision constitutes an unfair labor practice. *See e.g., National Guard Bureau, Maine Air National Guard and Local 3013, American Federation of Government Employees, AFL-CIO,* 10 FLRA No. 101 (December 3, 1982), Report No. 176. Accordingly, a party seeking to enforce a Panel decision should do so in accordance with the rules and regulations of the Authority and its General Counsel.

No comments were received regarding the proposed amendments concerning: (1) The definition of the term "quorum," and (2) copies and service. Regarding "quorum," the Panel proposed to amend the definition contained in § 2470.2(h) to clarify that a quorum of the Panel consists of a majority of its members. Regarding copies and service, the amendments require: (1) The submission of an original (or clean copy capable of further reproduction) and one copy of all requests, responses, and other documents filed with the Panel; and (2) service of such documents on all appropriate parties and persons. The amendments also contain specific requirements concerning statements of service, date of service, and paper size. The Panel's current regulations with respect to copies and service are found in Part 2471 of Title 5 of the Code of Federal Regulations, §§ 2471.5, 2471.8(a)(4), 2471.10(c), and 2471.11(f). The amendment replaces § 2471.5 in its entirety and deletes the other provisions.

List of Subjects in 5 CFR Parts 2470 and 2471

Administrative practice and procedure.

Accordingly, Parts 2470 and 2471 are amended as follows:

PART 2470—GENERAL

1. Section 2470.2 is amended by revising paragraph (h) to read as follows:

§ 2470.2 Definitions.

* * * * *

(h) The term "quorum" means a majority of the members of the Panel.

* * * * *

VOL 48 ISS 85 MY 2 1983 UMI

PART 2471—PROCEDURES OF THE PANEL

2. Section 2471.5 is revised to read as follows:

§ 2471.51 Copies and Service.

(a) Any party submitting a request for Panel consideration of an impasse or a request for approval of a binding arbitration procedure shall file an original and one copy with the Panel and shall serve a copy of such request upon all counsel of record or other designated representative(s) of parties, upon parties not so represented, and upon any mediation service which may have been utilized. When the Panel acts on a request from the Federal Mediation and Conciliation Service or acts on a request from the Executive Director, it will notify the parties to the dispute, their counsel of record or designated representatives, is any, and any mediation service which may have been utilized. A clean copy capable of being used as an original for purposes such as further reproduction may be submitted for the original. Service upon such counsel or representative shall constitute service upon the party, but a copy also shall be transmitted to the party.

(b) Any party submitting a response to or other document in connection with a request for Panel consideration of an impasse or a request for approval of a binding arbitration procedure shall file an original and one copy with the Panel and shall serve a copy of the document upon all counsel of record or other designated representative(s) of parties, or upon parties not so represented. A clean copy capable of being used as an original for purposes such as further reproduction may be submitted for the original. Service upon such counsel or representative shall constitute service upon the party, but a copy also shall be transmitted to the party.

(c) A signed and dated statement of service shall accompany each document submitted to the Panel. The statement of service shall include the names of the parties and persons served, their addresses, the date of service, the nature of the document served, and the manner in which service was made.

(d) The date of service or date served shall be the day when the matter served is deposited in the U.S. mail or is delivered in person.

(e) Unless otherwise provided by the Panel or its designated representatives, any document or paper filed with the Panel under these rules, together with any enclosure filed therewith, shall be submitted on 8½ × 11 inch size paper.

3. Section 2471.7 is amended by revising paragraph (b) to read as follows:

§ 2471.7 Preliminary hearing procedures.

* * * * *

(b) Issue and serve upon each of the parties a notice of hearing and a notice of prehearing conference, if any. The notice will state: (1) The names of the parties to the dispute; (2) the date, time, place, type, and purpose of the hearing; (3) the date, time, place, and purpose of the prehearing conference, if any; (4) the name of the designated representatives appointed by the Panel; (5) the issues to be resolved; and (6) the method, if any, by which the hearing shall be recorded.

(4). Section 2471.8 is amended by: (1) Revising paragraph (a)(4) to read as follows; and (2) removing paragraph (c) in its entirety.

§ 2471.8 Conduct of hearing and prehearing conference.

(a)* * *

(4) Designate the date on which posthearing briefs, if any, shall be submitted.

§ 2471.10 [Amended]

5. Section 2471.10 is amended by removing paragraph (c) in its entirety.

§ 2471.11 [Amended]

6. Section 2471.11 is amended by removing paragraphs (e) and (f) in their entirety.

Note.—In according with section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Federal Service Impasses Panel had determined that these proposed amendments do not require preparation of a regulatory flexibility analysis.

5 CFR Part 2472

Impasses Arising Pursuant to Agency Determinations Not To Establish or To Terminate Flexible or Compressed Work Schedules; Procedures of the Panel

AGENCY: Federal Service Impasses Panel.

ACTION: Final rules.

SUMMARY: These rules and regulations are designed to implement the provision of the Federal Employees Flexible and Compressed Work Schedules Act of 1982, 5 U.S.C. 6131, which provides that the Federal Service Impasses Panel (Panel) shall resolve impasses between Federal agencies and exclusive representatives of Federal employees arising from agency determinations: (1) Not to establish a flexible or compressed work schedule, or (2) to terminate such a schedule. The rules and regulations describe the procedures by which such impasses shall be presented to and considered by the Panel.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Linda A. Lafferty, Deputy Executive Director, Federal Service Impasses Panel, 500 C Street, SW., Washington, D.C. 20424, (202) 382-0981.

SUPPLEMENTARY INFORMATION: The Federal Employees Flexible and Compressed Work Schedules Act of 1982, 5 U.S.C. 6120 *et seq.*, authorizes the continuation of flexible and compressed work schedules (schedules) established under the Federal Employees Flexible and Compressed Work Schedules Act of 1978, Pub. L. 95-390, and permits the establishment of new programs. The Act provides that notwithstanding the provision of any collective bargaining agreement, the head of an agency may find that a particular schedule has had or would have an adverse agency impact as defined in section 6131(b). In the event of such a finding, the head of the agency shall determine not to: (1) Establish such a schedule, or (2) continue an already-established schedule.

With respect to schedules covering employees in a bargaining unit represented by an exclusive representative, section 6131(c) provides that if an agency and an exclusive representative reach an impasse with respect to an agency determination not to establish a flexible or compressed schedule, the impasse shall be presented to the Panel. It is required to promptly consider such an impasse and to take final action in favor of the agency's determination if the finding on which it it based is supported by evidence that the schedule is likely to cause an adverse agency impact. Similarly, if an agency and an exclusive representative have entered into a collective bargaining agreement providing for the use of a flexible or compressed schedule, the agency may reopen the agreement to seek termination of the schedule if the head of the agency determines that the schedule has caused an adverse agency impact. Impasses arising pursuant to such a determination shall be presented to the Panel which shall: (1) Promptly consider the case and (2) rule on the impasse not later than 60 days after the

date the Panel is presented the impasse. The Panel is required to take final action in favor of the agency's determination to terminate a schedule if the finding on which the determination is based is supported by evidence that the schedule has caused an adverse agency impact.

Effective February 7, 1983, the Panel published, beginning at 48 FR 5529, interim rules and regulations to govern the processing of cases arising under the Act. In addition to a statement of purpose and applicable definitions (Subpart A), the rules and regulations contain the procedures by which requests for Panel consideration of impasses resulting from agency determinations not to establish or to terminate a flexible or compressed work schedule shall be filed with and considered by the Panel (Subpart B). The interim rules and regulations also provided that written comments received by March 10, 1983, would be considered in promulgation of final rules. Three labor organizations submitted comments pertaining to various sections of the interim regulations. Their comments have been carefully considered and in certain instances, changes suggested therein have been adopted.

With respect to the portion of the interim regulations containing definitions, one party suggested that the definition of "impasse" contained in § 2472.2(j) should be revised to require participation by the Federal Mediation and Conciliation Service (FMCS) prior to Panel consideration of a request for assistance. That party also requested that § 2472.4 concerning the content of a request for assistance be revised to require the filing party to identify the number, length, and dates of mediation sessions. No changes in these sections of the interim rules and regulations are deemed necessary inasmuch as the provisions appear to be consistent with the Act and its legislative history.

It was also suggested that § 2472.4 be revised to require an agency which is proposing the termination of an existing schedule to submit the following with a request for assistance: (1) A list of reasons and arguments supporting its assertion of adverse agency impact, (2) copies of all documents upon which the agency relied in making such an assertion, and (3) an outline of the facts to be developed in any later proceedings. In addition to other information, the interim regulations require a party requesting Panel assistance to submit a copy of the agency's written determination (if any) as well as a summary of the position of the requesting party with respect to that determination. In the Panel's view, this information, along with the information required of the responding party under § 2472.6, is sufficient and accordingly, it is unnecessary to modify § 2472.4.

Section 2472.6 of the interim regulations requires a responding party to submit its position with respect to a request within 14 calendar days after the date of receipt. One party asserted that the time period is too long and requested that it be shortened. Consistent with this suggestion, the section has been revised to allow 10 days for the filing of responses to requests. Another party commented that § 2472.7(b) of the interim regulations which requires the service of documents upon both a party and the party's designated counsel or representative is unnecessary. That section is designed to facilitate the consideration of information by parties who are often not in the same location as their representative and accordingly, the requirement has not been deleted.

Finally, three comments were received regarding § 2472.12 of the interim regulations concerning final action of the Panel. One party requested that the section be amended to require the Panel to present detailed reasons for its decisions. Inasmuch as the rationale for any decision will depend upon the facts and circumstances of the case under consideration, that suggestion has not been adopted. Two parties commented that the section should be revised to include a description of the action to be taken by the Panel if an agency determination is not supported by evidence. Consistent with these comments, § 2472.12 has been revised to include a new subsection (b) describing what the Panel would do in such circumstances.

List of Subjects in 5 CFR Part 2472

Administrative practice and procedure.

Accordingly, Chapter XIV, Subchapter D, of Title 5 of the Code of Federal Regulations is amended to add Part 2472 to read as follows:

PART 2472—IMPASSES ARISING PURSUANT TO AGENCY DETERMINATIONS NOT TO ESTABLISH OR TO TERMINATE FLEXIBLE OR COMPRESSED WORK SCHEDULES

Subpart A—Purpose and Definitions

Sec.
2472.1 Purpose.
2472.2 Definitions.

Subpart B—Procedures of the Panel

2472.3 Requests for Panel consideration.
2472.4 Content of request.
2472.5 Where to file.
2472.6 Agency determinations not to establish or to terminate a flexible or compressed work schedule; responses to requests for Panel consideration.
2472.7 Copies and service; paper size.
2472.8 Investigation of request; Panel assistance.
2472.9 Preliminary hearing procedures.
2472.10 Conduct of hearing and prehearing conference.
2472.11 Reports.
2472.12 Final action by the Panel.

Authority: Pub. L. 97-221, 96 Stat. 227 (5 U.S.C. 6131).

Subpart A—Purpose and Definitions

§ 2472.1 Purpose.

The regulations contained in this Part are intended to implement the provisions of section 6131 of Title 5 of the United States Code. They prescribe procedures and methods which the Federal Service Impasses Panel may utilize in the resolution of negotiations impasses arising from agency determinations not to establish or to terminate flexible and compressed work schedules.

§ 2472.2 Definitions.

(a) The term "the Act" means the Federal Employees Flexible and Compressed Work Schedules Act of 1982, Pub. L. 97-221, 5 U.S.C. 6120 *et seq.*

(b) The term "adverse agency impact" shall have the meaning set forth in 5 U.S.C. 6131(b).

(c) The term "agency" shall have the meaning set forth in 5 U.S.C. 6121(1).

(d) The term "agency determination" means a determination: (1) Not to establish a flexible or compressed work schedule under 5 U.S.C. 6131(c)(2); or (2) to terminate such a schedule under 5 U.S.C. 6131(c)(3).

(e) The terms "collective bargaining agreement" and "exclusive representative" shall have the meanings set forth in 5 U.S.C. 6121(8).

(f) The term "Executive Director" means the Executive Director of the Panel.

(g) The terms "designated representative" or "designee" of the Panel means a Panel member, staff member, or other individual designated by the Panel to act on its behalf.

(h) The term "flexible and compressed work schedules" shall have the meaning set forth in 5 U.S.C. 6121 *et seq.*

(i) The term "hearing" means a factfinding hearing, arbitration hearing, or any other hearing procedures deemed necessary to accomplish the purpose of 5 U.S.C. 6131.

VOL
48
ISS
85
MY
2
1983
UMI

(j) The term "impasse" means that point in the negotiation of flexible and compressed work schedules at which the parties are unable to reach agreement on whether a schedule has had or would have an adverse agency impact.

(k) The term "Panel" means the Federal Service Impasses Panel described in 5 U.S.C. 7119(c) or a quorum thereof.

(l) The term "party" means the agency or the exclusive representative participating in negotiations concerning flexible and compressed work schedules.

(m) The term "quorum" means a majority of the members of the Panel.

(n) The term "schedule(s)" means flexible and compressed work schedules.

§ 2472.3 Request for Panel consideration.

Either party, or the parties jointly, may request the Panel to resolve an impasse resulting from an agency determination not to establish or to terminate flexible or compressed work schedule by filing a request as hereinafter provided.

§ 2472.4 Content of request.

(a) A request from a party or parties to the Panel for consideration of an impasse arising from an agency determination not to establish or to terminate a flexible or compressed work schedule under section 6131 (c)(2) or (c)(3) of the Act must be in writing and shall include the following information:

(1) Identification of the parties and individuals authorized to act on their behalf;

(2) Description of the bargaining unit involved in the dispute and the date recognition was accorded to the exclusive representative;

(3) Number, length, and dates of negotiation sessions held;

(4) A copy of any collective bargaining agreement between the parties and any other agreements concerning flexible and compressed work schedules;

(5) A copy of the schedule or proposed schedule, if any, which is the subject of the agency's determination;

(6) A copy of the agency's written determination, if any; and

(7) A summary of the position of the initiating party or parties with respect to the agency's determination.

§ 2472.5 Where to file.

Requests to the Panel provided for in these rules, and inquiries or correspondence on the status of impasses or other related matters, should be directed to the Executive Director, Federal Service Impasses Panel, 500 C Street, SW., Washington, D.C. 20424.

§ 2472.6 Agency determinations not to establish or to terminate a flexible or compressed work schedule; responses to requests for Panel consideration.

Within 10 calendar days after the date of receipt of a copy of a request for Panel consideration of an impasse arising from an agency determination not to establish or to terminate a flexible or compressed work schedule under sections 6131 (c)(2) or (3) of the Act, the responding party shall file with the Panel a statement of its position with respect to the request.

§ 2472.7 Copies and service; paper size.

(a) Any party submitting a request or other document in connection with a request for Panel consideration of an impasse filed pursuant to § 2472.3 of these rules shall file an original and one copy with the Panel. A clean copy capable of being used as an original for purposes such as further reproduction may be submitted for the original.

(b) Any party filing a document as provided in these rules is responsible for serving a copy upon all counsel of record or other designated representative(s) of parties, or upon parties not so represented. Service upon such counsel or representative shall constitute service upon the party, but a copy also shall be transmitted to the party.

(c) A signed and dated statement of service shall accompany each document submitted to the Panel. The statement of service shall include the names of the parties and persons served, their addresses, the date of service, the nature of the document served, and the manner in which service was made.

(d) The date of service or date served shall be the day when the matter served is deposited in the U.S. mail or is delivered in person.

(e) Unless otherwise provided by the Panel or its designated representatives, any document or paper filed with the Panel under these rules, together with any enclosure filed therewith, shall be submitted on 8½ x 11 inch size paper.

(f) The Panel shall not consider an impasse arising pursuant to section 6131(c) (2) or (3) of the Act to have been presented for consideration unless and until the party filing the request has complied with §§ 2472.4, 2472.5, and 2472.7 of these rules.

§ 2472.8 Investigation of request; Panel assistance.

(a) Upon receipt of a request for consideration of an impasse filed in accordance with these rules, the Panel or its designee shall promptly conduct an investigation, consulting when necessary with the parties. After due consideration, the Panel shall determine the procedures by which the impasse shall be resolved and shall notify the parties of its determination.

(b) The procedures utilized by the Panel shall afford the parties an opportunity to present their positions, including supporting evidence and arguments, orally and/or in writing. They include, but are not limited to, informal conferences with the Panel or its designee(s), hearings, written submissions, and Show Cause Orders.

§ 2472.9 Preliminary hearing procedures.

When the Panel determines that a hearing shall be held, it will:

(a) Appoint one or more of its designees to conduct such a hearing; and

(b) Issue and serve upon each of the parties a notice of hearing and a notice of prehearing conference, if any. The notice will state: (1) The names of the parties to the dispute; (2) the date, time, place, type, and purpose of the hearing; (3) the date, time, place, and purpose of the prehearing conference, if any; (4) the name of the designated representative(s) appointed by the Panel; (5) the issue(s) to be resolved; and (6) the method, if any, by which the hearing shall be transcribed.

§ 2472.10 Conduct of hearing and prehearing conference.

(a) A designated representative of the Panel, when so appointed to conduct a hearing, shall have the authority on behalf of the Panel to:

(1) Administer oaths, take the testimony or deposition of any person under oath, receive other evidence, and issue subpoenas;

(2) Conduct the hearing in open or in closed session at the discretion of the designated representative for good cause shown;

(3) Rule on motions and requests for appearance of witnesses and the production of records;

(4) Designate the date on which posthearing briefs, if any, shall be submitted; and

(5) Determine all procedural matters concerning the hearing, including the length of sessions, conduct of persons in attendance, recesses, continuances, and adjournments; and take any other action which, in the judgment of the designated representative, will promote the purpose and objectives of the hearing.

(b) A prehearing conference may be conducted by the designated representative of the Panel to:

(1) Inform the parties of the purpose of the hearing and the procedures under which it will take place;

(2) Explore the possibilities of obtaining stipulations of fact;

(3) Clarify the positions of the parties with respect to the issues to be heard; and

(4) Discuss any other relevant matters which will assist the parties in the resolution of the dispute.

§ 2472.11 Reports.

When a report is issued after an informal conference authorized in accordance with § 2472.8, or a hearing conducted pursuant to §§ 2472.9 and 2472.10, it normally shall be in writing and shall be submitted to the Panel, with a copy to each party, within a period normally not to exceed 30 calendar days after the close of the hearing or informal conference and receipt of briefs, if any.

§ 2472.12 Final action by the Panel.

(a) After due consideration of the parties' positions, evidence, and arguments, including any report submitted in accordance with § 2472.11, the Panel shall take final action in favor of the agency's determination if:

(1) The finding on which a determination under 5 U.S.C. 6131(c)(2) not to establish a flexible or compressed work schedule is based is supported by evidence that the schedule is likely to cause an adverse agency impact; or

(2) The finding on which a determination under 5 U.S.C. 6131(c)(3) to terminate a flexible or compressed work schedule is based is supported by evidence that the schedule has caused an adverse agency impact.

(b) If the finding on which an agency determination under 5 U.S.C. 6131(c)(2) or (c)(3) is based is not supported by evidence that the schedule is likely to cause or has caused an adverse agency impact, the Panel shall take whatever final action is necessary to resolve the impasse.

(c) In preparation for taking such final action, the Panel may hold hearings, administer oaths, take the testimony or deposition of any person under oath, and issue subpoenas, or it may appoint one or more individuals to exercise such authority on its behalf. Such action may be taken without regard to procedures previously authorized by the Panel.

(d) Notice of any final action of the Panel shall be promptly served upon the parties.

Note.—In accordance with section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Federal Service Impasses Panel has determined that these interim rules and regulations do not require preparation of a regulatory flexibility analysis.

Dated: April 27, 1983.

Robert G. Howlett,

Chairman, Federal Service Impasses Panel.

[FR Doc. 83-11567 Filed 4-29-83; 8:45 am]

BILLING CODE 6727-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary of Agriculture and general officers of the Department to reflect a transfer of the authority to make determinations under 41 CFR 1–2.406–3, relating to mistakes in bids disclosed before award or procurement contracts, from the General Counsel to the Assistant Secretary for Administration and the Director, Office of Operations.

EFFECTIVE DATE: July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Gary W. Butler, Deputy Assistant General Counsel, Office of the General Counsel, United States Department of Agriculture, Washington, D.C. (202) 447–2577.

SUPPLEMENTARY INFORMATION: Under 41 CFR 1–2.406–3 heads of executive agencies are authorized to make certain administrative determinations in connection with mistakes in bids alleged after opening of bids and before award. Further, heads of agencies may delegate to a central authority in their agencies, without power of redelegation, the authority to make determinations under paragraphs (a) (2), (3) and (4) of the section; and may delegate to any purchasing activity having legal counsel available, without power of redelegation, the authority to make determinations to permit withdrawal of bids under paragraphs (a) (1) and (3) of the section.

In the past the Secretary of Agriculture's authority to make all determinations under 41 CFR 1–2.406–3 was delegated to the General Counsel of the Department and all such determinations were made in the General Counsel's Washington, D.C., office. This document transfers the authority to make such determinations to the Assistant Secretary for Administration and the Director, Office of Operations, who may redelegate authority to make withdrawal determinations under paragraphs (a) (1) and (3) of 41 CFR 1–2.406–3 subject to approval by an appropriate legal officer in the Office of the General Counsel in accordance with 41 CFR 1–2.406–3(c). This change will minimize delay in making many contract awards.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the Federal Register. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined in Pub. L. 96–354, the Regulatory Flexibility Act, and thus, it is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

1. The authority citation in Part 2 reads as follows:

Authority.—5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, except as otherwise noted.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Section 2.25 is amended by adding a new paragraph (c)(3)(viii) to read as follows:

§ 2.25 Delegations of authority to the Assistant Secretary for Administration.

* * * * *

(c) * * *

(3) * * *

(viii) Make determinations under 41 CFR 1–2.406–3 relating to mistakes in bids alleged after opening of bids and before award.

* * * * *

Subpart D—Delegations of Authority to Other General Officers and Agency Heads

3. Section 2.31 is amended by removing and reserving paragraph (e).

Subpart J—Delegations of Authority by the Assistant Secretary for Administration

4. Section 2.76 is amended by adding a new paragraph (a)(3)(viii) to read as follows:

§ 2.76 Director, Office of Operations.

(a) * * *

(3) * * *

(viii) Make determinations under 41 CFR 1–2.406–3 related to mistakes in bids alleged after opening of bids and before award. Except for the authority to permit withdrawal of bids under paragraphs (a) (1) and (3) of 41 CFR 1–2.406–3, this authority may not be redelegated.

BILLING CODE 3410-01-M

Agricultural Marketing Service

7 CFR Part 1049

Milk in the Indiana Marketing Area; Order Suspending Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends for the months of April through December 1983 the seasonal producer payment plan (Louisville plan) under the Indiana Federal milk order that was designed to encourage dairy farmers to maintain relatively level production throughout the year. The action was requested by Hoosier Milk Marketing Agency, Inc., a federation of cooperative associations representing producers supplying milk to the market. The suspension is needed to maintain an appropriate alignment of producer prices with other markets.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–4829.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued March 24, 1983; published March 29, 1983 (48 FR 13050).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It also has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the completion of the required suspension procedures and include April 1983 in the suspension period. The initial request for the action was received on March 15, 1983. A notice of proposed suspension was issued on March 24, 1983, inviting interested parties to comment on the proposed action by April 5, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on dairy farmers and does not affect milk handlers.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Indiana marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 13050) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded an opportunity to file written data, views, and arguments thereon. Three comments were received and all were in favor of the suspension.

After consideration of all relevant information, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of April through December 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1049.61, the language in paragraph (f) that reads "For the months of January through March and August," and all of paragraphs (g) through (l).

Statement of Consideration

This action makes inoperative for 1983 the provisions of the Indiana milk order that contain the seasonal producer payment plan, or "Louisville" plan, for the order. Under those provisions, 20 cents per hunderweight of producer milk is deducted from the pooled value of milk in computing the uniform prices to producers during the months of April through July. The monies withheld plus accured interest then are added to the pool funds in computing the uniform prices to producers for each month of September through December. This payment plan is intended to encourage relatively level milk production throughout the year.

Suspension of the Louisville plan for 1983 was requested by Hoosier Milk Marketing Agency, Inc., a federation of cooperative associations representing most of the producers supplying the market. Without the suspension, a misalignment of producer pay prices could occur as a result of the suspensions of similar plans in the orders for the neighboring Ohio and Louisville-Lexington-Evansville markets. Producers shipping to handlers regulated by the Indiana, Louisville-Lexington-Evensville, and Ohio Valley orders are intermingled. A misalignment of pay prices among them could result in disorderly marketing as producers change markets for temporary gains.

Interested parties were given the opportunity to submit written data, views or arguments concerning the suspension. All comments were in favor of the suspension action. One comment was filed by another cooperative association whose member producers supply milk to plants fully regulated under the order. Two comments were filed by individual producers.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to assure the orderly marketing of milk in the affected and adjoining marketing areas;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension. No views opposing this suspension were received.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1049

Milk marketing orders, Milk, Dairy products.

PART 1049—[AMENDED]

It is therefore ordered, That the aforesaid provisions in § 1049.61 of the Indiana order are hereby suspended for April through December 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: May 2, 1983.

Signed at Washington, D.C., on: April 27, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 83-11886 Filed 4-29-83; 8:45 am]

BILLING CODE 3410-02-M

---

7 CFR Part 1131

[Milk Order No. 131]

Milk in the Central Arizona Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends for the months of April through July 1983 the performance standard for pooling a cooperative association's manufacturing plant that is located in the Central Arizona marketing area. The suspension was requested by United Dairymen of Arizona, a cooperative association that represents producers who supply the market. The cooperative requested the action to enable the cooperative to efficiently handle an increasing supply of milk that is in excess of fluid milk needs. The suspension is based on evidence presented at a public hearing held in November 1982 to consider amendments to the order including a proposal to lower the pooling standard for the cooperative's manufacturing plant. The suspension will promote the efficient handling of the market's reserve milk supply, and the pooling of milk of producers who have regularly been associated with the market, pending a decision on whether the order should be amended to lower the pooling standard.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C., (202) 447–4824.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Hearing—Issued October 20, 1982, published October 25, 1982 (47 FR 47259).

It has been determined that this suspension is not a major action under the criteria set forth in Executive Order 12291.

It has also been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the issuance of the suspension in time to include April 1983 in the suspension period. The request for this action was received on April 18, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and will tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agriculture Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.),* and of the order regulating the handling of milk in the Central Arizona marketing area.

After considering all relevant information, it is hereby found and determined that for the months of April through July 1983, the following provisions of the order do not tend to effectuate the declared policy of the Act.

In § 1131.7(c), the provisions, "65 percent or more of its".

Statement of Consideration

This action suspends the performance standard for pooling a cooperative association's manufacturing plant that is located in the marketing area. The order currently provides for the pooling of such a plant if at least 65 percent of the cooperative associations's member producer milk is received at pool plants of other handlers during the current month or the previous 12-month period ending with the current month. The suspension removes the 65 percent pooling standard for the months of April through July 1983.

The suspension was requested by United Dairymen of Arizona (UDA), a cooperative association that represents a substantial number of the dairy farmers who supply the market. UDA also operates a manufacturing plant that serves as an outlet for the market's reserve milk supplies. Such plant, which had been pooled continuously under the order, failed to qualify as a pool plant in March. As a result, UDA was not able to pool a portion of its member's milk at its manufacturing plant in March and absent the suspension action will also be unable to qualify the plant as a pool plant in April through July.

The issue of the appropriate pooling standard for the plant was the subject of a public hearing held November 9–10, 1982. UDA proposed that the current pooling standard be lowered to 50 percent. Also, proponent testified that in the event amendatory action could not be completed early in 1983, a suspension action would be necessary to avoid uneconomic shipments of milk to pool the milk of its member producers. Proponent requsted that evidence of marketing conditions that was presented at the hearing serve as a basis for any suspension action that the cooperative found necessary to request.

Testimony presented at the hearing indicated that changes in the market's supply-demand situation would make it impossible for UDA to continue to qualify its manufacturing plant as a pool plant under the current provisions of the order. Additional testimony indicated that, although the milk of the cooperative's member producers could continue to be pooled without a lowering of the pooling standards, costly and inefficient changes in milk movements would have to be made in order to do so.

Based on available information concerning the market's supply conditions, the suspension for the months of April through July 1983 is warranted. The suspension will accommodate the pooling and efficient handling of milk supplies for the market pending a decision on whether the order should be amended to lower the pooling standard in the manner proposed. In the absence of a suspension, costly and inefficient movements of producer milk would have to be made solely for the purpose of pooling the milk of dairy farmers who have historically supplied the fluid milk needs of the market.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and

VOL 48 ISS 85 MAY 1983

to maintain orderly marketing conditions in the marketing area in that without the suspension costly and inefficient movements of milk would have to be made solely for the purpose of pooling the milk of dairy farmers who have historically supplied the fluid milk needs of the market.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing problems that provide the basis for this suspension action were fully reviewed at a public hearing held on November 9–10, 1982, where all interested parties had an opportunity to be heard on this matter.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**

List of Subjects in 7 CFR Part 1131

Milk marketing orders, Milk, Dairy Products.

It is therefore ordered, That the aforesaid provisions in § 1131.7(c) of the order are hereby suspended for the months of April through July 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: May 2, 1983.

Signed at Washington, D.C. on: April 27, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-CE-50-AD; Amdt. 39-4643]

Airworthiness Directives; SIAI-Marchetti Models S205–18, S205–20, S208, S208A, F260 and F260B Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to SIAI-Marchetti Models S205–18, S205–20, S208, S208A, F260 and F260B airplanes which supersedes AD 77–14–16, Amendment 39–2959 (42 FR 34867). The superseded AD required periodic inspection and replacement, as necessary, of the propeller governor arm on certain serial numbers of the above model airplanes to detect and eliminate cracked arms which could fracture and result in loss of propeller control. Subsequently, the manufacturer has determined that the inspections are no longer required when steel replacement propeller governor arm, Part Number 260–13–274–01, is installed. The manufacturer has also identified certain additional airplanes to which the requirements should apply. This amendment assures that all affected aircraft are inspected and provides relief from these inspections when P/N 260–13–274–01 arm is installed.

DATES: Effective Date: May 9, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: SIAI–Marchetti Service Bulletins S.B. No. 205B43A and S.B. No. 260B18A, dated September 16, 1977, applicable to this AD may be obtained from SIAI–Marchetti S.p.A., V–12070 via Indipendenza, 2, 2108 Sesto Calenda, Italy, whose telephone number is 0331 924842/923598. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT:

A. Astorga, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium; Telephone 513.38.30; or Larry Werth, Foreign FAR 23 Section, ACE–100, Central Region, FAA 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: Reports of cracked propeller governor arms on certain Model S205, S208 and F260 airplanes prompted SIAI–Marchetti to issue Service Bulletin Nos. 205B43 and 260B18, both dated April 10, 1976, which called for the inspection and replacement, if necesary, of the propeller governor arm.

The FAA found that the condition addressed by these Service Bulletins was an unairworthy condition likely to exist on airplanes certificated for operation in the United States and issued AD 77–14–16 which required periodic inspection and replacement, as necessary, of the propeller governor arm on the affected aircraft. Subsequently, the manufacturer determined that the inspections are no longer required when steel replacement propeller governor arm, Part Number 260–13–274–01 is installed. The manufacturer has also identified certain additional airplanes to which the requirements should apply. As a result SIAI–Marchetti has issued Service Bulletins No. 205B43A and No. 260B18A, both dated September 16, 1977, and approved by the Italian Registry of Aeronautics (Registro Aeronautico Italiano—R.A.I.), which set forth the expanded applicability and specify the criteria for terminating the repetitive inspections. The R.A.I. who has responsibility and authority to maintain the continuing airworthiness of these airplanes in Italy has classified these Service Bulletins and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under Italian registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of the R.A.I. combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of Service Bulletins No. 205B43A and No. 260B18A and the mandatory classification of these Service Bulletins by the R.A.I.

Based on the foregoing, the FAA has determined that the condition addressed by these Service Bulletins is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States.

Therefore, an AD superseding AD 77–14–16 is being issued requiring periodic inspections and replacement, as necessary, of the propeller governor arm on certain serial numbered SIAI–Marchetti Models S205–18, S205–20, S208, S208A, F260 and F260B airplanes.

Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

SIAI-Marchetti: Applies to Models S205–18 and S205–20 (serial numbers 1 through 51, S208 and S208A (serial numbers 1 through 4–64), and F260 and F260B (serial numbers 101 through 125, 2–28 through 2–75, 3–70, 3–77 through 3–81, 3–84, 502, 10–09, 20–01, 235, 237 through 243, 247 through 254, and 266 through 280) airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished. To detect cracks in the propeller governor arm and preclude possible loss of propeller control, accomplish the following:

(a) Within the next 25 hours time-in-service after the effective date of this AD, unless already accomplished within the last 25 hours time-in-service, and thereafter at intervals not to exceed 50 hours time-in-service from the last inspection, visually inspect the propeller governor arm with a 5-power magnifier for cracks and breaks in accordance with the following:

(1) For the Model S205 and S208 airplanes, with "Instructions" paragraph (a), steps 1 through 4, of SIAI-Marchetti Service Bulletin No. 205B43A dated September 16, 1977.

(2) For the Model F260 and F260B airplanes, with "Instructions" paragraph (a), steps 1 through 4, of SIAI-Marchetti Service Bulletin No. 260B18A dated September 16, 1977.

(b) If a crack or break is detected as a result of an inspection required by paragraph (a) of this AD, before further flight, replace the propeller governor arm with a serviceable part in accordance with the following:

(1) For the Model S205 and S208 airplanes, with "Instructions" paragraph (c), steps 1 through 10, of the SIAI-Marchetti Service Bulletin No. 205B43A dated September 16, 1977.

(2) For the Model F260 and F260B airplanes, with "Instructions" paragraph (c), steps 1 through 10, of SIAI-Marchetti Service Bulletin No. 260B18A dated September 16, 1977.

(c) When propeller governor arm, Part No. 260–13–274–01 is installed, the inspections in paragraph (a) of this AD are no longer required.

(d) Any equivalent means of complying with this AD must be approved by Manager, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium.

This AD supersedes AD 77–14–16, Amendment 39–2959.

This amendment becomes effective on May 9, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. If is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on April 21, 1983.

John E. Shaw,

Acting Director, Central Region.

BILLING CODE 4910-13-M

DEPARTMENT OF STATE

Office of the Secretary

22 CFR Part 11

[Dept. Reg. 108.832]

Appointment of Members of the Foreign Service; Revised Regulations

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The Department of State is revising its regulations governing the appointment of Mid-Level Foreign Service Officer Career Candidates and adding a new § 11.20 governing the appointment of Foreign Service Specialist Career Candidates. These regulations also supplement and implement the Foreign Service Act of 1980.

EFFECTIVE DATE: October 15, 1982.

FOR FURTHER INFORMATION CONTACT:

Frontis B. Wiggins, Board of Examiners, Department of State, Washington, D.C. 20520, (703) 235–9232.

SUPPLEMENTARY INFORMATION: The Department of State is publishing revised regulations which govern the eligibility criteria for candidates for the Mid-Level Foreign Service Career Candidate Program and for the new Foreign Service Specialist Career Candidate Program; the competitive requirements for these two programs; and the terms and conditions of appointment for successful candidates. Proposed regulations were published in the **Federal Register** on September 1, 1982 (47 CFR 38540–38552).

The Mid-Level Program supplements the competitive Junior Foreign Service Officer Career Candidate Program to meet identified Mid-Level needs which cannot otherwise be met from within the ranks of the career Foreign Service. A limited number of appointments are made annually under the Mid-Level Program on a highly competitive basis.

The Foreign Service Specialist Career Candidate Program applies to professional, technical, and functional occupational categories at all levels, other than those of generalist Foreign Service officers. Appointments under the Specialist Program also are made on a competitive basis to meet identified needs of the Foreign Service.

Analysis of comments. The only comments received by the Department of State during the public comment period concerned the reasons for a stated maximum age for appointment as a Foreign Service Mid-Level or Specialist Career Candidate. Accordingly, the Department has amended and expanded the appropriate sections of these regulations to explain that the maximum age for appointment as a Career Candidate is based on the mandatory retirement age of 65 contained in the Foreign Service Act of 1980, as well as the requirement that such Career Candidates shall be able to complete a minimum period of duty and the requisite eligibility periods for tenure consideration and the receipt of retirement benefits prior to reaching the mandatory retirement age of 65. With this exception, plus certain minor editorial changes, the final rule as published herewith is the same as the proposed rule published in the **Federal Register** of September 1, 1982.

E.O. 12291, Federal Regulation

The Department of State has determined that this is not a major rule for the purposes of E.O. 12291, Federal Regulation, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets.

In addition, this rule relates solely to agency personnel and falls under section 1(a)(3) of E.O. 12291.

List of Subjects in 22 CFR Part 11

Foreign service.

PART 11—[AMENDED]

Accordingly, under the authority of sections 206(a) and 301(b) of the Foreign Service Act of 1980 (secs. 206(a) and 301(b), Pub. L. 96–465, 94 Stat. 2079 and 2088 (22 U.S.C. 3926 and 3941)), 22 CFR Part 11 is amended to read as follows:

1. Section 11.11 is revised to read as follows:

1983 UMI

VOL
48
ISS
85
MAY
2
1983
UMI

§ 11.11 Mid-level Foreign Service Officer career candidate appointments.

(a) *General considerations.* (1) *Authority.* Pursuant to sections 302 and 306 of the Foreign Service Act of 1980 (hereinafter referred to as the Act), all Foreign Service officers shall be appointed by the President, by and with the advice and consent of the Senate. All appointments shall be made to a class and not to a particular post. No person shall be eligible for appointment as a Foreign Service officer unless that person is a citizen of the United States. Such appointment is initially to career candidate status, with subsequent commissioning to career status governed by Volume 3 (Personnel), Foreign Affairs Manual section 570.

(2) *Veterans' Preference.* Pursuant to section 301 of the Act, and notwithstanding the provisions of section 3320 of title 5 of the United States Code, the fact that an applicant is a veteran or disabled veteran, as defined in section 2108(3A), (3B), and (3C) of such title, shall be considered as an affirmative factor in the selection of candidates for appointment as Foreign Service officer career candidates (22 U.S.C. 1234).

(3) *Purpose and Policy.* The Mid-Level Career Candidate Program of the Department of State supplements the Junior Foreign Service Officer Career Candidate Program to meet total requirements for foreign Service officers at the mid-level. The purposes of the Mid-Level Program are: (i) To provide expanded opportunities and upward mobility for outstanding members of the Foreign Service with high potential who have been serving with particular success in other occupational categories; (ii) to permit the recruitment of a limited number of highly skilled and qualified personnel from outside the Foreign Service to meet specific needs which cannot be met from within the career Service; and (iii) to assist in meeting the Affirmative Action goals of the Department of State. This section governs appointments to generalist occupational categories (that is, administrative, consular, economic and political) at classes FS–3, 2, or 1. All appointments above FS–1, regardless of occupational category, are govern by § 11.30 (to be supplied). Appointments to Specialist occupational categories below the Senior Foreign Service are governed by § 11.20. Successful applicants under the Mid-Level Program will be appointed to career candidate status for a period not to exceed 5 years. Under precepts of the Commissioning and Tenure Board, career candidates may be granted tenure and converted to career Foreign Service officer status. Those who are not granted tenure prior to the expiration of their career candidate appointments will be separated from the Career Candidate Program no later than the expiration date of their appointments. As provided in section 310 of the Act, such separated candidates who had originally been employed by the Department of State with the consent of the head of their agency shall be entitled to reemployment rights in their former agency under section 3597 of title 5, United States Code.

(4) *Sources of candidates.* (i) *Department.* The great majority of mid-level entrants will be career employees of the Department of State and the Foreign Service of proven ability who possess high potential for advancement. On the basis of the needs of the Foreign Service, the Department will approve the mid-level appointment of Foreign Service and Civil Service personnel on its rolls who apply, for whom the Bureau of Personnel issues a certificate of need, and who are found qualified by the Board of Examiners for the Foreign Service.

(ii) *Other Federal Government agencies.* Personnel with similar qualifications from other Federal Government agencies may also apply for the Mid-Level Program based on agreements between the Department and those agencies.

(iii) *Other.* Other candidates may be drawn from non-Government sources, including minority and women applicants for the Department's Mid-Level Affirmative Action Program.

(b) *Eligibility requirements.* (1) *Citizenship.* Each person appointed as a Foreign Service Mid-Level Career Candidate must be a citizen of the United States.

(2) *Service.* (i) On the date of application, a candidate must have completed a minimum of 9 years of professional work experience, including at least 3 years of service in a position of responsibility in a Federal Government agency or agencies. For this purpose, a position of responsibility is defined as one in the Foreign Service at class FS–5, in the Civil Service at GS–9, or in the Armed Forces as first lieutenant or lieutenant junior grade, or higher. Academic studies, particularly those related to Foreign Service work, may be substituted for part of the required experience. The duties and responsibilities of the position occupied by the candidate must have been similar to or closely related to that of a Foreign Service officer in terms of knowledge, skills, abilities, and overseas work experience. In addition, a candidate must currently be in, or have been in, a grade or class comparable to FS–4 or higher.

(ii) Candidates from outside the Department who at the time of application lack 3 years of service in a position of responsibility as defined in the preceding paragraph may, however, be considered if they are found to possess a combination of educational background, employment, experience, and skills needed by the Foreign Service at the mid-level.

(3) *Age.* All career candidate appointments shall be made before the candidate's 60th birthday. The maximum age for appointment under this program is based on the requirement that all career candidates shall be able to (i) complete at least two full tours of duty, exclusive of orientation and training, (ii) complete the requisite eligibility period for tenure consideration, and (iii) complete the requisite eligibility period to receive retirement benefits, prior to reaching the mandatory retirement age of 65 prescribed by the Act.

(4) *Certification of need.* Before the Board of Examiners may process a candidacy, the Director General of the Foreign Service must certify that there is a continuing, long-term requirement, consistent with the projections of personnel flows and needs mandated by section 601(c)(2) of the Act, for a combination of professional work experience, educational background, skills, and capabilities possessed by the applicant which cannot reasonably be met from within the ranks of the career service, including by special training of career personnel and/or limited appointments pending completion of such training, if feasible. No applicant may be appointed in an occupational category or at a class level for which the Director General has not certified a need. Such certifications shall take into full account the latest published skills resources inventory and shall be based on a written assessment of the assignment and promotion effects on career members of the Foreign Service. A separate certification of need is not required for applicants under the Mid-Level Affirmative Action Program, as the hiring goals established by the Secretary constitute the certification for applicants under that Program. The exclusive employee representative will be advised promptly in writing on request of the number, nature, and dates of the certifications of need issued since the last request, including a affirmation that each such issuance has been in accordance with the requirements of this section.

(c) *Recruitment.* (1) *From within the Department.* It is the Department's policy to encourage eligible personnel on its rolls to apply for appointment as Mid-Level Foreign Service officer career candidates including, in particular, the following categories: (i) Members of the Foreign Service whose performance has been consistently of a high caliber, and whose background, experience, and general qualifications indicate that they can compete favorably with Foreign Service officers; and (ii) Civil Service personnel who are serving in positions to which Foreign Service officers are normally assigned, who have superior records, and whose general qualifications indicate that they can compete favorably with Foreign Service officers.

(2) *Other.* The Department also encourages highly qualified applicants from other agencies of the Federal Government, and from outside the Federal Government, who meet the statutory and other eligibility requirements, to apply for the Mid-Level Program. Appointments from these sources for available openngs are made on a highly competitive basis to fill specific needs of the Foreign Service at the Mid-Level.

(d) *Methods of application.* (1) *Forms.* Application is made for a Mid-Level Foreign Service officer career candidate appointment but not for a specific class. Applicants for mid-level entry must complete Standard Form 171, "Personnel Qualifications Statement," and Form DSP–34, "Supplement to Application for Federal Employment," and forward them, together with an autobiography not exceeding four typewritten pages in length, to the Board of Examiners for the Foreign Service for consideration.

(2) *Qualifications evaluation panel.* The Board of Examiners establishes a file for each applicant, placing in it all available documentation of value in evaluating the applicant's potential for service as a Foreign Service officer. A Qualifications Evaluation Panel of deputy examiners of the Board of Examiners reviews the file to determine whether the applicant meets the statutory and other eligibility requirements, to assess the applicant's skills relative to the needs of the Foreign Service, and to recommend whether the applicant should be examined for possible appointment under the Mid-Level Program.

(e) *Examination for mid-level appointment.* The submission of an application to the Board of Examiners does not in itself entitle an applicant to examination. The decision whether to proceed with an examination will be made by the Board of Examiners after a thorough review of the candidate's qualifications and a determination of eligibility for appointment following receipt of a certification of need for that candidate.

(1) *Purpose.* The mid-level examination is designed to enable the Board of Examiners to determine a candidate's aptitude for the work of the Foreign Service at the mid-level and fitness for a Foreign Service career.

(2) *Class.* In determining the Foreign Service officer class for which a candidate will be examined, the Board of Examiner's presumption will be for the class which is equivalent to the candidate's current salary level. In evaluating qualifications and in conducting examinations, the Board of Examiners will determine whether the candidate's qualifications compare favorably with Foreign Service officers at the candidate's current salary level. However, the Board of Examiners, at its discretion, may certify a candidate for appointment as a career candidate at a class other than that equivalent to current salary level in those instances where the Board determines that the candidate's qualifications clearly warrant such action.

(3) *Written examination.* A written examination will not normally be required of candidates for mid-level appointment. However, if the volume of applications for a given class or classes, or a particular functional specialty, is such as to make it infeasible to examine all candidates orally within a reasonable time, such candidates may be required to take an appropriate written examination prescribed by the Board of Examiners. Candidates whose score on the written examination is at or above the passing level set by the Board of Examiners will be eligible for selection for the oral examination.

(4) *Oral examination.* (i) *Purpose.* The oral examination will be designed to enable the Board of Examiners to determine whether candidates are functionally qualified for work in the Foreign Service at the mid-level, whether they have the potential to advance in the Foreign Service, and whether they have the background and experience to make a contribution to the Foreign Service.

(ii) *When and where given.* The oral examination is individually scheduled throughout the year and is normally given in Washington, D.C. At the discretion of the Board of Examiners, it may be given in other American cities, or at Foreign Service posts, selected by the Board.

(iii) *Examining panel.* Candidates recommended by a Qualifications Evaluation Panel for examination will be given an oral examination by a panel of deputy examiners of the Board of Examiners. That panel shall include at least one officer from the functional or professional specialty for which the candidate is being examined. Examining panels shall be chaired by a career officer of the Foreign Service. Determinations of duly constituted panels of deputy examiners are final unless modified by specific action of the Board of Examiners.

(iv) *Content.* The Examining Panel will question the candidate regarding the indicated functional or professional specialty; knowledge of American history, government, and other features of American culture; familiarity with current events and international affairs; and other matters relevant to the candidate's qualifications for appointment.

(v) *Grading.* Candidates taking the oral examination will be graded numerically according to standards established by the Board of Examiners. The candidacy of anyone whose score is at or above the passing level set by the Board will be continued. The candidacy of anyone whose score is below the passing level will be terminated and may not be considered again until 1 year after that date.

(5) *Written essay.* Candidates who take the oral examination will be asked to write an essay during the examination day, on a topic related to Foreign Service work, to enable the Board of Examiners to measure the candidate's effectiveness of written expression.

(6) *Other exercises.* Candidates who take the oral examination also may be asked to complete other exercises during the examination day, to enable the Board of Examiners to measure additional aspects of performance related to Foreign Service work at the mid-level.

(7) *Background investigation.* Candidates who pass the oral examination will be eligible for selection for the background investigation. The background investigation shall be conducted to determine suitability for appointment to the Foreign Service.

(8) *Medical examination.* Candidates who pass the oral examination, and their dependents, will be eligible for selection for the medical examination. The medical examination shall be conducted to determine the candidate's physical fitness to perform the duties of a Foreign Service officer on a world-wide basis and, for candidates and dependents, to determine the presence of any physical, neurological, or mental condition of such a nature as to make it

VOL 48 ISS 85 MY 2 1983 UMI

unlikely that they would be able to function on a world-wide basis.

(9) *Final review panel.* The entire file of candidates who pass the oral examination will be reviewed and graded by a Final Review Panel, consisting of two or more deputy examiners of the Board of Examiners, after the results of the background investigation and the medical examination are received. The Final Review Panel will take into account the grade assigned by the oral Examining Panel, as well as all other available information concerning the candidate, and decide whether or not to recommend the candidate for appointment. The candidate's file will then be submitted to the Board of Examiners for approval. If approved by the Board, the candidate's name will be entered on the rank-order register for the class and functional specialty for which the candidate has been found qualified. The candidacy of anyone who is not recommended for appointment by the Final Review Panel shall be terminated and the candidate so informed.

(10) *Foreign language requirement.* All candidates who pass the oral examination will be required to take a subsequent test to measure their fluency in foreign languages or their aptitude for learning them. A candidate may be appointed without first having passed an examination in a foreign language, but the appointment will be subject to the condition that the newly appointed career candidate may not be converted to career Foreign Service officer status unless, within a specified period of time, adequate proficiency in a foreign language is achieved. For limitations on promotions see Volume 3 (Personnel), Foreign Affairs Manual, section 874.

(11) *Certification for appointment.* (i) *Departmental employees.* A candidate who is a career employee of the Department, for whom a certification of need has been issued, will be certified by the Board of Examiners for appointment after satisfactorily completing all aspects of the examination process. The appointment certification will specify the class and salary for which the candidate has been found qualified.

(ii) *Others.* Other successful candidates will, after being approved by the board of Examiners, have their names placed on the rank-order register for the class and functional specialty for which they have been found qualified. A separate rank-order register may be established for candidates under the Mid-Level Affirmative Action Program. Appointments to available openings will be made from the registers in rank-order according to the needs of the Foreign Service.

(12) *Termination of eligibility.* Candidates who have qualified but have not been appointed because of lack of openings will be removed from the rank-order register 18 months after the date of placement on the rank-order register. The Board of Examiners may extend the eligibility period when such extension is, in its judgment, justified in the interests of the Foreign Service.

2. By adding a new § 11.20 to read as follows:

§ 11.20 Foreign Service specialist career candidate appointments.

(a) *General considerations.* [1] Section 303 of the Foreign Service Act of 1980 (hereinafter referred to as the Act) authorizes the appointment of members of the Service (other than Presidential appointments).

(2) Section 306 of the Act provides that, before receiving a career appointment in the Foreign Service, an individual shall first serve under a limited appointment for a trial period of service as a career candidate.

(3) This section governs the appointment by the Department of State of Foreign Service specialist career candidates to classes FS–1 and below. Specialist candidates comprise all candidates for career appointment in all occupational categories other than generalists (that is, administrative, consular, economic, political, and program direction), who are governed by the regulations respecting Foreign Service officer career candidates. The appointment of all Senior Foreign Service career candidates regardless of occupational category is governed by § 11.30 (to be supplied). Regulations governing trial service and tenuring of specialist candidates are found in Volume 3 (Personnel), Foreign Affairs Manual, section 580.

(4) Veterans' preference shall apply to the selection and appointment of Foreign Service specialist career candidates.

(b) *Specialist career candidate appointments.* (1) *Certification of need.* Candidates for appointment as specialist career candidates must be world-wide available and must have a professional or a functional skill for which there is a continuing need in the Foreign Service. Before an application can be processed, the Director General of the Foreign Service must certify that there is a need for the applicant as a career candidate in the specialist category at or above the proposed class of appointment. No applicant shall be appointed at a class level for which there is no certified need. This individual certification of need is not required for those specialist occupations which the Director General determines in advance to be shortage or continuous recruitment categories, and for which the Director General has certified the need for a specific number of appointments at given levels. Such appointments, including an appointment of an individual who is the employee of any agency, may not exceed 5 years in duration, and may not be renewed or extended beyond 5 years. A specialist candidate denied tenure under Volume 3 (Personnel), Foreign Affairs Manual, section 580, may not be reappointed as a career candidate in the same occupational category.

(2) *Eligibility.* An applicant must be a citizen of the United States and at least 20 years of age. The minimum age for appointment as a career candidate is 21. All career candidate appointments shall be made before the candidate's 60th birthday. The maximum age for appointment under the program is based on the requirement that all career candidates shall be able to (i) complete at least two full tours of duty, exclusive of orientation and training, (ii) complete the requisite eligibility period for tenure consideration, and (iii) complete the requisite eligibility period to receive retirement benefits, prior to reaching the mandatory retirement age of 65 prescribed by the Act.

(3) *Selection and initial screening.* Specialist career candidates will be selected on the basis of education, experience, suitability, performance potential, and physical fitness for world-wide service. Applicants normally will be given personal interviews and will be subject to such written, oral, physical, foreign language, and other examinations as may be prescribed by the Board of Examiners for the Foreign Service and administered by the Office of Recruitment, Examination, and Employment (PER/REE). The Board of Examiners will identify and/or approve the knowledge, skills, abilities, and personal characteristics required to perform the tasks and duties of Foreign Service specialists in each functional field. PER/REE will screen applications for appointment as Foreign Service specialist career candidates under approved criteria and select those who meet the requirements for further processing under these regulations.

(4) *Oral Examination.* Candidates selected through the initial screening will be eligible for an oral examination unless they are candidates for appointment in occupational categories for which the oral examination may be waived by the Director General. This waiver normally will apply only to continuous-recruitment categories and to appointments below the FS–6 level, and where such waivers occur, a thorough oral interview will be conducted. The oral examination will be given by a panel of deputy examiners, at least one of whom will be a career Foreign Service specialist proficent in the functional field for which the candidate is being tested. The examination may include a writing sample. Candidates taking the oral examination will be graded numerically according to standards set by the Board of Examiners. The candidacy of anyone whose score is at or above the passing level set by the Board will be continued. The candidacy of anyone whose score is below the passing level will be terminated and may not be considered again for 1 year.

(5) *Background investigation.* Candidates who have passed the oral examination, and candidates who have passed the initial screening if the oral examination has been waived, will be eligible for selection for the background investigation to determine their suitability for appointment to the Foreign Service.

(6) *Medical examination.* Such candidates and their dependents will be eligible for selection for the medical examination. The medical examination shall be conducted to determine the candidate's physical fitness to perform the duties of a Foreign Service specialist on a world-wide basis and, for candidates and dependents, to determine the presence of any physical, neurological, or mental condition of such a nature as to make it unlikely that they would be able to function on a world-wide basis.

(7) *Final review panel.* After the results of the medical examination and background investigation have been received, a Final Review Panel, consisting of two or more deputy examiners of the Board of Examiners, or by another appropriate panel appointed for the purpose by the Director of PER/REE, will review and grade the candidate's entire file. Candidates approved by the Final Review Panel will have their names placed on a rank-order register for the functional specialty for which they are qualified. Candidates will remain eligible for appointment for 18 months from the date of placement on the rank-order register. The Board of Examiners may extend this eligibility period when such extension is, in its judgment, justified in the interests of the Foreign Service. The candidacy of anyone who is not recommended for appointment by the Final Review Board shall be terminated and the candidate so informed.

(c) *Limited non-career appointments.* Other Foreign Service specialist appointments may be made on a limited non-career basis. Before an application for a limited non-career appointment can be processed, the Director General of the Foreign Service must certify that there is a need for the applicant. Such limited specialists must serve overseas, and they will be subject to the same conditions as those outlined in these regulations for career candidates, with the exception that the maximum age of 59 does not apply to such appointments. However, because members of the Foreign Service generally are subject to the mandatory retirement age of 65 under section 812 of the Act, limited non-career appointments normally will not extend beyond the appointee's 65th birthday. Applicants for limited non-career appointments will be subject to the same screening, medical examination, background investigation, and final review process required of career candidates, but normally they will not be subject to a written or oral examination. Their appointments will normally be limited to the duration of the specific assignment for which they are to be hired, may not exceed 5 years in duration, and may not be renewed or extended beyond 5 years. Ordinarily, no limited non-career appointee will be reappointed until at least 1 year has elapsed since the expiration of a previous appointment. However, earlier reappointment may be granted in cases of special need, provided the exclusive employee representative is advised in advance and is afforded an opportunity to comment. Prior to the expiration of their limited appointments, if otherwise eligible, non-career appointees may compete for career candidate status by qualifying at that time for and taking the examinations required of career candidates. If successful, their names would be entered on the rank-order register for their functional specialty. If appointed as career candidates, the length of service under their previous limited non-career appointments may be counted as part of the trial period of service prescribed before a candidate can receive a career appointment.

Dated: April 23, 1983.

Clint A. Lauderdale,

Deputy Assistant Secretary for Personnel.

BILLING CODE 4710–15–M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1613

Equal Employment Opportunity in the Federal Government; Complaints of Discrimination

AGENCY: Equal Employment Opportunity Commission.

ACTION: Interim regulations with comments invited for consideration in final rulemaking.

SUMMARY: The Equal Employment Opportunity Commission is revising its regulations on equal employment in the Federal Government (29 CFR Part 1613).

The purpose of the amendments is to eliminate the duplicative complaint processing by federal agencies occurring with respect to "mixed cases", before the Merit Systems Protection Board (MSPB). Mixed cases are matters related to certain personnel actions which are appealable to the MSPB and which raise allegations of discrimination based on race, color, religion, sex, national origin, handicap, age and/or reprisal. In addition, it is the purpose of these amendments to eliminate the 15 calendar day reprisal charge process, which has proven to be impractical and which has served to eliminate an aggrieved individual's right to administrative due process, while seldom providing for rapid charge processing. Further, these amendments also provide an administrative mechanism for appealing decisions on grievances where (except with respect to the U.S. Postal Service), pursuant to 5 U.S.C. 7121 (which does not apply to the U.S. Postal Service), a grievant has raised an allegation of discrimination in connection with the grievance.

These amendments, in part, complement, and should be read in conjunction with, the regulations of the MSPB concerning appeals which include allegations of discrimination, found at Title 5 CFR Part 1201, Subpart D.

DATES: These interim regulations are effective upon publication and will remain effective until final regulations are issued. Written comments on the interim regulations must be received within 60 calendar days of publication. The Commission proposes to consider any comments received and, thereafter, to adopt final regulations.

ADDRESSES: Interested persons are invited to submit written comments regarding the interim regulations to Treva McCall, Executive Secretariat, Equal Employment Opportunity Commission, 2401 E Street, NW.,

Washington, D.C. 20506. Copies of the comments submitted by the public will be available for review at the Social Sciences Library, Room 2003, EEOC, 2401 E Street, NW., Washington, D.C. 20506 between the hours of 9:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT:
Gerald P. Tognetti, Chief, Hearings Program Management Branch, Office of Public Sector Programs, Room 4209, 2401 E Street, NW., Washington, D.C. 20506. (202) 634-7833.

SUPPLEMENTARY INFORMATION:
Commission is revising its regulations pursuant to its responsibilities for administration and enforcement of Sections 205 and 701 of the Civil Service Reform Act of 1978, 5 U.S.C. 7121 and 7702, Section 717 of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-16, Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 791 and 794a, Section 15 of the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. 633a, and Section 6(d) of the Fair Labor Standards Act of 1938, as amended, 29 U.S.C. 206(d).

These amendments should be distinguished from several amendments which the Commission will be proposing in the near future in a Notice of Proposed Rulemaking. These interim amendments are intended to correct deficiencies in the current regulations which the Commission does not believe should be delayed. The forthcoming Notice of Proposed Rulemaking will treat with other matters of importance, but of lesser urgency, with respect to appellate processing and duplication of effort. In addition, it will propose amendments to the pre-appellate process, with respect to grievances which raise allegations of discrimination, which complement the appellate amendments at §§ 1613.231 and 1613.233(b).

Pursuant to the Civil Service Reform Act of 1978, 5 U.S.C. § 7702, these amendments establish an administrative process for mixed cases. Mixed cases are matters related to certain personnel actions which are appealable to the MSPB and which raise allegations of discrimination based on race, color, religion, sex, national origin, handicap, age and/or reprisal. These amendments provide that mixed cases may be brought as a complaint before the respondent federal agency, or as an appeal before the MSPB, but not both. The regulations specify that mixed case complaints may be rejected or cancelled by the respondent agency when brought before it, if the aggrieved person has previously appealed the matter which forms the basis of the mixed case complaint to the MSPB. The regulations also require an election between the respondent federal agency EEO process and the MSPB process; specify the procedures to be followed upon election of the respondent federal agency EEO process; explain the administrative and civil action rights of the aggrieved; provide consolidation procedures when complaints are filed on proposals to take an action appealable to the MSPB and subsequent complaints and/or appeals are filed on agency decisions to take that action; and specify the time limits for processing mixed case complaints.

It should be noted that when the complainant has elected the respondent federal agency EEO complaint process, the mixed case complaint will be processed in a manner similar to other federal EEO complaints, except the hearing that may occur at the agency level in the processing of other complaints will not occur at that level in mixed case complaints but at the MSPB instead.

The regulations also contain a section on retroactivity which applies to all mixed case complaints arising on or after January 11, 1979 [the effective date of the Civil Service Reform Act of 1978 (CSRA)] and filed prior to the effective date of the regulations. Such a section is necessary in order to conform to the requirements of the statute, which, among other things, was clearly intended to eliminate duplicative complaint processing on and after January 11, 1979 and which clearly provided that any appeal from certain personnel actions, which also involved allegations of discrimination, was initially to be made to MSPB, with review authority *only* to be vested in EEOC. Without this section, such cases have been and would continue to be improperly processed, with improper advisement of appeal rights to EEOC, even though such appeal rights are precluded by statute. In addition, current regulations provide for 180 calendar day processing, with a right to file a civil action only, if that time limit is not met. The CSRA requires that mixed case complaints be processed in 120 calendar days, with an administrative appeal right the MSPB if that time limit is not met, in addition to a right to file a civil action. All of these differences became effective on January 11, 1979 and, as a consequence, a section on retroactivity is required.

In order to insure that complainant rights are adequately protected, while nevertheless complying with the requirements of the CSRA, the retroactivity amendments contain provisions which allow cancellation of a mixed case complaint filed during the retroactive period only where the complainant has already appealed the matter which forms the basis of the mixed case complaint to the MSPB and raised the allegations of discrimination in connection with the appeal. Such complainants retain their right to petition EEOC to review the discrimination allegations raised on appeal to the MSPB. With respect to those cases where the matter was appealed to the MSPB, but where the allegations of discrimination were not considered by the MSPB, the retroactivity amendments advise complainants that they may petition the MSPB to review their previous appellate decision, to now include the allegations of discrimination and that, thereafter, they may, as a matter of right, petition the EEOC to review the discrimination allegations, regardless of whether the MSPB chooses to review their previous appellate decision. Thus, such complainants will have received a hearing and will have retained their right to petition EEOC, in a manner similar to those complainants who file their complaints on or after the effective date of these regulations.

Further in this regard, the Commission notes that complainants and agencies have had no previous definitive guidance on how to process mixed case complaints and that, as a result, there has been much confusion where complainants have filed both an appeal with the MSPB and a complaint with agency, pursuant to the regular EEO complaint process. As a result of that confusion, some complainants who have raised the issue of discrimination before the MSPB on appeal have not thereafter actively pursued the matter, believing that it would be more fully addressed as part of the agency compliant process. As a consequence, the MSPB, in some instances, did not fully consider the discrimination allegations. In view of this history, the Commission believes it necessary to caution agencies that the retroactive cancellation authority provided at § 1613.404(a) should be invoked only where the agency is prepared to demonstrate that the MSPB fully considered all of the discrimination allegations contained in the mixed case complaint. In any instance where all of the discrimination allegations in the mixed case complaint were not fully considered by the MSPB on appeal, the agency must process the matter pursuant to § 1613.404(b), rather than pursuant to § 1613.404(a).

Additionally, these amendments eliminate the current regulations, found at 29 CFR 1613.282(b)(1), with respect to 15 calendar day reprisal charge processing. The current procedures are designed to circumvent the regular complaint procedures and provide a rapid charge process for complaints of reprisal discrimination. In exchange for this rapid charge process, the complainant waives all procedural due process safeguards provided by the regular complaint process, including the right to file a civil action in federal court. See *Porter* v. *Adams*, 639 F 2d. 273, (5th Cir. 1981). Except for a vaguely-worded provision which allows the Commission "to take whatever action is appropriate" when the time limit has been exceeded, there is no check on federal agencies which do not process the charge within 15 calendar days. It has been the Commission's experience that virtually no federal agency processes such charges within 15 calendar days. Since virtually every federal agency has indicated that the 15 calendar day time limit is unworkable, the Commission sees no benefit to be derived by providing appellate review (which this section was specifically created to circumvent) or other sanction authority to enforce an unworkable section of its regulations. Since complainants lose substantive due process rights when they elect the 15 calendar day process and since the Commission can only act to restore those due process rights by remanding the matter for regular complaint processing when federal agencies do not process the matter in 15 calendar days, and since the regulations otherwise clearly do not intend appellate review by the Commission of such matters, the Commission considers it to be in the public interest to eliminate the process.

These amendments also provide procedures for filing appeals from decisions made in the agency negotiated grievance procedure, where the negotiated grievance procedure provides that allegations of discrimination may be so raised. Such amendments are required, in order to conform to the provisions of 5 U.S.C. 7121, which provides that negotiated grievance procedures may allow allegations of discrimination to be raised therein and which provides for appeals from decisions reached on such grievances to the Commission, with respect to the allegations of employment discrimination.

These regulations have been coordinated with affected federal agencies, pursuant to Executive Order 12067, and have been reviewed by the Office of Management and Budget, pursuant to Executive Order 12291. These regulations have been determined not to be a major rule, as defined in that Order.

Pursuant to 5 U.S.C. 553(d)(3), the Commission finds that good cause exists for making these regulations effective in less than 30 days from publication, in order to eliminate costly and duplicative concurrent processing of complaints on, and appeals from, the same matters, especially since such concurrent processing may result in mutually contradictory conclusions, for which no regulatory resolution mechanism exists. Additionally, with respect to the expedited procedures for charges of reprisal, current regulations provide no right of appeal and no right to file a civil action. Charging parties seldom receive rapid charge processing under these procedures and federal agencies have severely criticized the regulation as confusing and unworkable. Further, with respect to the appellate amendments, the law (5 U.S.C. 7121) requires that the Commission entertain appeals, with respect to issues of discrimination, raised in connection with grievances, but current regulations contain no provisions for doing so. Therefore, the Commission finds good cause for also making these regulations effective in less than 30 days from publication.

Finally, the Commission realizes that issuance of these regulations on an interim basis is a departure from its normal rulemaking practice but, for the reasons stated above, finds there to be a compelling public interest for doing so. The interim regulations appear below.

List of Subjects in 29 CFR Part 1613

Administrative practice and procedure, Aged, Equal employment opportunity, Government employees, Handicapped, Sex discrimination.

By virtue of the authority vested in the Commission under Section 717 of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-16, Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 791 and 794a, Section 15 of the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. 633a, Section 6(d) of the Fair Labor Standards Act of 1938, as amended, 29 U.S.C. 206(d), Reorganization Plan No. 1 of 1978 (43 FR 19807) and Executive Order 12106 (44 FR 1053), the Equal Employment Opportunity Commission hereby publishes the following amendments to its regulations on Equal Employment in the Federal Government.

Signed at Washington, D.C., this 25th day of April 1983. For the Commission.
Clarence Thomas,
Chairman.

PART 1613—[AMENDED]

Accordingly, Chapter XIV, Part 1613 of title 29 of the Code of Federal Regulations is amended as follows:

1. Section 1613.231(a) is revised to read as follows: paragraph (b) is redesignated as paragraph (c); and a new paragraph (b) is added.

§ 1613.231 Entitlement.

(a) Except as provided by paragraph (c) of this section, a complainant may appeal to the Commission the decision of the head of the agency, or his/her designee: (1) To reject his/her complaint, or any portion thereof, for reasons covered by § 1613.215; or (2) To cancel his/her complaint because of the complainant's failure to prosecute the complaint; or (3) On the merits of the complaint, under §§ 1613.217(c) or 1613.221, or on the award of attorney's fees or costs.

(b) Except as provided by paragraph (c) of this section, a complainant may appeal to the Commission on issues of employment discrimination raised in a negotiated grievance procedure, where the agency's negotiated labor-management agreement permits such issues to be raised therein. A complainant may appeal the decision: (1) Of the agency head or his/her designee on the grievance; (2) of the arbitrator on the grievance; or (3) of the Federal Labor Relations Authority (FLRA) on exceptions to the arbitrator's award. A complainant may not appeal under this subsection, however, when the matter initially raised in the negotiated grievance procedure is still ongoing in that process, is in arbitration or is before the FLRA. Any appeal prematurely filed in such circumstances shall be dismissed without prejudice.

(c) A complainant may not appeal to the Commission under paragraph (a) of this section, when the issue of discrimination giving rise to the complaint is being considered or has been considered, in connection with any other appeal by the complainant.

2. Section 1613.233 is amended to revise paragaph (a); to redesignate the previous paragraph (b) as paragraph (c) and to add a new paragraph (b) to read as follows:

§ 1613.233 Time limits.

(a) Except as provided in paragraph (c) of this section, a complainant may file a notice of appeal at any time up to 20 calendar days after receipt of the

VOL

UMI

agency's notice of final decision on his or her complaint. An appeal shall be deemed filed on the date it is postmarked, or, in the absence of a postmark, on the date it is received by the Commission. Any statement or brief in support of the appeal must be submitted to the Commission and to the defendant agency within 30 calendar days of filing the notice of appeal. For purposes of this Part, the decision of an agency shall be final only when the agency makes a determination on all of the issues in the complaint, including whether or not to award attorney's fees or costs. If a decision to award attorney's fees or costs is made, the decision will not be final until the procedure is followed for determining the amount of the award as set forth in § 1613.271(c).

(b) When issues of discrimination have been raised in a negotiated grievance process, a complainant may file a Notice of Appeal of such issues up to 20 days after: (1) receipt of an agency decision on the grievance and expiration of the time during which the union and the agency may move the matter to the next state of the grievance process; (2) receipt of an arbitrator's award; or (3) receipt of the decision of the FLRA on exceptions to the arbitrator's award.

* * * * *

3. Section 1613.262 is amended by revising paragraph (a), removing paragraph (b)(1), redesignating paragraph (b)(2) as paragraph (b) and revising it to read as follows:

§ 1613.262 Review of allegations of reprisal.

(a) A complainant, his/her representative, or a witness who alleges restraint, interference, coercion, discrimination or reprisal for having filed a complaint or for having participated in the processing of a complaint under this subpart, may, if an employee or applicant, have the allegation reviewed as an individual complaint of discrimination subject to §§ 1613.211 through 1613.283.

(b) When a complainant alleges that (s)he has been subjected to restraint, interference, coercion, discrimination or reprisal in connection with the filing of a prior complaint of discrimination and that prior complaint from which the allegation derives is in process at the agency at the time the allegation is made, the complainant may request the agency to consolidate the allegation with the prior complaint. If the prior complaint is at the hearing stage of the complaint process under § 1613.216, the complainant may request the Complaints Examiner to consolidate the allegation with the complaint at the hearing. The agency or the Complaints Examiner may grant the request, *Provided*, that the request is made within 30 calendar days of occurrence of the act which forms the basis of the allegation, or within 30 calendar days of its effective date, if a personnel action. The agency or the Complaints Examiner may also deny the request, at its/his/her discretion, and require that the allegation be processed in accordance with § 1613.262(a).

Part 1613, Subpart D is amended to add the following section:

Subpart D—Processing Mixed Case Complaints

Sec.
1613.401 Purpose, scope, and applicability.
1613.402 Definitions.
1613.403 Election.
1613.404 Retroactivity.
1613.405 Procedures for agency processing of mixed case complaints.
1613.406 Processing of complaints on proposals.
1613.407 Timely processing.

* * * * *

Subpart D—Processing Mixed Case Complaints

§ 1613.401 Purpose, scope and applicability.

(a) *Purpose.* This subpart sets forth the regulations under which the Equal Employment Opportunity Commission will carry out its responsibilies for the administration and enforcement of Section 205 of the Civil Service Reform Act of 1978, 5 U.S.C. 7702, with respect to matters of alleged employment discrimination prohibited by Section 717 of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e–16, Section 501 of the Rehabilitation Act of 1973, as amended, 29 U.S.C. 794a, Section 15 of the Age Discrimination in Employment Act of 1967, as amended, 29 U.S.C. 633a, and Section 6(d) of the Fair Labor Standards Act of 1938, as amended, 29 U.S.C. 206(d).

(b) *Scope.* This subpart shall govern the treatment of complaints in which allegations of discrimination are raised, in connection with an action appealable to the Merit Systems Protection Board (MSPB), provided that the action which forms the basis of the complaint was initiated on or after January 11, 1979 (the effective date of the Civil Service Reform Act). This subpart governs the procedures applicable: (1) When a complainant elects to bring the matter which forms the basis of the complaint before his/her agency, by filing a complaint of discrimination, pursuant to this part; (2) when an appealable action, pending before the MSPB, is remanded for agency processing, pursuant to 5 CFR 1201.155(c); and (3) when a petition to review the decision of the MSPB on the issues of discrimination is filed with the Commission, pursuant to 5 U.S.C. 7702(b).

(c) *Applicability.* This subpart applies to all persons who have a right of appeal to the MSPB.

§ 1613.402 Definitions.

(a) *Mixed Case Complaint.* A mixed case complaint is: (1) A complaint of employment discrimination filed with a federal agency, based on race, color, religion, sex, national origin, handicap, age, and/or reprisal, related to, or stemming from an action taken by an agency against the complainant, which action may be appealed to the MSPB, pursuant to any law, rule or regulation; or (2) a complaint of sex-based wage discrimination, filed with the Commission, related to or stemming from an action taken by an agency against a complainant, which action may be appealed to the MSPB, pursuant to any law, rule or regulation. The complaint may contain only an allegation of employment discrimination or it may contain additional allegations which the MSPB has jurisdiction to address.

(b) *Mixed Case Appeals.* A mixed case appeal is an appeal filed with the MSPB, which jurisdiction to entertain, and which alleges that the agency action which forms the basis for the appeal was effected, in whole or in part, because of discrimination on the basis of race, color, religion, sex, national origin, handicap, age and/or reprisal, or alleges that such appealable action resulted in sex-based wage discrimination.

(c) *Complaint.* A complaint is a formal complaint of discrimination, filed with the appropriate person designated to receive complaints at the agency, pursuant to § 1613.214 of subpart B of this Part.

(d) *Proposal.* A proposal, as used in this subpart, means any document issued by an agency to an employee, pursuant to any requirements contained in regulations issued by the Office of Personnel Management (OPM), which proposes to take an action against that employee which, if effected, could be appealed by that employee to the MSPB.

(e) *Handicap Definitions.* The definitions set forth at § 1613.702 of subpart G of this Part are hereby incorporated by reference into this subpart and are applicable to any mixed case complaint which contains issues of handicap discrimination.

§ 1613.403 Election.

An aggrieved person may initially file a mixed case complaint with an agency, pursuant to this part, or (s)he may file a mixed case appeal directly with the MSPB, pursuant to 5 CFR 1201.151, but not both. An agency shall inform every employee who is the subject of an action which is appealable to the MSPB and who has raised the issue of discrimination either orally or in writing, during the processing of the action, of his/her right to file a mixed case complaint, if the employee believes the action to be based, in whole or in part, on discrimination, or to file a mixed case appeal with the MSPB. The person shall be advised that (s)he may not initially file both and that whichever is filed first (the mixed case complaint or the appeal) shall be considered an election to proceed in that forum. For purposes of this subsection, filing of a mixed case complaint occurs when the complaint is filed with an appropriate agency official, in accordance with § 1613.214(a)(3) of subpart B of this Part.

§ 1613.404 Retroactivity.

The following shall apply, with respect to mixed case complaints filed prior to the effective date of these regulations, where any issues in such mixed case complaints were also appealed to the MSPB:

(a) *Discrimination Allegations Considered.* If the MSPB considered, or is considering, the allegations of discrimination raised in the mixed case complaint, in connection with any appeal, the mixed case complaint before the agency shall be cancelled, pursuant to § 1613.405(a).

(b) *Discrimination Allegations Not Considered.* If the MSPB was not presented with or did not consider the allegations of discrimination raised in the mixed case complaint in connection with any appeal, the agency shall process such mixed case complaint in accordance with § 1613.405(a). The final agency decision on such complaint shall advise the complainant of his/her right to file a civil action, pursuant to § 1613.417, and that (s)he may petition the MSPB to review his/her previous appellate decision, to include the allegations of discrimination raised with the agency which were not previously decided on appeal by the MSPB. The decision shall further advise the complainant that, whether or not the MSPB chooses to review its previous decision, the complainant may thereafter petition the EEOC to review the matter, pursuant to § 1613.414, provided that the complainant has fullfilled the procedural prerequisite of first petitioning the MSPB.

§ 1613.405 Procedures for agency processing of mixed case complaints.

(a) *Rejections.* Whenever an agency is presented with a mixed case complaint concerning an action that has previously been appealed by the complainant to the MSPB, the agency shall reject the complaint (in writing), citing this subsection as the authority therefor, regardless of whether the allegations of discrimination raised in the mixed case complaint were raised in the previous appeal to the MSPB. The agency shall advise the aggrieved person: no part of the decision rejecting such a complaint, that (s)he must bring the allegations of discrimination contained in the rejected complaint to the attention of the MSPB, pursuant to 5 CFR 1201.155.

(b) *Cancellation.* Whenever the agency learns that a mixed case complaint, which has been filed with and accepted by the agency, contains issues which also form the basis of an appeal which has been filed with the MSPB, the agency shall determine which was filed first (i.e., the mixed case complaint or the appeal). If the appeal to the MSPB was filed first, the agency shall cancel (in writing) that portion of the mixed case complaint related to the action appealed to the MSPB and advise the complainant, as part of the decision which cancels the complaint (in whole or in part), that (s)he must bring the allegations of discrimination to the attention of the MSPB, pursuant to 5 CFR 1201.155. If the mixed case complaint was filed first, the agency shall so advise the MSPB and request that the MSPB dismiss the appeal without prejudice and, thereafter, the agency shall process the complaint, pursuant to § 1613.405(c), and issue an agency decision within 120 calendar days. An agency may also cancel a mixed case complaint when it learns that the complainant has chosen to appeal the matter to the MSPB upon expiration of 120 calendar days from the date that the mixed case complaint was filed with the agency.

(c) *Effect of Rejection or Cancellation.* An agency decision to reject or cancel a mixed case complaint pursuant to §§ 1613.405(a) or (b) is not subject to appeal to the EEOC, except where §§ 1613.405(a) or (b) has been misapplied to a nonmixed case matter (in which case an appeal may be filed pursuant to § 1613.231 of Subpart B).

(d) *MSPB Remands.* The MSPB may remand allegations of discrimination to an agency or, in Equal Pay Act matters, to the EEOC, pursuant to 5 CFR 1201.155(a) or (c). In such cases, the agency or the EEOC shall investigate those allegations, as required by the MSPB or by applicable EEOC regulation.

(e) *Procedures.* When a complainant, pursuant to § 1613.403, elects to proceed initially through the agency, rather than with the MSPB, the procedures set forth in §§ 1613.212 through 1613.221(d) of subpart B of this Part shall govern the processing of the mixed case complaint, with the following exceptions: (1) There shall be no hearing, as provided in § 1613.216 and as referenced in §§ 1613.217(b)(2) and 1613.221(b)(2) and (3); (2) At the time that an agency advises a complainant of the acceptance of a mixed case complaint, pursuant to § 1613.214, the agency shall also advise the complainant of the following: (i) The complaint shall be processed in accordance with this subpart; (ii) if no agency decision is issued within 120 calendar days of the date of filing of the mixed case complaint, the complainant may appeal the matter to the MSPB at any time thereafter, up to, but not later than, one year from the filing of the complaint, or may file a civil action as specified at § 1613.417(g); and (iii) if the complainant is dissatisfied with the agency's decision on the mixed case complaint, (s)he may appeal the matter to the MSPB (not EEOC), within 20 calendar days of receipt of the agency's decision; (3) At the time that an agency issues to the complainant its notice of proposed disposition, pursuant to § 1613.217(b), the agency shall advise the complainant that the complainant: (i) May request a decision (pursuant to § 1613.221 of subpart B of this Part) from the agency, without a hearing and, thereafter, appeal that decision to the MSPB (and, in connection therewith, request a hearing), within 20 calendar days of receipt of that agency decision, or (ii) if no decision is received within 120 calendar days of filing the mixed case complaint, may appeal the matter directly to the MSPB (not EEOC) at any time after expiration of 120 calendar days, up to, but no later than, one year after filing the mixed case complaint and of his/her right to file a civil action, as described at § 1613.417(g). (4) At the time that the agency issues its decision on a mixed case complaint (pursuant to § 1613.221) the agency shall advise the complainant of his/her right to appeal the matter to the MSPB (not EEOC), within 20 calendar days of receipt, and of his/her right to file a civil action, as described at § 1613.417(g).

§ 1613.406 Processing of complaints on proposals.

(a) *Where the Agency Decision is Appealable to the MSPB.* [1] Any complaint which is filed, pursuant to this Part, in connection with an agency proposal to take an action that is

VOL
48
ISS
85
MY
2
1983
UMI

appealable to the MSPB, shall be consolidated, pursuant to § 1613.251 of subpart B of this Part, with any subsequent mixed case complaint filed in connection with that agency decision to take such an action, either as proposed or as modified during the processing of the proposal, and shall be processed in accordance with this subpart. (2) If, following a complaint on a proposal, the complainant subsequently files an appeal with the MSPB on the subsequent agency decision resulting from that proposal, the agency shall cancel the complaint on the proposal. The complainant shall be advised by the agency that any allegations of discrimination contained in that complaint should be raised with the MSPB, in connection with the pending appeal. (3) If a complaint is filed on a proposal, and no appeal is filed with the MSPB on the subsequent appealable agency decision resulting from that proposal, and no complaint is filed with the agency on that appealable decision, the complaint on the proposal shall be deemed to include the final decision as an issue (as of the effective date of such final decision) and shall be processed as a mixed case complaint, in accordance with § 1613.405.

(b) *Where the Agency Decision is Not Appealable to the MSPB.* Where a proposal does not result in an agency decision which is appealable to the MSPB (e.g., a proposal to remove which is modified by the agency decision to a 5 day suspension), such a complaint shall be processed pursuant to subparts B, E, F and/or G of this Part, as appropriate.

§ 1613.407 Timely processing.

A mixed case complaint shall be processed in a timely manner by the agency, so that the agency's decision (pursuant to § 1613.221 of subpart B of this Part) on such a complaint is issued within 120 calendar days from the date the complaint was filed. When a complaint concerning a proposal to take an action that is appealable to the MSPB is consolidated, pursuant to § 1613.406, with a mixed case complaint concerning an agency decision to take the action as proposed or as modified, and that agency decision is appealable to the MSPB, the 120 calendar day time frame for processing the consolidated mixed case complaint begins to run as of the date the complaint concerning that agency decision is filed. For the purposes of § 1613.406(a)(3), the 120 calendar day time frame for processing the complaint shall begin to run as of the effective date of the final decision.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2616

Notice of Intent To Terminate for Non-Multiemployer Pension Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule; correction.

SUMMARY: On January 27, 1983, the Pension Benefit Guaranty Corporation published in the Federal Register at 48 FR 3722, FR Doc. 83-2103, a final rule prescribing a new method of filing the statutory Notice of Intent to Terminate for non-multiemployer pension plans covered under the plan termination insurance program of Title IV of the Employee Retirement Income Security Act of 1974. This document is needed to correct typographical errors in that final rule.

FOR FURTHER INFORMATION CONTACT: Renae R. Hubbard, Special Counsel, Office of the General Counsel, Code 210, 2020 K Street, NW., Washington, D.C. 20006, 202-254-6476. (This is not a toll-free number.)

The following corrections are made in FR Doc. 83-2103, appearing at 48 FR 3722 (January 27, 1983):

1. On page 3722, column one, line 16 of the Summary, "nonmultiemployer" is corrected to read "non-multiemployer."

2. On page 3722, column two, line 7 of the last paragraph, "Pub. L. No. 96-264" is corrected to read "Pub. L. No. 96-364."

3. On page 3723, column one, lines 9 and 10 of the fifth full paragraph, "in anticipation or termination" is corrected to read "in anticipation of termination."

4. On page 3723, column two, line 7, "a" is added between "and" and "plan administrator."

5. On page 3723, column three, line 4, a hyphen is added between "120" and "day."

6. On page 3723, column three, lines 31 and 32, "the final rule" is corrected to read "this final rule."

7. On page 3723, column three, line 36, the comma after "Code" is deleted.

8. On page 3724, column one, line 3 in the first full paragraph, "From" is corrected to read "from."

9. On page 3724, column one, lines 3 and 14 of the second full paragraph, a hyphen is added between "12" and "month."

10. On page 3724, column three, line 18 of the third full paragraph, a hyphen is added between "270" and "day."

11. On page 3726, column two, line 9 of § 2616.5(c), a hyphen is added between "270" and "day."

Authority: 29 U.S.C. 1302, 1341.

Issued this 27th day of April, 1983.

Henry Rose,

Acting Executive Director, Pension Benefit Guaranty Corporation.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 904

Approval of the State of Arkansas Abandoned Mine Land Reclamation Plan Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: On July 7, 1982, the State of Arkansas submitted to OSM its proposed Abandoned Mine Land Reclamation Plan (Plan) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The purpose of this submission is to demonstrate the State's intent and capability to assume responsibility for administering and conducting the Abandoned Mine Land Reclamation Program established by Title IV of SMCRA and regulations adopted by OSM (30 CFR Chapter VII, Subchapter R, 47 FR 28574-28604, June 30, 1982). After opportunity for public comment and review of the plan submission, the Assistant Secretary for Energy and Minerals of the Department of the Interior has determined that the Arkansas Reclamation Plan meets the requirements of SMCRA and the Secretary's regulations. Accordingly, the Assistant Secretary has approved the Arkansas Plan.

EFFECTIVE DATE: The rule is effective May 2, 1983.

ADDRESSES: Copies of the full text of the Arkansas Plan are available for review during regular business hours at the following locations:

State of Arkansas Department of Pollution Control and Ecology, 8001 National Drive, Little Rock, Arkansas 72209

Office of Surface Mining Reclamation and Enforcement, Room 3432, 336 W. 4th Street, Tulsa, Oklahoma 74103

Office of Surface Mining Reclamation and Enforcement, Administrative Record, Room 5315, 1100 L Street, NW., Washington, D.C. 20240

FOR FURTHER INFORMATION CONTACT: James Fary, Division of Abandoned Mine Land Reclamation, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Telephone: (202) 343-7921

SUPPLEMENTARY INFORMATION: General Background of the Abandoned Mine Land Program Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95-87, 30 U.S.C. 1201 *et seq.*, establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977 and for which there is no continuing reclamation responsibility under State or Federal law.

Each State, having within its borders coal mined lands eligible for reclamation under Title IV of SMCRA, may submit to the Department a State reclamation plan demonstrating its capability for administering an abandoned mine reclamation program. Title IV provides that the Department may approve the plan once the State has an approved Regulatory program under Title V of SMCRA. If the Secretary determines that a State has developed and submitted a program for reclamation and has the necessary State legislation to implement the provisions of Title IV, the Secretary shall grant the State exclusive responsibility and authority to implement the provisions of the approved plan. Section 405 of SMCRA (30 U.S.C. 1235) contains the requirements for State reclamation plans.

The Secretary has adopted regulations that specify the content requirements of a State reclamation plan and the criteria for plan approval (30 CFR Part 884, 47 FR 28600-28601, June 30, 1982). Under these regulations, the Director of the Office of Surface Mining is required to review the plan and solicit and consider comments of other Federal agencies and the public. If the State plan is disapproved, the State may resubmit a revised reclamation plan at any time.

Upon approval of the State reclamation plan, the State may submit to the Office on an annual basis an application for funds to be expended in that State on specific reclamation projects which are necessary to implement the State reclamation plan as approved. Such annual requests are reviewed and approved by OSM in compliance with the requirements of 30 CFR Part 888.

To codify information applicable to individual States under SMCRA, including decisions on State reclamation plans, OSM has established a new Subchapter T of 30 CFR Chapter VII. Subchapter T consists of parts 900 through 953.

Provisions relating to Arkansas are found in 30 CFR Part 904.

Background on the Arkansas Reclamation Plan Submission

A public meeting was held on the Arkansas Plan on June 16, 1982 in Fort Smith, Arkansas. On July 7, 1982, the State of Arkansas submitted its proposed Reclamation Plan to OSM. OSM published a notice of proposed rulemaking and requested public comment on July 23, 1982 (47 FR 30 267).

On October 6, 1982 and on March 22, 1983 representatives of the Arkansas Department of Pollution Control and Ecology and OSM met to discuss amendments and modifications to the proposed Plan. On February 11, 1983 and on April 5, 1983 the Arkansas Department of Pollution Control and Ecology submitted revised pages to the Arkansas Reclamation Plan. These pages contained several amendments and modifications to the original Plan. The OSM has determined that these additions and revisions were insignificant in nature and, accordingly, required no further public comment.

The necessary changes have been incorporated into the Plan. All of the documents mentioned above are available for public inspection at the offices of OSM and at the Arkansas Department of Pollution Control and Ecology listed above under "Addresses."

On April 11, 1983 OSM's Field Office Director and on April 12, 1983, the Assistant Director for Program Operations and Inspection recommended to the Director that the Assistant Secretary approve the Arkansas Reclamation Plan.

The administrative record on the Arkansas Plan is available for review during regular business hours at the Office of Surface Mining Reclamation and Enforcement, Room 3432, 336 W. 4th Street, Tulsa, Oklahoma 74103.

Assistant Secretary's Findings

1. In accordance with Section 405 of SMCRA, the Assistant Secretary finds that Arkansas has submitted a Plan for reclamation of abandoned mine lands and has determined, pursuant to 30 CFR 884.14, that:

(a) The public has been given adequate notice and opportunity to comment and the record does not reflect any unresolved controversies.

(b) The views of other Federal agencies have been solicited and considered.

(c) The State has the legal authority, policies, and administrative structure to implement the Plan.

(d) The Plan meets all requirements of the OSM, AML Program Provisions except that Arkansas does not have authority to conduct noncoal reclamation activities. Therefore, the OSM will not approve of funds for projects concerned with noncoal reclamation activities until such time as Arkansas demonstrates that it has the authority under its State law to perform noncoal reclamation activities.

(e) The Plan meets OSM's "Guidelines for Submission of Amendment to State Reclamation Plan to Conduct Emergency Reclamation" and therefore Arkansas has the authority to conduct an emergency reclamation program.

(f) The State has an approved Surface Mining Regulatory Program under Title V of the SMCRA.

(g) The Plan is in compliance with all applicable State and Federal laws and regulations.

2. The Assistant Secretary has solicited and considered the views of other Federal agencies having an interest in the Plan as required by 30 CFR 884.14. These agencies include: the U.S. Forest Service (USFS), U.S. Fish and Wildlife Service (FWS), the U.S. Bureau of Mines (USBOM), the U.S. Geological Survey (USGS), the U.S. Environmental Protection Agency (EPA), the U.S. Army Corps of Engineers (COE), and the Soil Conservation Service (SCS).

Disposition of Comments

The following comments received on the Arkansas Abandoned Mine Land Reclamation Plan during the public comment period were considered in the Assistant Secretary's evaluation of the Arkansas Plan as indicated.

1. The SCS and the USFS asked how does the landowner become eligible for funds or be in compliance with the regulations? OSM's answer is that State AML/R programs approved under Section 405 of the SMCRA are not

VOL 48 ISS 85 MAY 2 1983

landowner participation programs like the Rural Abandoned Mine Program of the SCS. These State AMLR programs give the States the primary authority to select reclamation projects under their approved Plans and to enter and reclaim abandoned mine lands and water. Funds are not given to landowners nor are landowners bound by 30 CFR Subchapter R or the approved State AMLR programs.

2. The SCS and USFS asked what does an individual reclamation project plan require? OSM's answer is that there are no individual reclamation project plan requirements under an approved State program. Projects must meet the requirements of the National Environmental Policy Act of 1969, as amended, Pub. L. 91–190, 42 U.S.C. 4321 *et seq.* Feasibility and design studies are done as determined by the State. Reclamation work is either done by State agencies or contracted for through State procurement procedures.

3. The SCS and the USFS asked when is an individual mined area considered restored? OSM's answer is that an individual abandoned mined area is considered restored when the site no longer poses a threat to public health, safety, general welfare, or property from the adverse effects of mining practices.

4. The SCS and the USFS asked how does the landowner get his property on or off the State abandoned mine reclamation property inventory? OSM's answer is that Arkansas landowners who want to either be included or excluded from the State's abandoned mine land inventory should contact the Arkansas Department of Pollution Control and Ecology at the address listed above under the "addresses" section.

5. The SCS and USFS asked how will reclamation research and demonstration projects be identifed? OSM's answer is that the State will determine research and demonstration projects under the priorities established by Section 403 of SMCRA and the ranking and selection procedures contained on pp. C.2.1–C.2.3 of the Arkansas Plan.

6. The SCS and the USFS commented that they disagreed with the statement on p. C.3.2 of the Plan that reclamation on Federal lands may "take a back seat" to reclamation on State and private lands. OSM's response is that Arkansas has agreed to change its discussion on "Federal Coal Funds" to indicate that projects will be selected according to their priority as determined by the Plan's selection and ranking procedures and without regard to the ownership of the land on which the project occurs.

7. The SCS and USFS submitted a list of minor non-substantive factual inaccuracies contained in the Plan's data base. Arkansas has agreed to include these corrections in an addendum to the Plan and will incorporate them into the Plan when it is revised.

Additional Findings

The Office of Surface Mining has examined this rulemaking under Section 1(b) of Executive Order No. 12291 (February 17, 1981), and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, and the Office of Surface Mining has determined that the rule will not have a significant economic effect on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

The Assistant Secretary has determfned that the Arkansas Abandoned Mine Land Reclamation Plan will not have a significant effect on the quality of the human environment because the decision relates only to policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of Interior Manual (DM) 516.2.2(A)(1), the Assistant Secretary's decision on the Arkansas Plan is categorically excluded from the National Environmental Policy Act requirements. As a result, no environmental assessment (EA) or environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Also, an EA or an EIS will be prepared for the approval of grants for the abandoned mine land reclamation projects under 30 CFR Part 886.

The good cause for making this rule effective upon date of publication is: (1) The Office of Surface Mining wants to minimize the time between the approval of Title V regulatory programs and Title IV State reclamation program plans; and (2) grants are pending approval of the Title IV plan and OSM wishes to expedite grant assistance to States to initiate needed reclamation work as required by the Act.

List of Subjects in 30 CFR Part 904

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Therefore, Part 904 is amended by adding § 904.20 to read as follows:

PART 904—ARKANSAS

§ 904.20 Approval of Arkansas Abandoned Mine Land Reclamation Plan.

The Arkansas Reclamation Plan, as submitted on July 7, 1982, is approved.

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD13 83–06]

Special Local Regulations; Seattle Opening Day Yacht Parade and Crew Race

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the areas of Union Bay, Portage Bay and Lake Washington. This event will be held on May 7, 1983 from 0800 to 1500. The regulations are needed to provide for the safety of life on navigable waters during the event. General navigation in the area will be restricted for the safety of the spectators and participants.

EFFECTIVE DATES: These regulations become effective on May 7, 1983 at 0600 and terminate on May 7, 1983 at 1500 (3:00 p.m.).

FOR FURTHER INFORMATION CONTACT: ENS Scott M. POLLOCK, Coast Guard Group Seattle Operations, (206) 442–1874.

SUPPLEMENTARY INFORMATION: On March 10, 1983 the Coast Guard published a Notice of Proposed Rulemaking in the **Federal Register** (48 FR 10080) for these regulations. Interested persons were requested to submit comments and no comments were received. An erroneous citation of the amended section of the Code of Federal Regulations was made in the Notice of Proposed Rulemaking. The proper citation is included here. Several other editorial changes are incorporated for clarity. These regulations are being made effective in less than 30 days from the date of publication to allow ample time for public comment.

Drafting Information: The drafters of this notice are ENS Scott M. POLLOCK, USCG, Project Officer, USCG Group Seattle, Operations Division, and LT James R. WOEPPEL, USCG, Project Attorney, Thirteenth Coast Guard District Legal Office.

Economic Assessment and Certification: This regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since no major shipping industry or trade will be interfered with. Based on this assessment it is certified in accordance with Section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation will not have a significant impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—[AMENDED]

Final Regulation

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding a temporary section.

§ 100.35–1307 Lake Washington/Portage Bay/Union Bay/Opening Day Crew Race and Yacht Parade.

(a) *Event.* Lake Washington/Portage Bay/Union Bay/Opening Day Crew Race and Yacht Parade.

(b) *Regulated Area.* (1) The waters of Portage Bay Southeast of a line running from the Western corner of the pier (Showboat) 70 yards South of 47°39′N, 122°18′40″W, 425 yards Southwest across Portage Bay to the Northwest corner of the "L" shaped moorage (at the foot of East Shelby St.) at 47°38′52″N, 122°18′52″W.

(2) All waters of Portage Cut (also known as Montlake Cut) to Union Bay Channel Buoy 27 and Union Bay Channel Buoy 28.

(3) All waters between an East and West line connecting Union Bay Channel Buoy 27, Union Bay Channel Buoy 29, Union Bay Channel Buoy 31, and Webster Point Light 33 and an East and West line connecting Union Bay Channel Buoy 28, Union Bay Channel Buoy 30, and a point 470 yards East of Union Bay Channel Buoy 30 and 80 yards South of Webster Point Light 33.

(4) The waters between the judging and reviewing vessels and the Southern Edge of the channel described above. This area is generally the area South of Union Bay Channel Buoy 28 and North of Foster Island. The judging and reviewing vessels will be identified by appropriate signs showing over their sides.

(c) *Special Local Regulation.* (1) This event will take place on May 7, 1983 between the hours of 0800 P.d.s.t and 1500 P.d.s.t.

(2) The patrol of the described areas will be under the direction of a designated Coast Guard Patrol Commander who is empowered to forbid and control movement of vessels on the parade course and in the adjoining water areas immediately prior to, during and after the parade for such time as he finds it necessary for the safe and orderly conduct of the program. Portage Cut will be closed to all traffic except crew shells and vessels in the parade from 1030 P.d.s.t. until the termination of the yacht parade.

(3) All sailing vessels in the restricted zone participating in the parade shall use propelling machinery for maneuvering. Spinnakers may be used, in addition to propelling machinery, to the extent that control of the vessel is not impaired.

(4) Vessels generally may not navigate or anchor in the regulated area from 0800 P.d.s.t. until termination of the yacht parade.

(5) A succession of sharp, short signals by whistle or horn from vessels patrolling the areas under the direction of the U.S. Coast Guard Patrol Commander shall serve as a signal to stop. Vessels signalled shall stop and shall comply with the orders of the Patrol Commander; failure to do so may result in expulsion from the area, citation for failure to comply, or both.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46(b); and 33 CFR 100.35)

Dated: April 22, 1983.

R. J. Copin,

Acting Commander, 13th Coast Guard District, 915 Second Avenue, Seattle, WA 98174.

Drawbridge Operation Regulations; Mitchell River, Chatham, Massachusetts

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Town of Chatham the Coast Guard is changing the regulations governing the operation of Mitchell River drawspan to permit advance notice to be required for an opening of the drawspan. The existing regulations require that the draw be opened on call. The change will provide for the reasonable needs of navigation.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, Boston, MA, 02114 (617–223–0645).

SUPPLEMENTARY INFORMATION: On 30 December 1982 the Coast Guard publjshed the proposed rule in the **Federal Register** (47 FR 58306). The First Coast Guard District published the proposal in a Public Notice on 3 December 1982 and as an item in the Local Notice to Mariners on 7 December 1982. Interested persons were given until 14 February 1983 to submit comments.

Drafting Information: The principal persons involved in drafting this proposal are: William J. Naulty, Chief Bridge Branch, First Coast Guard District, and Lieutenant Susan M. Krupanski, Project Attorney, Assistant Legal Officer, First Coast Guard District.

Dicsussion of the Proposed Regulation

Three replies to the Public Notices were received. One reply indicated approval of the proposed regulations. The others suggested amendments to the proposal. The first of these requested a

VOL
48
ISS
85
MAY
2
1983
UMI

provision for bridge openings, on one hour advance notice, following official broadcasts of storm warnings. This request is considered reasonable. Stage Harbor provides a safe anchorage during storms. The capacity of the anchorage could be increased if vessels had access to Mitchell River anchorage during storm periods. The other letter requested a change in the proposed length of advance notices. Specifically, the one hour notice would be reduced to one half hour and the 24 hour advance notice would be reduced to 12 hours. The letter states that a one hour notice is unnecessarily long as there is no place for a vessel to stop while waiting for a bridge to open and that a 24 hour notice could not be based on weather conditions for the following day. The purpose of an advance notice is to assure that the drawspan will open at the required time. If the proper signal is given, the approach of a vessel can be controlled so that it arrives at the bridge when the draw is open. This is true no matter how much advance notice is given. A compelling reason for the need for a one half hour advance notice has not been presented. Many of the vessels on Mitchell River are small recreational craft whose use is determined quite often by weather conditions. In the Chatham area it is sometimes very difficult to predict weather a day in advance. A 24 hour advance notice requirement would force a mariner to plan a trip without regard for the weather. A 12 hour advance notice will permit a trip plan to be based on more reliable data.

These final regulations have been reviewed under provisions of Executive Order 12291 and have been determined not to be a major rule. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). As explained above, an economic evaluation has not been conducted. In accordance with section 605(b) of the Regulatory Flexibility Act (94 Stat. 1167), it is also certified that these rules will not have significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

PART 117—[AMENDED]

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33 of the Code of Federal Regulations by adding § 117.75b to read as follows:

§ 117.75b Mitchell River, Chatham, Massachusetts.

The draw will be opened on signal provided that:

(a) From 1 May through 31 October, between 8 a.m. and 4 p.m., a one-hour advance notice is given and from 4 p.m. to 8 a.m. a 12 hour notice is given.

(b) From 1 November through 30 April, a 24 hour advance notice is given.

(c) Advance notice is given to the duty officer at the Chatham Police Department Headquarters.

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5); 33 CFR 1.05-1(g)(3))

Dated: April 15, 1983.

C. E. Robbins,

Rear Admiral, U.S. Coast Guard, Acting District Commander, First Coast Guard District.

[FR Doc. 83-11569 Filed 4-29-83; 8:45 am]

BILLING CODE 4910-14-M

VETERANS ADMINISTRATION

38 CFR Part 17

Treatment of Veterans in Noncontiguous States, Territories and Possessions

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration is amending its medical regulations (38 CFR Part 17) to extend the authority for treating veterans at VA expense in non-VA facilities outside of the United States as authorized by Public Law 97-251, "Veterans' Administration Health-Care Programs Improvement and Extension Act of 1982". This amendment will permit continuation of a benefit already available to eligible veterans.

DATE: These amendments are effective April 15, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph F. Fleckenstein, Chief, Policies and Procedures Division (136F), Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-3785.

SUPPLEMENTARY INFORMATION: Public Law 97-251 extended from September 30, 1982, to September 30, 1983, the authority for treating veterans in Puerto Rico, the Virgin Islands and other territories and possessions through contract services in non-VA facilities. In addition to amending the regulations to reflect the date change, clarification is provided on the determination of the inpatient load and amount of outpatient services to be provided to veterans in noncontiguous States and certain territories and possessions.

The Administrator has determined that this amendment to VA regulations is considered non-major under the criteria of Executive Order 12291, Federal Regulation. It will not have an annual effect on the economy of $100 million or more; it will not result in major increases in costs for consumers, individual industries, Federal, State or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The VA finds that advance publication for public notice and comment is unnecessary and not required. These changes are primarily date changes reflecting a one year statutory extension to an already existing benefit. The regulation changes will not have independent effect. Therefore, the changes come within exceptions to the general VA policy of prior publication for public notice and comment, contained in 38 CFR 1.12. Accordingly, the changes are now published as final regulations.

Since a proposed rule will not be published, these amendments do not come within the term "rule" as defined in the Regulatory Flexibility Act, 5 U.S.C 601(2). Therefore, these changes are not subject to that act. In any case, the changes will not have a significant economic impact on a substantial number of small entities because they concern the entitlement of individual veterans and their beneficiaries, and do not have independent effect.

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants programs-health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans.

(Catalog of Federal Domestic Assistance Numbers: 64.009 and 64.011)

Approved: April 15, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 17—[AMENDED]

38 CFR Part 17, MEDICAL, is amended by revising § 17.50b(e) and (f) to read as follows:

§ 17.50b Use of public or private hospitals for veterans.

* * * * *

(e) *For veterans in Puerto Rico and other possessions.* The veteran is a veteran in need of hospital care or medical services necessary to obviate the need for hospital admission in the Commonwealth of Puerto Rico or other territory, commonwealth or possession of the United States, except that the annually determined hospital patient load and incidence of the provision of medical services to veterans hospitalized or treated at the expense of the VA in Government and private facilities in each such territory, commonwealth or possession (except Puerto Rico and the Virgin Islands) shall be consistent with the patient load or incidence of the provision of medical services for veterans hospitalized or treated by the VA within the forty-eight contiguous States, except the authority under this paragraph expires September 30, 1983. (38 U.S.C. 601(4)(C)(v); Pub. L. 93-82; Pub. L. 95-520; Pub. L. 96-22; Pub. L. 97-72; Pub. L. 97-251)

(f) *For veterans in Alaska or Hawaii.* The veteran is a veteran in need of hospital care or medical services necessary to obviate the need for hospital admission in Alaska or Hawaii, except that the annually determined hospital patient load and incidence of the provision of medical services to veterans hospitalized or treated at the expense of the VA in Government and private facilities in Alaska or Hawaii shall be consistent with the patient load or incidence of the provision of medical services for veterans hospitalized or treated by the VA within the forty-eight contiguous States. (38 U.S.C. 601(4)(C)(v); Pub. L. 93-82; Pub. L. 95-520)

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FL-003; A-4-FRL 2339-3]

Approval and Promulgation of Implementation Plans; Florida; TSP Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA today approves the State Implementation Plan (SIP) revision submitted by the State of Florida Department of Environmental Regulation (DER) for the Hillsborough County (Tampa) and Duval County (Jacksonville) particulate secondary nonattainment areas. This action is based on the State's submittal of a control strategy and regulations as required by Part D of Title I of the Clean Air Act (CAA) of 1977. An improvement in the air quality in Hillsborough and Duval County is expected from this action.

DATE: This action is effective June 1, 1983.

ADDRESSES: Copies of the materials submitted by the State may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460

Library, Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C. 20406

Environmental Protection Agency, Region IV, Air Management Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Florida Department of Environmental Regulation, Bureau of Air Quality Management, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32301.

FOR FURTHER INFORMATION CONTACT: Mr. Barry Gilbert, Air Management Branch, EPA Region IV at the above address and telephone number 404/881-3286 or FTS 257-3286.

SUPPLEMENTARY INFORMATION: In the March 3, 1978, **Federal Register** (43 FR 8962 at 8980), a number of areas within the State of Florida were designated as not attaining certain national ambient air quality standards (NAAQS). Hillsborough and Duval County were designated nonattainment for the secondary ambient standard for total suspended particulates (TSP). On September 11, 1978 (FR 40412), the size of these nonattainment areas was reduced. The Florida DER has developed a mix of particulate regulations requiring reasonably available control technology (RACT) and other control limitations in the violating areas so that the TSP secondary standard can be attained and maintained. On September 24, 1982, EPA published a **Federal Register** notice (47 FR 42124) proposing to approve Florida's plan. No comments were received on the proposed action.

General Discussion

The implementation plan revision developed for these areas by the Florida DER under Part D of Title I of the CAA was submitted for EPA's approval on February 27, 1981. Action on this submittal was delayed until control strategies were submitted by Florida DER. The revision has now been reviewed by EPA to determine whether it meets the requirements of the CAA of 1977, EPA regulations, and additional guidance. Section 172(b) of the Clean Air Act contains the minimum requirements for approval of Part D plans for designated nonattainment areas.

The two areas in Florida designated as nonattainment for total suspended particulate are defined as follows: The portion of the downtown Jacksonville area in Duval County located just north and west of the St. Johns River and east of I-95 and just south of Trout River, and the portion of Hillsborough County that falls within the area of the circle having a centerpoint at the intersection of U.S. 41 South and State Road 60 and a radius of 12 kilometers.

Agency personnel investigated the major source categories that represent the type of sources that are located in the two Florida nonattainment areas to assist in determining specific emission limitations. These categories include: (1) Phosphate process operations, (2) portland cement plants, (3) electric arc furnaces, (4) sweat or pot furnaces, and (5) materials handling, sizing, screening, crushing, and grinding operations.

The Florida Environmental Regulation Commission adopted these regulatory and non-regulatory SIP revisions following the required public hearings and participation on January 21, 1981. The control strategies, as approved and adopted for the local program agencies (the Duval County Bio-Environmental Service Division and the Hillsborough County Environmental Protection Commission), were submitted to EPA on March 16 and April 20, 1982, respectively. In preparing the plan, both agencies prepared an extensive inventory of air pollution sources in and impacting the nonattainment areas. Using this data base, the primary source categories were modelled following EPA guidelines to determine their respective contribution to the ambient air concentrations. The agencies then evaluated this information and proposed an attainment plan which, by applying RACT to most traditional point and industrial process fugitive sources, would result in attainment of the TSP secondary standard by July 31, 1986.

The attainment plan for the secondary standard calls for a reduction in ambient TSP concentrations by the implementation of RACT and other control measures on industrial point and process fugitive emission sources.

VOL 48 ISS 85 MAY 2 1983

primarily in the form of more stringent mass and visible emission limits.

In reference to FAC Section 17–2.13(3)(g)-Electric Arc Furnaces, DER has placed fugitive visible emission limits of 20% opacity for charging and 40% opacity for tapping operations, to be determined by Test Reference Method 9. Where processes and operations are long-term or continuous, Method 9 would be appropriate. In the case of electric arc furnace charging and tapping emissions, a more appropriate time averaging period would be three minutes, consisting of twelve readings taken at fifteen second intervals. Florida DER has agreed to consider the issue of modifying Method 9 for short-term or intermittent processes which discharge emissions for a shorter time period. For this reason, EPA has recommended to Florida DER that they consider the need to modify and allow visible emission determinations for intermittent processes to be based on time periods shorter than six (6) minutes.

Florida DER has certified in writing to EPA that all sources of air pollution subject to this action, are in fact, in compliance with the stipulated compliance schedules where add-on equipment was required.

Any request for redetermination of RACT rules or regulations by an owner or operator shall be submitted to EPA for approval as a SIP revision.

Since submittal of the SIP revision, Florida Administrative Code (FAC) 17–2 was subsequently reformatted, a revision approved by EPA in the Federal Register on March 30, 1982 (47 FR 13336). It should be noted that the Part D rule will be contained in FAC Rules 17–2.400 and 17–2.600.

As required in Section 172(b) of the CAA, the plan also requires preconstruction review of proposed new or modified major sources before the issuance of a permit. Through emissions offsets and the application of Lowest Achievable Emission Rate (LAER), the plan provides for reasonable further progress towards attainment of the standard as new sources construct in the area. The plan also allows growth and expansion of new sources or modification to take place in the nonattainment areas without jeopardizing progress towards attainment.

On September 24, 1982, EPA published a Federal Register notice (47 FR 42124) proposing to approve Florida's plan. No comments were received on the proposed action. The revision submitted by Florida satisfies the requirements of Section 172(b) of the CAA.

Action. Based on the foregoing, EPA is today approving the SIP under Part D of Title I of the CAA as it relates to the attainment of the secondary TSP standards in Hillsborough and Duval Counties, Florida. This action is effective June 1, 1983.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by [60 days from today]. This action may not be challenged later in proceedings to enforce its requirements. (See Sec. 307(b)(2).)

Incorporation by reference of the State Implementation Plan for the State of Florida was approved by the Director of the Federal Register on July 1, 1981.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Intergovernmental relations, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

(Secs. 110, 172, Clean Air Act, as amended, (42 U.S.C. 7410 and 7502))

Lee L. Verstandig,

Acting Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart K—Florida

1. Section 52.520 is amended by adding paragraph (c)(21) as follows:

§ 52.520 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the date specified.

* * *

(21) The implementation plan revision developed by the Florida DER for the Jacksonville and Tampa TSP secondary nonattainment areas under Part D of Title I of the CAA was submitted for EPA's approval on February 27, 1981. The control strategies, as approved and adopted for the local program agencies (the Duval County Bio-Environmental Services Division and the Hillsborough County Environmental Protection Commission) were submitted to EPA on March 16 and April 20, 1982, respectively.

§ 52.523 [Amended]

2. In § 52.523, Attainment dates for national standards, the notation "*e*" in the particulate matter, secondary, column of the entries for Duval County and Hillsborough County is replaced with the notation "*g*" and a corresponding line is added to the legend of the table as follows: g. July 31, 1986.

BILLING CODE 6560-50-M

40 CFR Part 52

[KY-004; TN-004; A-4-FRL 2329-3]

Approval and Promulgation of Implementation Plans; Kentucky and Tennessee; Variances and Individual Compliance Schedule for Volatile Organic Compound Sources

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is today approving variances for several dry cleaning establishments in northern Kentucky and an extended compliance schedule for a paper coating establishment in Chattanooga, Tennessee since the affected companies satisfy EPA criteria for such extensions and variances.

DATE: These actions are effective June 1, 1983.

ADDRESSES: Copies of the materials submitted by the States may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460
Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C. 20408
Air Management Branch, EPA Region IV, 345 Courtland Street NE., Atlanta, Georgia 30365
Division of Air Pollution Control, Kentucky Department for Environmental Protection, 18 Reilly Road, Bldg. #2, Ft. Boone Plaza, Frankfort, Kentucky 40601
Division of Air Pollution Control, Tennessee Department of Public Health, 150 9th Avenue North, Nashville, Tennessee 37203.

FOR FURTHER INFORMATION CONTACT: Douglas Cook, Air Management Branch, EPA Region IV, at the above address, telephone 404/881–2864 (FTS 257–2864).

SUPPLEMENTARY INFORMATION: Following public hearing, Kentucky adopted and submitted a plan revision involving seven perchloroethylene dry cleaning facilities in northern Kentucky. These variances and the requirement for carbon adsorbers, but good housekeeping and leak prevention requirements are still in force for these plants. EPA has determined that these variances will not hamper the state's "reasonable further progress (RFP)", demonstration in northern Kentucky because the additional uncontrolled emissions from these sources amount to only 16.5 tons. This emission level is less than 1% of the emission inventory in the affected counties.

Following public hearing, Tennessee submitted an extended compliance plan for Knowlton Brothers' paper coating facility in Chattanooga, Tennessee. The extended compliance schedule runs until May 6, 1983 and will allow Knowlton Brothers to install and test an application system for water based resins. EPA has determined that the extended compliance schedule will not hamper Chattanooga's RFP demonstration. EPA proposed approval of these revisions on November 18, 1982. (See 47 FR 51896.)

Comment. The comment period ended on December 20, 1982. One comment was received on the proposal. The commenter disagreed with EPA's finding that $650.00 to $3015.00 per ton of controlled emission placed an undue burden on the perchloroethylene dry cleaning facilities in northern Kentucky. The commenter also felt that the Agency was proposing approval just because the cost of control was higher than the average figure found in the control techniques guideline document (CTG) for this category. The commenter was also concerned about equity in the treatment of sources in different source categories because the Reasonably Available Control Technology (RACT) cost in some categories might be several times higher than in this specific case.

Response. EPA considers RACT to be the lowest emission limit that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility. Inherent in this definition is the requirement that economics be considered. What may be economically feasible for one source category may not be economically feasible for another. It is therefore inappropriate to link the cost of RACT for perchloroethylene dry cleaners to any other source category. In this particular RACT determination, the Agency considered not only the calculated cost of control per ton of controlled emissions, but also the effect of the cost on the individual facilities, the amount of actual emissions, and the sources' impact on the area's ability to attain the National Ambient Air Quality Standard for ozone. In conclusion, the Agency considered the individual economic feasibility of RACT for the seven specific dry cleaning facilities in the November proposal and did not waive the carbon adsorber requirements just because the cost of control was higher than the average cost in the CTG.

Action. Based on the foregoing, EPA hereby approves Kentucky's variance for the seven perchloroethylene drycleaning facilities listed in the November 18, 1982, proposal and Tennessee's extended compliance schedule for the Knowlton Brothers facility in Chattanooga.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 28, 1983. This action may not be challenged later in proceedings to enforce its requirements.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Incorporation by reference of the Kentucky and Tennessee State Implementation Plans was approved by the Director of the Federal Register on July 1, 1982.

BILLING CODE 6560-50-M

40 CFR Part 145

[W-3-FRL 2356-8]

Guam Environmental Protection Agency Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The Territory of Guam has submitted an application under Section 1422 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program. After careful review of the application, the Agency has determined that the State's injection well program meets the requirements of Section 1422 of the Act. Therefore, this application is approved.

EFFECTIVE DATE: This approval is effective June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Doris Lee-Betuel, Office of Territorial Programs, Water Management Division, U.S. Environmental Protection Agency, 215 Fremont Street, San Francisco, California, 94105. PH (415) 974–7433.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SWDA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the Federal Register each State for which in his judgment a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The Territory of Guam was listed as needing a UIC program on March 19, 1980 (45 FR 17632). The Territory submitted an application under Section 1422 on June 23, 1982, for a UIC program to be administered by the Guam Environmental Protection Agency (GEPA). On July 21, 1982, EPA published notice of its receipt of the application, requested public comments, and offered a public hearing on the UIC program submitted by the GEPA (47 FR 31590). Neither requests for public hearing nor requests to offer testimony at such hearing were received. Consequently, the public hearing was not held. The GEPA submitted a final application, including clarifications, on January 20, 1983.

The GEPA application includes a program for Class IV and V wells, and demonstration pursuant to 40 CFR 145.51(d) that there are no Class I, II, or III underground injections in the Territory and such injections cannot legally occur. Therefore, after careful review of the application, I have determined that the Guam UIC program submitted by the GEPA meets the requirements of the SDWA, and hereby approve it.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 145

Hazardous materials, Indians—lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental Relations, Penalties, Confidential business information.

OMB review

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. § 605(b), I certify that approval by EPA under Section 1422 of the Safe Drinking Water Act of the application by the Guam Environmental Protection Agency will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

Dated: April 22, 1983.

Lee L. Verstandig,

Acting Administrator.

BILLING CODE 6560-50-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

41 CFR Part 4–2

Amendment of Agriculture Procurement Regulations

AGENCY: Office of Operations, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the Agriculture Procurement Regulations by revising the section covering mistakes in bids. It reflects a transfer of the authority to make administrative determinations under 41 CFR 1–2.406–3 from the General Counsel to the Director, Office of Operations; authorizes Contracting Officers to make, subject to pre-approval by an appropriate legal officer, determinations to permit withdrawal of bids; and prescribes the pre-determination procedures for Contracting Officers to follow regarding mistakes in bids disclosed after award.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Larry Schreier, Office of Operations, United States Department of Agriculture, Washington, D.C., (202) 447–8924.

SUPPLEMENTARY INFORMATION: In the past, the Secretary of Agriculture's authority to make administrative determinations under 41 CFR 1–2.406–3 (other mistakes disclosed before award) was delegated to the General Counsel of the Department and all such determinations were made in the General Counsel's Washington, D.C., office. This amendment reflects the transfer of such authority to the Director, Office of Operations, and authorizes Contracting Officers of purchasing activities, that have legal counsel available in the field or Washington, D.C. offices of the General Counsel, authority to make withdrawal determinations under paragraphs (a) (1) and (3) of 41 CFR 1–2.406–3. Each proposed determination by the Director, Office of Operations, will be subject to approval by the Assistant General Counsel, Research and Operations Division. Each determination by a Contracting Officer will be approved by the Assistant General Counsel, Research and Operations Division, or the appropriate Regional Attorney or Attorney-in-Charge, whichever routinely provides legal services to the purchasing activity in accordance with 41 CFR 1–2.406–3(c). This change will minimize delay in awarding many contracts. In addition, this amendment revises the Agriculture Procurement Regulations to prescribe procedures whereby Contracting Officers shall coordinate proposed determinations regarding mistakes in bids disclosed after award with appropriate offices of Office of the General Counsel.

This rule relates to agency contracting. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impracticable and contrary to public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. Furthermore, rules relating to agency contracting have been exempted from the provisions of Executive Order 12291. Lastly, this action is not a rule as defined in Pub. L. 96–354, the Regulatory Flexibility Act, and thus, it is exempt from the provisions of that Act.

List of Subjects in 41 CFR Part 4–2

Government procurement.

PART 4–2—[AMENDED]

Accordingly, Part 4–2, Title 41, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 4–2 reads as follows:

Authority: 5 U.S.C. 301, 40 U.S.C. 486(c).

Subpart 4–2.4—Opening of Bids and Award of Contract

2. Section 4–2.406 is revised to read as follows:

§ 4–2.406 Mistakes in bids.

§ 4–2.406–3 Other mistakes disclosed before award.

(a) Except as authorized in paragraph (b) of this section, all cases of mistakes in bids, cognizable under § 1–2.406–3 of this title, shall be forwarded through agency channels to the Director, Office of Operations, for administrative determinations. Each proposed determination is subject to the approval of the Assistant General Counsel, Research and Operations Division.

(b) Contracting Officers at purchasing activities that have legal counsel available in the field or the Washington, D.C., offices of the General Counsel are authorized to make determinations to permit withdrawal of bids under paragraph (a) (1) and (3) of § 1–2.406–3 of this title. This authority may not be redelegated. Each proposed determination is subject to the approval of the Assistant General Counsel, Research and Operations Division, or the appropriate Regional Attorney or Attorney-in-Charge, whichever routinely provides legal services for the purchasing activity.

(c) Doubtful cases that are to be submitted to the General Accounting Office for advance decision shall be submitted through the Director, Office of Operations.

§ 4–2.406–4 Disclosure of mistakes after award.

If a mistake in bid is disclosed after award, the Contracting Officer shall make a final determination in accordance with the provisions of § 1–2.406–4 (b) and (c) of this title and shall coordinate each proposed determination with the Assistant General Counsel, Research and Operations Division, or the Regional Attorney or Attorney-in-Charge, whichever routinely provides legal services to the contracting officer. Such coordination shall, at a minimum, consist of the Contracting Officer providing the proposed determination and the case file to the appropriate legal officer for comment.

Dated: March 4, 1983.

Frank Gearde, Jr.,

Director, Office of Operations.

BILLING CODE 3410–98–M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 172 and 175

[Docket No. HM–166Q and HM–166F; Amdt. Nos. 172–80, 175–27]

Exceptions for Small Quantities of Hazardous Materials and Limited Quantities of Radioactive Materials

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: The MTB is renewing the exemption found in 49 CFR 172.204(c)(4), 175.10(a)(6), and 175.700(c) for air transport of limited quantity radioactive materials exhibiting low levels of radiation. These materials do not present a significant hazard to passengers and crew on an aircraft. The effect of this action is to permit contined transportation by passenger-carrying aircraft of radioactive materials under existing restrictions.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Thomas G. Allan, Exemptions and Regulations Termination Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone (202) 426–2075.

SUPPLEMENTARY INFORMATION: The MTB published a notice of proposed rulemaking (NPRM) on November 15, 1982 (47 FR 51430), seeking public comment, in part, on the proposed renewal for two years of the exemption found at 49 CFR 172.204(c)(4), 175.10(a)(6) and 175.700(c) for air transportation of limited quantity radioactive materials exhibiting low levels of radiation. The comment period ended on January 6, 1983. Eight commenters specifically addressed the proposal to renew the limited exemption. Each of these commenters support the renewal of this exemption. There was no opposition to a renewal of the exemption.

Conforming with Section 107 of the Hazardous Materials Transportation Act (HMTA) (49 U.S.C. 1806) governing exemptions, the exemption in §§ 172.204(c)(4), 175.10(a)(6), and 175.700(c) is limited to a two-year life unless reexamined and renewed. The exemption was last renewed under Docket HM–149C (46 FR 24184), published on April 30, 1981. The legal background and regulatory history of the exemption is discussed in that amendment and preceding amendments dating back to April 17, 1975 (40 FR 17141). The present exemption expires on May 3, 1983. The MTB is renewing the exemption on the finding that renewal is consistent with the public interest and safety.

Two commenters suggested that MTB has gained sufficient experience with this exemption to permit its adoption in the Hazardous Materials Regulations as a permanent rule, or, alternatively, to increase the life of the exemption to a period of 4 years. Neither of the suggested actions are possible through rulemaking. The general prohibition which restricts radioactive material from being transported on passenger-carrying aircraft is contained in § 108 of the HMTA (49 U.S.C. 1807) and, therefore, may be withdrawn only by new legislation. As indicated above, MTB is limited in its authority and may issue exemptions only for a period not exceeding 2 years. Consequently, the commenters suggestions must be denied. It is noted, however, that MTB has included this item in its 1983 legislative package.

This amendment is being handled as an emergency regulation to permit an effective date which is less than 30 days following publication in the **Federal Register**. An interruption of currently authorized practices would adversely affect many shippers of limited quantity radioactive materials and radioactive devices who depend on transportation by passenger-carrying aircraft. Also, a prohibition from passenger-carrying aircraft would not result in an overall increase in the level of safety during transportation.

Other proposals published in the NPRM are to be addressed in subsequent amendments issued under this Docket.

Regulatory Impact: MTB has determined this final rule is not a "major rule" under the terms of Executive Order 12291, and is not "significant" under DOT procedures (44 FR 11034). A regulatory evaluation is available in the Docket at the address shown above. Based on the comments received in response to the NPRM, I certify that this rule change will not have a significant economic impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act.

List of Subjects in 49 CFR Parts 172 and 175

Hazardous materials transportation, Air carriers, Radioactive materials.

In consideration of the foregoing, Parts 172 and 175 of Title 49, Code of Federal Regulations are amended as follows:

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

1. In § 172.204, paragraph (c)(4) is revised to read as follows:

§ 172.204 Shipper's certification.

* * * * *

(c) * * *

(4) *Radioactive material.* Each person who offers any radioactive material for transportation aboard a passenger-carrying aircraft shall sign (mechanically or manually) a printed certificate stating that the shipment contains radioactive material intended for use in, or incident to, research, or medical diagnosis or treatment. Prior to May 3, 1985, this provision does not apply to materials meeting the

Proposed Rules

Federal Register
Vol. 48, No. 85
Monday, May 2, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 28

Addition of New Grade Standards for American Upland Cotton

AGENCY: Agricultural Marketing Service, USDA

ACTION: Proposed rule.

SUMMARY: The Agricultural Marketing Service (AMS) is proposing to add two new standards to the official cotton standards of the United States for the grade of American Upland cotton. The new standards would be a Strict Good Ordinary Spotted physical standard and a Strict Good Ordinary Light Spotted descriptive standard. These standards would more accurately describe a small amount of cotton now classified as Below Grade.

It is also proposed that references to the size of the boxes used to display standards samples be deleted from the regulations. The twelve sample box would be discontinued and the six-sample box used exclusively to represent the physical standards. The six-sample box is less expensive and more convenient to prepare and handle than the twelve-sample box and its use would not adversely affect the classification of cotton.

DATE: Comments must be received on or before July 1, 1983.

ADDRESS: Written comments may be sent to Harvin R. Smith, Chief, Standards and Testing Branch, Cotton Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Harvin R. Smith (202) 447–2167.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed in accordance with Executive Order 12291 and has been determined not to be a "major rule" since it does not meet the criteria for a major regulatory action as stated in the Order. No new costs or additional requirements are being imposed on the industry or others.

William T. Manley, Deputy Administrator, AMS, has certified that this action would not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601). Because the proposed changes would affect less than 1 percent of the annual U.S. cotton crop, the proposals would not have the requisite significant economic impact. Further, the proposed changes do not impose any additional duties upon users of the service.

Background: Pursuant to the authority contained in the United States Cotton Standards Act (7 U.S.C. 51), the Secretary of Agriculture has established the official cotton standards of the United States for the grades of American Upland cotton. These standards are used for the classification of American Upland cotton and provide a basis for the determination of value for commercial purposes.

The existing official cotton standards for the grades of American Upland cotton are listed and described in the regulations at 7 CFR 28.402–28.475. Fourteen are physical standards represented by practical forms, and 26 are descriptive standards for which practical forms are not made. Six of the descriptive standards describe the poorest quality cotton and taken together make up the Below Grade classification (7 CFR 28.475). The volume of cotton designated Below Grade in the United States each year amounts to less than one percent of the crop submitted for classification. However, the percentage of Below Grade cotton in certain cotton producing areas is estimated to have been as much as fifteen percent in some years.

New Standards: Cotton producer organizations have urged the establishment of two new grade standards for a number of years. The addition of a physical standard for Strict Good Ordinary Spotted cotton and a Strict Good Ordinary Light spotted cotton descriptive standard would provide a more accurate description of certain cotton which is currently classified as Below Grade.

Below Grade cotton which would be classified in one of the proposed grade standards has been found to have better spinning characteristics than other Below Grade cotton and the more accurate description would contribute to the overall efficiency of the cotton marketing system.

In consideration of the foregoing, the Agency is proposing to add these two standards to the official cotton standards of the United States for the grade of American Upland Cotton.

Furthermore, this proposal would require that the definition of Below Grade cotton be revised. At the present the two lowest spotted cotton grade standards are Low Middling Light Spotted and Low Middling Spotted. All spotted cotton lower in grade than these two standards is now defined as Below Grade cotton. This proposal would create the two new spotted cotton grade standards of Strict Good Ordinary Light Spotted and Strict Good Ordinary Spotted which would become the two lowest spotted cotton grade standards. Spotted cotton lower in grade than the proposed standards would be, by definition, Below Grade cotton.

Standards Boxes: The Agency is also proposing to discontinue production of the 12-sample standards box to represent the physical standards for grade. The six-sample box would become the only size produced for the practical forms of the cotton standards. This would apply to the standards for American Upland cotton and for American Pima cotton.

The present 12-sample standards box contains six color positions each of which is represented by two identical samples. The six-sample box contains only one sample for each of the six color positions.

The six-sample boxes have been produced and used since the mid 1950s and are much less expensive to prepare, store, and ship and have proven to be more convenient to use in day-to-day classing operations. Adoption of a six-sample box as the only size for representing the standards would not affect the classification of cotton in any manner and would greatly improve the efficiency of standards preparation and distribution. Furthermore, the smaller box is widely accepted and used by both domestic and foreign users.

In consideration of the foregoing, the Agency is proposing to delete from the regulations any reference to the size of standards boxes made up to represent the official standards of the United States for the grade of American Upland

UMI

cotton and of American Pima cotton. Therefore § 28.105 would be amended as well as the fee schedule in § 28.123 to delete references to the 12-sample box. The fees for the six-sample boxes and other fees contained in § 28.123 are presently under study and may be revised in the future.

List of Subjects in 7 CFR Part 28

Cotton, Samples, Standards, Cotton linters, Grades, Staples, Market news, Testing.

PART 28—[AMENDED]

Accordingly, it is proposed to amend Subparts A and C, Part 28, of Chapter I, Title 7 of the Code of Federal Regulations as shown. The Table of Contents would be amendd accordingly.

1. The authority citation for Part 28, Subparts A and C reads as follows:

Subpart A

Authority: Sec. 10, 42 Stat. 1519; 7 U.S.C. 61, unless otherwise noted.

Subpart C

Authority: Sec. 28.402 to 28.481 issued under Sec. 10, 42 Stat. 1519, 7 U.S.C. 61. Interpret or apply Sec. 6, 42 Stat. 1518, as amended, 7 U.S.C. 56.

2. 7 CFR Part 28 would be amended by adding new § 28.425 and § 28.435 to read as follows:

§ 28.425 Strict Good Ordinary Light Spotted.

Strict Good Ordinary Light Spotted is American Upland cotton which in leaf and preparation is Strict Good Ordinary, but which in spot or color, or both, is between Strict Good Ordinary and Strict Good Ordinary Spotted.

§ 28.435 Strict Good Ordinary Spotted.

Strict Good Ordinary Spotted is American Upland cotton which in color, leaf, and preparation is within the range represented by a set of samples in the custody of the United States Department of Agriculture in a container marked "Original Official Cottom Standards of the United States, American Upland, Strict Good Ordinary Spotted, effective July 1, 1984."

3. Section 28.475 would be revised to read as follows:

§ 28.475 Below Grade Cotton.

Below Grade cotton is American Upland cotton which is lower in grade than Good Ordinary, or Strict Good Ordinary Light Spotted, or Strict Good Ordinary Spotted, or Low Middling Tinged, or Middling Yellow Stained, or Strict Low Middling Gray. In cotton classification, the official designation for such cotton is Below Grade. The term Below Good Ordinary, or Below Strict Good Ordinary Light Spotted, or Below Strict Good Ordinary Spotted, or Below Low Middling Tinged, or Below Middling Yellow Stained, or Below Strict Low Middling Gray and other additional explanatory terms considered necessary to describe adequately the condition of the cotton may be entered on classification memorandums or certificates.

4. Paragraph (b)(1) of § 28.105 would be revised to read as follows:

§ 28.105 Practical forms of cotton standards.

* * * * * * *

(b) * * *

(1) That no practical form of any of the cotton standards for the grade of American upland cotton shall be considered or used as representing such standards after the date of its cancellation in accordance with this section or in any event after the expiration of 12 months following the date of its certification: Provided, That sets of practical forms stored, protected, and preserved in accordance with certain agreements for the adoption of universal standards may be used for such periods as may be prescribed in such agreements.

* * * * *

5. Section 28.123 would be revised to read as follows:

§ 28.123 Costs of practical forms of cotton standards.

The cost of practical forms of the cotton standards of the United States shall be as follows:

	Dollars each box	
	Domestic shipments f.o.b. Memphis, Tenn.	Foreign shipments surface delivery
Grade Standards		
American Upland	80.00	95.00
American Pima	110.00	125.00
Standards for Length of Staple		
American upland (prepared in one pound rolls for each length)	11.00	13.00
American Pima (prepared in one pound rolls for each length)	12.00	14.00

Dated: April 27, 1983.

BILLING CODE 1505-01-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 40

[Docket No. PRM-40-23]

Sierra Club; Receipt of an Amendment to a Petition for Rulemaking

AGENCY: Nuclear Regulatory Commission.

ACTION: Petitition for rulemaking; amendment.

SUMMARY: The Nuclear Regulatory Commission is publishing for public comment a notice of receipt of an amendment to a petition for rulemaking submitted by the Sierra Club. The petitioner, in both the original petition and in this amendment to that petition, requests that the NRC amend its regulations to license the possession of uranium mill tailings at inactive storage sites or take other regulatory action to protect the public health and safety and the environment from the radiological and nonradiological hazards associated with the tailings. The petitioner believes that this action is necessary if NRC is to adequately fulfill its statutory responsibilities.

DATE: Submit comments by June 30, 1983. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Submit comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

Hand deliver comments to Room 1121, 1717 H Street, NW., Washington, DC between 8:15 am and 5:00 pm.

For a copy of the amendment to the petition write: Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Inspect and copy comments received on the amendment to the petition at: The NRC Public Document Room, 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John Philips, Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: (301) 492-7086 or call toll free (800) 368-5642.

SUPPLEMENTARY INFORMATION: The Nuclear Regulatory Commission has received an amendment to a petition for rulemaking from the Sierra Club. This amendment to the petition for rulemaking is assigned to the same docket as the original petition for rulemaking (Docket No. PRM-40-23).

On February 25, 1981 (46 FR 14021) the NRC published a notice of receipt of a petition from the Sierra Club. The petitioner requested that the NRC amend its regulations to license the possession of uranium mill tailings at inactive storage sites. The petitioner proposed that the NRC take the following regulatory action to ensure that public health and safety and the environment is adequately protected from the hazards associated with uranium mill tailings.

1. Repeal the licensing exemption for inactive mill tailings sites subject to the Department of Energy's remedial program.

2. Require a license for the possession of byproduct material on any other property in the vicinity of an inactive mill tailings site if the byproduct materials are derived from the inactive mill tailings site.

3. Or alternatively, conduct a rulemaking to determine whether a licensing exemption of these sites or the byproduct material derived from the sites constitutes an unreasonable risk to public health and safety.

On March 21, 1983, the Sierra Club filed an amendment to its earlier petition. In this amendment to the petition, the petitioner requests that, in the event the NRC denies the petitioner's earlier request that NRC repeal the licensing exemption for inactive sites or conduct the requested rulemaking, the NRC take further action. Specifically, the petitioner requests that the NRC ensure that the management of byproduct material located on or derived from inactive uranium processing sites is conducted in a manner that protects the public health and safety and the environment from the radiological and nonradiological hazards associated with uranium mill tailings.

Whether the original petition is granted or not, the petitioner also requests that the NRC establish requirements to govern the management of byproduct material, not subject to licensing under section 61 of the Atomic Energy Act (42 U.S.C. 2111), comparable to the requirements applicable to similar materials under the Solid Waste Disposal Act, as amended (42 U.S.C. 6901 et seq.). In the alternative, the petitioner suggests that NRC extend the coverage of the requirements in 10 CFR Part 40, Appendix A, which are now applicable only to licensed byproduct material, to byproduct material not subject to licensing. In addition, the petitioner requests that NRC issue regulations that would require a person exempt from licensing to conduct monitoring activities, perform remedial work, or take any other action necessary to protect health and safety and the enviroment.

The petitioner stresses that, by filing this amendment to the earlier petition for rulemaking, it has not abandoned the original petition and the legal claims set forth in it. The petitioner, by this amendment to the petition, also seeks an expedited decision on the matters presented in the original petition and this amendment to it.

PRM-40-23 is but one of several issues currently before the NRC concerning the uranium mill tailings regulations. These regulations may also be affected by potential court action, certain legislative requirements directed toward the NRC and other government agencies with jurisdiction in this area, and another petition for rulemaking. The NRC is currently reassesing its uranium mill tailings regulations to determine the changes that may be necessary to satisfy its legal obligations in light of each of these actions. The NRC intends to consider the issues raised by PRM-40-23 and the amendment to it in a single rulemaking action that would make any necessary changes to the uranium mill tailings regulations. The NRC will begin this rulemaking as soon as the full extent of the changes necessary is determined.

The Commission would like to receive public comment on the specific items addressed in this amendment to PRM-40-23. Those who intend to submit comments on the petition may obtain a complete copy of the amendment to the petition from the Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Dated at Washington, DC this 27th day of April 1983.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 83-11070 Filed 4-29-83; 8:45 am]

BILLING CODE 7590-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 561 and 563

[No. 83-231]

Acquisition of Non-Cash Assets

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), proposes to amend its regulations pertaining to reserve requirements, to address the treatment afforded an acquisition of a non-cash asset. The proposal would provide that an acquisition of a non-cash asset could only be included in the regulatory net worth and statutory reserve calculations of an institution whose accounts are insured by the FSLIC ("insured institution" or "institution"), where the acquisition: (1) Is an authorized investment of a federally-chartered institution; (2) arises in connection with certain supervisory actions involving an insured institution; (3) is an authorized investment under state law made by a state-chartered insured institution meeting its statutory-reserve and net-worth requirements; (4) is an authorized investment under state and federal law, made by a state-chartered insured institution with a statutory-reserve or net-worth deficiency; or (5) is an authorized investment under state law only, made by a state-chartered insured institution with a statutory-reserve or net-worth deficiency, if after submission of a 30-day notice, the acquisition is not disapproved by the Corporation. The purpose of the amendments is to: clarify when an insured institution's reserve calculations and regulatory net worth may be affected by an acquisition of a non-cash asset, ensure that a non-cash asset is properly valued, and prevent acquisitions which are likely to adversely affect an insured institution's financial condition or operations.

DATE: Comments must be received by: June 30, 1983.

SUPPLEMENTAL INFORMATION:

Background

A significant number of transactions have been proposed or consummated in recent months by insured institutions where certain non-cash assets, primarily land, are acquired either in exchange for securities of an insured institution or contributed to an insured institution. The transactions typically involve insured institutions with severe operating problems and reserves that have declined to levels below that required by the Board's regulations. Although the non-cash acquisitions usually involve significant proposed increases in reserves, the Board believes that certain of these acquisitions are not in the best long-term interests of the acquiring institution or the FSLIC.

The Board, therefore, is proposing regulatory amendments directed toward those proposed acquisitions in which: (1) The authority to acquire the non-cash asset is not clear; (2) the actual values of the non-cash asset to be acquired by certain insured institutions appear to be substantially less than the values proposed to be recorded as reserves, and (3) there would be a possible adverse effect on the financial condition or operations of certain insured institutions, due to the servicing of debt associated with the proposed acquisition or to any planned expenditures for development or maintenance of the acquired properties.

In those transactions involving an application requiring prior approval (e.g., holding company acquisition, merger, and certain issuances of mutual capital certificates or subordinated debt), the Board is able to readily obtain as part of the application process acceptable appraisals and other information, in order to ascertain the impact of the proposed non-cash acquisition on the institution. However, some non-cash acquisitions involve no application. For example, a contribution of a non-cash asset, a purchase of a non-cash asset for cash, or an exchange of either an institution's securities or a currently-held non-cash asset for a non-cash asset to be acquired, may not require any application. In such circumstances, the acquired asset could be included in an institution's reserves based on "fair market value" without any prior regulatory review.

Generally, an overvalued non-cash asset would only be reviewed by the Board, after the fact, in connection with an institution's examination. At that time, the Board could order a new appraisal, if a non-cash asset appeared to be overvalued. However, the acquiring institution could be subsequently determined to be insolvent, if the asset were required to be written down by a significant amount. Accordingly, the Board is concerned that due to pressures to increase reserves, certain insured institutions with either a statutory-reserve or a regulatory-net-worth deficiency may enter into non-cash acquisitions without due regard for the long-term effects that could seriously disadvantage the institution or the FSLIC.

Where an institution is likely to enter into certain proposed acquisitions of non-cash assets which may be overvalued, illiquid, and not economically beneficial, the Corporation should have an opportunity to review the proposed acquisition prior to consummation. The Board's experience with non-cash acquisitions has indicated that the Corporation should be furnished with a notice and opportunity to review a proposed non-cash acquisition by a state-chartered insured institution where that institution has a statutory-reserve or regulatory-net-worth deficiency, and the non-cash asset to be acquired is authorized for investment by the institution only under state law and would not be authorized for investment by a federally-chartered institution under federal law.

Regulatory Net Worth

The Board is proposing to amend the definition of regulatory net worth in 12 CFR 561.13 by revising paragraph (a) to separately number the current proviso clauses and to add a new proviso clause as section 561.13(a)(3). The new proviso clause would provide that the regulatory net worth of an insured institution shall only be increased, directly or indirectly, as a result of the acquisition of a non-cash asset, if its acquisition were authorized in certain specific instances, as set forth in proposed new paragraph (d) of the Board's reserve requirement regulation (12 CFR 563.13). This limitation would apply to all non-cash acquisitions, whether as a result of a contribution; purchase for cash; or an exchange for stock, debt, other securities, or another non-cash asset.

Reserve Accounts

The Board is proposing to revise its reserve requirements set forth in section 563.13 by adding a new paragraph (d) to provide that, for purposes of satisfying the Board's reserve requirements and of regulatory financial reports prepared for submission to the Corporation, an insured institution shall only include in its statutory-reserve calculations and reported regulatory net worth an amount attributable to an acquisition of a non-cash asset, if the transaction or series of transactions resulting in the acquisition satisfies any of five specified grounds.

Federally-Chartered Institutions

Under proposed section 563.13(d)(1)(i), an acquisition of a non-cash asset would be authorized, for purposes of an insured institution's statutory-reserve calculations and regulatory net worth, if that institution were federally-chartered and the non-cash asset is of a type authorized for investment under section 5(c) of the Home Owners' Loan Act of 1933 ("HOLA") (12 U.S.C. 1464(c)). The Board believes that, except for certain supervisory cases described below, a federally-chartered institution should only be capitalized with assets which the institution is authorized to invest in by statute. If an institution may not invest in certain non-cash assets for cash, it is the Board's view that the institution should not be able to acquire that same asset either in exchange for a security or another non-cash asset, or in a transaction structured as a contribution.

The non-cash assets authorized for investment under section 5(c) of HOLA are high-quality assets and do not generally include real property and other types of non-cash assets that are likely to be overvalued with concomitant adverse effects on an institution's financial condition or operations. Currently, federally-chartered institutions may directly acquire real property as an investment only if it is to be used for office facilities of the institution or for certain community property purposes. *See* 12 CFR 545.10 and section 5(c)(3)(B) of OLA HOLA.

Supervisory Cases

The acquisition of a non-cash asset, which would not be an authorized investment under section 5(c) of HOLA for a federally-chartered institution or for a state-chartered institution under state law, is proposed to be authorized under section 563.13(d)(1)(ii) for purposes of statutory-reserve calculations and regulatory-net-worth requirements for an insured institution in a supervisory case under either section 5(p) of HOLA (12 U.S.C. 1464(p)) or section 408(m) of the National Housing Act ("NHA") (12 U.S.C. 1730a(m)). Generally, section 5(c) of HOLA (12 U.S.C. 1464(c)) provides the investment authority for federally-chartered institutions and state law provides the investment authority for state-chartered institutions. Sections 121 and 123 of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. No. 97-320, amended section 5 of HOLA by adding a new paragraph (p) to that section (12 U.S.C. 1464(p)) and amended section 408 of NHA by adding a new paragraph (m) to that section (12 U.S.C. 1730a(m)), respectively, to provide that the Board or Corporation may authorize conversions, mergers, consolidations, transfers, and acquisitions, notwithstanding any provision of federal law or the laws or constitution of any state, under certain specified conditions which generally relate to a receivership or when an institution's financial stability is threatened by severe financial conditions.

When the requirements of either section 5(p) of HOLA or section 408(m) of NHA have been satisfied, the Board or Corporation may authorize any non-cash acquisition in connection with a qualifying supervisory case. In evaluating a proposed non-cash acquisition in connection with a supervisory case where the net worth of an institution could be affected under proposed section 563.13(d)(1)(ii), the Board would generally require for its consideration the information required for a notice under proposed section 563.13(d)(2). If an insured institution acquired a non-cash asset proposed to be authorized for net-worth purposes under section 563.13(d)(1)(ii), which was not authorized as an investment under federal law if federally-chartered or state law, if state-chartered, any subsequent expenditure on the non-cash asset would be limited to maintenance of the asset. An institution would not be permitted to expand or increase its investment in a non-cash asset acquired in a supervisory case above the level authorized by the Corporation, which level will not exceed the value of the non-cash asset at its acquisition.

State-Chartered Insured Institutions

Pursuant to proposed section 563.13(d)(iii), acquisition by a state-chartered insured institution meeting its statutory-reserve and net-worth requirements of a non-cash asset authorized for investment under applicable state law would be recognizable in its statutory-reserve calculations and regulatory net worth. Since such institutions are in the Board's view unlikely to acquire high-risk, over-valued assets for the purpose of increasing their statutory reserves and regulatory net worth, they would be authorized to use for purposes of those reserve calculations any non-cash asset authorized under applicable state law.

If a state-chartered institution had a statutory reserve or regulatory-net-worth deficiency, a non-cash asset could be acquired and would be recognizable under section 563.13(d)(1)(iv) for reserve calculations if the non-cash asset were authorized for investment under applicable state law and under 5(c) of HOLA (12 U.S.C. 1464(c)). Generally, where the non-cash asset is of the type authorized for a federally-chartered institution, the asset will not likely be subject to the degree of overvaluation with which the Board is concerned.

Where a proposed acquisition of a non-cash asset is by a state-chartered institution with a statutory-reserve or regulatory-net-worth deficiency, and the non-cash asset is authorized for investment under applicable state law and not authorized for investment by a federally-chartered institution under section 5(c) of HOLA (12 U.S.C. 1464(c)), any amount attributable to the acquisition could only be used in the institution's reserve calculations if written notice were submitted to the Board 30 days prior to acquisition of the non-cash asset and the acquisition were not disapproved by the Corporation. The Board believes that where a state-chartered insured institution is not satisfying its regulatory-net-worth requirements and the non-cash asset is one which is not authorized for investment under federal law, a higher risk of overvaluation and illiquidity will be involved in the transaction and a prior review will be necessary. Acquisitions by such institutions that involve undeveloped land, apartment buildings, land development programs, and any other assets which may generate a negative cash flow, will be the types of non-cash asset acquisitions which are least likely to satisfy the proposed regulation's standards for an acquisition that will not be disapproved.

The proposed notice would be required to include a description of the property, an appraisal meeting certain specifications, financial information, related agreements and documents, and a legal opinion as to certain matters. The proposed procedures provide that the notice must be filed with the Board's Office of the Secretariat and the Principal Supervisory Agent. The proposed 30-day period for review would only commence with the filing of a sufficient notice acknowledged by a letter from the Corporation. Any information required to be included in a notice may waived by the Corporation upon a showing of good cause. Where a state-chartered insured institution files a notice to acquire a non-cash asset, proposed section 563.13(d)(3)(iii) provides that the Corporation will not disapprove a proposed acquisition of a non-cash asset for purposes of an institution's statutory-reserve calculations and regulatory net worth, where: the valuation of the non-cash asset is supported by an acceptable appraisal; the proposed acquisition is not projected to yield a negative return to the institution; the proposed acquisition is not likely to have a material adverse effect upon the institution's financial condition, business operations, or liquidity; and the institution has filed all required information.

Delegation

The Board is proposing in section 563.13(d)(6) to delegate its authority under proposed section 563.13(d) to the Director of the Office of Examinations and Supervision, or his designee, to act on behalf of the Corporation.

Initial Regulatory Flexibility Analysis

Pursuant to Section 3 of the Regulatory Flexibility Act, Pub. L. No. 96-354, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis.

1. *Reasons, objectives, and legal basis underlying the proposed rules.* These elements have been incorporated elsewhere in the supplementary information regarding the proposal.

2. *Small entities to which the proposed rules will apply.* The proposed rules apply to federally-chartered institutions or state-chartered insured institutions that may consider acquisition of a non-cash asset.

3. *Impact of the proposed rules on small institutions.* Since the proposed rules would establish the authority of insured institutions to include proposed acquisitions of non-cash assets in their statutory-reserve calculations and regulatory net worth, institutions that may be considered small entities would be benefited.

4. *Overlapping or conflicting federal rules.* There are no federal rules that duplicate, overlap, or conflict with this proposal.

5. *Alternatives to the proposed rules.* It is not possible to eliminate or significantly modify these requirements for small entities, since the notice

requirements are governed by the nature of the non-cash asset and the institution's net-worth deficiency, rather than by the identity or the size of the affected institution.

List of Subjects in 12 CFR Parts 561 and 563

Savings and loan associations.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend Parts 561 and 563, Subchapter D, Chapter V of Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

1. Amend § 561.13 by revising paragraph (a), as follows:

§ 561.13 Regulatory net worth.

(a) The term "regulatory net worth" means the sum of all reserve accounts (except specific or valuation reserves), retained earnings, common stock, preferred stock, mutual capital certificates (issued pursuant to § 563.7–4 of this Subchapter), subordinated debt securities (issued pursuant to § 563.6–1 of this Subchapter), securities which constitute permanent equity capital in accordance with generally accepted accounting principles (if approved by the Corporation), appraised equity capital) as defined in § 563.13(c) of this Subchapter), and any other nonwithdrawable accounts of an insured institution: *Provided*, that:

(1) For any nonpermanent instrument qualifying as regulatory net worth under this definition, either: (i) The remaining period to maturity or required redemption (or time of any required sinking fund or other prepayment or reserve allocation, with respect to the amount of such prepayment or reserve) is not less than one year, or (ii) the redemption or prepayment is only at the option of the issuer and such payments would not cause the institution to fail to meet its statutory-reserve or net-worth requirement under § 563.13 of this Subchapter;

(2) Capital stock may be included as net worth without limitation if it would otherwise qualify but for either: (i) A provision permitting redemption in the event of a merger, consolidation, or reorganization approved by the Corporation where the issuing institution is not the survivor, or (ii) a provision permitting a redemption where the funds for redemption are raised by the issuance of permanent stock; and

(3) The regulatory net worth of an insured institution shall only be increased, directly or indirectly, as a result of the acquisition of a non-cash asset, if authorized under § 563.13(d) of this Subchapter.

* * * * *

PART 563—OPERATIONS

2. Amend § 563.13 by redesignating paragraphs (d), (e), and (f) thereof as paragraphs (e), (f), and (g), respectively, and adding a new paragraph (d) thereto, as follows:

§ 563.13 Reserve accounts.

* * * * *

(d) *Acquisition of non-cash assets.*

(1) *General.* For purposes of satisfying the reserve requirements of paragraphs (a) and (b) of this section and for purposes of regulatory financial reports prepared for submission to the Corporation, and insured institution shall only include in its statutory-reserve calculations or reported regulatory net worth an amount attributable to an acquisition of a non-cash asset, if it is:

(i) An acquisition by a Federally-chartered institution of a non-cash asset which is authorized for investment under section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c));

(ii) An acquisition of a non-cash asset which is not an authorized investment under section 5(c) of the Home Owners' Loan Act for a federally-chartered institution or under applicable state law for a state-chartered insured institution, in a supervisory case under either section 5(p) of the Home Owners' Loan Act (12 U.S.C. 1464(p)) or 408(m) of the National Housing Act (12 U.S.C 1730a(m)), where any subsequent expenditure will be limited to maintaining the value of the non-cash asset at a level authorized by the Corporation, which level will not exceed the value of the non-cash assets at its acquisition;

(iii) An acquisition by a state-chartered insured institution meeting its requirements under paragraphs (a) and (b) of this section of a non-cash asset which is authorized for investment under applicable state law;

(iv) an acquisition by a state-chartered insured institution with a statutory-reserve or regulatory-net-worth deficiency of a non-cash asset which is authorized for investment under applicable state law and under section 5(c) of the Home Owners' Loan Act; or

(v) An acquisition by a state-chartered insured institution with a statutory-reserve or regulatory-net-worth deficiency of a non-cash asset which is authorized for investment under applicable state law, but not authorized under section 5(c) of the Home Owners' Loan Act, if notice of the proposed acquisition is provided to the Corporation pursuant to paragraph (d)(2) of this section and the acquisition is not disapproved by the Corporation.

(2) *Notice requirement.* An insured institution seeking approval of an acquisition under paragraph (d)(1)(v) of this section shall file a written notice of intent 30 days prior to the acquisition.

(i) The notice and any amendments to it shall be executed on behalf of the institution by a duly authorized officer on the institution.

(ii) The original and two copies of the notice and any amendments shall be filed with the Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C., 20552, and three copies of the Notice and any amendments shall be filed with the Principal Supervisory Agent of the Federal Home Loan Bank of which the institution is a member.

(iii) The notice shall contain all of the following information:

(*a*) A detailed description of the terms of the proposed transaction, the non-cash assets, and all participants.

(*b*) A current appraisal prepared by an independent professional appraiser, as defined by secton 571.1(a)(2) of this Subchapter, which reflects the market value of any asset acquired or transferred to the institution and which meets current standards established by the Federal Home Loan Bank Board's Office of Examinations and Supervision.

(*c*) A description of any debt or other encumbrances which the institution will incur, assume, or retire in conjunction with the transaction. Information provided should include the terms, required servicing, current payment status, and separate valuation for any such debt, and any contingent liabilities arising from the transaction.

(*d*) A *pro forma* balance sheet and a statement of operations for the institution as of the latest semiannual closing date, reflecting the impact of the proposed transaction, and supported by an opinion from an independent auditor regarding compliance with generally accepted accounting principles.

(*e*) Information about the historical performance of all proposed assets to be acquired or transferred to the institution, including specific information regarding the payment status and underwriting for any loan-type assets, and a balance sheet and a statement of operations (audited if available) for each of the last two years for any income-producing properties.

(*f*) Projected annual revenue, expense, and cashflow statments for a 5-year period for all assets and liabilities proposed to be transferred or incurred by the institution, which include all holding costs, planned expenditures or other cash outlays by the institution.

(*g*) An opinion by legal counsel as to the following:

(*1*) Tax impact on the institution arising from the transaction.

(*2*) A statement that all legal requirements will be met, including the institution's authority to acquire and hold the proposed assets and to assume any related liabilities.

(*3*) A statement that good and marketable title will be received by the institution for any acquired asset.

(*4*) Likelihood of any due-on-sale provision or debt provision being triggered as a result of the transfer of any such debt to the institution.

(*h*) Evidence that any required state regulatory approvals have been obtained.

(*i*) A resolution by the institution's board of directrors authorizing the transaction.

(*j*) A copy of any proposed written agreements and any related documents.

(*k*) Any additional information requested by the Corporation.

(iv) The period for Corporation review of a proposed acquisition will commence upon the filing of a sufficient notice, as determined by the Corporation. The Corporation will send a letter acknowledging the filing of a sufficient notice or specify the reasons for any insufficiency. Following a determination of sufficiency, the Corporation may subsequently determine that additional information is required, and it may then issue a letter indicating the notice is insufficient. Upon the filing of additional information in an amendment to the notice, whether upon the initiative of the institution or at the direction of the Corporation, the period for Corporation review will recommence in its entirety.

(3) *Action by Corporation.* (i) Not later than the expiration of the 30-day review period, the Corporation may issue a letter indicating:

(*a*) Its disapproval of the proposed acquisition on any of the grounds provided in paragraph (d)(3)(iii) of this section; or

(*b*) Its intention not to disapprove the proposed acquisition, provided that it is consummated within one year and there is no material change in circumstances prior to the acquisition.

(ii) If the Corporation fails to issue a letter regarding a proposed acquisition by the expiration of the 30-day review period, the acquisition may be consummated within one year provided that there is no material change in circumstances prior to the acquisition.

(iii) The Corporation will not disapprove a proposed acquisition of non-cash asset for purposes of an institution's statutory-reserve calculations and regulatory net worth, where:

(*a*) The valuation of the non-cash asset is supported by an acceptable appraisal;

(*b*) The proposed acquisition is not projected to yield a negative return to the institution;

(*c*) The proposed acquisition is not likely to have a material adverse effect upon the institution's financial condition, business operations, or liquidity, and

(*d*) The institution has filed all required information.

(4) *Disclosure.* A notice, or any portion thereof, filed pursuant to this paragraph (d) shall be for the information of the Corporation and will not be made available except in accordance with the provisions of the Freedom of Information Act (5 U.S.C. 552), the Privacy Act of 1974 (5 U.S.C. 552a), and Parts 505 and 505a of this Chapter.

(5) *Waiver.* The Corporation may waive any information required by this paragraph (d) upon a showing of good cause.

(6) *Delegation of authority.*

The Director of the Office of Examinations and Supervision, or his designee, is authorized to act on behalf of the Corporation and the Board with respect to the exercise of any authority pursuant to this paragraph (d).

(e) *Failure to meet net-worth requirements.* * * *

(f) *Charging of losses to statutory reserves.* * * *

(g) Exemption relating to sale of mortgages. * * *

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 21

[Docket No. NM–2; Notice No. SC–83–1–NM]

Special Conditions; Avions Marcel Dassault-Breguet Aviation Model Mystere-Falcon 200

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for the Avions Marcel Dassault-Breguet Aviation Model Mystere-Falcon 200 airplane. The airplane will have novel or unusual design features associated with the unusually high operating altitude (49,000 feet) for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. This notice contains the safety standards which the Administrator finds necessary to reduce the likelihood of failures which could lead to cabin altitudes that exceed the protective capability of the oxygen equipment.

DATE: Comments must be received on or before June 16, 1983.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, Attention: Rules Docket (ANM–7), Docket No. NM–2, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, or delivered in duplicate to the Office of the Regional Counsel at the above address. Comments must be marked: Docket No. MN–2. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mark Quam, Regulations and Policy Office, ANM–110, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168; telephone (206) 764–7053.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and may be submitted in duplicate to the address specified above. All communications received on or before

VOL 48 ISS 85 MAY 2 1983 UMI

the closing date for comments will be considered by the Administrator before taking action on this proposal. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket, both before and after the closing date, for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM–2." The postcard will be date/time stamped and returned to the commenter.

Background

On October 3, 1978, Avions Marcel Dassault-Breguet Aviation (AMD–BA), 33 rue du Professeur Victor Pauchet, 92420 Vaucresson, France, filed an application for a type certificate in the transport category for the airplane now designated as the Avions Marcel Dassault-Breguet Aviation Model Mystere-Falcon 200. The Mystere-Falcon 200 is a derivative version of the AMD–BA Fan Jet Falcon series, for which FAA Type Certificate No. A7EU was issued, with two Garrett Model ATF3–6 engines and associated engine system changes, increased fuel capacity, increased weights, aerodynamic changes, system changes, and installation of an auxiliary power unit. Type certification of the Model Mystere-Falcon 200 was accomplished on July 6, 1982, as an amendment to Type Certificate No. A7EU in accordance with Subpart D of Part 21.

On June 30, 1982, AMD–BA filed an amended application for type certification to operate the Model Mystere-Falcon 200 up to a maximum altitude of 49,000 feet MSL. The June 30 application superseded a November 27, 1981, application relating to operation up to 45,000 feet.

High Altitude Operation

The FAA policy is to apply special conditions to Part 25-type transports when the certificated altitude exceeds the capability of the oxygen system (in this case, the passenger system). This has been the case for the early Learjet, Lockheed Jetstar, Aero Commander, and Cessna 650 (46 FR 35929 dated July 13, 1981). These same special conditions are proposed herein with the following exceptions:

The cabin altitude after failure may exceed the cabin altitude/time curve limits in Figures 3 and 4. Continuous flow passenger oxygen equipment is certificated for use up to 40,000 feet. However, for rapid decompressions above 34,000 feet, reverse diffusion leads to low oxygen partial pressures in the lungs to the extent a small percentage of passengers may lose useful consciousness at 35,000 feet. The percentage increases to an estimated 60 percent at 40,000 feet even with the use of the continuous flow system. To prevent permanent phisiological damage, the cabin altitude is not to exceed 25,000 feet for more than 2 minutes. The maximum cabin altitude has been set at 40,000 feet to agree with past FAA certification. In addition, at these altitudes the other aspects of decompression sickness have a significant, detrimental effect on pilot performance (for example, a pilot can be incapacitated by internal expanding gases). The limitations proposed herein differ from previously issued special conditions and are reflected by the changes to the notes proposed on Figures 3 and 4.

Decompression above the 37,000 foot limit of Figure 4 strains a person's physiological limits; therefore, every effort must be made to provide the pilot with adequate oxygen equipment to withstand these severe decompressions. Reducing the time interval between pressurization failure and the time the pilot receives oxygen will provide a safety margin against being incapacitated and can be accomplished by the use of mask-mounted regulators. Proposed Special Condition E., therefore, requires pressure demand masks with masks-mounted regulators for the flightcrew. This combination of equipment will provide the best practical protection for the failures covered by the special conditions and for improbable failures not covered by the special conditions, provided the cabin altitude is limited.

Type Certification Basis

The original certification basis for the AMD-BA Fan Jet Falcon was CAR 4b, effective December 31, 1953, Amendments 4b–1 through 4b–12; Special Regulation SR–422B; and the provisions of Part 25 of the Federal Aviation Regulations (FAR), Amendment 25–4, in lieu of CAR 4b.350 (e) and (f). For the Mystere-Falcon 200 certification, AMD–BA elected to voluntarily comply with numerous Part 25 requirements. The list of these requirements is contained in an FAA letter dated May 10, 1982. Avions Marcel Dassault-Breguet Aviation has filed an application for certification to operate the Model Mystere-Falcon 200 airplane up to a maximum altitude of 49,000 feet. The applicable airworthiness requirements do not contain adequate or appropriate safety standards for this feature; therefore, the special conditions which may be established as a result of this notice will form an additional part of the type certification basis for the Model Mystere-Falcon 200 airplane.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with §§ 21.17(a)(1) and 21.101(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of the airplane. Special conditions, as appropriate, are now issued after public notice in accordance with §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis in accordance with § 21.101.

List of Subjects in 14 CFR Part 21

Air transportation, Aircraft, Aviation safety.

Proposed Special Conditions

PART 21—[AMENDED]

Accordingly, the Federal Aviation Administration proposes the following special conditions for the Avions Marcel Dassault-Brequet Aviation Model Mystere-Falcon 200 airplane to be certificated for high altitude operation:

A. Pressure Vessel Integrity

1. The maximum extent of failure and pressure vessel opening that can be demonstrated to comply with Special Condition D. (Pressurization) must be determined. It must be demonstrated by crack propagation and fail-safe testing that a larger opening or a more severe failure than demonstrated will not occur in normal operations.

2. Inspection schedules and procedures must be established to assure that cracks and normal fuselage leak rates will not progress or that the pressurization system capability will not deterioriate to the extent that an unsafe condition could exist during normal operation.

3. With regard to the fuselage structural design for cabin pressure capability above 45,000 feet altitude, the following apply:

a. The pressure vessel structure, including doors and windows, must comply with CAR 4b.216(c)(3) using a factor of 1.67 in lieu of the 1.33 factor prescribed therein.

b. In addition to the requirements of CAR 4b.216(c)(3), the fuselage pressure vessel should be capable of withstanding maximum regulated pressure combined with 1 g. flight loads with a frame or stringer failed and two adjacent panels cracked, without total failure of the fuselage of floor collapse.

B. Ventilation

In lieu of the requirements of CAR 4b.371(a), the ventilation system must be designed to provide a sufficient amount of uncontaminated air to enable the crewmembers to perform their duties without undue discomfort or fatigue and to provide reasonable passenger comfort during normal operating conditions and also in the event of any probable failure of any system on the airplane which could adversely affect the cabin ventilating air. For normal operations, crewmembers and passengers must be provided with at least 10 cubic feet of fresh air per minute per person or the equivalent in filtered, recirculated air based on the volume and composition at the corresponding cabin pressure altitude of not more than 8,000 feet.

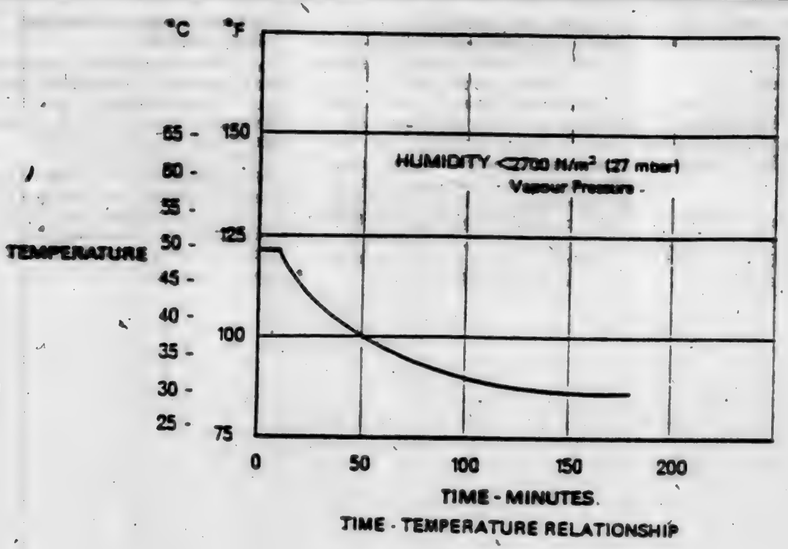
C. Air Conditioning

In additon to the requirements of CAR 4b.371 (b) through (e), the cabin cooling sustem must be designed to meet the following conditions during flight above 15,000 feet mean sea level (MSL):

1. After any probable failure, the cabin temperature-time history may not exceed the values shown in Figure 1.

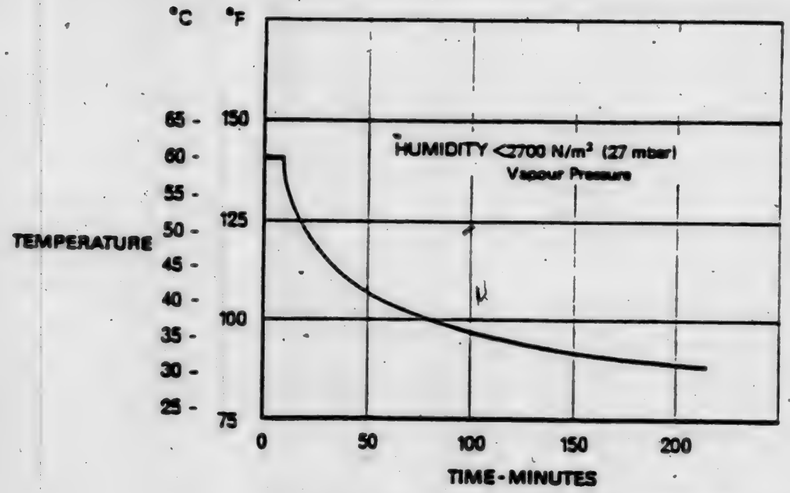
2. After any improbable failure, the cabin temperature-tme history may not exceed the values shown in Figure 2.

BILLING CODE 4910-13-M



TIME - TEMPERATURE RELATIONSHIP

FIGURE 1



MAXIMUM TIME-TEMPERATURE RELATIONSHIP

FIGURE 2

BILLING CODE 4910-13-C

D. Pressurization.

In addition to the requirements of CAR 4b.374 and 4b.375, the following apply:

1. The pressurization system must be capable of maintaining the following relationships between specific failure and cabin altitude-time histories:

a. The cabin altitude-time history may not exceed that shown in Figure 3 after each of the following:

(1) Any probable double failure in the pressurization system.

(2) Any single failure in the pressurization system combined with the occurrence of a leak produced by a complete loss of a door seal element, or a fuselage leak through an opening having an effective area 2.0 times the effective area which produces the maximum, permissible fuselage leak rate approved for normal operation, whichever produces a more severe leak.

b. The cabin altitude-time history may not exceed that shown in Figure 4 after each of the following:

(1) The maximum pressure vessel opening resulting from crack propagation for a period encompassing two normal inspection intervals. The initial crack must be at least one-half the local panel width in length. Mid-panel cracks and cracks through skin-stringer and skin-frame combinations must be considered.

(2) The pressure vessel opening resulting from probable damage, while under maximum operating cabin pressure differential, due to a tire burst, engine rotor burst, loss of antennas or stall warning vanes, or any probable equipment failure (bleed air, pressure control, air conditioning, electrical power source(s), etc.) that affects pressurization.

(3) Complete loss of thrust from all engines.

2. In showing compliance with paragraphs D.1.a. and b. of these special conditions, it may be assumed that an emergency descent is made in accordance with an approved emergency procedure. A 17-second crew recognition and reaction time must be applied between cabin altitude warning and the initiation of an emergency descent.

BILLING CODE 4910-13-M

For Figure 3, time starts at the moment cabin altitude exceeds 8,000 feet during depressurization. After depressurization, the maximum cabin altitude exceedance is limited to 30,000 feet. The maximum time the cabin altitude may exceed 25,000 feet is two minutes; time starting when the cabin altitude exceeds 25,000 feet and ending when it returns to 25,000 feet.

FIGURE 3
CABIN ALTITUDE - TIME HISTORY
(Supplemental oxygen available to all passengers.)

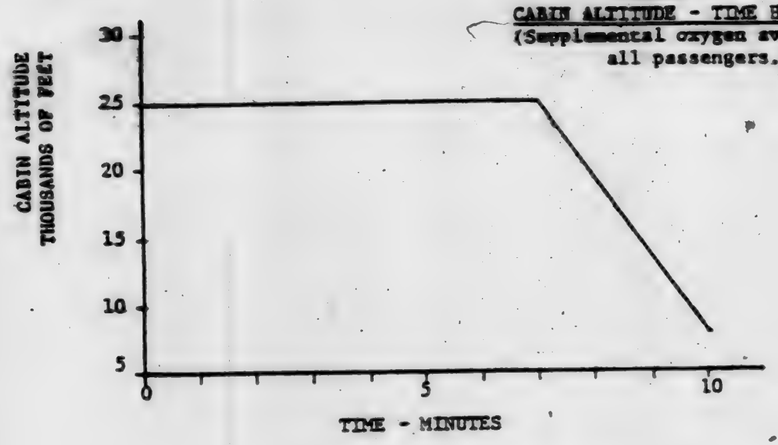


FIGURE 4
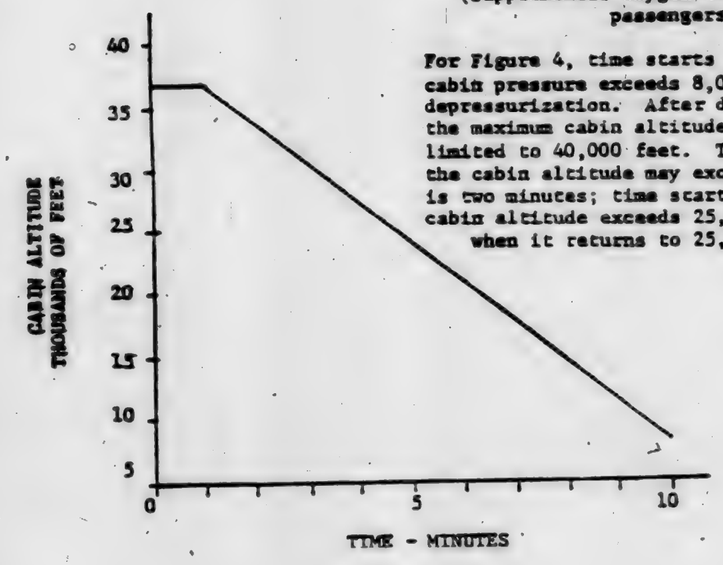
CABIN ALTITUDE - TIME HISTORY
(Supplemental oxygen available to all passengers.)

For Figure 4, time starts at the moment cabin pressure exceeds 8,000 feet during depressurization. After depressurization, the maximum cabin altitude exceedence is limited to 40,000 feet. The maximum time the cabin altitude may exceed 25,000 feet is two minutes; time starting when the cabin altitude exceeds 25,000 feet and ending when it returns to 25,000 feet.



E. Oxygen Equipment and Supply

In addition to the requirements of CAR 4b.651, the following apply: A pressure-demand oxygen system with quick-donning masks with mask-mounted regulators must be provided for the flightcrew. It must be shown that each quick-donning mask can, with one hand and within 5 seconds, be placed on the face from its ready position, properly secured, sealed, and supplying oxygen upon demand.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.28 and 11.29(b))

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and is not major as defined in Executive Order 12291. In addition, it has been determined under the criteria of the Regulatory Flexibility Act that this regulation, at promulgation, will not have a significant economic impact on a substantial number of small entities. The regulation affects only certain unusual or novel design features of one model series of airplanes. The regulation is necessary for safety and affects primarily the manufacturer who applied to the FAA for approval of these features on the airplane.

Issued in Seattle, Washington on April 8, 1983.

Wayne J. Barlow,
Acting Director,
Northwest Mountain Region.

14 CFR Part 21

[Docket No. NM-3; Notice No. SC-83-2-NM]

Special Conditions; Gates Learjet Corporation Model 55 Series Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for the Gates learjet Corporation Model 55 series airplane. The airplane will have novel or unusual design features associated with an automatic takeoff thrust control system (ATTCS) for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. This notice contains the safety standards which the Administrator finds necessary, because of these design features, to establish a level of safety equivalent to that established in the regulations.

DATE: Comments must be received on or before June 16, 1983.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, Attention: Rules Docket (ANM-7), Docket No. NM-3, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; or delivery in duplicate to the Office of the Regional Counsel at the above address. Comments must be marked: Docket No. NM-3. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James Walker, Regulations and Policy Office, ANM-110, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168; telephone (206) 764-7051.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory dockets or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on this proposal. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket, both before and after the closing date, for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM-3." The postcard will be date/time stamped and returned to the commenter.

Background

On November 19, 1982, Gates Learjet Corporation, P.O. Box 7707, Wichita, Kansas 67277, filed an application for an amendment to Type Certificate No. A10CE to include an Automatic Performance Reserve System (Automatic Takeoff Thrust Control System (ATTCS)) installation for approval under that type certificate covering the Model 55 series aircraft.

The Model 55 is a low wing, twin-engine, pressurized transport category airplane having a maximum takeoff weight of 21,000 pounds. The airplane is equipped with two AiResearch TFE-731-3A tubofan engines, each producing 3,700 pounds rated thrust, or, alternatively, TFE-731-3AR engines each rated at 3,880 pounds thrust. The higher rated -3AR engine is used in conjunction with the installation of an ATTCS The airplane has a maximum permissible altitude of 51,000 feet and total occupancy of 10 persons, including the crew.

The modification covered under the proposed amendment to the type certificate is the installation of an ATTCS. Automatic takeoff thrust control system special conditions issued to date for other airplanes require the ATTCS be designed to permit manual decrease or increase in thrust up to the maximum takeoff thrust approved for the airplane under existing conditions through the use of power levers. The ATTCS system installed on the engines of the Model 55 airplane contains an electronic fuel controller and thrust limiters which automatically limit thrust and prevent engine operating limits from being exceeded under conditions with full throttle employed. In the event of an engine failure, a signal from the ATTCS is transmitted to the limiters for the maximum thrust. In the event of an ATTCS failure with engine failure, the crew woud be required to activate an override switch to obtain the maximum thrust. Because of this design feature where the pilot must move his hand off the throttle to activate the maximum thrust available, the agency has determined that the special condition issued under item E.2.b. should provide that such activation is permitted providing that the means to increase thrust is located on or forward of the power levers, is easily operated by either pilot, and meets the requirements of § 25.777.

The type design of the Model 55 series airplane, with the automatic system installed, contains a number of novel or unusual design features for an airplane type certificated under the airworthiness requirements incorporated by reference in Type Certificate No. A10CE or under the applicable airworthiness requirements in effect on the date of application for change to that type certificate. In either case, the applicable airworthiness requirements do not contain adequate or appropriate safety standards. Special conditions are necessary to provide a level of safety equal to that established by the regulations incorporated by reference in

the type certificate and to support a finding by the Administrator that no feature or characteristic of the airplane with the automatic system installed makes it unsafe for the category in which certification is requested. These special conditions specify limits on the maximum thrust increment which may be applied to the operating engines by the ATTCS, prescribe system reliability and status monitoring requirements, require provisions for manual selection of the maximum takeoff thrust approved for the airplane under existing conditions, prohibit approval of the system if the automatic or manual application of maximum takeoff thrust would result in an engine operating limit being exceeded, and require the installation of an independent engine failure warning system if the inherent characteristics of the airplane do not provide a clear warning to the crew.

The FAA developed special conditions for an ATTCS for current turbine-powered transport category airplanes and sent the proposal to U.S. user groups and various foreign civil aviation authorities for review and comment in November 1977. Comments were received, reviewed, and the special conditions were revised and sent to the same groups in May 1978. This procedure was repeated again in November 1978. Cooperating with the FAA in this development were the Aerospace Industries Association of America (AIA), Air Transport Association of America (ATA), Air Line Pilots Association (ALPA), Allied Pilots Association (APA), Rolls Royce (RR), Hawker Siddeley Aviation Ltd. (HS), British Civil Aviation Authority (CAA), the civil aviation authorities of Australia and Japan, the French Technical Commission Navigation (FTCN), and the French civil aviation authorities, Lockheed, Boeing, McDonnell Douglas, and Rockwell International.

Based on the comments received and on further review by the FAA, a number of changes were made to the special conditions proposed. These provide for consideration of the following specific matters:

1. For the fail-operational (able to perform its intended function after a single failure or combination of failures not shown to be extremely improbable within the ATTCS system) system proposed, a reduction of the ATTCS failure probability from extremely improbable for the ATTCS alone, the addition of an extremely improbable failure probability for the combined ATTCS and engine failure, and deletion of the all engine performance criteria;

2. For the nonfail-operational system proposed, a reduction in the failure probability from improbable to 10-3 for the ATTCS alone, introduction of a climb gradient for the combined ATTCS and engine failure case, and deletion of an engine failure warning means if the inherent characteristics of the engine failure are clearly made known to the pilot; and

3. Clarifying changes, including a graphical presentation to clarify the definition of the term, "Critical Time Interval."

Type Certification Basis

The type certification basis for the Gates Learjet Model 55 series airplane with the ATTCS installed is Part 25 of the Federal Aviation Regulations (FAR) effective February 1, 1965, as amended by Amendments 25-2 and 25-4. In addition:

Amendments 25-3, 25-7, 25-10, 25-12, 25-18, 25-21, and 25-30; plus § 25.955(b)(2) of Amendment 25-11; § 25.954 of Amendment 25-14; §§ 25.803(e), 25.811(f), 25.853(a), 25.853(b), and 25.855(a) of Amendment 25-15; § 25.1359 of Amendment 25-17; § 25.785(c) of Amendment 25-20; §§ 25.251(c), 25.251(d), 25.251(e), 25.303, 25.305(b), 25.307(d), 25.331(a)(3), 25.335(b), 25.335(f),25.337(b), 25.349(b), 25.351(a), 25.363, 25.395(a), 25.395(b), 25.471(a)(1), 25.471(a)(2), 25.473, 25.493(b), 25.499(b), 25.499(c), 25.499(d), 25.509(a)(3), 25.561(b)(3), 25.581, 25.607, 25.615, 25.619, 25.625, 25.629, 25.677, 25.697, 25.699, 25.701, 25.721, 25.723, 25.725, 25.727, 25.729, 25.733, 25.735, 25.865, 25.867, 25.871, 25.903(d), 25.934, 25.994, 25.1103(d), 25.1143(e), 25.1303, 25.1307, 25.1331, and 25.1585(c) of Amendment 25-23; §§ 25.1013(e), 25.1305(c)(4), and 25.1305(c)(6) of Amendment 25-36; §§ 25.815, 25.1322, and 25.1403 of Amendment 25-38, and §§ 25.903(e), 25.939, and 25.943 of Amendment 25-40; § 25.255 of Amendment 25-42; § 25.1326 of Amendment 25-43; Part 36 effective December 1, 1969, as amended through Amendment 36-10; Special Federal Aviation Regulation (SFAR) 27 effective February 1, 1974, as amended through Amendment SFAR 27-2; Special Conditions 25-99-CE-14; and the special conditions contained herein.

Special conditions may be issued and amended, as necessary, as a part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of novel or unusual design features of the airplane. Special conditions, as appropriate, are now issued after public notice, in accordance with §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis in accordance with § 21.101.

Air transportation, Aircraft, Aviation safety.

Proposed Special Conditions

PART 21—[AMENDED]

Accordingly, the Federal Aviation Administration proposes the following special conditions for the Gates Learjet Model 55 series airplane equipped with an automatic takeoff thrust control system (ATTCS):

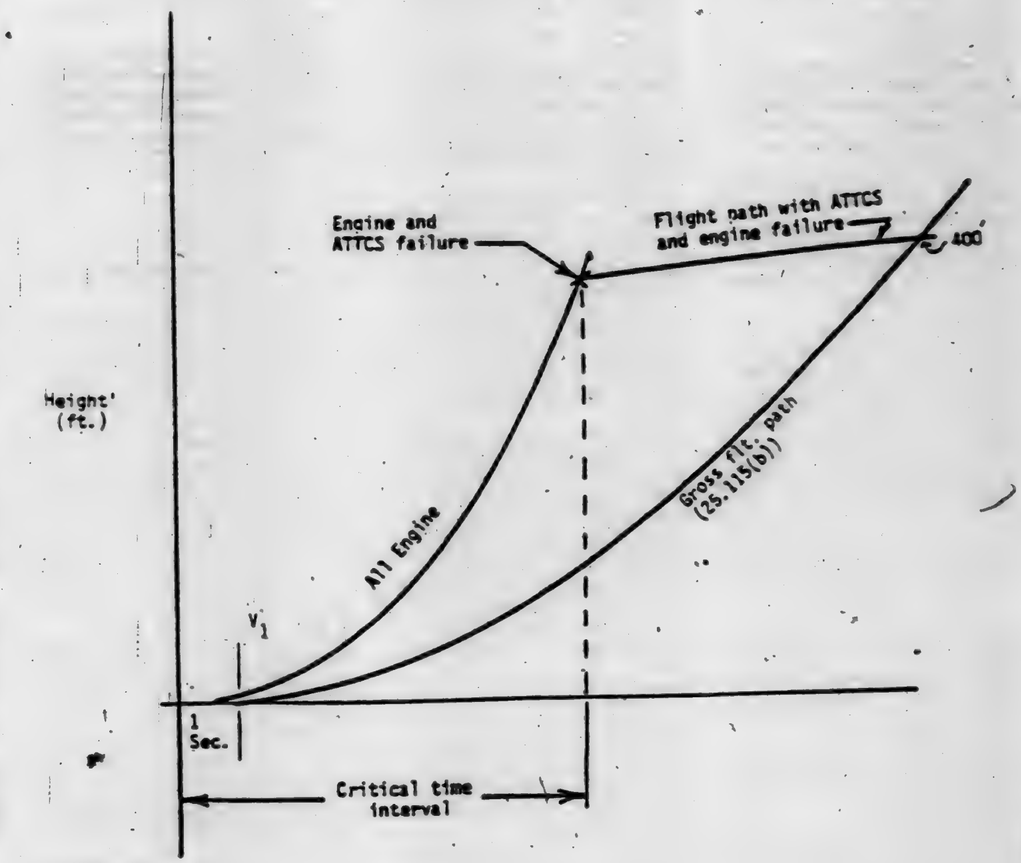
A. *General.* With the ATTCS and associated systems functioning normally as designed, all applicable requirements of Part 25, except as provided in these special conditions, must be met without requiring any action by the crew to increase thrust.

B. *Definitions.*

1. ATTCS. An ATTCS is defined as the entire automatic system used on takeoff, including all devices, both mechanical and electrical, that sense engine failure, transmit signals, actuate fuel controls or power levers on operating engines to achieve scheduled thrust increase, and furnish cockpit information on system operation.

2. Critical Time Interval. When conducting an ATTCS takeoff, the critical time interval between V1 minus 1 second and a point on the minimum performance, all-engine flight path where, assuming a simultaneous engine and ATTCS failure, the resulting minimum flight path thereafter intersects the Part 25 required gross flight path at no less than 400 feet from the takeoff surface. This definition is shown in the following graph:

BILLING CODE 4910-13-M



BILLING CODE 4910-13-C

3. Takeoff Thrust. Notwithstanding the definition of "takeoff thrust" in Part 1 of the Federal Aviation Regulations (FAR), "takeoff thrust" means each thrust obtained from each initial thrust setting approved for takeoff under these special conditions.

C. *Performance Requirements.* The applicant may elect to comply with the performance requirements contained in either paragraph 1. or 2. as follows:

1. The following reliability and performance criteria apply:

a. An ATTCS system failure during the critical time interval must be shown to be improbable.

b. The concurrent existence of an ATTCS failure and engine failure during the critical time interval must be shown to be extremely improbable.

c. All applicable performance requirements of Part 25 must be met with an engine failure occurring at the most critical point during takeoff with the ATTCS system functioning.

2. If compliance is not shown with the criteria given in paragraph 1. of this special condition, the following apply:

a. An ATTCS system failure during the critical time interval must be shown to have a probability of failure of 10^{-3} or less.

b. The concurrent existence of an ATTCS failure and engine failure during the critical time interval must be shown to be extremely improbable.

c. All applicable performance requirements of Part 25 must be met with an engine failure occurring at the most critical point during takeoff with the ATTCS system functioning.

d. The takeoff runway length required shall be the greater of:

(1) The accelerate-stop distance determined under § 25.109 with initial takeoff thrust setting and with the ATTCS operating;

(2) The horizontal distance along the takeoff path from the start of takeoff to the point at which the airplane is 35 feet above the takeoff surface, determined under § 25.113 with one engine failed and the ATTCS operating at the most critical point during takeoff;

(3) The horizontal distance along the takeoff path from the start of takeoff to the point at which the airplane is 15 feet above the takeoff surface with one engine and the ATTCS failed at the most critical point during takeoff; or

(4) One hundred fifteen (115) percent of the horizontal distance along the takeoff path, with all engines operating at the initial takeoff thrust setting, from the start of takeoff to the point at which the airplane is 35 feet above the takeoff surface as determined by a procedure consistent with § 25.111.

e. With the initial takeoff thrust set as described in Special Condition D. (Thrust Setting), the critical engine inoperative, the ATTCS system failed, and without moving the power lever on the remaining engine, the airplane must:

(1) Have a positive gross climb gradient at all points in the takeoff path (procedures consistent with § 25.111 must be used); and

(2) Have an available gradient of climb of not less than 1.0 percent determined in accordance with § 25.121(b).

f. The gradient of climb used to determine the takeoff path required by § 25.1587 may not be greater than:

(1) The net gradient determined in accordance with § 25.115(b) with the ATTCS functioning; or

(2) The gross gradient available resulting from the configuration of Special Condition C.2.e.

D. *Thrust Setting.* The initial takeoff thrust set on each engine at the beginning of the takeoff roll may not be less than:

1. Ninety (90) percent of the thrust level set by the ATTCS (the maximum takeoff thrust approved for the airplane under existing conditions);

2. That required to permit normal operation of all safety-related systems and equipment dependent upon engine thrust or power lever position; or

3. That shown to be free of hazardous engine response characteristics when thrust is advanced from the initial takeoff thrust level to the maximum approved takeoff thrust.

E. Powerplant Controls

1. In addition to the requirements of § 25.1141, no single failure or malfunction, or probable combination thereof, of the ATTCS system, including associated systems, may cause the failure of any powerplant function necessary for safety.

2. The ATTCS must be designed to:

a. Apply thrust on the operating engine, following an engine failure during takeoff, to achieve the selected takeoff thrust without exceeding engine operating limits;

b. Permit manual decrease or increase in thrust up to the maximum takeoff thrust approved for the airplane under existing conditions through the use of the power lever, except that for aircraft equipped with limiters that automatically prevent engine operating limits from being exceeded under existing conditions, other means may be used to increase the maximum level of thrust controlled by the power levers in the event of an ATTCS failure, provided the means is located on or forward of the power levers, is easily identified and operated under all operating conditions by a single action of either pilot with the hand that is normally used to actuate the power levers, and meets the requirements of § 25.777, paragraphs (a), (b), and (c).

c. Provide a means to verify to the flightcrew prior to takeoff that the ATTCS is in a condition to operate; and

d. Provide a means for the flightcrew to deactivate the automatic function. This means must be designed to prevent inadvertent deactivation.

F. Powerplant Instruments

In addition to the requirements of § 25.1305:

1. A means must be provided to indicate when the ATTCS is in the armed or ready condition; and

2. If the inherent flight characteristics of the airplane do not provide adequate warning that an engine has failed, a warning system that is independent of the ATTCS must be provided to give the pilot a clear warning of any engine failure during takeoff.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.28 and 11.29(b))

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and is not major as defined in Executive Order 12291. In addition, it has been determined under the criteria of the Regulatory Flexibility Act that this regulation, at promulgation, will not have a significant economic impact on a substantial number of small entities. The regulation affects only certain unusual or novel design features of one model series of airplanes. The regulation is necessary for safety and affects primarily the manufacturer who applied to the FAA for approval of these features on the airplane.

Issued in Seattle, Washington, on April 12, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83-ACE-08]

Transition Area—Lake Winnebago, Missouri Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to designate a 700-foot transition area at Lake Winnebago, Missouri, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Lake Winnebago, Missouri, Airport utilizing the Napoleon, Missouri, VORTAC as a navigational aid. This proposed action will change the airport status from VFR to IFR.

DATES: Comments must be received on or before June 4, 1983.

ADDRESS: Send comments on the proposal to: Federal aviation Administration, Manager, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-530, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Operations, Procedures and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dwaine Hiland, Air Traffic Division, ACE-532, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374-3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedures and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106 or by calling (816) 374-3408.

Communications must identify the notice number of this NPRM. persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) by designating a 700-foot transition area at Lake Winnebago, Missouri. To enhance airport usage, a new instrument approach procedure is being developed for the Lake Winnebago, Missouri, Airport utilizing the Napoleon VORTAC as a navigational aid. This navigational aid will provide new navigational guidance for aircraft utilizing the airport. The establishment of a new instrument approach procedure based on this navigational aid entails designation of a transition area at Lake Winnebago, Missouri, at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and enroute environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR). This action will change the airport status from VFR to IFR.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71), by designating the following transition area:

Lake Winnebago, Missouri

That airspace extending upwards from 700 feet above the surface, within a 6-mile radius of the Lake Winnebago Airport (Latitude 34°48'51"N; Longitude 94°16'37"W), and within 3 miles each side of the Napoleon, Missouri VORTAC 207° radial extending from the airport to 6 miles northeast, excluding that portion that overlies Lee's Summit, Missouri, McComas Airport 700-foot Transition Area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Kansas City, Missouri, on April 18, 1983.

John E. Shaw,

Director, Central Region.

[FR Doc. 83-11468 Filed 4-29-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 83-ASW-22]

Proposed Designation of Transition Area; Jena, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration proposes to designate a transition area at Jena, LA. The intended effect of the proposed action is to provide controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the Jena Airport. This action is necessary since a nonfederal nondirectional radio beacon (NDB) will be established approximately 4 nautical miles south of the airport and a SIAP to Runway 35 will be possible. Coincident with the action, the airport will be changed from visual flight rules (VFR) to instrument flight rules (IFR).

DATES: Comments must be received on or before June 3, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedure Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8 a.m. and 4:30 p.m. The FAA Rules Docket is located in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch, ASW-535, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O.

Box 1689, Fort Worth, TX 76101; telephone: (817) 877–2630.

SUPPLEMENTARY INFORMATION:

History

Federal Aviation Regulation Part 71, Subpart G § 71.161 as republished in Advisory Circular AC 70–3A dated January 3, 1983, contains the description of transition areas designated to provide controlled airspace for the benefit of aircraft conducting instrument flight rules (IFR) activity. Designation of the transition area at Jena, LA, will necessitate an amendment to this subpart. This amendment will be required at Jena, LA, since there is a proposed SIAP to Runway 35 at the Jena Airport, using a nonfederal NDB located approximately 4 nautical miles south of the airport.

Comments Invited

Interested persons are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. (Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals.) Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASW–22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, or by calling (817) 877–2630. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should contact the office listed above.

Control zones, Transition areas.

Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend § 71.161 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Jena, LA [New]

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Jena Airport (latitude 31°40'15" N., longitude 92°09'30" W.) and within 3.5 miles each side of the 181° bearing of the Hemphill Creek NDB (latitude 31°36'20" N., longitude 92°09'33" W.) extending from the 5-mile radius area to 10.5 miles south of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979; and (3) does not warrant preparation of a regulatory evaulation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on April 21, 1983.

Richard L. Failor,

Acting Director, Southwest Region.

14 CFR Part 71

[Airspace Docket No. 83-ACE-09]

Control Zone and Transition Area, Columbus, Nebraska; Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to alter the control zone and the 700-foot transition area at Columbus, Nebraska, to provide additional controlled airspace for aircraft executing a new instrument approach procedure being developed for the Columbus Municipal Airport, Columbus, Nebraska, utilizing the Columbus VOR as a navigational aid.

DATES: Comments must be received on or before June 4, 1983.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE–530, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Operations, Procedures and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dale L. Carnine, Air Traffic Division, ACE–532, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views of arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedures and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106 or by calling (816) 374–3408. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering amendments to Subpart F, § 71.171 of the Federal Aviation Regulations (14 CFR 71.171) and Subpart G, § 71.161 of the Federal Aviation Regulations (14 CFR 71.161), by altering the control zone and 700-foot transition area at Columbus, Nebraska. To enhance airport usage, an instrument approach procedure is being developed to serve Runway 32 at the Municipal Airport, Columbus, Nebraska, utilizing the Columbus VOR as a navigational aid. The establishment of this instrument approach procedure entails alteration of the control zone and 700-foot transition area at Columbia, Nebraska, within which aircraft are provided additional air traffic control service. Control zones are designed to contain IFR operations in controlled airspace to the surface around airports within a specified radius and along the final approach course of the IAPs. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation while transiting between the terminal and enroute environment. The intended effect of this action is to ensure segregation of aircraft using this approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas.

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by altering the following control zone:

Columbus, Nebraska

Within a 5-mile radius of the Columbus Municipal Airport (latitude 41°26'50"N, longitude 97°20'22"W); and within 3 miles each side of the 156° radial of the Columbus VOR extending from the 5-mile radius zone to 10 miles southeast of the VOR; and within 3 miles each side of the 312° radial of the Columbus VOR extending from the 5-mile radius zone to 6.5 miles northwest of the VOR; and within 4 miles each side of the 329° bearing from the Columbus Airport extending from the 5-mile radius zone to 12 miles northwest of the airport. This control zone shall be effective during the times established by a Notice to Airmen or as published in the Airport/Facility Directory.

Additionally, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.161 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by altering the following transition area:

Columbus, Nebraska

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Columbus Municipal Airport (latitude 41°26'50"N, longitude 97°20'22"W); and within 4.75 miles each side of the 156° radial from the Columbus VOR extending from the 6.5 mile radius area to 11 miles southeast of the VOR; and within 3 miles each side of the 312° radial from the Columbus VOR extending from the 6.5-mile radius area to 6.5 miles northwest of the VOR; and within 4.5 miles each side of the 329° bearing from the Columbus Airport extending from the 6.5-mile radius area to 12 miles northwest of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65))

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Kansas City, Missouri, on April 19, 1983.

[Airspace Docket No. 83-AWA-10]

Proposed Alteration of VOR Federal Airways Minneapolis, MN, Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to realign a segment of VOR Federal Airway V–161, establish a new segment of V–246, renumber V–410 and V–347, and revoke V–418 to enhance the traffic flow within the Minneapolis Air Route Traffic Control Center's area.

DATES: Comments must be received on or before June 13, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Great Lakes Region, Attention: Manager, Air Traffic Division, Docket No. 83–AWA–10, Federal Aviation Administration, 2300 East Devon, Des Plaines, IL 60018.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Boyd Archer, Airspace Regulations and Obstructions Branch (AAT–230), Airspace—Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, enviromental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–AWA–10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to realign V–161 between Gopher, MN, and Rochester, MN; renumber V–410 between Gopher, MN, and Eau Claire, WI, to V–413; renumber V–347 between Ironwood, MI, to Houghton, MI, to V–148; revoke V–418 from Gopher, MN, to Nodine, MN; and establish an airway from Nodine, MN, to FALAR INT to Waukon, IA, to enhance the traffic flow within the Minneapolis Air Route Traffic Control Center's area. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Airways, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (41 CFR Part 71) as follows:

1. V–161 [Amended]

By deleting the words "INT Rochester 005° and Gopher, MN, 144° radials, Gopher" and substituting for them the words "Farmington, MN; Gopher, MN"

2. V–410, V–418, and V–347 are revoked.

3. V–413 [Amended].

By inserting the words "Eau Claire, WI; INT Eau Claire 269° and Gopher, MN, 109° radials;" after the word "From"

4. V–148 [Amended]

By deleting the words "to Ironwood, MI" and substituting for them the words "Ironwood, MI; to Houghton, MI"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on April 20, 1983.

B. Keith Potts,

Manager, Airspace—Rules and Aeronautical Information Division.

[Airspace Docket No. 83-ACE-07]

Transition Area—Stockton, Missouri; Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to designate a 700-foot transition area at Stockton, Missouri, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Stockton, Missouri, Airport utilizing the Springfield, Missouri, VORTAC as a navigational aid. This proposed action will change the airport status from VFR to IFR.

DATE: Comments must be received on or before June 4, 1983.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE–530, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

The official docket may be examined at the Office of the Regional Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Operations, Procedures and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dwaine Hiland, Air Traffic Division, ACE–532, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in duplicate to the Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this notice be may changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Operations, Procedures and Airspace Branch, 601 East 12th Streeet, Kansas City, Missouri 64106 or by calling (816) 374–3408.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) by designating a 700-foot transition area at Stockton, Missouri. To enhance airport usage, a new instrument approach procedure is being developed for the Stockton, Missouri, Airport utilizing the Springfield VORTAC as a navigational aid. This navigational aid will provide new navigational guidance for aircraft utilizing the airport. The establishment of a new instrument approach procedure based on this navigational aid entails designation of a transition area at Stockton, Missouri, at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during portions of the terminal operation and while transiting between the terminal and enroute environment. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR). This action will change the airport status from VFR to IFR.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71), by designating the following transition area:

Stockton, Missouri

That airspace extending upwards from 700 feet above the surface within a 5-mile radius of the Stockton Airport (Latitude 37°39'37"N; Longitude 93°49'07"W) and within 3 miles either side of the Springfield, Missouri VORTAC 308° radial extending from the center of the 5-mile radius area to 5.5 miles southeast of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 135(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65)

Note:—The FAA has determined that this proposed regulation only involves and established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Kansas City, Missouri, on April 18, 1983.

John E. Shaw,

Acting Director, Central Region.

BILLING CODE 4910-13-M

Coast Guard

33 CFR Part 117

[CGD 83-04]

Drawbridge Operation Regulations; Kennebunk River, Kennebunk/Kennebunkport, Maine

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the Maine Department of Transportation the Coast Guard is considering amending the operating regulations for the drawspan between Kennebunk and Kennebunkport. The number of drawspan openings has decreased significantly during the last few years. There is no commercial activity and no significant recreational use of the river above the drawspan. There are no foreseeable prospects for the development of the upriver area. The proposed amendment may provide for the reasonable needs of navigation.

DATE: Comments must be received on or before June 13, 1983.

ADDRESS: Comments should be submitted to and will be availebe for examination at the Office of the Commander, First Coast Guard District (obr), 150 Causeway Street, Boston, Massachusetts 02114.

FOR FURTHER INFORMATION CONTACT: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, Boston, MA. 02114 (617–223–0645).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their name and address, identify the bridge and give reasons for concurrence with or any recommended changes in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a stamped, self-addressed envelope or postcard.

The Commander, First Coast Guard District will evaluate all comments received and decide on the final course of action. The proposed regulations may be changed in light of comments received.

Drafting Information: The principal persons involved in drafting this proposal are: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, and Lieutenant Susan M. Krupanski, Project Attorney, Assistant Legal Officer, First Coast Guard District.

Discussion of the Proposed Regulation

Most marine activity on the Kennebunk River occurs below the drawspan. Upriver there may be an occasional private dock but generally the river is peaceful and undisturbed. This is borne out by the fact that in the past few years there has been a significant decrease in the number of openings of the drawspan. The total yearly openings have decreased from 228 in 1974 to one in 1981. The decrease is due primarily to the closing of the boatyard which was located above the drawbridge. In view of the limited number of openings and the fact that there are no foreseeable prospects for the development of the upper river, the proposed amendment would seem to provide for the reasonable needs of navigation. The proposed amendments have been reviewed under provisions of Executive Order 12291 and have been determined not to be a major rule. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). As explained above, an economic evaluation has not been conducted. In accordance with section 605(b) of the Regulatory Flexibility Act (94 Stat. 1167), it is also certified that these rules will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

PART 117—[AMENDED]

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33 of the Code of Federal Regulations by revising paragraph (a) of § 117.28 to read as follows:

§ 117.28 Kennebunk River, Maine Dock Square Highway Bridge between Kennebunk and Kennebunkport, Maine

(a) The draw shall be opened promptly on signal for the passage of vessels between the hours of 7 a.m. and 5 p.m. (local time) from April 15 through October 15. At other hours during this period the draw need not be opened except on advance notice given to the drawtender during hours he is on duty. At dates other than those specified above, the draw need not be opened for the passage of vessels unless 24 hours advance notice is given in person, in writing or by telephone to the Maine Department of Transportation, Division office, Scarborough, Maine.

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Part 61

Procedures for Approved State and Local Government Historic Preservation Programs

AGENCY: National Park Service, Interior.

ACTION: Proposed rules with request for comments.

SUMMARY: Proposed rules incorporate the requirements for State and local historic preservation programs as specified in the National Historic Preservation Act as amended in 1980 (the Act). The title and organization of the existing 36 CFR Part 61 are revised to reflect changes required by the 1980 amendments to the Act.

These rules establish regulations for approval of State historic preservation programs. The rules also establish procedures for Historic Preservation Fund (HPF) matching grants-in-aid to approved State programs. The rulemaking will establish, for the first time, a process by which local governments will be certified to participate formally in the national historic preservation program. Proposed rules also set forth procedures for the transfer of a portion of each State's annual HPF grant to certified local governments.

DATES: Comments must be received on or before July 1, 1983.

ADDRESS: Send comments to: Lawrence E. Aten, Chief, Interagency Resource Management Division, U.S. Department of the Interior, National Park Service, Washington, D.C. 20240 (202–272–3706).

FOR FURTHER INFORMATION CONTACT: Steven Sheffield, Interagency Resource Management Division (202–343–9513).

SUPPLEMENTARY INFORMATION: This proposed rulemaking was necessitated by enactment of the National Historic Preservation Act Amendments of 1980, Pub. L. 96–515, on December 12, 1980.

The National Historic Preservation Act, as amended (the Act) specifies basic requirements for approval of State historic preservation programs. The requirements and responsibilities listed in the Act are incorporated into this rulemaking. Procedures also are included in these rules for Historic Preservation Fund (HPF) matching grants-in-aid to approved State programs; matching grants are made in accordance with the HPF Grants Management Manual.

Section 101(b)(2) of the Act requires the Secretary of Interior (the Secretary) to conduct performance evaluations of State historic preservation programs. Procedures and standards for these evaluations will be forthcoming.

Since enactment of the National Historic Preservation Act of 1966, the historic preservation expertise and activities of local governments have significantly increased. The Act, however, provided no opportunity for local governments to be involved formally in the National historic preservation program administered by the Department of the Interior's National Park Service (NPS). Lack of formal participation by local governments often meant that historic preservation issues were not considered until development planning was well underway. This often resulted in preservation/land development conflicts causing project delays and increasing costs. In addition, opportunities frequently were lost for preservation-oriented development that could satisfy both preservation and development goals.

In recognition of the need to involve local governments in historic preservation, the 1980 amendments to the Act provided a specific rule for local governments in the national program. The Secretary is required by the Act to develop regulations for the certification of local governments and for the allocation of Historic Preservation Fund (HPF) monies by States to certified local governments (CLGs). To qualify for certification, the Act specifies that local governments must have certain administrative and legal capacities. The Act directs States with approved State historic preservation programs to develop a mechanism for the certification of qualified local governments. Section 103(c) of the Act directs States to provide for the transfer of at least ten percent of the State's annual HPF grant to certified local governments.

Once certified, a local government will be included in the process of nominating properties to the National Register of Historic Places and will be eligible to apply to the State for a share of the State's annual HPF allocation. The Secretary and/or the States may amplify the requirements set forth in the Act to reflect particular State and local government concerns.

The proposed rules provide States with a framework on which to base development of procedures for local certification and funds transfer. The approach set forth by the Secretary in these rules gives States the primary responsibility to develop these procedures. This approach is consistent with intent of the Act. These rules strengthen the existing historic preservation system by extending to local governments the opportunity to be directly involved in the National program for the identification, evaluation, and protection of historic properties.

The Secretary intends to have the rules for local certification and funds transfer provide flexibility to meet the needs of communities throughout the country. States will be given the primary responsibility for establishing both certification mechanisms and procedures for transferring HPF grant funds as subgrants to certified local governments. The Secretary will exercise his authority through review and approval of the processes for local certification and grant funds transfer developed by each State.

The rules establish the criteria by which the Secretary will review State processes for local certification. These rules are minimum requirements and are derived from the Act to insure the State processes conform to the statutory intent of the Act. States may amplify these requirements to reflect State and local government program concerns. The proposed rules also establish criteria by which the Secretary will review State procedures for the transfer of HPF monies to certified local governments. These criteria insure consistency and accountability in fiscal management and are intended to insure that no local government receives a disproportionate share of the funds available. States will use the Secretary's rules to design and implement certification and funds transfer processes that achieve the purposes of the Act.

More prescriptive regulations were considered; however, the Secretary concluded that the varying preservation needs and capabilities of communities make it inappropriate for the Federal government to dictate a set of procedures to which all local governments must adhere. States have latitude to set priorities for allocating the CLG share of their annual HPF grant.

To insure that the intent of the Act is satisfied, the Secretary's rules will establish minimum requirements and the Secretary will review and approve the certification and funding processes developed by each State to implement local certification and funds transfer.

The Secretary also is required by the Act to issue rules for the certification of local governments in States that do not have an approved historic preservation program. Because all States now operate approved programs and there is no practical need for such rules, they have not yet been prepared.

As required by section 101(c)(1) of the National Historic Preservation Act, States will be required to develop procedures for the certification of local governments and for the transfer of funds to local governments. Because the District of Columbia is an approved State program and there are no subordinate local governments in the District, it is exempted from this local certification requirement. If a territory believes that its political subdivisions lack authorities similar to those of local governments in other States and hence cannot satisfy the requirements for local certification, it may apply to the Secretary for exemption from the local certification requirement.

These rules require States to propose local certification and funds transfer processes and specify schedules for submission of State proposals and for the Secretary's review and approval. In developing their proposals, States are required to analyze local preservation needs and capabilities, consult with local governments, local historic preservation commissions and other interested parties, and assess the capabilities of different types of local governments in the State.

Once its proposal is approved by the Secretary, a State may begin to certify local governments. States will notify the Secretary and forward to the Secretary copies of all certification requests approved according to the State's DOI approved certification process. If the Secretary does not take exception to the request within a specified period, the local government is to be considered certified by the Secretary. In addition, transfer of HPF financial assistance in accordance with the approved process may begin. The Secretary will review the functioning of State certification and funds transfer processes during performance evaluations and audits of approved State programs that are required by section 101(b)(2) of the Act.

Classification: These rules are not substantive and deal with procedural aspects of the State and local historic preservation programs. In accordance with Executive Order 12291, the Department of the Interior has determined that these rules are not major. The rules will not require States to assume significant additional costs. Local government certification under these rules is strictly voluntary. Additional expenses that may be incurred by local governments will be a result of their decision to seek certification. In accordance with the Regulatory Flexibility Act, the Department of the Interior has determined that these rules will not have a significant economic effect on a substantial number of small entities. Small governmental jurisdictions are the only small entities that may be affected by these rules. Additional expenses that may be incurred by small governments will be the result of their decision to seek certification. This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et. seq.*

Regulatory Analysis: Not required for this rulemaking.

Environmental Impact Statement: This regulation does not significantly impact the environment. Because these rules have to do with procedural aspects of State and local historic preservation programs and have no impact on the environment, an Environmental Impact Statement is not required.

The originator of these procedures is Lawrence A. Finfer, Historian, Interagency Resource Management Division (202/272–3708).

(National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 *et seq.*)

List of Subjects in 36 CFR Part 61

Grant programs—natural resources, Historic preservation.

Dated: January 4, 1983.

J. Craig Potter,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

For the reasons set out above, 36 CFR Part 61 is proposed to be amended as follows:

—The title of Part 61 is changed to "Procedures for Approved State and Local Government Historic Preservation Programs."

—Section 61.1 Definitions is revised and redesignated as §61.2. A new section is added and designated as §61.1 Authorization.

—Section 61.2 Designation and responsibilities of the State Historic Preservation Officer is revised and redesignated as §61.3 Approved State Programs.

—Section 61.3 State Professional Staff is incorporated into §61.3 Approved State Programs.

—Section 61.4 State Review Board is incorporated into §61.3 Approved State Programs. A new section is added and designated as §61.4 Approved Local Programs.

—Section 61.5 Professional Qualifications is redesignated as *Appendix A* Professional Qualifications. A new section is added and designated as §61.5 Grants to Approved State Programs.

—Section 61.6 Comprehensive statewide survey process is deleted. Standards and guidelines on statewide surveys will be forthcoming from the Secretary as an appendix to these rules.

—Section 61.7 State Historic Preservation Plans is deleted. Standards and guidelines on comprehensive historic preservation planning will be forthcoming from the Secretary as an appendix to these rules.

—Section 61.8 Protection of Historic Properties Through the Planning Process is deleted.

36 CFR Part 61 is proposed to be revised to read as set forth below:

PART 61—PROCEDURES FOR APPROVED STATE AND LOCAL GOVERNMENT HISTORIC PRESERVATION PROGRAMS

Sec.
61.1 Authorization.
61.2 Definitions.
61.3 Approved State programs.
61.4 Approved local programs.
61.5 Grants to approved State programs.
61.6 Transfer of grants to certified local governments.
61.7 Waiver.
Appendix A—Professional Qualifications Standards
Appendix B—Historic Preservation Planning Standards (Reserved)
Appendix C—Survey Standards (Reserved)
Appendix D—State Program Performance Evaluation Standards (Reserved)

Authority: National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 *et seq.*

§61.1 Authorization.

The National Historic Preservation Act of 1966, 16 U.S.C. 470 *et seq.*, as amended:

(a) Requires the Secretary of the Interior (Secretary) to promulgate regulations for:

(1) Approving State historic preservation programs;

(2) Certifying local governments to carry out the purposes of the Act;

(3) The allocation by States of a share of the grants received by the States under the Act to certified local governments (CLGs);

(b) Directs the Secretary to conduct performance evaluations of State programs periodically;

(c) Directs the Secretary to administer a program of matching grants-in-aid to the States for historic preservation projects and programs approved by the Secretary;

(d) Requires the Secretary to establish guidelines for the use and distribution of funds transferred to local governments to insure that no local government receives a disproportionate share of the funds available; and

(e) Requires the Secretary to make information available concerning

VOL

UMI

professional methods and techniques for the preservation of historic properties and the administration of historic preservation programs.

§61.2 Definitions.

As used in this part:

(a) "National Park Service" means the bureau of the Department of the Interior to which the Secretary of the Interior has delegated the authority and responsibility for administering the National Historic Preservation Program.

(b) "Historic Preservation Fund" means the program of matching grants-in-aid to the States for historic preservation programs, as authorized by Sec. 101(d)(1) of the National Historic Preservation Act.

(c) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territories of the Pacific Islands.

(d) "State Historic Preservation Officer" is the official within each State who has been designated and appointed by the Governor to administer the State historic preservation program in the State.

(e) "State Program" means the State historic preservation program in the State.

(f) "Approved State program" means a State historic preservation program that has been approved by the Secretary of the Interior in accordance with Sec. 101(b) of the National Historic Preservation Act. All State programs will be treated as approved programs until December 12, 1983, unless specifically disapproved by the Secretary before that time.

(g) "HPF Grants Management Manual" means the manual that sets forth NPS administrative policies, procedures, and guidelines for Historic Preservation Fund grants-in-aid and which serves as a basic reference for those who are engaged in the administrative and financial management of HPF grants.

(h) "Subgrantee" means the agency, institution, organization or individual to which a subgrant is made by the State and which is accountable to the State for use of the funds provided.

(i) "Local government" means a city, county, parish, township, municipality, or borough, or any other general purpose political subdivision of any State.

(j) "Certified local government" means a local government that has been certified to carry out the purposes of the National Historic Preservation Act in accordance with section 101(c) of the Act.

(k) "Chief elected local official" means the elected head of a local government.

(l) "National Register of Historic Places" means the national list of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, engineering, and culture, maintained by the Secretary of the Interior under authority of section 101(a)(1)(A) of the National Historic Preservation Act.

(m) "CLG share" means the funding authorized for transfer to local governments in accordance with section 103(c) of the National Historic Preservation Act.

(n) "Comprehensive historic preservation planning" means an ongoing process for resource management that is consistent with technical standards issued by the Department of the Interior and which produces reliable, understandable, and up-to-date information for decisionmaking related to the identification, evaluation, and protection/treatment of historic resources.

(o) "Historic preservation review commission" means a board, council, commission, or other similar collegial body which is established in accordance with § 61.4(c)(2) of these rules.

§ 61.3 Approved State Programs.

(a) A State Historic Preservation Officer (SHPO) shall be appointed by the Governor to administer the State historic preservation program.

(b) It shall be the responsibility of the SHPO to:

(1) Direct and conduct a comprehensive statewide survey of historic properties and maintain an inventory of such properties;

(2) Identify and nominate eligible properties to the National Register of Historic Places and administer other applications for the National Register;

(3) Prepare and implement a comprehensive statewide historic preservation planning process;

(4) Administer the State program of Federal assistance for historic preservation within the State;

(5) Advise and assist Federal, State, and local government agencies in carrying out their historic preservation responsibilities;

(6) Cooperate with the Secretary, the Advisory Council on Historic Preservation, and other Federal, State and local government agencies to insure that historic properties are taken into consideration at all levels of planning and development;

(7) Provide public information, education, training, and technical assistance relating to the National and State historic preservation programs;

(8) Cooperate with local governments in development of local historic preservation programs and assist local governments in becoming certified.

(c)(1) State programs shall be approved by the Secretary if he determines that the program meets the requirements of paragraphs (a), (d), (e), and (f) of this section. Performance of the responsibilities specified in paragraph (b) of this section and continued compliance with the requirements in paragraphs (a), (d), (e), and (f) of this section shall be evaluated by the Secretary not less than every four years as required by section 101(b)(2) of the National Historic Preservation Act. These evaluations shall determine the State's continued eligibility for approved program status.

(2) Procedures [Reserved]

(d) A professionally qualified staff shall be appointed or employed by the State historic preservation program.

(1) Except as approved pursuant to paragraph (d)(2) of this section, the staff shall include at a minimum, one full-time professional in each of the following disciplines: History, archeology, and architectural history. To be approved for expanded participation, a State must also have on the staff a professional in the discipline of historic architecture. Required professional State staff members shall meet the standards set forth in Appendix A of these rules. Two or more part-time staff members may be substituted for one full-time professional in any of the required disciplines as long as the equivalent of one full-time professional is achieved in each discipline. States shall determine what other professional disciplines, such as planning, law, architecture, historic architecture, historical archeology, accounting, and grants management are needed to carry out the responsibilities of the State historic preservation program. State professional staff members approved by the Secretary prior to September 21, 1977, shall remain approved until such time that they are no longer employed on the State staff.

(2) The Secretary will consider proposals submitted by States for alternative staffing requirements for States with resources and needs which cannot be served or met by the composition outlined in paragraph (d)(1) of this section. Such alternative requirements must insure adequate professional expertise on the staff, comparable to that required in paragraph (d)(1) of this section, to perform the required responsibilities of the State. These proposals will be reviewed and approved by the Secretary in writing on a State-by-State basis. Approved alternatives will remain in effect until they are reviewed, at the Secretary's discretion or at the request of the State.

(3) The State shall annually certify according to procedures provided by the Secretary that the State program meets the minimum staffing requirements. If these requirements are not met for a period exceeding three months, the State shall communicate by letter to the Secretary, the timetable for filling the vacancy, or propose an alternative pursuant to paragraph (d)(2) of this section. During the lapse in minimum staffing requirements the State shall suspend all decisionmaking related to the discipline of the vacant staff position. If the lapse in staffing requirements persists for more than six months, the Secretary may require further restrictions in State program operations of HPF financial assistance that will remain in effect until the staff vacancy has been filled or an alternative has been approved by the Secretary pursuant to paragraph (d)(2) of this section.

(e) An adequate and qualified State historic preservation Review Board shall be designated by the SHPO unless an alternative method of appointment is provided by State law.

(1) The State Review Board shall consist of at least five persons. A majority of Review Board members shall be recognized professionals in the following and related disciplines defined in Appendix A of these rules. Except as approved pursuant to paragraph (e)(4) of this section, the membership shall include a minimum of one professional in each of the following disciplines: history, prehistoric and historic archeology, and architectural history and architecture. All of these professionals shall meet the standards set forth in Appendix A. The State shall determine what other professional disciplines and/or additional members are needed.

(2) The archeologist shall be qualified in both prehistoric and historic archeology, or an additional qualified person shall be appointed to the State Review Board so that expertise in both prehistoric and historic archeology will be represented.

(3) The architectural historian or architect shall be qualified in both architectural history and architecture or an additional qualified person shall be appointed to the State Review Board so that expertise in both architectural history and architecture will be represented.

(4) The Secretary will consider proposals for alternative Review Board requirements for States with historic resources and needs which cannot be served or met by the composition outlined in paragraph (e)(1) of this section. Such alternative requirements must insure adequate professional expertise on the Review Board, comparable to that required in paragraph (e)(1) of this section to perform the responsibilities of the Review Board. Such proposals will be reviewed and approved in writing by the Secretary on a State-by-State basis. Approved alternatives will remain in effect until they are reviewed, at the Secretary's discretion, or at the request of the State.

(5) The State shall annually certify according to procedures provided by the Secretary that the State program meets the minimum Review Board requirements. If these requirements are not met for a period exceeding three months, the State shall communicate by letter to the Secretary, the timetable for filling the vacancy, or propose to NPS an alternative pursuant to paragraph (e)(4) of this section. During the lapse in minimum Review Board requirements, the State shall suspend all decisionmaking related to the discipline of the vacant Review Board position. If the lapse in Review Board requirements persists for more than six months, the Secretary may require further restrictions in State program operations or HPF financial assistance to remain in effect until the Review Board vacancy has been filled or an alternative has been proposed and approved by the Secretary pursuant to paragraph (e)(4) of this section.

(6) The State Review Board shall meet at least three times a year and shall adopt procedures governing its operations consistent with the provisions of this section.

(7) The responsibilities that the State Review Board performs shall include, but need not be limited to, the following:

(i) Reviewing each National Register nomination proposal prior to submission to the National Register to determine whether or not the property meets the National Register criteria for significance, and to make a recommendation that the State nominate or reject the proposed nomination;

(ii) Participating in the review of apeals to National Register nominations and providing written opinions on the significance of the properties;

(iii) Providing advice to the State about documentation submitted in conjunction with the Historic Preservation Fund including but not limited to grant applications, end-of-year reports, and the State comprehensive historic preservation planning process;

(iv) Providing general advice, guidance, and professional recommendations to the SHPO in carrying out the duties and responsibilities listed in § 61.3(b).

(f) Mechanisms shall be provided for adequate public participation in the State historic preservation program. As part of the process of recommending properties to the National Register, the State shall comply with all consultation and notification procedures contained in 36 CFR 60.6.

(g) Any State may carry out all or any part of its responsibilities by contract or cooperative agreement with any qualified nonprofit organization, educational institution or otherwise pursuant to State law. A State may not delegate its responsibility for compliance with grant assistance terms and conditions.

(h) The Secretary may prepare standards and guidelines as an appendix to these rules, in order to facilitate implementation of this section.

§ 61.4 Approved local programs.

(a) All approved State programs shall provide a mechanism for certifying local governments to participate in the National program.

(b) All approved State historic preservation programs shall develop, for approval by the Secretary, procedures for the certification of local governments. States shall indicate specific requirements for certification, specific responsibilities that will be delegated to certified local governments, and the schedule for the certification process. The requirements outlined in paragraph (c) of this section must be incorporated into the State's process for local certification that is submitted to the Secretary for approval. States shall outline performance standards and a procedure by which they will evaluate the performance of CLGs in program operation and administration. Procedures also shall be defined for removal of CLG status for cause.

(c) States shall require local governments to satisfy the following minimum requirements:

(1) *Enforce appropriate State or local legislation for the designation and protection of historic properties.* The State shall define what constitutes appropriate legislation. Where State enabling legislation or home rule authority permits local historic preservation ordinances, a State may require adoption of an ordinance and

VOL
48
ISS
85
MAY
2
1983
UMI

indicate specific provisions that must be included in the ordinance.

(2) *Establish an adequate and qualified historic preservation review commission (Commission) by State or local legislation.* Commission members shall be appointed from among professionals in the disciplines or architecture, history, architectural history, planning archeology, or related disciplines, to the extent that such professionals are available in the community. In addition, Commission membership shall include other persons who have demonstrated special interest, experience, or knowledge in history, architecture, or related disciplines.

(i) States shall specify the minimum number and type of professional members required on the Commission and indicate how additional expertise can be obtained. When a discipline is not represented in the Commission membership, the Commission shall be required to seek expertise in this area when considering National Register nominations and other actions that will impact properties which are normally evaluated by a professional in such discipline. This can be accomplished through consulting or by other means that the State determines appropriate.

(ii) States shall specify the role and responsibilities of the Commission in local preservation decisions. These responsibilities must be complementary to and carried out in coordination with those of the State as outlined in § 61.3(b) of these rules. Additional requirements for an adequate and qualified Commission may be established by the State.

(3) *Maintain a system for the survey and inventory of historic properties.* States shall formulate guidelines for local survey and inventory systems which ensure that such systems and the data they produce can be readily integrated into statewide comprehensive historic preservation planning and other appropriate planning processes. Local government survey and inventory efforts shall be coordinated with and complementary to those of the State. The State also shall require that local survey data be in a format that is consistent with the planning processes noted above.

(4) *Provide for adequate public participation in the local historic preservation program, including the process of recommending properties to the National Register.* States shall require adequate public participation in relation to all responsibilities that are delegated to CLGs. States shall outline specific mechanisms to insure adequate public participation in local preservation programs. These may include requirements for open meetings, published minutes, and the publication of procedures by which assessments of potential National Register nominations, design review, etc. will be carried out as well as compliance with appropriate regulations.

(5) *Satisfactorily perform the responsibilities delegated to it under the Act.* States shall monitor and evaluate the performance of CLGs. States shall outline procedures and standards by which the performance of CLGs in program operation and administration will be evaluated. Written records shall be maintained for all State evaluations of CLGs so that results are available for the Secretary's performance evaluations of States. If a State evaluation of a CLG's performance indicates that, in the State's judgment, such performance is inadequate, the State shall suggest ways to improve performance. If, after a period of time stipulated by the State, the State determines that there has not been sufficient improvement, it may recommend decertification of the local government to the Secretary for his concurrence. This recommendation shall cite the specific reasons why decertification is proposed. Appropriately documented State recommendations for decertification ordinarily will be accepted by the Secretary. When a local government is decertified, the State shall conduct suspension and termination of financial assistance procedures as specified in the HPF Grants Management Manual.

(d) Effects of certification:

(1) *Inclusion in the process of nominating properties to the National Register of Historic Places in accordance with section 101 (c)(2)(A) and (c)(2)(B) of the Act.* The State may delegate to a CLG any of the responsibilities of the SHPO and the State Review Board in processing National Register nominations as specified in 36 CFR 60.6, except for the authority to nominate properties directly to the National Register. States shall insure that CLG performance of these responsibilities is consistent and coordinated with the identification, evaluation, and preservation priorities of the comprehensive State historic preservation planning process.

(2) *Eligibility to apply for a portion of the State's annual HPF grant.* At least 10 percent of the State's annual HPF apportionment shall be set aside for transfer to CLGs. All CLGs in the State shall be eligible to receive funds from the designated CLG share of the State's annual HPF grant; no government, however, is automatically entitled to receive funds. Local governments that receive these monies shall be considered subgrantees of the State.

(3) The requirements set forth in paragraph (c) of this section may be amplified by the Secretary and/or the States as necessary to reflect particular State and or local government program concerns.

(e) States shall submit, within 180 days of publication of the final rule for local certification and funds transfer, their proposed local certification processes to the Secretary for review and approval. In developing the submission, the State shall consult with local governments, local historic preservation commissions and other interested parties, consider local preservation needs and capabilities, and invite comments on the proposed process from local governments, commissions and interested parties in the State. The State's proposal shall review the results of this consultation process.

(f) States shall establish procedures to insure that all interested parties are notified and provide a 30-day period for public comment on the proposal before it is submitted to the Secretary. Records of all comments received during the commenting period shall be kept by the State and shall be made available to the Secretary upon request.

(g) The Secretary shall review State proposals and within 90 days of receipt issue an approval of disapproval. This review will be based on compliance with the requirements set forth in this section.

(h) If a State proposal is disapproved, the Secretary will recommend changes that would make the proposed process acceptable and, in consultation with the State, will designate a date by which the revision must be submitted. Final approval by the Secretary must be achieved by October 1, 1984, or States will be ineligible to continue their approved State program status beyond that time.

(i) A State may begin to certify local governments as soon as the State's proposed certification process is approved by the Secretary. The State shall notify the Secretary when a local government certification request has been approved in accordance with the State's approved certification process and forward to the Secretary a copy of the approved request. If the Secretary does not take exception to the request within 15 working days of receipt, the local government shall be regarded as certified by the Secretary.

(j) State administration of its local certification process shall be reviewed by the Secretary during performance evaluations and audits of State programs as required by section 101(b)(2) of the National Historic Preservation Act.

(k) The District of Columbia shall be exempted from the requirements of section 61.4 because there are no subordinate local governments in the District. If a territory believes that its political subdivisions lack authorities similar to those of local governments in other States and hence cannot satisfy the requirements for local certification, it may apply to the Secretary for exemption from the requirements of § 61.4.

(l) Procedures for direct certification by the Secretary where there is no approved State program [Reserved].

(m) The Secretary may prepare standards and guidelines as an appendix to these rules, in order to facilitate implementation of this section.

§ 61.5 Grants to approved State programs.

(a) All States with approved State historic preservation programs shall be eligible for matching grants-in-aid from the Historic Preservation Fund for the purposes of preparing comprehensive statewide historic surveys and plans, and for preserving and protecting properties listed in the National Register of Historic Places.

(b) Administration of HPF matching grants-in-aid shall be in accordance with the HPF Grants Management Manual. States receiving HPF grants shall adhere to the policies, procedures, and guidelines in the Grants Management Manual and its supplements.

(c) States are responsible, through financial audit, for the proper accounting of HPF grants in accordance with OMB Circular A–102, Attachment P, "Audit Requirements," and the HPF Grants Manual.

(d) States are responsible, through the program performance evaluation requirements of § 61.3(c), for administration of HPF grants in accordance with the requirements of this section.

(e) The Secretary may prepare standards and guidelines as an appendix to these regulations, in order to facilitate implementation of this section.

§ 61.6 Transfer of grants to certified local governments.

(a) At least 10 percent of each State's annual Historic Preservation Fund (HPF) allocation shall be designated for transfer by States to CLGs. States may transfer more than 10 percent unless otherwise prohibited. Any year in which the annual HPF State grant appropriation exceeds $65,000,000, one half of the excess shall also be transferred to CLGs according to procedures to be provided by the Secretary.

(b) All CLGs shall be eligible to receive funds from the 10 percent CLG share of the State's total annual HPF grant award. The State is not required to award funds to all governments that are eligible to receive funds.

(c) CLGs receiving HPF grants from the CLG share shall be considered subgrantees of the State. Transferred monies shall not be applied as matching share for any other Federal grant.

(d) States shall require all local governments receiving a portion of the local share of the State's annual HPF grant to satisfy the following minimum requirements:

(1) *Maintain adequate financial management systems.* Local financial management systems shall be in accordance with the standards specified in OMB Circular A–102, Attachment G, "Standards for Grantee Financial Management Systems." Local financial management systems shall be auditable in accordance with the General Accounting Office's *Standards for Audit of Governmental Organizations, Programs, Activities, and Functions.* States shall be responsible, through financial audit, for the proper accounting of HPF CLG share monies in accordance with OMB Circular A–102, Attachment P, "Audit Requirements." The periodic State evaluations of CLG performance shall include an assessment of the fiscal management of HPF monies.

(2) *Adhere to all requirements of the HPF Grants Management Manual.* The HPF Grants Manual sets forth administrative procedures and policies for HPF grants awarded by the Secretary. It serves as a basic reference for the State management of HPF grants. Indirect costs may be charged as part of the CLG grant only if the CLG subgrantee meets the requirements of Chapter 12 of the Grants Manual. Unless the CLG has a current indirect cost rate approved by the cognizant Federal agency, only direct costs may be charged.

(3) *Adhere to any requirements mandated by Congress regarding the use of such funds.* The Secretary will advise States of any directives contained in annual appropriations laws regarding the use of HPF State grants that must be applied to local governments receiving a share of these grants.

(e) The requirements listed in paragraph (d) of this section shall be used by States as minimum requirements for local governments receiving HPF funds; they also shall be included in the State's required written grant agreement with the local government. States may require specific uses of funds as long as such requirements are consistent with the State comprehensive historic preservation planning process and are eligible for HPF assistance.

(f) Each State shall develop, for approval by the Secretary, a procedure for allocating the CLG share of its annual Historic Preservation Fund grant to eligible local governments in the State. States shall articulate a clear rationale on which funding decisions will be based. States may require a matching share for CLG grants. Allocation procedures shall include guidelines for the review of applications and the selection of applicants. At a minimum, these guidelines shall include the following:

(1) The amount awarded to any applicant must be sufficient to produce a specific impact. While no lower limit is prescribed by these rules, States must insure that the funds awarded are sufficient to generate effects directly as a result of the funds transfer. The requirement for measurable results may not be waived even if there are many otherwise eligible applicants for the amount set aside for CLG share; States may use additional funds from their regular HPF annual grant to satisfy competing demands.

(2) In order to promote local preservation activities, States shall make reasonable efforts to distribute these monies among the maximum number of eligible local jurisdictions to the extent that such distribution is consistent with paragraph (f)(1) of this section. States also shall seek to insure a reasonable distribution between urban and rural areas in the State.

(3) States shall make available to the public, upon request, the rationale for the applicants selected and the amounts awarded.

(g) Within 180 days of publication of final rules for local certification and funds transfer, but not before submitting their proposed local certification process, States shall submit to the Secretary for review and approval, their proposed procedure for transfer of funds.

(h) States shall set up notice procedures to insure that all interested parties are notified and provide a 30-day period for public comment on the proposal before it is submitted to the Secretary. Records of all comments received during the commenting period shall be kept by the State and shall be

VOL 48 ISS 85 MAY 2 1983 UMI

made available to the Secretary upon request.

(i) The Secretary shall review State proposals and within 90 days of receipt issue an approval or disapproval. This review will be based on compliance with the requirements set forth in this section.

(j) If a State proposal is disapproved, the Secretary will recommend changes that would make the proposed process acceptable and, in consultation with the State, will designate a date by which the revision must be submitted. Final approval by the Secretary must be achieved by October 1, 1984, or States will be ineligible to continue their approved State program status beyond that time.

(k) Once a State's proposed process for funds transfer has been approved by the Secretary and the Secretary has obligated the State's annual HPF grant, the State shall begin the transfer of HPF monies unless otherwise prohibited as a consequence of actions described in § 61.6(d)(3).

(l) Each State shall insure that its procedure is widely publicized so that all eligible local governments have the opportunity to apply for funding.

(m) States shall be responsible for reviewing requests from CLG subgrantees for grant amendments as required by OMB Circular A–87, and for issuing approval or denial of such requests. If any action by a CLG will result in a change in the overall grant project or budget requiring NPS approval, the State shall obtain such approval prior to granting approval to the CLG subgrantee. A State shall not forward to NPS any action which is inconsistent with the purpose or terms of the grant. CLG subgrantee requests for revisions to the grant are invalid unless they are in writing and signed by an authorized official of the State grantee.

(n) State performance in transferring funds to CLGs shall be reviewed by the Secretary during performance evaluations and audits of State programs as required by Sec. 101(b)(2) of the National Historic Preservation Act.

(o) States may submit grant amendment requests to NPS to reallocate monies set aside for local governments in instances where no certified governments exist, wish to receive funds, or are qualified to receive funds. Such requests will be considered grant reprogramming actions and shall be submitted to NPS not less than one calendar year after the beginning of the fiscal year of the State's HPF appropriation. All such requests shall clearly document the State's attempts to encourage and assist local governments in developing local historic preservation programs pursuant to section 61.4 of these regulations, in being certified, and in applying for funding.

(p) The District of Columbia shall be exempted from the requirements of § 61.6 because there are no subordinate local governments in the District. If a territory believes that its political subdivisions lack authorities similar to those of local governments in other States and hence cannot satisfy the requirements for local certification, it may apply to the Secretary for exemption from the requirements of § 61.6.

(q) The Secretary may prepare standards and guidelines as an appendix to these regulations, in order to facilitate implementation of this section.

§ 61.7 Waiver.

The Secretary may waive any of the requirements of these rules which are not mandated by statute or by government-wide regulations, if, in his opinion, as expressed in writing to the State, the State historic preservation program would benefit from such waiver, and the purposes, conditions, and requirements of the National Historic Preservation Act would not be compromised.

Appendix A—Professional Qualifications Standards

In the following definitions, a year of full-time professional experience need not consist of a continuous year of full time work but may be made up of discontinuous periods of full-time or part-time work adding up to the equivalent of a year of full-time experience.

(a) *History.* The minimum professional qualifications in history are a graduate degree in history or closely related field; or a bachelor's degree in history or closely related field plus one of the following:

(1) At least two years of full-time experience in research, writing, teaching, interpretation or other demonstrable professional activity with an academic institution, historic organization or agency, museum, or other professional institution; or

(2) substantial contribution through research and publication to the body of scholarly knowledge in the field of history.

(b) *Archeology.* The minimum professional qualifications in archeology are a graduate degree in archeology, anthropology, or closely related field plus:

(1) at least one year of full-time professional experience or equivalent specialized training in archeological research, administration or management;

(2) at least four months of supervised field and analytic experience in general North American archeology; and

(3) demonstrated ability to carry research to completion. In addition, to these minimum qualifications, a professional in prehistoric archeology shall have at least one year of full-time professional experience at a supervisory level in the study of archeological resources of the prehistoric period. A professional in historic archeology shall have at least one year of full-time professional experience at a supervisory level in the study of archeological resources of the historic period.

(c) *Architectural history.* The minimum professional qualifications in architectural history are a graduate degree in architectural history, art history, historic preservation, or closely related field, with coursework in American architectural history; or a bachelor's degree in architectural history, art history, historic preservation, or closely related field plus one of the following:

(1) At least two years of full-time experience in research, writing, or teaching in American architectural history or restoration architecture with an academic institution, historical organization or agency, museum, or other professional institution; or

(2) substantial contribution through research and publication to the body of scholarly knowledge in the field of American architectural history.

(d) *Architecture.* The minimum professional qualifications in architecture are a professional degree in architecture plus at least two years of full-time professional experience in architecture; or a State license to practice architecture.

(e) *Historic Architecture.* The minimum professional qualifications in historic architecture are a professional degree in architecture or State license to practice architecture, plus one of the following:

(1) At least one year of graduate study in architectural preservation, American architectural history, preservation planning, or closely related field; or

(2) At least one year of full-time professional experience on historic preservation projects. Such graduate study or experience shall include detailed investigations of historic structures, preparation of historic structures research reports, and preparation of plans and specifications for preservation projects.

[FR Doc. 83-11565 Filed 4-29-83; 8:45 am]

BILLING CODE 4310-70-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA Docket No. (AWO34bPA); A–3–FRL 3219–5]

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Pennsylvania has submitted a proposed revision to its State Implementation Plan (SIP) to incorporate an alternative emission reduction plan or "bubble." Pennsylvania has requested that the plan be approved by EPA for the Fairless Works of the United States Steel Corporation (USSC) in Fairless Hills, Bucks County, Pennsylvania. This plan consists of a bubble permit and regulations which apply to sulfur dioxide emissions from the power boilers, coke oven batteries, open hearth furnaces, soaking pits, annealing furnaces, and other miscellaneous heat treating furnaces. The proposed plan would allow sulfur dioxide emissions from the coke ovens to exceed the currently applicable Pennsylvania SIP limitation. These higher sulfur dioxide emissions would be offset by burning low sulfur oil and natural gas in the other sources listed above. In support of this proposed bubble, an air quality analysis was conducted in accordance with EPA's Emissions Trading Policy of April 7, 1982 (47 FR 15076). EPA has reviewed this analysis and has concluded that no significant air quality impacts will occur on an annual or short-term (24-hour) basis when this bubble is implemented.

DATE: Comments must be submitted on or before June 1, 1983.

ADDRESSES: Copies of the proposed SIP revision and the accompanying support documents are available for inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Air Programs and Energy Branch, 6th and Walnut Streets, Curtis Building, Philadelphia, PA 19106; Attn: Mr. David L. Arnold, or

Pennsylvania Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, PA 17120; Attn: Mr. Gary L. Triplett.

All comments on the proposed revision submitted on or before June 1, 1983 will be considered and should be sent to: Mr. Glenn Hanson, Chief, Pennsylvania Section (3AW11), Air and Waste Management Division, U.S. Environmental Protection Agency, Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106.

FOR FURTHER INFORMATION CONTACT: Mr. David L. Arnold at the above address, or at (215) 597–7936.

SUPPLEMENTARY INFORMATION: The proposed changes to the Pennsylvania State Implementation Plan (SIP) were submitted by the Pennsylvania Department of Environmental Resources (PADER). The changes will allow the implementation of an alternative emission reduction plan (bubble) in accordance with EPA's Emissions Trading Policy of April 7, 1982 (47 FR 15076). EPA and the PA DER are processing this proposal concurrently. All comments received by the PA DER at the public hearing on June 17, 1982 in Norristown, Pennsylvania, and any written comments received by EPA, will be considered by EPA in making a final determination on the approvability of the plan.

The bubble being proposed involves 96 sulfur dioxide (SO_2) emission sources at the Fairless Works of the United States Steel Corporation (USSC). This plan consists of a bubble permit and regulations which apply to SO_2 emissions from five boilers, two coke oven batteries, nine open hearth furnaces, thirty-six soaking pit furnaces, thirty-one annealing furnaces, and thirteen miscellaneous heat treating furnaces. The proposed plan would allow sulfur dioxide emissions from the coke ovens to exceed the currently applicable Pennsylvania SIP limitation. These higher sulfur dioxide emissions would be offset by burning low sulfur oil and natural gas in the other sources listed above.

The current Pennsylvania SIP (25 PA. Code Sections 123.21, 123.22(e)(3), and 123.23(b)) prohibits the combustion of coke oven gas that contains hydrogen sulfide in concentrations greater than 50 grains per 100 dry standard cubic feet; requires control of the boilers to a level of 0.6 pounds SO_2 per million Btu and the remaining sources in the bubble to a level of 500 ppm (vol) of SO_2. The proposed bubble regulations establish a short term plant emission limit of 0.8 pounds SO_2 per million Btu applied on a weekly basis. To restrict extreme variations in daily emission levels, the emission limit is calculated using a rolling average. Using the rolling average method, one day's emissions are included in the calculation for compliance seven times instead of once. This technique is also applied to the long term emission limit which is set at 0.6 pounds SO_2 per million Btu (52 week rolling average). This limit was chosen because it was the most restrictive combustion emission limit in the PA DER regulations. In addition, to prevent daily emission levels from increasing because of production increases, a maximum limit of 54,000 pounds SO_2 per day is also proposed in the plan.

The PA DER is also proposing separate emission limits for the plant during times of economic slowdown or lower production. Based upon historical operating data, a total facility heat demand of less than 400 billion Btu per week has been used to define low production activity. During these periods, the PA DER is proposing an emission limit of 0.9 pounds SO_2 per million Btu based on a seven-day rolling average. To prevent daily emission levels from increasing during low production, a maximum limit of 36,000 pounds SO_2 per day is also being proposed.

Table 1 below lists the sources involved in the emissions trade and summarizes the average hourly SO_2 emission rates for each under the base case and the alternate case.

TABLE I.—SULFUR DIOXIDE EMISSIONS FROM USSC—FAIRLESS WORKS

[In pounds per hour]

Facility	Base case	Alternate case
Boilers	1,126	442
Coke batteries	125	700
Open hearth shop	539	308
No. 1 soaking pits	372	112
No. 2 soaking pits	230	67
60" Reheat	978	350
40" Reheat	125	63
10" Reheat	94	35
Batch anneal furnaces	175	50
Sheip reheat	140	40
Weld furnaces	360	91
Galvanize furnace	12	4
Total	4,195	2,344

As illustrated by Table 1, the proposed bubble plan will result in an overall net decrease in SO_2 emissions of 1851 pounds per hour. In addition, the company estimates its savings in capital pollution control costs to be approximately $17,000,000

In accordance with EPA's Emissions Trading Policy and modeling guidelines, a Level II air quality analysis was conducted by USSC to support the proposed plan. A Level II analysis is required when the proposed emissions trade will result in no net increase in baseline emissions and the relevant sources are *not* in the same immediate vicinity. Air dispersion modeling analyses were conducted using the proposed bubble emission rates and the base case emission rates. This plan was evaluated using the ISC model. Results of the modeling predictions indicate that no significant increase in air qualtiy impact will occur on either an annual or short-term (24-hour) basis. In addition, EPA has concluded that the PSD increment for SO_2 will not be violated as a result of this proposed action.

The proposed regulation to implement and enforce this plan will become Section 128.15 of the PA DER Air Resources Regulations. Subsection (a) of the Section identifies the sources affected by this plan.

Subsection (b) and (c) prohibits sulfur dioxide emissions from the identified sources in the bubble in excess of the specified emission limits. Subsection (d) prohibits the use of residual fuel oil which contains sulfur in excess of 0.5% (wt). Subsection (e) prohibits the charging of the coke ovens with blended

VOL

1983
UMI

coal containing sulfur in excess of 1.0% (wt). Subsection (f) relieves USSC from compliance with Sections 123.21, 123.22 and 123.23 when in compliance with this Section. Finally, subsection (g) voids the bubble if one or more of the sources identified in subsection (a) is permanently shut down.

In order for the PA DER to determine compliance with these regulations, monitoring, recordkeeping and reporting requirements have been developed as conditions in the operating permit. USSC will be required to monitor and record all natural gas, fuel oil and coke oven gas usage on a daily basis. In addition, the company must analyze all fuel oils for sulfur and heat content; blended coal for sulfur content; and coke oven gas for hydrogen sulfide on a daily basis. The above analyses must be conducted in accordance with approved State/EPA methods. All daily and weekly sulfur dioxide emission calculations must be performed in accordance with the instructions prescribed in the State operating permit.

EPA is today proposing to approve this bubble plan as a SIP revision since it has met the requirements of the April 7, 1982 Emissions Trading Policy (47 FR 15076).

The public is invited to submit, to the address stated above, comments on whether the proposed changes should be approved as a revision to the Pennsylvania SIP. The Administrator's decision to approve or disapprove the proposed revision will be based on the comments received and on a determination of whether the amendments meet the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51.

The Office of Management and Budget has exempted this rule from requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

[A-5-FRL 2356-6]

Approval and Promulgation of Implementation; Ohio

AGENCY: Environmental Protection Agency (EPA)

ACTION: Extension of the public comment period.

SUMMARY: On February 13, 1983, the U.S. Environmental Protection Agency (EPA) proposed rulemaking on a revision in the form of individual variance permits for two coal-fired boilers and three PVC resin storage silos at the B.F. Goodrich Chemical Plant located in Avon Lake (Lorain County), Ohio (48 FR 7211). The State requested that EPA approve an alternate strategy "bubble" which would involve trading emission reductions between the boilers and the silos.

At the time of proposed rulemaking a 30 day comment period was provided. On April 18, 1983 (47 FR 16507), EPA published in the **Federal Register** an extension of the public comment period to April 20, 1983. The Natural Resources Defense Council (NRDC) requested a second extension of the public comment period to May 5, 1983.

On February 3, 1983, EPA proposed rulemaking on a revision to the ozone and carbon monoxide (CO) State Implementation Plan (SIP) for Cincinnati, Ohio to demonstrate attainment of the National Ambient Air Quality Standards (NAAQS) by December 31, 1987. (48 FR 5118).

ON April 18, 1983, (47 FR 16507), EPA published in the **Federal Register** an extension of the public comment period to Apirl 20, 1983. The Tri-State Air Committee, Inc. requested a second extension of the public comment period to May 5, 1983.

DATES: Comments for both notices must be received on or before May 5, 1983.

ADDRESSES: Comments should be submitted to: Gary V. Gulezian, Chief, Regulatory Analysis Section (5 AP-26), Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Anne E. Tenner, (312) 886-6036.

Dated: April 22, 1983.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

LEGAL SERVICES CORPORATION

45 CFR Part 1626

Restrictions on Legal Assistance To Aliens

AGENCY: Legal Services Corporation.

ACTION: Proposed rule.

SUMMARY: The Continuing Resolution under which the Legal Services Corporation is presently operating restricts categories of aliens who may receive legal assistance financed with fiscal year 1983 funds. This proposed rule adds a new Part 1626 to implement these restrictions. It clarifies and interprets them, sets forth procedures for verification of eligibility, requirements for recordkeeping and protection of confidential information, and guidelines for withdrawal from representation when an alien client is found to be ineligible.

DATE: Comments must be received on or before June 1, 1983.

ADDRESS: Comments may be mailed to Office of General Counsel, Legal Services Corporation, 733 Fifteenth Street, N.W., Room 620, Washington, D.C. 20005.

FOR FURTHER INFORMATION CONTACT: John Meyer, Deputy General Counsel, (202) 272-4010.

SUPPLEMENTARY INFORMATION:

Background

The Second Continuing Resolution (Pub. L. 97-377) prohibits the use of Fiscal Year 1983 funds appropriated to the Legal Services Corporation (the Corporation) for the provision of legal assistance "for or on behalf of" any alien except for aliens in four specific categories (enumerated in Section 1626.4(a) of this Part). All recipients of Corporation funds received with their 1983 grants a copy of this Continuing Resolution language governing legal assistance to aliens and are required by grant condition to comply therewith.

Scope of Eligibility for Legal Assistance

The broad scheme of this legislation is that all aliens not within an eligible category are ineligible. The eligible categories are generally: permanent residents; immediate family members of a citizen who have filed a petition for adjustment of status which has not been rejected; refugees, asylees, and conditional entrants admitted because of persecution or natural calamity; and aliens lawfully present in the United States as a result of the Attorney General's withholding of deportation under Section 243(h) of the Immigration

and Nationality Act. These categories reflect a general division Congress made between aliens who can be expected to remain in the United States permanently or indefinitely and those whose status is expected to be temporary. (Section 1626.4(a) includes a full list of the eligible alien categories.)

In determining the scope of eligibility, two significant questions arose. First, what is the meaning of the prohibition of legal assistance "for or on behalf of" an ineligible alien; second, at what point is an application for adjustment of status deemed "rejected"?

Interpretation of Legal Assistance "For or On Behalf of" an Ineligible Alien

Three alternatives presented themselves in interpreting the scope of the prohibition of legal assistance "for or on behalf of" an ineligible alien. First, it could be interpreted to prohibit any legal assistance to a client which would result in a significant benefit, even if incidental, to an ineligible alien. Second, it could be interpreted to prohibit any legal assistance which directly benefits an ineligible alien. Third, it could be interpreted as simply a precaution against an eligible client seeking legal assistance for the purpose of benefiting an ineligible alien. In the absence of legislative history bearing on the meaning of this phrase, the Corporation has chosen the second alternative. The first interpretation would interfere unduly with representation of eligible clients, while the third would be an unduly narrow interpretation of Congressional intent. The Corporation considers that the requirement of a direct benefit to the eligible client and only an incidental benefit to the ineligible alien is reasonable and feasible to administer. The Corporation has specifically concluded that all immigration cases in which an ineligible alien is a beneficiary fall under this prohibition, because the direct benefit is to the ineligible individual, even if another eligible individual has an interest in that individual's immigration into or continued presence in the United States. The benefit to the ineligible alien is direct and the benefit to the eligible client is consequent on the benefit to the ineligible alien.

Interpretation of Rejection of Application for Adjustment of Status

The Continuing Resolution allows legal assistance to any spouse, parent or child under 21 of a citizen if that individual has filed a petition for adjustment of status to permanent resident and it has not been "rejected." Again, the Corporation considered three interpretations of the term "rejected":

(1) Rejection of the initial application by the Immigration and Naturalization Service (INS);

(2) Exhaustion of administrative appeals;

(3) A final judgment by a court.

INS normally employs a one-step process to adjudicate petitions for adjustment of status; however, INS regulations do allow appeals in certain instances. As the word "rejected" properly applies to any denial of a petition, there is a strong argument for the first alternative. Nevertheless, the Corporation prefers to take the INS administrative process as a whole and interpret the term "rejected" as a denial of a petition not subject to further administrative appeal (see § 1626.2(c)). The third interpretation covers applications denied by INS which are being or could be challenged in court; it would negate the effect of the prohibition.

Verification of Eligibility

The proposed regulation allows recipients to accept self-declarations from United States citizens as to their citizenship, but requires recipients to obtain documentation from aliens claiming to be eligible for legal services before commencing representation. The Corporation considered, as an alternative, requiring recipients to accept self-declaration in every case, but rejected that approach since it could lead to recipients expending scarce resources to provide legal services to ineligible persons rather than to citizens and eligible aliens. Indeed, many aliens may not know whether they are eligible until they seek legal assistance and a recipient makes this determination. On the other hand, the Corporation considered and rejected an approach that would require documentation of citizens and aliens alike, since most legal services clients are citizens and imposing a verification requirement in all cases would be unnecessarily expensive, time-consuming, and a diversion of resources from the provision of legal services. The proposed regulation, which allows self-declarations by citizens but requires documentation as to alien status, recognizes that recipients should not be required to spend unnecessary time and resources verifying citizenship. It also recognizes, however, that the Corporation is obligated to ensure that recipients represent only aliens who are demonstrably eligible for assistance. Hence it allows a recipient to require verification of citizenship if the recipient has good reason to believe that a person is not a citizen. The Corporation expects that recipients will not rely on factors such as a person's appearance, race or national origin, or limited ability to speak English to justify requiring documentation of citizenship, as recipients are required by law to provide legal services in a nondiscriminatory manner. Rather a recipient may require verification of citizenship only when specific circumstances arising either at the outset of or during the representation of an individual indicate that the individual may not be a citizen.

Disposition of Cases Involving Representation of Ineligible Aliens

The Corporation recognizes that recipients may have begun representation of persons who are "ineligible aliens" under proposed § 1626.2(b) prior to the receipt of funds appropriated under Pub. L. 97-377, and that attorneys have certain ethical and professional responsibilities toward those clients. Nevertheless the language of Pub. L. 97-377 does not allow of the use of such funds to complete representation of ineligible aliens. Consequently, proposed § 1626.6 requires the use of funds other than those appropriated by Pub. L. 97-377 to complete legal assistance for or on behalf of an "ineligible alien" where referral or discontinuance of representation is impossible. Should no such funds be available, a recipient and its attorneys may need to make a special effort to seek the assistance of the local bar, solicit other funds, and/or allow its attorneys to complete these cases on an uncompensated basis.

Proposed § 1626.7 requires a recipient to discontinue representation supported by funds appropriated by Pub. L. 97-377 if a client becomes an ineligible alien as defined in proposed § 1626.2(b) due to a change in circumstances, or if representation was commenced due to an erroneous eligibility determination or false information provided by the alien, if discontinuance is not inconsistent with the attorney's professional responsibilities. Immediate discontinuance is required after the discovery of false information provided by the alien relating to eligibility.

Confidentiality and Recordkeeping

There is a clear need to retain records of eligibility documents to allow review by recipients and by the Corporation of the implementation of these restrictions. Consequently, retention of copies of eligibility documents for all persons seeking legal assistance is required. As those who are found ineligible often have no documentation or irrelevant documentation, retention of copies of

said documentation is not required in all instances, but recipients are required to keep a record of what documentation, if any, was given to them.

The Corporation gives high priority to the protection of the confidentiality of eligibility documentation. Therefore, § 1626.9 prohibits release of such documentation except under court order or by Congressional request to any third party except the Corporation for the purpose of reviewing eligibility determinations.

Eligibility of Micronesia

Under Section 1002(8) of the Legal Services Corporation Act (the Act), the term "State" is defined to include " " " the Trust Territory of the Pacific Islands " " " (Micronesia). The Corporation funds recipients in all states, as defined in Section 1002(8), except American Samoa. The authority of the Corporation to fund Micronesia Legal Services is clear under the Act. However, the issue is whether funds appropriated under the Continuing Resolution can be used for provision of legal assistance to citizens and permanent residents of Micronesia, very few of whom are citizens of the United States and who do not fall within the definition of eligible aliens under the Continuing Resolution.

Congress, has, however, expressed no intent to exclude them; they do not come from and neither were or are citizens of any other country, but rather are citizens of a Trust Territory administered under U.N. mandate. It is the interpretation of the Corporation that the scheme of the aliens provision is to exclude all aliens not likely to be permanent or long-term residents of the United States and its territories. Thus the distinctions expressed in the Continuing Resolution are not appropriate to Micronesians. Consequently, the Corporation considers all such permanent residents of Micronesia in a category analogous to permanent alien residents of the United States; as such the Corporation has determined that such permanent residents of Micronesia are eligible to receive legal assistance provided they are otherwise eligible under the Act.

Eligibility of Cross-Border Indian Tribes

Canadian-born American Indians at least 50% Indian by blood have a right to freely "pass and repass" the Canadian-American border under the Jay Treaty of 1794 and 8 U.S.C. 1359. They are not subject to the Immigration Act of 1952, as amended, as held in *Akins* v. *Saxbe*, 380 F. Supp. 1210 (D. Me. 1974). Thus, the Corporation has concluded that because such Canadian-born American Indians are not treated as aliens for immigration purposes, they fall outside of the restrictions of the continuing resolution, and are eligible to receive legal assistance.

Likewise, the Texas Band of Kickapoo who live on both sides of the U.S.-Mexican border were granted rights similar to those of Canadian-born American Indians by Pub. L. 97–684. This statute also requires the Interior Department to make a permanent record of all members of the Kickapoo during 1983 and allows them to apply for United States citizenship at any time within the next 5 years. Although their technical status at present is that of parolees, Congress has thus indicated that their relationship to the United States is of a permanent nature and most of them can be expected to become citizens within the next 5 years. On the basis of this recently passed legislation expressing the intent of Congress to regularize the status of the Kickapoo, they are deemed eligible to receive legal assistance.

List of Subjects in 45 CFR Part 1626

Privacy, Aliens, Legal services, Reporting and recordkeeping requirements.

For the reasons set out above, 45 CFR Chapter XVI is proposed to be amended by adding Part 1626 to read as follows:

PART 1626—RESTRICTIONS ON LEGAL ASSISTANCE TO ALIENS

Sec.

1626.1 Purpose.
1626.2 Definitions.
1626.3 Prohibition of legal assistance "for or on behalf of" an ineligible alien.
1626.4 Alien status and eligibility.
1626.5 Verification of citizenship and eligible alien status.
1626.6 Disposition of cases involving ongoing representation of ineligible aliens.
1626.7 Change in circumstances.
1626.8 Records.
1626.9 Use and confidentiality of records pertaining to determination of eligible alien status.
1626.10 Special eligibility questions.

Authority: Section 1006(e) Pub. L. 93–355, 88 Stat. 378 (42 U.S.C. 2996e(e)); Pub. L. 97–377, 96 Stat. 1874.

§ 1626.1 Purpose.

This Part is designed to assist recipients in determining the eligibility and immigration status of persons who seek legal assistance, to provide guidelines for referral of ineligible persons, and to protect the confidentiality of information obtained from clients and prospective clients. This Part does not apply to any case or matter in which assistance is not being provided with funds appropriated under Pub. L. 97–377.

§ 1626.2 Definitions.

As used in this Part the term—

(a) "Eligible alien" means an alien who meets the requirements of § 1626.4(a).

(b) "Ineligible alien" means an alien who does not meet the requirements of § 1626.4(a) and who is consequently determined not to be eligible to receive legal assistance under Pub. L. 97–377.

(c) "Rejected" refers to an application for adjustment of status that has been denied by the Immigration and Naturalization Service (INS) and is not subject to further administrative appeal.

§ 1626.3 Prohibition of legal assistance "for or on behalf of" an ineligible alien.

(a) *General.* No funds made available to a recipient by the Corporation under the authority of Pub. L. 97–377 shall be used to provide legal services for or on behalf of any person unless that person is a citizen of the United States or an eligible alien, except as authorized in this part.

(b) *Prohibited legal assistance "for" an ineligible alien.*—(1) To provide legal assistance "for" an ineligible alien is equivalent to furnishing legal assistance to a client and it shall be deemed to be coextensive with accepting an ineligible alien as a client. Consequently, all recipients are prohibited from using fiscal year 1983 Corporation funds to pay any costs connected with furnishing legal assistance to clients who are ineligible aliens.

(2) Normal intake procedures and referral of ineligible alien clients by the same procedures used to refer other classes of ineligible clients are excepted from this prohibition. If a referral is not possible, an ineligible alien client may not be represented if any fiscal year 1983 funds are used in such representation. If such an ineligible alien client is referred, a recipient may not participate further in the case (using fiscal year 1983 funds).

(3) The provisions of Section 1010(c) of the Legal Services Corporation Act do not apply to the expenditure of funds to represent ineligible aliens. Such aliens may be represented if all costs of such representation, including staff time, are funded from non-Corporation sources.

(c) *Prohibited legal assistance "on behalf of" an ineligible alien.*—(1) To provide legal assistance "on behalf of" an ineligible alien is to render legal assistance to an eligible person which directly benefits an ineligible alien. Ineligible aliens may benefit but only as an incidental result of the relief

obtained for eligible clients. As an example, where a group of individuals renting a residence is faced with eviction, and one of the group is an eligible alien or a citizen, representation of that individual is allowed because there is a direct benefit inuring to the client represented which would exist even absent the involvement of ineligible clients. The other aliens may not be named as parties or represented and no relief may be sought for them, but they may receive an incidental benefit if successful representation of the eligible client leads to their not being evicted.

(2) Any case in which an eligible client seeks legal assistance to facilitate immigration of or adjustment of status of an ineligible alien constitutes provision of legal assistance "on behalf of" an ineligible alien, even if there is a benefit to the eligible client. The benefit to the eligible client occurs only as a consequence of the benefit to the ineligible alien. Consequently, the prohibition of assistance on behalf of an ineligible alien extends to all legal assistance wherein the admission of a person into the United States is sought and to any other immigration matter wherein an eligible client is assisted to aid or facilitate the adjustment of the status of an ineligible alien.

§ 1626.4 Alien status and eligibility.

(a) Subject to all other eligibility requirements of the Act, an alien who is a resident of the United States and who is within one of the following categories shall be eligible for legal services:

(1) An alien lawfully admitted for permanent residence as an immigrant as defined by section 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a) (15) and (20));

(2) An alien who is either married to a United States citizen or is a parent or an unmarried child under the age of twenty-one years of such a citizen and who has filed an application for adjustment of status to permanent resident under the Immigration and Nationality Act, and such application has not been rejected;

(3) An alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157 relating to refugee admissions) or who has been granted asylum by the Attorney General under section 208 of the Immigration and Nationality Act (8 U.S.C. 1158), or who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity; or

(4) An alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)).

(b) An alien who is not within one of the eligibility categories defined in § 1626.4(a) shall not be eligible for legal services. Categories of ineligible aliens include but are not limited to:

(1) Aliens present in the United States as a result of an exercise of discretion by the Attorney General for emergent reasons or reasons deemed strictly in the public interest under section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5) relating to parolee admissions); or

(2) Aliens admitted into the United States as nonimmigrants under section 101(a)(15) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)), including:

(i) Ambassadors and other diplomatic officers and employees, embassy attendants and servants, and their immediate families;

(ii) Tourists and temporary business visitors;

(iii) Aliens in transit through the United States or going to and from the United Nations;

(iv) Alien crewmen from foreign vessels and aircraft who enter the United States temporarily and intend to depart on their vessels or aircraft;

(v) Alien traders and investors present in the U.S. pursuant to treaties of commerce and navigation, and their immediate families;

(vi) Foreign students who enter the United States to study at academic institutions, and their spouses and minor children;

(vii) Officials, employees, and representatives of international organizations, and their immediate families;

(viii) Temporary workers, trainees, and persons of distinguished ability and their spouses and minor children;

(ix) Members of the foreign press, radio, film, and other media, and their spouses and children;

(x) Participants in State Department-sponsored exchange programs, and their spouses and minor children;

(xi) Fiances and fiancees of United States citizens who enter the United States solely to conclude valid marriages, and their minor children;

(xii) Employees of United States corporations or businesses based in another country who enter the United States to work for the same employers, and their spouses and minor children;

(xiii) Foreign students who enter the United States to study at vocational or nonacademic institutions, and their spouses and minor children.

§ 1626.5 Verification of citizenship and eligible alien status.

(a) A citizen seeking representation shall attest in writing to the fact of his or her United States citizenship. Verification of citizenship shall not be required unless a recipient has good cause to conclude that a person may not be a United States citizen. A recipient shall accept the original or a certified copy of any of the following documents as proof of citizenship:

(1) United States passport;

(2) Birth certificate;

(3) Naturalization certificate;

(4) United States Citizenship Identification Card; (INS Form I–197);

(5) Commuter Status Card (INS Form I–178).

If a person is unable to produce any of the above documents, he or she may submit a notarized statement signed by a third party, who can produce proof of that party's own United States citizenship that the person seeking legal assistance is a United States citizen.

(b) An alien seeking representation shall submit appropriate documents to verify eligibility. A recipient shall accept originals of any of the following documents as proof of eligibility:

(1) An alien in the category specified in § 1626.4(a)(1) shall present an Alien Registration Receipt Card (INS Forms I–151, I–551, or AR–3a), Temporary Evidence of Lawful Admission for Permanent Residence (INS Form I–181B), or a valid passport and immigrant visa.

(2) An alien in the category specified in § 1626.4(a)(2) shall present the fee receipt issued to the alien by the Immigration and Naturalization Service (INS) at the time that the Application for Status as Permanent Resident (INS Form I–485) was filed; or, if such fee receipt is not available, a copy of the Petition to Classify Status of Alien Relative for Issuance of Immigrant Visa (INS Form I–130) and the Application for Status as Permanent Resident accompanied by a notarized statement, signed by the alien that such forms were filed with INS.

(3) An alien in the category specified in Part 1626.4(a)(3) shall present an Arrival-Departure Record (INS Form I–94) marked "section 207" or "Refugee" (if claiming refugee status), "section 208" or "Asylum" (if claiming asylee

VOL
48
ISS
85
MAY
2
1983
UMI

status), or "section 203(a)(7)" or "Conditional entry" (if claiming conditional entrant status.

(4) An alien in the category specified in Part 1626.4(a)(4) shall present an Arrival-Departure Record (INS form I–94) marked "section 243(h)," or a court order or letter signed by an immigration judge stating that the Attorney General is withholding deportation of the alien.

(c) The following documents shall not be considered evidence of eligible alien status:

(1) Nonimmigrant Visa;

(2) Arrival-Departure Record (INS Form I–94) marked with any code from "A" through "M" for nonimmigrants, or marked "section 212(d)(5)" for parolees;

(3) Crewman's Landing Permit (INS Form I–95A);

(4) Mexican Border Visitors Permit (INS Form I–144);

(5) Nonresident Alien Canadian Border Crossing Card (INS Form I–185);

(6) Nonresident Alien Mexican Border Crossing Card (INS Form I–186);

(7) Nonresident Alien Canadian Border Crossing Identification Card (unnumbered).

(d) A recipient shall upon request furnish each person seeking legal assistance with a list of the domuments described in this section. Persons applying for legal assistance are responsible for producing the appropriate documents to verify eligibility.

§ 1626.6 Disposition of cases involving ongoing representation of ineligible aliens.

(a) A recipient may not use funds available to it under the authority of Pub. L. 97–377 to provide legal assistance to ineligible aliens; other alternatives must be used to dispose of pending cases in which the client is an ineligible alien. Generally, three alternatives are avilable:

(1) Referral to alternative counsel who can provide adequate representation;

(2) Withdrawal from pending judicial or administrative proceedings where permission to withdraw can be obtained under the rules of precedure of the tribunal; or

(3) Continuance of representation supported by funds available to the recipient either from non-Corporation sources or from unexpended carryover balances of prior year Corporation funds. As such other funds will normally be limited, referral or discontinuance of representation should be chosen wherever not inconsistent with an attorney's professional responsibilities.

(b)(1) Where referral or discontinuance of representation are not possible and no other funds are available, the recipient may permit a staff attorney to complete the case (or bring it to a stage where referral or discontinuance is possible) on an uncompensated basis. In such instances, the attorney may use the necessary minimum of recipient overhead support, but direct expenditures of Pub. L. 97–377 funds will not be permitted.

(2) In any such circumstances, a recipient shall maintain documentation clearly differentiating the time the attorney used on an uncompensated basis from his or her paid time and establishing the approximate amont of any overhead services allocable to completion of the case.

§ 1626.7 Change in circumstances.

(a) A recipient shall not use funds made available to it under the authority of Pub. L. 97–377 to provide legal assistance for or on behalf of an alien if:

(1) The alien becomes an ineligible alien due to a change in circumstances after representation has commenced;

(2) Representation of an ineligible alien was commenced due to an erroneous eligibilty determination made by the recipient; or

(3) Representation of an ineligible alien was commenced due to false information provided by the alien to the recipient.

(b) A recipient shall discontinue representation supported by funds authorized by Pub. L. 97–377 under the circumstances described in § 1626.7(a) provided discontinuance is not inconsistent with with attorney's professional responsibilities. In discontinuing representation, a recipient shall follow the procedures set out in § 1626.6. In the event of discovery of false information relating to eligibility as set forth in § 1626.7(a)(3), steps to discontinue representation shall be taken immediately.

§ 1626.8 Records.

Programs shall keep records of whether a client or prospective client claims to be a citizen or an alien. For all individuals seeking legal assistance, recipients shall keep copies of all documents given to them to establish eligibility. Such records shall be kept whether the individual was found to be eligible or ineligible for legal assistance. If an alien is found ineligible, a record of documentation (or lack thereof) may be kept in lieu of copies of said documentation.

§ 1626.9 Use and confidentiality of records pertaining to determination of eligible alien status.

(a) All records pertaining to determination of the eligibility of an alien for legal assistance shall be available (with deletion of names and personal identification) for review by the Corporation of recipients' actions and procedures in determining the eligibility of the alien for legal services. Such records shall not be released by the Corporation or by any recipient to any third party except in statistical form, nor may they be used for any other purpose than that stated in this subsection. This subsection shall not prevent release to Congress of information specifically requested by Congress.

(b) Release of any such record by a recipient, except to the Corporation or under court order, shall subject the recipient to appropriate sanctions by the Corporation.

(c) Such records shall be retained for a minimum of three years or until resolution of all audit questions pertaining thereto, whichever period is longer. Recipients shall keep a statistical record of the number of aliens found eligible and ineligible and the number of persons found eligible who subsequently were discovered to have been ineligible.

§ 1626.10 Special eligibility question.

(a) *Micronesia.* The residents of the Trust Territory of the Pacific Islands (Micronesia) currently receive legal assistance under the Legal Services Corporation Act. As Congress has expressed no intention to exclude them, the Corporation deems all citizens and permanent residents of Micronesia eligible to receive legal assistance provided they are otherwise eligible under the Act.

(b) *Cross-Border Indian Tribes.*—(1) All Canadian-born American Indians at least 50% Indian by blood are eligible to receive legal assistance provided they are otherwise eligible under the Act.

(2) Members of the Texas Band of Kickapoo are eligible to receive legal assistance provided they are otherwise eligible under the Act.

Dated: April 28, 1983.

Alan R. Swendiman,

General Counsel.

BILLING CODE 6820-35-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 30, 151, and 153

[CGD 81–078]

Safety Rules for Self-Propelled Vessels Carrying Hazardous Liquids

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard is proposing to revise the rules for self-propelled vessels carrying hazardous liquids. The proposed rule revises and adds to the list of cargoes regulated under Parts 30, 151, and 153, and includes carriage requirements for these new cargoes. In Part 153 it will correct editorial errors, clarify provisions that are confusing, delete provisions that are impractical, relax certain provisions, and add a number of new provisions. In general, the changes are in keeping with comparable standards adopted by the International Maritime Organization (IMO, formerly the Inter-Governmental Maritime Consultative Organization or IMCO) in the ninth set of amendments to the IMO Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (IMO Chemical Code), Resolution A.212.

DATES: Comments must be received on or before July 1, 1983.

ADDRESS: Comments should be submitted to: Commandant (G–CMC/44) (CGD 81–078), U.S. Coast Guard, Washington, D.C. 20593. Between the hours of 8:00 a.m. and 3:00 p.m., Monday through Friday, comments may be delivered to and will be available for inspection or copying at the Marine Safety Council (G–CMC/44), Room 4420, U.S. Coast Guard Headquarters, 2100 Second Street S.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. Robert M. Query, Office of Merchant Marine Safety (G–MTH–1/12), Room 1206, U.S. Coast Guard Headquarters, 2100 Second Street, S.W., Washington, D.C. 20593 (202–426–1217).

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (CGD 81–078), identify the specific section of the proposal to which each comment applies, and include sufficient detail to indicate the basis on which each comment is made. If an acknowledgment is desired, a stamped addressed postcard should be enclosed. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one will be held at a time and place to be set in a later notice in the **Federal Register** if requested in writing by an interested person raising a genuine issue and desiring to comment orally at a public hearing.

Drafting Information

The principal persons involved in drafting this proposal are: Mr. Robert M. Query, Project Manager, Office of Merchant Marine Safety and Mr. Michael N. Mervin, Project Attorney, Office of the Chief Counsel.

Discussion of the Proposed Regulation

The proposed rule corrects the present listings of cargoes regulated under 46 CFR Subchapter D and adds several newly classified flammable or combustible cargoes to the listings in the table in § 30.25–1 and Table 151.01–10(d) of Title 46. It adds a number of new hazardous chemical cargoes to table I of Part 153 and modifies some of the requirements applying to cargoes already listed. The proposed modifications to carriage requirements for cargoes presently listed in table I are the result of the Coast Guard's reevaluation of the hazards of some cargoes. The chemical data are in the public docket and are available for review by interested parties. The additions and changes to table I are generally comparable to additions, deletions and changes adopted by IMO in the ninth set of amendments to the IMO Chemical Code and subsequent cargo updates through May 1982. Copies of the ninth set of amendments and the new IMO cargo data have been included in the public docket.

The proposed rule will correct the electrical regulation citation in § 153.8(b)(2) to show the new Subchapter J citation for the submission of electrical plans. To be consistent with the first set of amendments to the 1974 Safety of Life at Sea Convention (SOLAS '74), §§ 153.200 and 153.202 are to be relaxed and incorporated into one section, § 153.201. The proposed rule will clarify §§ 153.372, 153.408, and 153.530(h) and (j), simplify the requirements in § 153.907, and remove §§ 153.200, 153.202, 153.530(q), 153.908, and 153.914.

Finally, the proposed rule will clarify confusing provisions, delete impractical requirements, and make editorial changes.

Comments on Specific Sections

Section 30.25–1 Cargoes carried in vessels certificated under the rules of this subchapter; and Table 151.01–10(d) Cargoes to be regulated by Subchapter D. The table in § 30.25–1 and Table 151.01–10(d) contain identical listings of flammable and combustible cargoes which may be transported in vessels certificated under Subchapter D. The Coast Guard has recently evaluated and classified several new cargoes as flammable or combustible liquids subject to Subchapter D. These cargoes are proposed to be added to the table in § 30.25–1 and Table 151.01–10(d). Also, these tables are proposed to be revised to correct misspellings of cargo names and misprints in the Code of Federal Regulations.

Iso-Propyl ether was removed from the table in § 30.25–1 by a final rule that appeared in the **Federal Register** of May 17, 1982; however, it was not removed from Table 151.01–10(d). This proposal removes "Propyl ether (iso-)" from Table 151.01–10(d).

Section 153.2 Definitions. A cross reference to the existing definition of "control space" in § 30.10–19a would be added. The definition of "Independent" as applied to tank overflow control systems would be moved to § 153.406, the only section in which the term is used.

Section 153.8 U.S. flag vessel endorsement application. The Coast Guard is proposing to amend § 153.8(b)(2) to correct the citation for the submittal of electrical plans required for plan review.

Table I—Table of Minimum Requirements. Since the most recent update of table I, the Coast Guard has evaluated approximately thirty-seven new hazardous cargoes under the IMO Criteria for Hazard Evaluation of Bulk Chemicals (annex to the IMO Chemical Code, 1980 edition). These cargoes have been adopted by IMO and are proposed for incorporation into table I.

IMO is removing chloroprene from Chapter VI of the IMO Chemical Code because of potential problems with cargo stability under the present carriage conditions. Since the Coast Guard is not aware of any company shipping chloroprene in bulk by tankships, chloroprene is proposed to be removed from table I. The Coast Guard will consider reinstating chloroprene, if removed, after reevaluation of data on the cargo.

The cargo names for "Benzene" and "Phenol" are proposed to be amended to read "Benzene, and hydrocarbon mixtures containing 10 per cent or more

VOL 48 ISS 85 MAY 2 1983 UMI

Benzene," and "Phenol/Phenol solutions." These changes would encompass a large number of cargoes that the Coast Guard had previously classified as hazardous (i.e. Petroleum hydrocarbon polymer, Pyrolysis gasoline, Phenol hydrate, etc.). The gauging requirement for "(n-) Butyl ether" is proposed to be relaxed to restricted gauging on the basis of the IMO standard. The "Fire protection system" column entry for a number of cargoes is proposed to be revised to conform with the IMO and industry recommendations.

The carriage requirements for propylene oxide are proposed to be revised to conform to those adopted by the tenth session of the IMO Subcommittee on Bulk Chemicals for insertion into the IMO Chemical Code in May 1982. (See the discussion under §§ 153.530 and 153.1010.)

Cargo pumprooms through which motor fuel anti-knock compounds are transferred present a high risk of personnel exposure to lead or lead alkyls. The Coast Guard is proposing to require that these pumprooms have ventilation rates meeting § 153.316.

Sections 153.200 Portlights, wheelhouse windows, and wheelhouse doors; 153.201 Openings to accommodation, service or control spaces; and 153.202 Location of doors and airports on deckhouses and superstructures. The proposed § 153.201 incorporates the existing §§ 153.200 and 153.202 and relaxes the distance aft of the superstructure's athwartship bulkhead to any opening. The proposed § 153.201 will state that openings to accommodation, service or control spaces must be at least L/25 or 3.00m (approx. 10 ft) from the athwartship bulkhead facing the cargo area, whichever is farther, except that the distance need not exceed 5m (approx. 16.4 ft). This revision will make the proposed § 153.201 consistent with the first set of amendments to SOLAS '74, 46 CFR 154.330 and the IMO Gas Carrier Code, Resolution A.328. Sections 153.200 and 153.202 are proposed to be deleted.

Section 153.370 Minimum relief valve setting for ambient temperature cargo tanks. The proposed rule makes an editorial change to correct the spelling of "ambient".

Section 153.372 Gauges and vapor return for cargo vapor pressures exceeding 100kPa (approx. 14.7 psia). At present cargoes whose vapor pressure exceeds 100kPa at 37.8°C (approx. 14.7 psia at 100°F) are not designated by referencing § 153.372 as suggested by § 153.970(c)(1). These high vapor pressure cargoes would be designated by modifying the section's introductory language and by making a reference to this section from table I.

Sections 153.408 Tank overflow controls; and 153.968 Cargo transfer conference. Section 153.408(d) contains an operational requirement to have the persons in charge of the cargo transfer for the vessel and facility agree to use a certain signal to initiate shutdown procedures on the vessel and facility. The Coast Guard is proposing to move this operational requirement to a more appropriate location, § 153.968(b)(5).

Sections 153.430 Heat transfer systems: general; and 153.436 Heat transfer fluids. The introductory language to § 153.430 would be revised to limit the requirements applying to cargo cooling systems to those cooling systems required by the part. The language was inadvertently changed with an earlier amendment. Section 153.436 would be rewritten to clarify it and to correct the wording of the paragraph limiting the flashpoint of the heat transfer fluid.

Sections 153.530 Special requirements for alkylene oxides; and 153.1010 Alkylene oxides. The carriage requirements for propylene oxide were reconsidered at the tenth session of the IMO Subcommittee on Bulk Chemicals in May 1982. Based on the safety record for propylene oxide carriage in integral gravity tanks, IMO deleted the recommendation that propylene oxide be carried in independent gravity tanks on vessels constructed after 1 January 1982. However, an operational requirement to check an integral gravity tank for cracks before it is loaded with propylene oxide was added. Based on the IMO recommendations, the Coast Guard proposes to delete § 153.530(q) and to add the operational requirement mentioned to § 153.1010(a).

IMO also clarified the void space monitoring requirement for oxygen content to allow the use of portable equipment. Section 153.530(h) is proposed to be revised to allow the use of portable sampling equipment.

The proposed rule clarifies § 153.530(j) by replacing the words "entirely separate" with "independent." The proposed paragraph (j) will conform to the IMO Chemical Code standard.

Section 153.907 Cargo information cards, and § 153.908 Shipping document. Cargo information cards with printing on one side are generally not available. The Coast Guard is proposing to simplify cargo information requirements and consolidate them in § 153.907. Section 153.908 would then be deleted. Section 153.914 would be deleted since it has been viewed as a requirement that the vessel supply cargo information to the shore facility and has not been practical. The shore facility is still required to have cargo information by the requirements applying to such facilities under Title 33.

Section 153.1065 Sodium chlorate solutions. Sodium chlorate solutions are very reactive. Contact with organic substances, sulfur, sulfides, powdered metals, phosphorus or ammonium compounds can cause fire and explosion. When in contact with strong acids, chlorine dioxide may be released. Sodium chlorate solutions, when spilled or mixed with small amounts of impurities, become very sensitive to shock and friction if allowed to dry. They decompose with an exothermic release of oxygen at 300° F. For these reasons, it is essential for vessel safety that tanks be washed prior to loading and spilled solutions be washed away. The proposed rule would make these safety considerations operational requirements.

Regulatory evaluation

These proposed regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these proposed regulations are considered to be nonsignificant in accordance with the guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). A draft regulatory evaluation has been included in the public docket. Copies may be obtained from Commandant (G–CMC/44), U.S Coast Guard, 2100 2nd St., S.W., Washington, D.C. 20593. This proposed rulemaking will have a minimal economic impact on the U.S. economy. Currently, there are no U.S. chemical tankships that will have to meet more stringent requirements. It is anticipated that there will be a minor benefit by allowing the carriage of additional cargoes; however, the number of variables in this trade precludes quantifying the result.

Regulatory Flexibility Analysis

The proposed rulemaking has been evaluated under the Regulatory Flexibility Act (94 Stat. 1164) for its impact on small entities. Since there will be no costs imposed on U.S. vessel owners and the anticipated minor benefits will primarily be realized in the bulk shipment of chemicals, the economic impact on small entities will be minimal. Therefore, it is certified that the rule would not, if promulgated, have a significant economic impact on a substantial number of small entities.

Environmental Analysis

The proposed rulemaking has been evaluated in accordance with Commandant Manual Instruction M16475.1A, National Environmental Policy Act Implementing Procedures, and has been found to be categorically excluded from further environmental documentation under Sections 2.B.3.g and 2.B.3.h. A copy of the Categorical Exclusion Determination statement has been placed in the public docket.

List of Subjects

46 CFR Part 30

Administrative practice and procedure, Foreign relations, Hazardous materials transportation, Marine safety, Penalties, Tank vessels, Barges.

46 CFR Part 151

Barges, Flammable material, Hazardous materials transportation, Marine safety.

46 CFR Part 153

Hazardous materials transportation, Marine safety, Tank vessels.

PART 30—GENERAL PROVISIONS

In consideration of the foregoing, Chapter I of Title 46, Code of Federal Regulations, is proposed to be amended as follows:

§ 30.25–1 [Amended]

The Table in § 30.25–1 is amended by:

1. Revising the following cargo names to read as follows:

Alkyl Benzene Sulfonic Acid (4% or less).
Diethylbenzene.
Diglycidyl Ether of Bisphenol A.
Jet Fuel:
JP–1 (Kerosene)
JP–3.
JP–4.
JP–5 (Kerosene, Heavy).
Nonyl Phenol Sulfide (90% or less).
Xylene (meta-, para-, ortho-).

2. Placing the following cargo names in proper alphabetical order:

Cyclopentadiene Polymers.
Sulfolane.

3. Adding the following new cargoes in proper alphabetical order.

Diisopropyl Naphthalene.
Dimethyl Polysiloxane.
Dipropylene Glycol Dibenzoate.
Tallow Fatty Acid.
Tributyl Phosphate.
Triethylene Glycol Butyl Ether Mixture.
Triethylene Glycol Ether Mixture.

PART 151—UNMANNED BARGES CARRYING CERTAIN BULK DANGEROUS CARGOES

§ 151.01–10 [Amended]

The Table in § 151.01–10(d) is amended by:

4. Removing "Propyl ether (iso-)".

5. Revising the following cargo names to read as follows:

Alkyl Benzene Sulfonic Acid (4% or less).
Diethylbenzene.
Diglycidyl Ether of Bisphenol A.
Nonyl Phenol Sulfide (90% or less).
Xylene (meta-, para-, ortho-).

6. Placing the following cargo names in proper alphabetical order:

Cyclopentadiene Polymers.
Sulfolane.

7. Adding the following new cargoes in proper alphabetical order to Table 151.01–10(d):

Diisopropyl Naphthalene.
Dimethyl Polysiloxane.
Dipropylene Glycol Dibenzoate.
Tallow Fatty Acid.
Tributyl Phosphate.
Triethylene Glycol Butyl Ether Mixture.
Triethylene Glycol Ether Mixture.

PART 153—SAFETY RULES FOR SELF-PROPELLED VESSELS CARRYING HAZARDOUS LIQUIDS

8. In § 153.2, by removing the definition of "independent" as applied to tank overflow control systems and by adding in alphabetical sequence the following definition:

§ 153.2 Definitions.

* * * * *

"Control space" is defined in § 30.10–19a of this chapter.

* * * * *

9. By revising § 153.8(b)(2) to read as follows:

§ 153.8 U.S. flag vessel endorsement application.

* * * * * * *

(b) * * *

(2) The plans and information listed in §§ 54.01–18, 56.01–10, 91.55–5(a), (b), (d), (g) and (h), and 110.25–1 of this chapter; and

* * * * *

10. By revising in table I to Subpart A the following entries for propylene oxide to read as follows:

Table I—[Amended]

Cargo name * * *	Fire protection system	* * *	Special requirements
* * * * *			

By removing "Chloroprene" from table I.

12. By amending the cargo name entry in table I for "Benzene" to read "Benzene, or hydrocarbon mixtures containing 10 pct or more benzene".

13. By amending the cargo name entry in table I for "Phenol" to read "Phenol or solutions with 5% or more phenol".

14. By amending the table I column entry under "Gauge" to read "Restr." for "(n-) Butyl ether."

15. By adding "D" to the table I column entry under "Fire protection system" for the following cargoes:

(n-) Butyl ether	Coal tar naphtha
Creosote	Cyclohexylamine
(iso-, n-) Decyl acrylate	Dibutylamine
Dichlorobenzene	Diethylethanolamine
Dimethylamine (40 pct or less)	Dimethylethanolamine
Dimethylformamide	Ethylene chlorohydrin
Ethyl methacrylate	2-Methyl-5-ethyl pyridine
(iso-) Propylamine	(n-) Propylamine

16. By amending the table I column entry under "Fire protection system" to read "A,B,C,D" for the following cargoes:

alpha-Methyl styrene	(mono-) Nitrobenzene
Vinyl toluene	

17. By amending the table I column entry under "Fire protection system" to read "A,D" for the following cargoes:

Butyl methacrylate	Naphthalene (liquid)

18. By adding ".236(a),(g)" in proper numerical sequence to the "Special requirements" column of table I for "Tetraethylene pentamine".

19. By adding ".316" in proper numerical sequence to the "Special requirements" column of table I for "Motor fuel antiknock compounds containing lead alkyls."

20. By adding ".372" in proper numerical sequence to the "Special requirements" column of table I for the following cargoes:

Ethyl ether	Isoprene
Methyl formate	(iso-) Propylamine
Propylene oxide	Vinyl ethyl ether
Vinylidene chloride	

21. By adding ".440" in proper numerical sequence to the "Special requirements" column of table I for "Naphthalene (liquid)" and "Phenol or solutions with 5% or more phenol".

22. By removing and reserving footnote 9, and revising footnote 8 at the end of table I to read as follows:

For details see these sections:

* * * * *

[8] Dry chemical should not be used because of the possibility of explosion.

[9] (Reserved).

* * * * *

23. By adding the following new cargoes and their corresponding column entries in proper alphabetical order to table I:

TABLE I.—TABLE OF MINIMUM REQUIREMENTS

Cargo name[1]	Cargo containment system[2]	Vent height[3]	Vent[4]	Gauge[5]	Fire protection system[6]	Special requirements	Electrical hazard class and group[7]
Acrylamide solution (50 pct or less)	II	NR	Open	Closed	NSR	.408, .525(a), (c), (d), (e), .912(a)(1), .1002(a), .1004, .1020.	NA.
2-(2-Aminoethoxy) Ethanol	III	NR	Open	Open	A,C,D	.236(b), (c), .409	NA.
Benzenesulfonyl	III	4m	PV	Restr.	B,D	.236(a), (b), (c), (g), .409, .526	I-D.
Cetyl-Eicosyl Methacrylate	III	NR	Open	Open	A,C,D	.912(a)(1), .1002(a), (b), .1004	NA.
(o-, m-, p-)Chlorotoluene	III	4m	PV	Restr.	B,C	.526	I-D.
Cresylate spent caustic (mixtures of cresols and caustic soda solution.	III	NR	Open	Open	NSR	.236(a), (c), 933	NA.
Diammonium salt of zinc ethylenediamine tetraacetic acid solution.	III	NR	Open	Open	NSR	.236(a), .238(a)	I-B.
2,2'-Dichloroisopropyl ether	II	B/3	PV	Restr.	B,C,D	236(a), (b), 316, .408, .525, .526, .1020	I-D.

§ 153.200 [Removed]

24. By removing § 153.200.

25. By adding § 153.201 to read as follows:

§ 153.201 Openings to accommodation, service or control spaces.

(a) Except as allowed in paragraphs (b) and (c) of this section, entrances, ventilation intakes and exhausts, and other openings to accommodation, service, or control spaces, must be located on a house bulkhead not facing the cargo area as follows:

(1) At least 3m aft of the house bulkhead that faces the cargo area if the vessel length is less than 75 meters.

(2) At least L/25 aft of the house bulkhead that faces the cargo area if the vessel length is between 75 and 125 meters.

(3) At least 5m aft of the house bulkhead that faces the cargo area if the vessel length is more than 125 meters.

(b) Fixed port lights, wheelhouse doors, and windows need not meet the location requirements specified in paragraph (a) if they do not leak when tested with a fire hose at 207 kPa gauge (30 psig).

§ 153.202 [Removed]

26. By removing § 153.202.

27. By revising § 153.370 to read as follows:

§ 153.370 Minimum relief valve setting for ambient temperature cargo tanks.

The relief valve setting for a containment system that carries a cargo at ambient temperature must at least equal the cargo's vapor pressure at 46°C (approx. 115°F).

28. By revising the introductory text of § 153.372 to read as follows:

§ 153.372 Gauges and vapor return for cargo vapor pressures exceeding 100kPa (approx. 17.7 psia).

When table I references this section, the containment system must have a—

* * * * *

29. By revising § 153.408 to read as follows:

§ 153.408 Tank overflow control.

(a) When table I refers to this section, a cargo containment system must have a cargo high level alarm meeting § 153.409 and one of the following:

(1) A second high level (cargo overflow) alarm.

(2) A system that automatically stops cargo flow to the tank (automatic shutdown system).

(b) The high level alarm and the cargo overflow alarm or automatic shutdown system must—

(1) be independent of one-another; and

(2) operate on loss of power.

(c) The cargo overflow alarm or the automatic shutdown system must—

(1) operate at a cargo level that allows shutdown of the loading operation before the cargo tank overflows; and

(2) allows sufficient time to avoid surge pressures exceeding the working pressure specified in § 153.294(b).

(d) A tank overflow alarm must be marked with the legend "Tank Overflow Alarm" in lettering as specified for the warning sign in § 153.955.

(e) The alarm must be audible and visible in that part of the deck where the containment systems are located and at the point where cargo loading is controlled on the tankship.

(f) The automatic shutdown system or tank overflow alarm must be able to be checked for proper operation from the tank (e.g., by generating the alarm signal at the tank gauge connection).

(g) In this section, "independent" as applied to two systems means that one system will operate with a failure of any part of the other system except high level power sources and electrical feeder panels. Independent systems include those having separate signal or low level power runs within the same conduit.

30. By revising the introductory language of § 153.430 to read as follows:

§ 153.430 Heat transfer systems: general.

Each cargo cooling system required by this part and each cargo heating system must—

* * * * *

31. By revising § 153.436 to read as follows:

§ 153.436 Heat transfer fluids: flashpoint and compatibility with cargo.

(a) A cargo heating system must have a control that prevents the temperature of the heat transfer fluid from exceeding its flashpoint.

(b) A heat transfer fluid separated from the cargo by only one wall (for example, the heat transfer fluid in a coil within a tank) must be compatible with the cargo under the standards prescribed for compatibility between two cargoes in part 150 of this chapter.

32. By revising § 153.530(h) and (j) to read as follows:

§ 153.530 Special requirements for alkylene oxides

* * * * *

(h) The cargo containment system and those spaces listed in paragraphs (k) and (l) must have an arrangement to allow sampling the atmosphere of the spaces prescribed by § 153.1010(c).

* * * * *

(j) The venting system must be independent of other containment or tankship systems.

* * * * *

§ 153.530 [Amended]

33. By removing § 153.530(q)

§ 153.900 [Amended]

34. By changing the footnote number in § 153.900 to read "5".

35. By revising §153.907 to read as follows:

§ 153.907 Cargo information.

The master shall ensure that the following information for each cargo carried under this part is readily available to those on the tankship engaged in cargo operations:

(a) The name of the cargo as listed in table I.

(b) A description of the cargo's appearance and odor.

(c) Hazards in handling the cargo.

(d) Any special handling procedures for the cargo, such as inerting.

(e) Procedures to follow if the cargo spills or leaks.

(f) Procedures to follow with a person who is exposed to the cargo.

(g) A list of fire fighting procedures and extinguishing agents effective with fires involving the cargo.

(h) Shipper's name.

(i) Loading point.

(j) Approximate quantity of cargo.

(k) Tank in which the cargo is located.

(l) The name of the agent in the United States authorized to accept legal process.

§ 153.908 [Removed]

36. By removing § 153.908.

§ 153.914 [Removed]

37. By removing § 153.914.

38. By revising § 153.968(b)(5) to read as follows:

§ 153.968 Cargo transfer conference.

* * * * *

(b) * * *

(5) If the vessel is equipped with the tank overflow alarm prescribed in § 153.408(c), a procedure for shutdown of shore pumps, shore valves, and ship's valves that prevents piping systems pressures from exceeding those for which the piping system is designed.

40. Section 153.1010 is amended by redesignating paragraphs (a)(1) and (a)(2) as (a)(2) and (a)(3), respectively, and adding a new paragraph (a)(1) to read as follows:

§ 153.1010 Alkylene oxides

(a) * * *

(1) Inspect each integral gravity tank in which alkylene oxides are to be loaded and make sure the tank is free of cracks;

* * * * *

41. By adding a new § 153.1065 to read as follows:

§ 153.1065 Sodium chlorate solutions.

(a) No person may load sodium chlorate solutions into a containment system that previously carried another cargo unless the containment system is thoroughly washed before loading.

(b) The person in charge of cargo transfer shall ensure that spills of sodium chlorate solutions are immediately washed away.

(46 U.S.C. 391a; 49 U.S.C. 1803; 49 CFR 1.46 (n)(4) and (t))

Dated: December 27, 1983.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 21, 22, 23, 74, 78, 81, 87, 90, 94, and 150

[Gen. Docket No. 82-334]

Establishment of a Spectrum Utilization Policy for the Fixed and Mobile Services' Use of Certain Bands Between 947 MHz and 40 GHz; Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of reply comment period.

SUMMARY: The FCC has granted in part Motions file by Hughes Aircraft Company, Electronic Industries Association, Rockwell International Corporation and M/A-COM, Inc. for extension of time for Reply Comments in General Docket 82-334, establishment of a spectrum utilization policy for the fixed and mobile services' use of certain bands between 947 MHz and 40 GHz. The Motions were granted in part to provide interested parties additional time to adequately and fairly respond to technical analyses and alternative proposals received in the initial Comments; the full amount of time requested could not be granted due to Commission deadlines for future work in the Docket.

DATES: The deadline for Reply Comments is extended to May 23, 1983.

ADDRESS: Federal Communications, Commission Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Donald Draper Campbell, Office of Science and Technology (202) 653–6177.

Order Extending Time for Reply Comments

In the matter of Establishment of a spectrum utilization policy for the fixed and mobile services' use of certain bands between 947 MHz and 40 GHz; Gen Docket 82–334.

Adopted: April 18, 1983.
Released: April 20, 1983.

By the Deputy Chief Scientists.

1. On January 13, 1983, the Commission adopted and released a *Notice of Proposed Rule Making* [FCC 83–2] *(NPRM)* in the above captioned proceeding (February 15, 1983; 48 FR 6730). The *NPRM* imposed Comment and Reply Comment dates of March 25, 1983, and April 25, 1983, respectively. The Commission stated in the *NPRM* that these dates were established because of the need to complete action by September 1983 in providing alternative spectrum for fixed service licensees displaced from 12 HGz. The Commission also stated that it did not expect to grant extensions of the filing dates.

2. On April 12, 1983, the Commission received a Motion for Extension of *Time to File Reply Comments* (*Motion*) from Hughes Aircraft Company, Microwave Communications Products (Hughes-MCP). The petitioner states that it needs an additional sixty (60) days to prepare Reply Comments. It notes that the Commission, through the Acting Chief Scientist, denied all requests for extensions of time of the March 25 Comment date,[1] but states that the circumstances surrounding the instant request are quite different from those previously made. Hughes goes on to state "Interested parties such as Hughes-MCP cannot be expected to digest, analyze and comment intelligently on the many detailed technical issues which have been raised in such voluminous initial comments in such a short period."

[1] *Denial of a Joint Motion for an Extension of Time and Modification of Procedures*, released March 7, 1983, in response to a petition filed by the American Petroleum Institute, Association of American Railroads and Utilities Telecommunications Council; *Denial of Petition of the Los Angeles County Sheriff's Department and Los Angeles County Department of Communications to Extend Time to File Comments*, released March 16, 1983; and *Denial of Request for Extension of Time for Filing Comments*, released March 28, 1983, in response to a petition filed by the County of Orange, California, Communications Division.

3. The Commission also received a *Request for Extension of Time for Filing Reply Comments* from the Fixed Point-to-Point Section of the Telecommunications Group of the Electronic Industries Association (EIA), filed April 14, 1983; a *Plea for Extension of Time for Filing Reply Comments* from Rockwell International Corporation (Rockwell), filed April 15, 1983; and a *Request for Extension of Time* from M/A-COM, Inc. (M/A-COM), filed April 15, 1983. EIA requests that the Reply Comment date be extended to June 30, 1983, Rockwell requests that the date be extended to May 31, 1983, and M/A-COM requests an extension to May 25, 1983. Their justifications parallel that of Hughes-MCP regarding volume, and complexity of the Comments. Rockwell and M/A-COM also note that they had trouble locating and obtaining copies of the Comments in the Commission's public reference room.

4. Comments were received from about 170 parties and total about 1685 pages. Some of these contain complex technical analyses and present alternatives to the Commission's proposals. The Commission believes that there is merit in providing additional time for interested and affected parties to perform responsive analyses leading to thoughtful, well organized comments. Such Reply Comments would be more useful to the Commission in formulating a speedy yet comprehensive decision in this proceeding.

5. The Commission made a commitment in Docket 80–603 to provide replacement spectrum for displaced 12 GHz licenses by September 1983. If the Commission is to meet this deadline, it cannot grant the total additional time requested by the petitioners. However, the Commission feels that an extension of time to May 23, 1983, is reasonable.

6. Accordingly, the requests for Extension of Time to File Reply Comments filed by Hughes Aircraft Company, Electronic Industries Association Rockwell International Corporation, and M/A-COM, Inc. in this proceeding are hereby granted in part pursuant to § 0.241(d) of the Commission's Rules. The date for filing Reply Comments is extended from April 25, 1983 to May 23, 1983.

Majorie S. Reed,
Deputy Chief Scientist.

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Rulemaking Petition

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Denial of rulemaking petition.

SUMMARY: This notice denies a petition filed by Mr. Carl Seashore to amend Federal Motor Vehicle Safety Standard (FMVSS) 111 to permit the use of an automated rearview mirror system he has developed for passenger cars. This mirror system would automatically change its alignment depending on vehicle speed and would also change position when the vehicle turn signal is activated. Since the agency lacks information on the safety performance of this system and the petitioner was unable to provide such information, this petition is being denied. However, several aspects of the petitioner's mirror system are currently the subject of ongoing agency research activities. Depending on the results of this research, it is possible that FMVSS 111 could be amended in the future to permit the use of a version of the petitioner's system.

FOR FURTHER INFORMATION CONTACT: Kevin Cavey, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590, (202)–426–2153).

SUPPLEMENTARY INFORMATION: On September 3, 1982, Mr. Carl Seashore petitioned NHTSA to amend FMVSS 111 to permit the use of a mirror system he designed. FMVSS 111 currently requires that exterior mirrors must be planar (flat), except that exterior passenger side spherically convex mirrors may be used in passenger cars and light trucks, multipurpose passenger vehicles, and buses other than school buses with a gross vehicle weight rating of 10,000 pounds or less. The reason for the prohibition against the use of certain non-planar mirror surfaces is that such surfaces may produce distorted images which could mislead drivers as to the location and velocity of objects viewed in the mirror. However, convex mirrors do have the advantage of providing a wider field of view than a plane mirror of similar size.

Mr. Seashore's system involves using exterior convex mirrors on each side of the vehicle. These mirrors would be mounted forward on the vehicle's fenders, rather than the more typical door mounting. The use of convex mirrors on each side of the vehicle is intended to provide a wider field of view than currently used mirrors and to provide equal image sizes in each mirror. The forward mounting is intended to permit the driver to look in the mirrors while still retaining a forward view, rather than having to look far to the side and perhaps lose sight of hazards in the path of the vehicle. The Seashore system is also automated, permitting automatic reorientation of the mirror, and thereby the field of view, as driving speed varies and for turns.

Many of the aspects of the Seashore recommended system are the subject of ongoing agency research and will be further considered by the agency. These aspects include the use of convex mirrors on each side of the vehicle and the forward mirror mounting position. However, the agency is concerned that the automated movement of the mirrors may present safety concerns. For example, the sudden movement of the automated mirror might cause the driver to become confused as to the location and velocity of an overtaking vehicle. Further, the reliability of such a system is unknown, particularly in adverse weather conditions where ice or snow could impede the movement of the mirror. Therefore, the agency is denying this petition. Should the agency's research demonstrate that the use of convex mirrors on each side of the vehicle and forward mirror mounting promote rearward visibility, FMVSS 111 could be amended to permit the use of a version of the Seashore proposed system, albeit one without the automated features.

(Sec. 124, Pub. L. 89–492, 80 Stat. 1470 (15 U.S.C. 1410a); delegations of authority at 49 CFR 1.50 and 501.8)

Issued on April 22, 1983.

Courtney M. Price,
Associate Administrator for Rulemaking.

BILLING CODE 4910–59–M

49 CFR Part 574

[Docket No. 80–20; Notice 2]

Tire Identification and Recordkeeping

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of termination of rulemaking.

SUMMARY: This notice terminates the rulemaking action begun by this agency when it published a notice of proposed rulemaking (NPRM) to require that tire manufacturers mold the tire identification number on the outward-facing sidewalls of all passenger car and light truck tires. The agency has no evidence showing that significant safety benefits would result from the proposed action, or even that there would be any safety benefits at all.

FOR FURTHER INFORMATION CONTACT: Arturo Casanova, Office of Vehicle Safety Standards, NHTSA, 400 Seventh Street, S.W., Washington, D.C. 20590 (202–426–1715)

SUPPLEMENTARY INFORMATION: Two years ago, the NHTSA published an NPRM (45 FR 82293; December 15, 1980) proposing that the tire identification number, which tire manufacturers are required to mold into or onto one of the sidewalls of each tire they manufacture, be required to appear on the whitewall side of whitewall tires and on both sidewalls of blackwall tires for all passenger car and light truck tires. This proposed requirement was intended to make it easier for consumers to check their tire identification numbers. These numbers are used by tire manufacturers to help identify and recall the tires that are found to contain a safety defect or to fail to comply with an applicable Federal motor vehicle safety standard. The agency believed that adoption of the amendment would increase the response to tire recall campaigns. Ultimately, the agency anticipated that this action would reduce the chances of potentially unsafe tires being used on the public roads.

Before making this proposal, NHTSA sent special orders to nine tire manufacturers to determine what technical problems might be posed by such a requirement and to obtain estimates by the manufacturers of the costs associated with such a requirement. Based on its evaluation of these responses, NHTSA determined that such a requirement would impose costs of between $4.25 million and $5.9 million.

The agency was not able to provide a quantified estimate of the benefits to be gained from the proposed requirement. The data relied upon by the agency in issuing the proposal consisted solely of anecdotal comments by 13 consumers on difficulties they experienced in locating tire identification numbers. These 13 comments were among about 9,500 responses received by the agency in response to a survey in which it sent questionnaires to approximately 100,000 consumers. Thus, only 0.013 percent of the questionnaire recipients and 0.14 percent of the respondents reported this type of difficulty. Prior to issuing the proposal, the agency did not have any data or perform any analysis regarding the extent to which the proposed requirement would increase the number of people who find the identification number on their tires, the number of those people who respond to a recall, or the number of potentially defective or noncomplying tires that would be removed from service.

Even after consideration of the comments on the proposal, NHTSA is still unable to provide any estimate of expected benefits. No additional data regarding benefits were obtained by the agency as a result of the comment process.

Accordingly, since the agency is unable to determine that adoption of the proposal would significantly contribute to motor vehicle safety and since the compliance costs would be $4.25 to $5.9 million, the agency has decided to terminate this rulemaking.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Renewals of Designation of Cedar Rapids Grain Service, Inc. (IA), Champaign-Danville Grain Inspection Departments, Inc. (IL), and Springfield Grain Inspection Department (IL)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the renewals of designation of the Cedar Rapids Grain Service, Inc. (Cedar Rapids), Champaign-Danville Grain Inspection Departments, Inc. (Champaign-Danville), and Springfield Grain Inspection Department (Springfield) as official agencies responsible for providing inspection services under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (Act).

EFFECTIVE DATE: June 1, 1983.

ADDRESS: James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore, the Executive Order and Secretary's Memorandum do not apply to this action.

The December 1, 1982, issue of the **Federal Register** (47 FR 54128) contained a notice from the Federal Grain Inspection Service (FGIS) announcing that Cedar Rapids', Champaign-Danville's, and Springfield's designations would terminate on May 31, 1983, and requesting applications for designation as the agency to provide official services within each specified geographic area. Applications were to be postmarked by January 3, 1983.

Cedar Rapids, Champaign-Danville, and Springfield were the only applicants for each respective designation.

FGIS announced the names of these applicants and requested comments on them in the February 1, 1983, issue of the **Federal Register** (48 FR 4496). Comments were to be postmarked by March 18, 1983.

No comments were received regarding Cedar Rapids' and Champaign-Danville's designation renewal. One comment was received from a grain firm discussing the timeliness of service the firm received from Springfield. This situation has resolved to the mutual satisfaction of both the firm and Springfield.

After evaluating all available information in regard to the designation criteria in Section 7(f)(1)(A) of the Act, and in accordance with Section 7(f)(1)(B), FGIS has determined that Cedar Rapids, Champaign-Danville, and Springfield are able to provide official services in the geographic areas for which their designations are being renewed. Each assigned area is the entire geographic area, as previously described in the December 1 issue of the **Federal Register.**

Effective June 1, 1983, and terminating May 31, 1986, the responsibility for providing official inspection services in each specified geographic area is assigned to Cedar Rapids, Champaign-Danville, and Springfield, respectively.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency to conduct official inspection and where the agency and one or more of its licensed inspectors are located. In addition to the specified service points within the assigned geographic area, the agencies will provide official services not requiring a licensed inspector to all locations within their geographic area.

Interested persons may contact the Regulatory Branch, specified in the address section of this notice, to obtain a list of the specified service points. Interested persons also may obtain a list of the specified service points by contacting the agencies at the following addresses:

Cedar Rapids Grain Service, Inc., 1120 2nd Street, SW., Cedar Rapids, IA 52401

Champaign-Danville Grain Inspection Departments, Inc., 527 East Main Street, Danville, IL 61832

Springfield Grain Inspection Department, 1301 North Fifteenth Street, Springfield, IL 62702

(Sec. 8, Pub. L. 94–582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: April 20, 1983.

J. T. Abshier,

Director, Compliance Division.

[FR Doc. 83–11027 Filed 4–29–83; 8:45 am]

BILLING CODE 3410-EN-M

Request for Comments on Applicants for Designation in the Areas Currently Assigned to William F. Christen Grain Inspection (IN), Fremont Grain Inspection Department, Inc. (NE), and Titus Grain Inspection, Inc. (IN)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for designation as the official agency in the areas currently assigned to William F. Christen Grain Inspection, Fremont Grain Inspection Department, Inc., and Titus Grain Inspection, Inc.

DATE: Comments to be postmarked on or before June 16, 1983.

ADDRESS: Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Management Staff, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 0667, South Building, 1400 Independence Avenue, SW., Washington, D.C. 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382–1736.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore, the Executive Order and Secretary's Memorandum do not apply to this action.

The March 1, 1983, issue of the **Federal Register** (48 FR 8519), and as corrected, the April 1, 1983, issue of the **Federal Register** (48 FR 14017), contained a notice from the Federal Grain Inspection Service requesting applications for designation to perform official services under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (Act), in the areas currently assigned to the official agencies. Applications were to be postmarked by April 15, 1983.

William F. Christen Grain Inspection (Christen), the only applicant, requested designation for all of the geographic area currently assigned to that agency. Titus Grain Inspection, Inc. (Titus), the only applicant, requested designation for all of the geographic area currently assigned to that agency. Each agency applied for a renewal of designation for a 3-year period.

There were two applicants for the Fremont Grain Inspection Department, Inc. (Fremont), designation. Fremont requested designation for all of the geographic area currently assigned to that agency and applied for a renewal of designation for a 3-year period. Sioux City Inspection and Weighing Agency, Inc. (Sioux City), an official agency, applied for a portion of Fremont's geographic area, as follows: Clay (west of U.S. Route 71); Dickinson (west of U.S. Route 71); O'Brien (north of B24 and east of U.S. Route 59); and Osceola (east of U.S. Route 59) Counties, Iowa. If designated, this action would result in an amendment to Sioux City's currently assigned geographic area in accordance with Section 800.207 of the regulations under the Act.

In accordance with § 800.208(b)(2) of the regulations under the Act, this notice provides interested persons the opportunity to present their views and comments concerning the applicants for designation. All comments must be submitted to the Regulations and Directives Management Staff, specified in the address section of this notice, and postmarked not later than June 16, 1983.

Consideration will be given to comments and to other available information before a final decision is made in this matter. Notice of the final decision will be published in the **Federal Register,** and the applicants will be informed of the decision in writing.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: April 20, 1983.

J. T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Applicants for Designation To Perform Official Services in the Geographic Area Currently Assigned to Cairo Grain Inspection Agency

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as amended (Act), designations of official agencies shall terminate not later than triennially and may be renewed in accordance with the criteria and procedures prescribed in the Act. This notice announces that the designation of one agency will terminate, in accordance with the Act, and requests applications from parties, including the agency currently designated, who are interested in being designated as an official agency to conduct official services in the geographic area currently assigned to the specified agency. The official agency is Cairo Grain Inspection Agency.

DATE: Applications to be postmarked on or before June 1, 1983.

ADDRESS: James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, D.C. 20250. All applications submitted pursuant to this notice will be made available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Secretary's Memorandum 1512–1; therefore, the Executive Order and Secretary's Memorandum do not apply to this action.

Section 7(f)(1) of the Act (7 U.S.C. 71 *et seq.*, at 79(f)(1)) specifies that the Administrator of the Federal Grain Inspection Service (FGIS) is authorized, upon application by any qualified agency or person, to designate such agency or person to perform official services after a determination is made that the applicant is better able than any other applicant to provide such official services in an assigned geographic area.

Cairo Grain Inspection Agency, 4007 Sycamore Street, Cairo, Illinois 62914, was designated as an official agency under the Act for the performance of inspection functions on August 31, 1978.

The agency's designation will terminate on October 31, 1983. This date reflects administrative extensions of official agency designations, as discussed in the July 16, 1979, issue of the **Federal Register** (44 FR 41275). Section 7(g)(1) of the Act states generally that official agencies' designations shall terminate no later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Cairo, in Illinois, Kentucky, and Tennessee, pursuant to Section 7(f)(2) of the Act, and which is the area that may be assigned to the applicant selected for designation is the following:

In Illinois, the area is bounded on the North by State Route 150 from the Mississippi River north to State Route 3; State Route 3 southeast to State Route 149; State Route 149 east to State Route 13; State Route 13 southeast to U.S. Route 51; U.S. Route 51 south to Union county. The area also includes the following Counties: Alexander, Johnson, Hardin, Massac, Pope, Pulaski, and Union.

In Kentucky, the area includes the following Counties: Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Livingston, Lyon, Marshall, McCracken, and Trigg.

In Tennessee, the area includes the following Counties: Benton, Dickson, Henry, Houston, Humphreys, Lake, Montgomery, Obion, Stewart, and Weakley.

The following locations, outside of the foregoing contiguous geographic area, are presently assigned to Cairo and are part of the area that may be assigned to the applicant selected for designation: Hopkinsville Elevator Company, Inc., Hopkinsville; and the L&N Railroad siding on Alternate U.S. Route 41 five miles southeast of Hopkinsville, Christian County, Kentucky.

Exceptions to the described geographic area are the following locations situated inside Cairo's area which have been and will continue to be served by Memphis Grain and Hay Association: Continental Grain Co., Tiptonville; West Tennessee Soya, Tiptonville; and Planters Gin, Ridgely, all in Lake County, Tennessee.

Interested parties, including Cairo, are hereby given opportunity to apply for designation as the official agency to perform the official services in the geographic area, as specified above, under the provisions of section 7(f) of the Act and § 800.196(b) of the regulations issued thereunder. Designation in the specified geographic area is for the period beginning

VOL
48
ISS
85
MAY

1983
UMI

November 1, 1983, and ending October 31, 1986. Parties wishing to apply for this designation should contact the Regulatory Branch, Compliance Division, at the address listed above for appropriate forms and information. Applications must be postmarked not later than June 1, 1983 to be eligible for consideration.

In making a determination as to which applicant will be designated to provide official services in a geographic area, consideration will be given to applications submitted and other available information.

Forest Service

Colville National Forest Grazing Advisory Board; Meeting

The Colville National Forest Grazing Advisory Board will meet at 2 p.m. on May 6 at the Federal Building Conference Room, 695 So. Main Street, Colville, MA, 99114. The purpose of this meeting is to discuss range allotment management planning and to review the projects which will receive funding from Range Betterment Fund monies in 1983.

The meeting is open to the public. Persons who wish to attend should notify Gary Oliverson, Colville National Forest, at the above address. Written statements may be filed with the committee before or after the meeting.

Dated: April 11, 1983.

William D. Sheak,

Forest Supervisor.

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

International Trade Administration

Foreign Availability Subcommittee of the Computer Systems Technical Advisory Committee; Open Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee. The Foreign Availability Subcommittee was formed to ascertain if certain kinds of equipment are available in non-COCOM and Communist countries, and if such equipment is available, then to ascertain if it is technically the same or similar to that available elsewhere.

Time and Place: May 17, 1983, at 9:30 a.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C.

Agenda: General Session:

(1) Opening remarks by the Subcommittee Chairman.

(2) Presentation of papers or comments by the public.

(3) Review of the foreign availability research contract progress—Scientific Applications Staff.

(4) Review of the world computing data base status.

(5) Discussion of foreign availability test cases to be submitted to Commerce on:

(a) Microprocessors;

(b) Floppy disk drives.

(6) Discussion of the legislative activity on the Export Administration Act for 1983.

(7) Discussion of the long term 1983 agenda.

Public Participtation: The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202–377–2583.

Dated: April 20, 1983.

Milton Baltas,

Director of Technical Programs, Office of Export Administration.

BILLING CODE 3510-25-M

Hardware Subcommittee of the Computer Systems Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee.

The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to: (1) Maintenance of the processor performance tables and further investigation of total systems performance; and (2) investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

Time and Place: May 17, 1983, at 1:30 p.m. The meeting will take place at the Main Commerce Building, Room 3708, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the meeting will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and properly classified under Executive Order 12356. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202–377–4217.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202–377–2583.

Dated: April 26, 1983.

Milton Baltas,

Director of Technical Programs, Office of Export Administration.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigation; Chloropicrin From the People's Republic of China

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of antidumping investigation.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating an antidumping investigation to determine whether chloropicrin from the People's Republic of China is being, or is likely to be, sold in the United States at less than fair value. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of chloropicrin are materially injuring, or are threatening to materially injure, a United States industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before May 23, 1983, and we will make ours on or before September 13, 1983.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Michael Ready or Loc Nguyen, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377–2613 or 377–0167.

Petition

On April 6, 1983, we received a petition filed by counsel on behalf of LCP Chemicals & Plastics, Inc. and Niklor Chemical Company, Inc. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petitioners allege that imports from the People's Republic of China of chloropicrin are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 732 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act) and that these imports are materially injuring, or are threatening to materially injure, a United States industry.

The petitioners further allege that the People's Republic of China is a state-controlled economy country within the meaning of the Act. They allege that sales of chloropicrin in the People's Republic of China do not permit a determination of foreign market value and that the Department of Commerce must choose a non-state-controlled economy country to be used as a surrogate for the purpose of determining the foreign market value of this product. The petition suggests Japan as a possible surrogate country.

The allegation of sales at less than fair value is supported by information on foreign market value and United States price obtained by the petitioners from a trading company in Japan. The petition also includes United States price information obtained from an American firm which unsuccessfully sought to purchase the product from the PRC.

Critical circumstances have also been alleged under section 773(e) of the Act (19 U.S.C. 1673b(e)). We will make a determination regarding this issue on the date of our preliminary determination.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on chloropicrin and have found that it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether chloropicrin from the People's Republic of China is being, or is likely to be, sold in the Unites States at less than fair value. If the investigation proceeds normally, we will make our preliminary determination by September 13, 1983.

Scope of the Investigation

The merchandise covered by this investigation is chloropicrin, also known as trichloronitromethane. Chloropicrin is currently classified under item number 408.1600, 408.2900 and 425.5290 of the Tariff Schedules of the United States Annotated.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination By ITC

The ITC will determine by May 23, 1983, whether there is a reasonable indication that imports of chloropicrin from the People's Republic of China are materially injuring, or are threatening to materially injure, a U.S. industry. If its determination is negative, this investigation will terminate; otherwise, the investigation will proceed according to statutory procedures.

Judith H. Bello,

Acting Deputy Assistant Secretary for Import Administration.

April 26, 1983.

BILLING CODE 3510-25-M

Applications for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States.

Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, Room 1523, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No.: 83–38. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550. Instrument: Faraday Rotator Glass Blanks, Type FR–5. Manufacturer: Hoya Corporation, Japan. Intended use of instrument: The instrument is intended to be used in the country's most advanced effort to demonstrate the

feasibility of the generation of usable power in a controlled thermonuclear fusion reaction. Experiments will be conducted using the NOVA 10-arm laser system to obtain isentropic compression of deuterium-tritium targets to greater than 10,000 times liquid density, thereby producing for the first time in any research facility thermonuclear reaction of as many as 10^{14} neutrons per microexplosion. Application received by Commissioner of Customs: November 3, 1982.

Docket No.: 83–141. Applicant: University of Minnesota, Minneapolis, MN 55455. Instrument: Electron Microscope, Model H–600–2 and Accessories. Manufacturer: Hitachi Ltd., Japan. Intended use of instrument: The instrument is intended to be used in carrying out various research projects involving a wide range of biological materials. In addition, the instrument will be used in the course, Transmission Electron Microscopy Lab to provide the student with sufficient experience in electron microscopy techniques. Application received by Commissioner of Customs: March 10, 1983.

Docket No.: 83–6. Applicant: Associated Universities, Inc., National Radio Astronomy Observatory, Post Office Box 2, Green Bank, West Virginia 24944. Instrument: Electrical Transducer. Manufacturer: ERA Technology Limited, United Kingdom. Intended use of instrument: The instrument is intended to be incorporated into a 3.3 GHz radio astronomy receiver which is to be used to study natural radiation from molecules and electrons in space. Application received by Commissioner of Customs: October 18, 1982.

Docket No.: 83–174. Applicant: Riverside Methodist Hospital, 3535 Olentangy River Road, Columbus, OH 43214. Instrument: Electron Microscope, EM 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: The instrument is intended to be used for studies of kidney biopsies with emphasis on pathogenesis of renal diseases, undifferentiated malignant tumors as to their identity, origin and behavior, leukemias and malignant tumors of the lymphoid system. Also included in research will be specimens suitable for establishing and identifying viruses and viral-related disease. The instrument will also be used in various medical conferences and courses for further understanding of the pathogenesis of disease states and relationships of structural alteration to the clinical status of the patient. Application received by Commissioner of Customs: April 15, 1983.

BILLING CODE 3510–25–M

Decision on Application for Duty-Free Entry of Scientific Instrument; Department of Agriculture

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83–6. Applicant: U.S. Department of Agriculture, Systematic Entomology Laboratory, Room 4, Bldg. 003, Beltsville Agricultural Research Center-West, Beltsville, MD 20705. Instrument: Scanning Electron Microscope, S100T and Accessories. Manufacturer: Cambridge Instruments Ltd., United Kingdom. Intended use of instrument: See Notice on Page 53759 in the **Federal Register** of November 29, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (September 20, 1982).

Reasons: The foreign instrument provides X and Y stage movements of 100 millimeters (mm). The most closely comparable domestic instrument is the Model 1700/02 manufactured by AMRAY Incorporated, 160 Middlesex Turnpike, Bedford, MA 01730. The Model 1700/02 provides X stage movement of up to 55 mm and Y movement of up to 80 mm. The Department of Health and Human Services (HHS) advises in its memorandum dated March 2, 1983 that X and Y stage movements up to 100 mm are pertinent to the purposes for which the foreign instrument is intended to be used. HHS further advises that it knows of no domestic instrument of equivalent scientic value to the foreign instrument for its intended uses. We therefore find that the Model 1700/02 is not of equivalent scientific value to the foreign instrument for such purposes as this foreign instrument is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510–25–M

Decision on Application for Duty-Free Entry of Scientific Instrument; Georgia Institute of Technology

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 82–00376. Applicant: Georgia Institute of Technology, Procurement Office, 888 Hemphill Ave., NW., Atlanta, Georgia 30332. Instrument: Untuned Cavity Resonator, Model UR–1. Manufacturer: Ealing Research Ltd., United Kingdom. Intended use of instrument: See Notice on page 51436 in the **Federal Register** of November 15, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument measures optical properties of irregular shaped materials and provides broad

uniform spectral coverage (millimeter and far infrared). The National Bureau of Standards advises in its memorandum dated March 28, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

Decision on Application for Duty-Free Entry of Scientific Instrument; University of California

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83–12. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 5512, L–630, Livermore, CA 94550. Instrument: Streak Camera, Model C1370. Manufacturer: Hamamatsu Corporation, Japan. Intended use of instrument: See Notice on page 53759 in the **Federal Register** of November 29, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument has a quantum efficiency greater than or equal to 0.7 percent at 600 nanometers. The National Bureau of Standards advises in its memorandum dated April 4, 1983 that: (1) The capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (June 29, 1982).

Reasons: The foreign instrument is a system composed of an excimer laser integrated to a dye laser. At the time the foreign instrument was ordered there were domestic manufacturers of excimer lasers who could combine their respective products with a dye laser produced by another manufacturer. However this would not constitute a "reasonable combination of instruments" within the meaning of § 301.5(d)(1)(i) of the regulations unless the domestic manufacture offering to furnish the combination undertakes to: (a) Functionally integrate the instruments as a single operating unit and (b) establish through appropriate test procedures the overall performance specifications of the excimer and dye laser system. [See decisions on Gas Chromatograph/Mass Spectrometer Docket Number 68–00518–01–13000, 33 FR 11097, August 3, 1968 and Docket Number 69–00716–01–41000, 34 FR 13336 and 13337, August 16, 1969.] We note that at the time of order of the foreign instrument there were no such domestic combinations manufactured in the United States. The foreign instrument has: (1) An excimer pump energy of 0.7 joules per pulse on xenon chloride at 20 pulses per second and (2) a dye laser linewidth less than or equal to 0.002 nanometers(nm) at 320 to 730nm and less than or equal to 0.003nm at 730 to 950nm. The National Bureau of Standards advises in its memorandum dated March 17, 1983 that: (1) The capabilities of the foreign instrument described above are pertinent to the applicant's intended purpose and (2) it knows of no combination of instruments or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no combination of other instruments or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510–25–M

Computer Systems Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving: (A) Technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States establishes or in which it participates including proposed revisions of any such controls.

Time and Place: May 18, 1983, at 1:00 p.m. The meeting will take place at the Main Commerce Building, Room 6802, 14th Street and Constitution Avenue, N.W., Washington, D.C.

Agenda: General Session:

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Industry priority issues on export controls.

(4) Report on current work program of the subcommittees:

(a) Foreign Availability;

(b) Hardware; and

(c) Licensing Procedures.

Executive Session:

(6) Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Public Participation: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuamnt to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202-377-4217.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: 202-377-2583.

Dated: April 26, 1983.

Milton Baltas,

Director of Technical Programs, Office of Export Administration.

BILLING CODE 3510-25-M

Licensing Procedures Subcommittee of the Computer Systems Technical Advisory Committee; Open Meeting

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: The Computer Systems Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981 in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was approved for continuation on October 5, 1981 pursuant to the charter of the Committee. The Licensing Procedures Subcommittee was formed to review the procedural aspects of export licensing and recommend areas where improvements can be made.

Time and Place: May 18, 1983, at 10 a.m. The meeting will take place at the Main Commerce Building, Room 6802, 14th Street and Constitution Ave., N.W., Washington, D.C.

Agenda: General Session:

1. Minutes of the previous meeting.

2. Presentation of papers or comments by the public.

3. Remarks by the Chairman:

a. Proposal for an all-industry licensing procedures committee;

b. Meridian corporation interview program.

4. U.S. Customs Service: Rule making and quick response procedures.

5. Export Administration Act developments.

6. OEA response to letters on:

a. Procedures for exhibits.

b. Acceleration of post-COCOM procedures.

7. Report on Distribution License policies consideration.

Public Participation: The meeting will be open for public observation and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Subcommittee. Written statements may be submitted at any time before or after the meeting.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, "Washington, D.C. 20230," Telephone: 202-377-2583.

Dated: April 26, 1983.

Gulf of Mexico Fishery Management Council's ad hoc Shrimp/Stone Crab Advisory Subpanel; Meeting Amendment

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The dates and location for the ad hoc Shrimp/Stone Crab Advisory Subpanel meeting, as published in the **Federal Register** on April 25, 1983, (48 FR 17638), have been amended as follows:

Separate public meetings will be convened for Shrimp and Stone Crab members on Tuesday, May 3, 1983, and Wednesday, May 4, 1983, respectively. Separate public meetings will be convened for Stone Crab and Shrimp members on Tuesday, May 10, 1983, and Wednesday, May 11, 1983, respectively, to define each fishery.

Public meetings of the entire advisory subpanel will be convened on Tuesday, May 24, 1983, and Tuesday, May 31, 1983, respectively, to address a solution to the conflict. All public meetings will convene at 9 a.m., and will adjourn at approximately 4 p.m.

The public meetings on May 3 and 4, will take place at the Holiday Inn, U.S. Highway 19, Weeki Wachee, Florida. The public meetings on May 10 and 11, will take place at the Pasco/Hernando Community College, Building F, 7025 State Road 587, New Port Richey, Florida. The public meetings on May 24 and 31, will take place at the Hernando/Pasco County Community College, Administration Building, U.S. 98, Brooksville, Florida.

FOR FURTHER INFORMATION CONTACT: Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609, telephone: (813) 228-2815.

Dated: April 26, 1983.

Alfred J. Bilik,

Acting Chief, Fees, Permits and Regulations Branch, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Office of the Secretary

President's Private Sector Survey on Cost Control; Meeting

AGENCY: Office of the Secretary, Commerce.

ACTION: Notice of open meeting of the Subcommittee of the President's Private Sector Survey on Cost Control (PPSSCC).

SUMMARY: The Subcommittee was established by the Executive Committee of the PPSSCC to: (i) Review the recommendations submitted, including task force reports and public comments, and (ii) determine which recommendations should be made to the President and the Departments and Agencies.

Time and Place: May 17, 1983, begining at 3 p.m. The meeting will be held at the U.S. Department of Commerce Auditorium, First Floor, Herbert C. Hoover Building, 14th St. and Constitution Avenue, N.W., Washington, D. C. 20230.

Agenda:

1. Draft reports from the following Task Forces of the Survey will be discussed by Subcommittee members:

A. Boards/Commissions—Business;

B. Hospital Management;

C. Federal Construction Management;

D. Department of Labor;

E. Real Property Management;

F. Veterans Administration.

2. Comments and recommendations received from public and other interested parties will be discussed by Subcommittee members.

In compliance with Federal Advisory Committee Act and Freedom of Informatiion Act requirements, copies of the draft reports will be available on May 6 at the Department's Central Reference and Records Inspection Facility, Room 6628 Hoover Building, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Please call Ms. Geraldine P. LeBoo on (202) 377-3271 for information concerning fees and procedures for obtaining copies by mail.

SUPPLEMENTARY INFORMATION: The Subcommittee will hold additional public meetings in May and June, 1983. Exact dates will be noticed in the Federal Register. Copies of all materials, including Task Force reports, to be considered at these meetings will be available approximately two weeks prior to each meeting at the Department's Central Reference and Records Inspection Facility, address above.

Public Participation: the May 17 meeting will be open to the public. Seating will be on a first-come, first-served basis, up to the safe capacity of the meeting room. Media representatives are encouraged to call Mr. Malcolm Barr, Director, News Relations, Department of Commerce, 377-4901 to arrange for coverage of the meeting.

The public may file written statements for consideration by the Subcommittee any time before, at, or after the meeting. It is strongly recommended that statements concerning the matters to be considered at each meeting be filed before such meeting to ensure that they are considered by the Subcommittee before adoption of a report. The statements should be filed at the Department of Commerce's Central Reference and Records Inspection Facility, address and phone number as above. Because of the number of recommendations to be discussed, the meeting agenda will not include time for oral statements from public attendees. All public statements received will be available for public review.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Colson, Committee Control Officer for the Executive Committee of the President's Private Sector Survey on Cost Control, telephone (202) 466-4665.

Dated: April 26, 1983.

Marilyn S. McLennan,

Chief, Information Policy and Management Division, Office of the Secretary.

BILLING CODE 6630-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Levels for Certain Wool Textile Products From the Hungarian People's Republic Under a New Bilateral Agreement

April 27, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import levels for men's and boys' suit-type wool coats in category 433 and wool suits in category 443 and 444, produced or manufactured in Hungary, under a new bilateral agreement.

SUMMARY: On February 15 and 25, 1983, the Governments of the United States and the Hungarian People's Republic signed a new Bilateral Wool Textile Agreement. The new agreement establishes, among other things, levels of restraint for wool textile products in Category 433 during the twelve-month period which began on January 1, 1983 and for Categories 443 and 444 during the fifteen-month period which began on October 1, 1982 and extends through December 31, 1983. In the letter published below, the Chairman, Committee for the Implementation of Textile Agreements, directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of wool textile products in categories 433, 443, and 444, produced or manufactured in Hungary and exported during the periods indicated, in excess of the designated levels. The level of restraint for Category 433 has not been adjusted to account for any imports after December 31, 1982. The levels for Categories 443 and 444 have not been adjusted for any imports after September 30, 1982. Such charges will be made, as applicable, to account for periods which began on October 1, 1982 and January 1, 1983 and extend to the effective date of this action, as well as thereafter. A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Gordana Slijepcevic, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4214).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

April 27, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasure, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Wool Textile Agreement of February 15 and 25, 1983, between the Governments of the United States and the Hungarian People's Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on May 3, 1983 and for the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Category 433, produced or manufactured in Hungary and exported during 1983, in excess of 7,350 dozen.[1]

You are also directed to prohibit, effective on May 3, 1983 and for the fifteen-month period which began on October 1, 1982 and extends through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Categories 443 and 444, produced or manufactued in Hungary and exported during that fifteen-month period in excess of the following levels of restraint:

[15-month level of restraint] [1]

Category	Dozens
443	8,740
444	8,209

[1] The levels of restraint have not been adjusted to reflect any imports after September 30, 1982.

Wool textile products in Category 433 which have been exported to the United States before January 1, 1983, or, in the case of Categories 443 and 444, before October 1, 1982, shall not be subject to this directive.

Textile products in Categories 433, 443, and 444 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The levels set forth above, except where noted, are subject to adjustment in the future according to the provisions of the bilateral agreement of February 15 and 25, 1983 between the Governments of the United States and the Hungarian People's Republic, which provide, in part, that: (1) Except for Category 433, the levels of restraint may be exceeded by not more than five percent during an agreement year, provided the increase is compensated for by an equivalent decrease in another specific limit, other than Category 433; (2) the levels may be increased for carryforward up to 6 percent of the applicable category limit; and (3) administrative arrangements or adjustment may be made to resolve minor problems arising in the implementation of the agreement.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Hungarian People's Republic and with respect to imports of wool textile products from Hungary have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83-11649 Filed 4-29-83; 8:45 am]

BILLING CODE 3510-25-M

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1982.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of committee: Army Science Board (ASB).

Dates of meeting: Tuesday and Wednesday, May 17 and 18, 1983.

Times: 0830-1700 hours (closed)—both days.

Place: The Pentagon, Washington, D.C.

Agenda

The Army Science Board 1983 Summer Study on Future Development

Goal will have a meeting of its Equipping the Army Subpanel for classified briefings and discussions of same. Areas to be covered are innovations within ARRADCOM and TRADOC, interfaces between new equipment requirements and Mission Area Analyses (MAA), interface between doctrine and new equipment, and system constructs—the bridge between the technology base and AirLand Battle 2000. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5 U.S.C. App. 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695-3039 or 697-9703.

Maria P. Winters,

Acting Administrative Officer.

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of committee: Army Science Board (ASB).

Dates of meeting: Tuesday, Wednesday, and Thursday, May 17-19, 1983.

Times: 0830-1700 hours (closed)—all three days.

Place: Various West Coast facilities of private industry sector, all located in the Los Angeles, California area (see below).

Agenda

The Army Science Board Ad Hoc Subgroup on Intelligent Robotics will conduct facility visits of Hughes Research Laboratories (Malibu), Odetics (Anaheim), and the Naval Ocean Systems Command Laboratories (San Diego) for orientation in kicking off this important study effort. The Subgroup is examining applications for the U.S. Army of emerging technologies in the field of intelligent robotics. The Subgroup will also hold an Executive Session to discuss what has been briefed and demonstrated. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraphs (1 and 4) thereof, and Title 5, U.S.C. App. 1, subsection 10(d). The classified and proprietary nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695-3039 or 697-9703.

Maria P. Winters,

Acting Administrative Officer.

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

National Advisory Council on Vocational Education; Meeting

AGENCY: National Advisory Council on Vocational Education.

ACTION: Notice of public meeting of the council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Advisory Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE: June 12, 1983, 9:00 a.m.-4:30 p.m.

ADDRESS: The Capitol Holiday Inn, 550 C Street SW., Columbia Ballroom North.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Vocational Education is established under Section 104 of the Vocational Education Amendments of 1968, Pub. L. 90-576. The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to the Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

The meeting of the National Advisory Council, as announced, is open to the public, and the proposed Agenda will include presentations regarding:

Guidance and Counseling

Business/Education Cooperation

Recognition of Outstanding Handicapped Student

Committee Reports

Records are kept of the Council's proceedings, and are available for public inspection at the office of the National Advisory Council on Vocational Education from 9:00 a.m. to 5:00 p.m., 425 13th Street NW., Suite 412, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Virginia Solt, NACVE Staff, at above address. Telephone: (202) 376-8873.

Signed at Washington, DC on April 27, 1983.

James W. Griffith,

Executive Director, National Advisory Council on Vocational Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA-FC-83-011; FC Case Nos. 61045-9229-20-24 61045-9229-21-24 61045-9229-22-24]

Petition for Exemption and Availability; Capitol Cogeneration Co., Ltd.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of acceptance of petition for exemption and availability of certification by Capitol Cogeneration Company, Ltd.

SUMMARY: On March 9, 1983, Capitol Cogeneration Company, Ltd. (Capitol), filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for each of three identical electric powerplants from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) (FUA or the Act). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA were published in the **Federal Register** at 46 FR 59872 (December 7, 1981). Final rules governing the cogeneration exemption were revised on June 25, 1982. (47 FR 29209 (July 6, 1982)).

Capitol seeks exemptions for three 100 megawatt combustion turbine powerplants capable of using natural gas or No. 2 distillate oil to produce

VOL
48
ISS
85
MY
2
1983
UMI

electricity, each of which will be coupled with a heat recovery steam generator to produce high pressure process steam.

It is expected that all the net annual electric power generation of Capitol's turbine generators will be sold to Houston Lighting & Power Company (HL&P), making each cogeneration facility an electric powerplant pursuant to § 500.2 of the final rules.

Within thirty days of the receipt of the petition, ERA found it to be incomplete due to minor deficiencies and so notified Capitol. On April 18, 1983 additional data and information addressing the deficiencies were received from Capitol. ERA has determined that the amended petition appears to include sufficient evidence to support an ERA determination and it is therefore accepted pursuant to § 501.3 of the final rules. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701 (c) and (d) of FUA and §§ 50.31 and 501.33 of the final rules, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E–190, Washington, D.C. 20585, 8:00 a.m. to 4:00 p.m., Monday through Friday except Federal holidays.

ERA will issue a final order granting or denying the petition for exemptions from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register**.

DATE: Written comments are due on or before June 16, 1983. A request for a public hearing must be made within this same 45-day period.

ADDRESS: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–093, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585.

Docket No. ERA–FC–83–011 should be printed on the outside of the envelope and the document contained therein.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA–073G, Washington, D.C. 20585, Phone (202) 252–8162, or

Allan Stein, Esq., Office of the General Counsel, Department of Energy, Forrestal Building, Room 6B–222, 1000 Independence Avenue, SW., Washington, D.C. 20585, Phone (202) 252–2967.

SUPPLEMENTARY INFORMATION: Capitol proposes to construct and operate a cogeneration plant known as the Bayport Project located in Pasadena Industrial District, Pasadena, Harris County, Texas which will: (1) Generate electrical power for sale to HL&P, and (2) produce process steam for sale to Celanese Chimical Company. The proposed system will consist of three 100 megawatt gas turbine/generators, together with three heat recovery generators, which will utilize exhaust heat from the turbines to produce high pressure steam. The heat recovery generators will not be supplementally fired with additional fuel.

Capitol expects to sell all the net annual electric power generation of the turbine generators to HL&P. The sale of in excess of 50 percent of each facility's net annual electric power generation causes it to be classified as an electric powerplant under FUA, subject to the Title II construction and fuel use prohibitions.

Section 212(c) of the Act and § 503.37 of the final rules provide for permanent cogeneration exemptions from the prohibitions of Title II of FUA. In accordance with the requirements of § 503.37(a)(1) of the final rules, Capitol has certified that:

1. The oil or gas to be consumed by each cogeneration facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility, where the calculation of savings is in accordance with § 503.37(b) of the final rules; and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in each cogeneration facility for which an exemption under § 503.38 of the final rules would be available, would not be economically or technically feasible.

In accordance with the evidentiary requirements of § 503.37(c), Capitol has also included as part of its petition:

1. Exhibits containing the basis for the certifications described above, and

2. An environmental impact analysis, as required under § 503.13 of the final rules.

In processing these exemptions, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA); the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE's guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of: (1) An Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment. If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until ERA's NEPA compliance has been completed. Pursuant to § 501.3 of the final rules, ERA hereby accepts the petitioner's requet for permanent cogeneration exemptions for the Bayport Project units, described above. ERA retains the right, however, to request additional relevant information from the petitioner at any time during the pendency of these proceedings. As provided in § 503.3(b)(4) of the final rules, the acceptance of the petition by ERA does not constitute a determination that Capitol is entitled to the exemptions requested. That determination will be based on the entire record of this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, D.C. on April 25, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Office of Energy Research

Energy Research Advisory Board; Light Water Reactor Safety R&D Panel; Opening Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Light Water Reactor Safety R&D Panel of the Energy Research Advisory Board (ERAB).

Date and time: May 24–25, 1983 from 9 a.m. to 5 p.m.

Place: U.S. Department of Energy, 1000 Independence Avenue, SW., Room 4A–110, Washington, DC 20585.

Contact: Charles E. Cathey, U.S. Department of Energy, Office of Energy Research (ER–6), 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the Parent Board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide longrange guidance in these areas to the Department.

Tentative Agenda:

- Discussions on the activities and current status of the subpanels on DOE and Foreign Research, NRC Research, and Private Sector and INPO Research.
- Panel discussions of the working draft chapters prepared by the subpanels.
- Public comment (10 minute rule).

Public Participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles E. Cathey at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 25, 1983.

J. R. Young,

Director for Management, Office of Energy Research.

BILLING CODE 6450–01–M

Energy Research Advisory Board; Materials R&D Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Materials R&D Panel of the Energy Research Advisory Board (ERAB).

Date and Time: May 18, 1983 from 8 a.m. to 4 p.m.

Place: U.S. Department of Energy, 1000 Independence Avenue, SW., Room 4A–110, Washington, DC 20585.

Contact: William Woodard, U.S. Department of Energy, Office of Energy Research (ER–6), 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252–8933.

Purpose of the Parent Board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative Agenda:

- Discussion of Initial Working Outline for Draft Report.
- Reports on laboratory visits.
- Public comment (10 minute rule).

Public Participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact William Woodard at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 25, 1983.

Algonquin Gas Transmission Co., et al.; Filing of Pipeline Refund Reports and Refund Plans

April 27, 1983

Take notice that the pipelines listed in the Appendix hereto have submitted to the Commission for filing proposed refund reports or refund plans. The date of filing, docket number, and type of filing are also shown on the Appendix.

Any person wishing to do so may submit comments in writing concerning the subject refund reports and plans. All such comments should be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before May 11, 1983. Copies of the respective filings are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER83–469–000]

Arizona Public Service Co.; Filing

April 27, 1983.

The filing Company submits the following:

Take notice that on April 19, 1983, Arizona Public Service Company (APS) tendered for filing as an initial rate schedule an Emergency Interruptible Transmission Service Agreement

between Southern California Edison Company and APS dated April 14, 1983. The emergency interruptible transmission service shall expire when the Moenkopi 500 kV line is back in service.

APS requests an effective date of April 3, 1983, and therefore requests waiver of the Commission's notice requirements.

A copy of the filing was served upon the Arizona Corporation Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 12, 1983. Protests will be considered by the Commission in determining the appropriate action taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

David B. Meeker; Application

April 27, 1983.

The filing individual submits the following:

Take notice that on April 21, 1983, David B. Meeker, filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Director: The Dayton Power & Light Company
Director: Square D Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 12, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. QF83-208-000]

Genstar Gas Recovery Systems, Inc., Marsh Road; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 27, 1983.

On March 7, 1983, Genstar Gas Recovery Systems, Inc., 177 Bovet Road, Suite 550, San Mateo, California 94402, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules. On March 31, 1983 supplementary information was filed regarding the facility.

The facility is located at Marsh Road Landfill, Menlo Park, California. The generating capacity of the facility is one megawatt. The primary energy source is landfill gas. the facility is the only small power production facility owned by the applicant located within one mile of the site. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-207-000]

Genstar Gas Recovery Systems, Inc., Newby Island; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

April 27, 1983.

On March 7, 1983, Genstar Gas Recovery Systems, Inc., of 177 Bovet Road, Suite 550, San Mateo, California 94402, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules. On March 31, 1983 supplementary information was filed regarding the facility.

The facility is located at Newby Island Landfill, San Jose, California. The generating capacity of the facility is 1.5 megawatts. The primary energy source is landfill gas. The facility is the only small power production facility owned by the applicant located within one mile of the site. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-51-001]

Great Lakes Gas Transmission Co.; Filing

April 27, 1983.

Take notice that on April 13, 1983, Great Lakes Gas Transmission Company (Great Lakes) submitted for filing Substitute Forty-Second-A Revised Sheet No. 57 to its FERC Gas Tariff, First Revised Volume No. 1.

On March 31, 1983, Great Lakes filed Forty-Second-A Revised Sheet No. 57 to its FERC Gas Tariff, First Revised Volume No. 1, containing adjustments to rates to reflect the current cost of gas purchased by Great Lakes from TransCanada Pipelines Limited, and a revised surcharge rate resulting from unrecovered purchased gas cost for the period commencing September 1, 1982 and ending February 28, 1983. The requested effective date of Forth-Second-A Revised Sheet No. 57 was May 1, 1983, which is the next semi-annual purchase gas cost adjustment date for Great Lakes under the Commission's regulations.

On April 11, 1983, the Canadian government announced, effective April 12, 1983, a reduction in the Canadian border price of natural gas to $4.40 U.S. per MMBtu from $4.94 U.S. Per MMBtu.

The instant filing reflects the new border price. Also transmitted with the filing as Exhibit A are the details of the computations of the revised purchased gas cost adjustment. The surcharge and the GRI charge adjustments remain unchanged from those filing on March 31, 1983.

Great Lakes requests that Substitute Forty-Second-A Revised Sheet No. 57 become effective on May 1, 1983, instead of Forth-Second-A Revised Sheet No. 57. The effect of the reduction in the border price between April 12, 1983, and April 30, 1983 will be credited to Great Lakes unrecovered purchased gas adjustment Account No. 191 and will be included in the next surcharge to be effective November 1, 1983.

Great Lakes states that copies of the filing were served on all Great Lakes, customers, and the public service commissions of Minnesota, Wisconsin and Michigan.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 5, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-11680 Filed 4-29-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. SA83-11-000]

Hamman Oil and Refining Co.; Application for Adjustment

Issued: April 27, 1983.

On April 6, 1983, Hamman Oil and Refining Co. (Hamman) filed with the Commission a "Petition for an Adjustment" under section 502(c) of the Natural Gas Policy Act of 1978 (NGPA) 15 U.S.C. 3301 *et seq.* (Supp. V 1982). Specifically, Hamman requests a finding that production from a well within 2.5 miles of the State Tract No. 36 No. 1 Well (State Well) for the 5 month period of January to May 1970 is not "production in commerical quantities" as defined in § 270.102 of the Commission's regulations. Further, Hamman seeks a finding that if such production is not in commercial quantities, the State Well is not within 2.5 miles of a "marker well" as that term is defined in section 2(5)(A) of the NGPA, and therefore may qualify for a section 102(c)(1)(B) well determination under the NGPA.

Hamman is the operator of the State Well, on State Tract No. 36, Lake Anahuac Field, Chambers County, Texas, and wishes to qualify that well for NGPA section 102 rates. Section 102(c)(1)(B)(i) requires that a well must be a "new well," as defined in NGPA section 2(3), and must be at least 2.5 miles from the nearest marker well in order to qualify for section 102 rates. A "marker well" is defined as any well from which natural gas was produced in commercial quantities at any time after January 1, 1970, and before April 20, 1977. Since the NGPA did not define "produced in commerical quantities" the Commission defined such term in § 270.102 of its regulations as "production of natural gas from a well or reservoir which is either: (A) Sold and delivered to one other than the operator; or (B) (subject to [a rebuttable presumption in] § 271.204(e)) retained by the operator, or any owner of the production at severance, for beneficial economic use."

Hamman asserts that of the 12 wells which are producing or have produced gas within a 2.5 mile radius of the State Well, measured from the surface projection of the bottom hole location, only one, in the Trinity Field, is a possible marker well, that may prevent the State Well from qualifying under section 102(c)(1)(B)(i). Hamman contends that since this Trinity Field well produced only 13,639 Mcf for the period January through May 1970 (the first 5 months of the marker well determination period), which was only 16.63 percent of its set allowable of 62,000 Mcf for the same period, this shows that the well was beginning to play out, and was probably unprofitable in 1970, and maintained only because it could be commingled with the producer's other production from wells in the area. Thus, Hamman alleges that this was "inadvertent" production, and should be disregarded as sufficient production to be designated "production in commerical quantities."

Hamman's request for an adjustment is based on an assertion that it would suffer inequitable treatment if the Commission finds that the alleged marker well's 5 months of production, which "inadvertently" overlapped the first 5 months of the marker well determination period, is production in commercial quantities. The alleged inequity which would result should the State Well be ineligible for section 102 rates, is that the necessary incentives to explore and develop the Lake Anahuac wildcat area, and in particular the sands in which the State Well was completed, would be unavailable. Hamman avers that to dissallow the requested adjustment would contravene the policy of the NGPA to encourage the development and production of natural gas.

The procedures applicable to the conduct of this adjustment proceeding are found in Rules 1101–1117, Subpart K of the Commission's Rules of Practice and Procedure. 18 CFR 385.1107–1117. Any person desiring to participate in this proceeding shall file a petition to intervene in accordance with the provisions of Rule 214 (§ 385.214). All petitions to intervene must be filed within fifteen days after the publication of this notice in the Federal Register.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-11681 Filed 4-29-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP81-61-010]

Michigan Wisconsin Pipe Line Co.; Filing of Post Audit Report

April 27, 1983.

Take notice that on April 12, 1983, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), pursuant to Article I of the Stipulation and Agreement dated October 25, 1982, in

VOL 48 ISS 85 MAY 2 1983 UMI

Docket Nos. RP81–61 and RP82–60, which was approved by the Commission on February 10, 1983, submitted for filing its Post Audit Report setting forth the settlement cost of service for the Locked-In Period (twelve months ended October 31, 1982) and settlement base rates for resale, transportation and storage services all computed in accordance with Appendix A of the Stipulation and Agreement.

Michigan Wisconsin states that copies of the report were sent to all of Michigan Wisconsin's jurisdictional customers, interested state commissions and parties to the proceedings in Docket Nos. RP81–61 and RP82–60.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–11682 Filed 4–29–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP83–77–000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Petition of Northern Natural Gas Company for Waiver of FERC Gas Tariff

April 27, 1983.

Take notice that on April 25, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), filed a petition requesting a waiver of its FERC Gas Tariff so as to permit the Company a fifteen day extension of the time required to file its Semi-Annual ANGTS Rate Adjustment, reflecting changes in Northern Border transportation rates charged to Northern.

Northern states that granting of the requested waiver will allow it to make the ANGTS Rate Adjustment filing based upon the Commission's disposition of the Stipulation and Agreement resolving Northern's rate case in Docket No. RP82–71. This settlement currently is on the Commission's agenda for its April 27 meeting.

Northern states that the settlement in Docket NO. RP82–71 embodies a new rate design which will substantially affect the ANGTS Rate Adjustment filing and that it desires to make the required filing based upon the rates ultimately approved by the Commission. Furthermore, approval of its request will permit Northern and its customer utilities to forego multiple rate filings with this Commission and/or their respective state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.11, 385.214). All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Tennessee Gas Pipeline Co.; Denying Extension of Time

April 26, 1983.

On April 8, 1983, Tennessee Gas Pipeline Company (Tennessee) filed a motion for an extension of time to file Settlement Cost of Service, Settlement Base Tariff Rates and Unit Refund Amounts pursuant to the Stipulation and Agreement which was approved by Commission letter order issued June 23, 1982, in the above-docketed proceeding. In its April 8, 1983, motion, Tennessee requests that the filing date be postponed pending Commission consideration of a second Stipulation and Agreement which was filed by the company on April 6, 1983, in the above-proceeding and other Tennessee proceedings. On April 20, 1983, Commission Staff Counsel filed an answer stating his opposition to Tennessee's request.

Upon consideration, notice is hereby given that the motion is denied.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–11685 Filed 4–29–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER83–470–000]

Wisconsin Power and Light Co.; Filing

April 27, 1983.

The filing Company submits the following:

Take notice that on April 19, 1983, Wisconsin Power and Light Company (WPL) tendered for filing an Agreement and three rate schedules dated February 14, 1983 between WPL and Wisconsin Public Power Incorporated System (WPPIS). WPL states that the Agreement and associated rate schedules are filed for the purpose of establishing the terms and conditions of sale and purchase of wholesale power and energy and transmission services between WPL and WPPIS.

WPL request an effective date of March 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been provided to WPPIS and the Public Service Commission of Wisconsin.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 12, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–11686 Filed 4–29–83; 8:45 am]

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPRM–FRL 2355–1]

Agency Forms Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 USC 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers; Office of Standards and Regulations; Information Management Section (PM–223); U.S. Environmental Protection Agency; 401 M Street SW.; Washington, D.C. 20460; telephone (202) 382–2742 or FTS 382–2742.

SUPPLEMENTARY INFORMATION:

Water Programs

- Title: Survey of Operating and Financial Characteristics of Community Water Systems (EPA ID 0371).

Abstract: EPA is following up its original survey of community water systems to complete unanswered quetions. The Agency will use this information for economic analysis of regulatory and nonregulatory alternatives.

Respondents: Public and privately-owned community water systems.

Pesticides Programs

- Title: Pilot Study: Pesticide Use Survey of Public Outdoor Use Areas (EPA ID 0604).

Abstract: EPA Is conducting a pilot study of local governments' usage of pesticides in outdoor areas. The data collected will ultimately affect regulatory decisions involving registration, data requirements and special studies.

Respondents: Local governments.

Agency Forms Cleared by OMB Between March 31 and April 8, 1983

EPA ID 0094, Recordkeeping of Supporting Date for Permit to Discharge Wastewater, was cleared April 7 (OMB #2000–0448).

EPA ID 0574, Premanufacture Notification Requirements, was cleared April 8 (OMB #2070–0012).

EPA ID 0808, Contingency Plans for Hazardous Waste Management Facilities, was cleared April 7 (OMB #2050–0011).

EPA ID 0809, Operating Record for Hazardous Waste Management Facilities, was cleared April 7 (OMB #2050–0013).

EPA ID 0820, Generator Requirements, was cleared on April 1 (OMB #2000–0412).

EPA ID 0969, Authorization of State Hazardous Waste Management Programs, was cleared April 7 (OMB #2000–0387).

EPA ID 1017, Survey of Nonferrous Metals Forming Industry (resubmission), was cleared March 31 (OMB #2040–0034).

Comments on all parts of this notice should be sent to:

David Bowers, U.S. Environmental Protection Agency, Office of Standards and Regulations (PM–223) 401 M Street SW., Washington, D.C. 20460

and

Anita Ducca, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building (Room 3228), 726 Jackson Place NW., Washington, D.C. 20503.

Dated: April 22, 1983.

N. Phillip Ross,

Chief, Statistical Policy Staff.

[FR Doc. 83–11344 Filed 4–29–83; 8:45 am]

BILLING CODE 6560–50–M

[OPTS–59048; TSH–FRL 2350–6]

Premanufacture Notices; Monthly Status Report for March 1983

Correction

In FR Doc. 83–10457, beginning on page 17134, in the issue of Thursday, April 21, 1983, make the following changes:

1. On page 17134, in the third column, the fourth line from the bottom should read "Dated: April 13, 1983."

2. On page 17135 in the table, in entry 83–536, "ester" should read "esters".

3. Also on page 17135, an entry should be inserted after 83–546; it should read "83–547 Generic name: Substituted phenolazo, substituted pyrazonlone. 48 FR 11501 (3/18/83) June 7, 1983."

4. On page 17136, in entry 83–473, remove "di-"; in entry 83–474 "di" should read "tri".

5. Also on page 17133, in entry 83–501, "condensation" should read: "condensation product".

BILLING CODE 1505–01–M

[OPTS–59116A; FRL 2356–5]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM–83–22, an application for test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: April 22, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–204, 401 M St. SW., Washington, D.C. 20460; (202–382–3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and

disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83–22.

Initial Date of Receipt: February 2, 1983.

Notice of Receipt: February 16, 1983 (48 FR 6900).

Applicant: Confidential.

Chemical: Alkyl co-polyether, (Generic).

Use: Confidential.

Import Volume: 15,000 kg.

Number of Customers: 3.

Exposure Information: There will be low potential for worker exposure to the new chemical substance during manufacture and processing operations. Worker exposure to the new chemical substance is expected to be minimal because of the low vapor pressure, use of protective clothing, and because of the short duration of manufacture (an estimated 5 days during the 1 year test marketing period). Worker exposure at customers' use sites is also expected to be low because of the automated application of the new chemical to an article.

Releases of the new chemical substance from manufacturing sites will be to publically owned treatment works (POTWs) and is expected to be low. The test market substance is expected to be released to water at customer's use sites after end use application.

Test Marketing Period: 1 year.

Commencing on: April 22, 1983.

Risk Assessment: There is some concern for health effects for the new chemical substance. However, concern is mitigated by the very low exposure potential during the test marketing period.

Chemicals analogous to the new chemical substance vary in ecotoxicity potential over a wide range. Based on uncertainty and the expected release of the new chemical substance to water, concerns were raised for possible aquatic toxicity. However, the Agency concludes that the test market substance has a low potential for aquatic toxicity based on results of toxicity tests conducted by the submitter in response to Agency concerns.

Public Comments: None.

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: April 22, 1983.

Marcia Williams,

Acting Director, Office of Toxic Substances.

[FR Doc. 83-11624 Filed 4-29-83; 8:45 am]

BILLING CODE 6560-50-M

[OPTS–59120A/59121A; TSH FRL 2356–4]

Certain Chemicals; Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM–83–31, and TM–83–32, TM–83–33, and TM–83–34, four applications for test marketing exemptions (TME) under section 5 (h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore C. Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–204, 401 M St. SW., Washington, D.C. 20460; (202–382–3725).

SUPPLEMENTARY INFORMATION: Section 5 (h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. If the substance is shipped, the applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83–31.

Date of Receipt: March 15, 1983.

Notice of Receipt: March 25, 1983 (48 FR 12590).

Applicant: Confidential.

Chemical: Sustituted acetamide.

Use: Confidential. The new chemical will be incorporated as a minor constituent in an article for use in commercial production.

Production Volume: 0.2 kg.

Worker Exposure: During manufacture and processing, dermal and inhalation exposure may occur for up to 5 days/year during manual transfer operations.

Test Marketing Period: 3 months.

Commencing on: April 25, 1983.

Risk Assessment: There are moderate health concerns for the new substance. It could also be potentially ecotoxic. However, these concerns are mitigated by the low human exposure and release. There will be no significant human exposure and release during manufacture and processing of the PMN substance. General exhaust, safety glasses and protective clothing will be used. After processing the substance will be contained in an article with no potential for human contact.

Public Comments: None.

TME 83–32.

Date of Receipt: March 15, 1983.

Notice of Receipt: March 25, 1983 (48 FR 12590).

Applicant: Confidential.

Chemical: Polyester polyurethane (Generic).

Use: Confidential.

Production Volume: 11,200 kg.

Number of Customers: 1.

Worker Exposure: Manufacture: dermal and eye, a total of 27 workers, up to 6 hours/day, up to 6 days/year. Processing: dermal and eye, a total of 15 workers, up to 6 hours/day, up to 6 days/year. Use: dermal and eye, 6 workers, 8 hours/day 45, days/year.

Test Marketing Period: 45 days.

Commencing on: April 25, 1983.

Risk Assessment: The Agency did not identify any significant health or environmental effects based on the information received from the submitter and other information presently available to the Agency. In addition, the production volume and potential for exposure and release are very low. The overall concerns, therefore, for health and ecotoxicity are low.

Public Comments: None.

TME 84–33.

Date of Receipt: March 15, 1983.

Notice of Receipt: March 25, 1983 (48 FR 12590).

Applicant: Confidential.

Chemical: Disubstituted heteromonocycle (Generic).

Use: Confidential.

Production Volume: 4,480 kg.

Worker Exposure: Manufacture: dermal and ocular, a total of 27 workers, up to 6 hours/day, up to 6 days/year. Processing: dermal and ocular, 48 workers, up to 6 hours/day, up to 6 days/year.

Test Marketing Period: 45 days.

Commencing on: April 25, 1983.

Risk Assessment: EPA has established that the new test market substance, submitted under TM–83–33, will not present an unreasonable risk of injury to health or to the environment under the specific conditions set out in the application. There are moderate health concerns for the new substance. The TME substance could also be potentially ecotoxic. However, these concerns are mitigated by the expected low worker exposure and low release to the environment. Furthermore, the TME chemical is expected to be poorly absorbed. Worker exposure to the new sustance during manufacturing and processing will be minimized by use of protective clothing and equipment. Release of the new substance to the environment will be low because of process controls.

Public Comments: None.

TME 83–34

Date of Receipt: March 18, 1983.

Notice of Receipt: April 1, 1983 (48 FR 14036).

Applicant: Confidential.

Chemical: Substituted alkane diols (Generic).

Use: Confidential.

Production Volume: 10,000 kg.

Worker Exposure: Manufacture and processing: dermal and ocular, a total of 25 workers, up to 10 hours/day, up to 22 days/year. Use: dermal, ocular and inhalation, a total of 10 workers, up to 8 hours/day, up to 45 days/year.

Test Marketing Period: 1 year.

Commencing on: April 25, 1983.

Risk Assessment: No significant health effects or significant environmental effects were identified for the TME substance. Furthermore, any concerns would be mitigated because of low worker exposure during manufacture, processing and use of the chemical and because of low releases to the environment. Releases from manufacture and processing are expected to be incinerated. Releases from use are to be landfilled or incinerated. Therefore, the Agency finds that the test marketing activity will not result in an unreasonable risk.

Public Comments: None.

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: April 25, 1983.

Marcia Williams,

Acting Director, Office of Toxic Substances.

[AMS–FRL–2354–8]

Petrocoal Fuel Waiver

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is soliciting comments, data, and analyses which can be of help in evaluating a petition and supplementary submission by the Motor Vehicle Manufacturers Association of the United States, Inc. (MVMA), seeking administrative reconsideration of EPA's grant of a waiver requested by Anafuel Unlimited (Anafuel) [1] for a proprietary fuel known as "Petrocoal."

[1] Subsequent to the grant of the waiver, Anafuel changed its name to American Methyl Corporation. To avoid confusion, this notice will refer to the company as Anafuel, in which name the waiver was granted.

DATE: Comments must be submitted by July 1, 1983.

ADDRESS: Copies of all public information on the waiver application and subsequent submissions, including the MVMA petition and supplementary submission requesting reconsideration of the waiver, are available for inspection in public docket EN–81–8 at the Central Docket Section (LE–131) of the Environmental Protection Agency, Gallery 1, West Tower, 401 M Street, S.W., Washington, D.C. 20460; (202) 382–7548, between the hours of 8:00 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: James W. Caldwell, Chief, Fuels Section, Field Operations and Support Division, 401 M Street, S.W., Washington, D.C., 20460 at (202) 382–2635.

SUPPLEMENTARY INFORMATION: Section 211(f)(1) of the Clean Air Act (Act), 42 U.S.C. 7545(f)(1), states that effective upon March 31, 1977, it shall be unlawful for any manufacturer of any fuel or fuel additive to first introduce into commerce, or to increase the concentration in use of, any fuel or fuel additive for general use in light-duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act, 42 U.S.C. 7545(f)(4), provides that the Administrator of the EPA, upon application of any manufacturer of any fuel or fuel additive, may waive the prohibitions established under section 211(f)(1), if the Administrator determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, or the emission products of such fuel or additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. If the Administrator does not act to grant or deny an application within 180 days of receipt of the application, the waiver authorized by section 211(f)(4) shall be treated as granted.

Anafuel submitted an application for a waiver for a proprietary fuel known as "Petrocoal" on February 20, 1981. A Federal Register notice was published April 13, 1981, 46 FR 21695,

acknowledging receipt of the application and soliciting comments. The 180-day review period provided by section 211(f)(4), scheduled to expire on August 19, 1981, was subsequently extended until September 28, 1981 by the consent of Anafuel and EPA. On September 28, 1981 the Administrator granted a waiver. A Federal Register notice of this decision was published on October 5, 1981, 46 FR 49075.

Under Section 307(b)(1) of the Act, judicial review of this Agency action was available only by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia within 60 days of the October 5, 1981 publication date. On December 4, 1981, within the required 60 days, MVMA on behalf of its member companies, and General Motors individually, filed petitions for review of the waiver grant in the U.S. Court of Appeals of the District of Columbia Circuit. On that day, MVMA also filed with EPA a petition seeking administrative reconsideration of EPA's decision. MVMA's administrative petition argued that: (1) The Petrocoal waiver was not in the public interest, (2) adverse consequences to vehicle manufacturers and individual car owners would result, and (3) the decision was contrary to applicable provisions of the Act.

Anafuel joined in the litigation, and over the next several months the parties discussed approaches to narrow or resolve the outstanding issues. Those discussions did not lead to an agreement, and on February 22, 1983, MVMA submitted to EPA a supplementary petition for reconsideration, referencing new data on the effects of methanol in gasoline on automotive evaporative emissions. These data were obtained primarily from studies performed for the Department of Energy and the Coordinating Research Council by Systems Control, Inc., and by E.I. duPont (DuPont) in connection with its August 25, 1982 waiver application to EPA, and from comments submitted by the California Air Resources Board in connection with DuPont's waiver application. On the basis of this evidence, MVMA argues that evaporative emissions with methanol gasoline blends are significantly higher than with gasoline, and cannot be controlled by fuel blending, even if their volatility is controlled.

In addition, subsequent information indicates that the fuel tested by the applicant and provided by the applicant to the Agency and to General Motors Corporation for testing, may not have been the fuel described in the waiver request.

Since the control of evaporative emissions by compliance to American Society for Testing and Materials (ASTM) specifications was a key assumption upon which the waiver was granted, and since the composition of the fuel described or tested is integral to the waiver decision, the new information brings into question the validity of the Agency's conclusion in the waiver grant.

EPA is accordingly considering whether administrative action is appropriat to modify or revoke the waiver under section 211(f) or to control or prohibit sale of Petrocoal under section 211(c), or whether the waiver should stand as granted. In order to give full and fair consideration to these issues, EPA is hereby soliciting comments, data, and analyses which bear on the waiver or which can be of help in determining whether Petrocoal either produces any emission product which causes, or contributes to, air pollution which may reasonably be anticipated to endanger the public health or welfare, or which will impair to a significant degree the performance of any emission control device or system which is in general use or which is likely to be in general use in a reasonable time.

EPA will consider holding a public hearing on the MVMA petition and related issues if such hearing is requested and, in the opinion of EPA, is warranted. Any request for a public hearing must be received by (insert date 30 days after date of publication), and is to be submitted to public docket EN-81-8, Central Docket Section (LE-131), Environmental Protection Agency, Gallery 1, West Tower, 401 M Street, S.W., Washington, D.C. 20460. Any other submission in response to this notice must be received by July 1, 1983, and is to be submitted to the above docket.

Commenters desiring to submit proprietary information should segregate that information from other comments to the greatest extent possible, and label it "Confidential Business Information." Submissions containing such proprietary information should be sent directly to the Agency contact indicated above, and not to the Docket, to ensure that proprietary information is not inadvertently placed in the public docket.

Information covered by such a claim will be disclosed by EPA only to the extent, and by means of the procedures, set forth in 40 CFR Part 2. If no claim of confidentiality accompanies the information when it is received by EPA it may be made available to the public without further notice to the commenter.

With the exception of proprietary information, all additional submissions in response to this notice will be placed in the docket and will be open for public inspection.

Dated: April 22, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Publishing of Quarterly Report on Travel Reimbursement Experiment

AGENCY: Federal Communications Commission.

ACTION: Notice

SUMMARY: In Public Law 97-259, the Congress authorized the Federal Communications Commission to accept reimbursement from non-government organizations for travel of employees of the Commission. The Federal Communication Commission must keep records of such travel by each event and prepare a report each quarter of all reimbursements allowed and provide copies of each quarterly report to the Senate Committee on Appropriations, House Committee on Appropriations, Senate Committee on Commerce, Science and Transportation, and the House Committee on Energy and Commerce. This must be done each quarter until September 30, 1985. In addition the Federal Commnications Commission must publish each quarterly report in **Federal Register** until September 30, 1983

DATE: This report is for the period from January 1, 1983 through March 31, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT: Geoffrey Sherman, Office of the Managing Director, (202) 632-6900.

SUPPLEMENTARY INFORMATION: The report for the quarter ending March 31, 1983 follows.

William J. Tricarico,

Secretary, Federal Communications Commission.

Federal Communications Commission Quarterly Report of Travel Reimbursement Experiment for Quarter Ending March 31, 1983, in Accordance With Public Law 97-259

Summary Report

Total Number of Sponsored Events: 15.

Total Number of Sponsoring Organizations: 15.

Total Number of Commissioners/Employees Attending: 22.

Total Amount of Reimbursement:

Transportation	$5,934.00
Room	2,043.07
Board	490.38
Other Expenses	866.15
Total	9,033.00

Individual Event Reports Attached.

[Docket No. 83-23]

Central National Corporation, Nantucket Navigation, Inc. and T. Smith & Son (Texas), Inc. v. Port of Houston Authority; Filing of Complaint and Assignment

Notice is given that a complaint filed by Central National Corporation, Nantucket Navigation, Inc. and T. Smith & Son (Texas), Inc. against Port of Houston Authority was served April 25, 1983. Complainants allege that respondent has violated section 17 of the Shipping Act, 1916, in connection with establishment of rules concerning responsibility for lost and damaged cargo.

This proceeding has been assigned to Administrative Law Judge John E. Cograve. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Great Western Financial Services, Inc.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Great Western Financial Services, Inc.*, Colorado Springs, Colorado; to acquire 100 percent of the voting shares or assets of The Western National Bank of Colorado, Colorado Springs, Colorado. Comments on this application must be received not later than May 26, 1983.

Board of Governors of the Federal Reserve System, April 26, 1983.

William W. Wiles,

Secretary of the Board.

[FR Doc. 83-11582 Filed 4-29-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Company, Proposed de Novo Nonbank Activities; Citicorp

The organization identified in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to the application, interested person may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts or interests, or unsound banking practices." Any comment on the application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Citicorp*, New York New York (consumer finance and credit-related insurance activities; Minnesota): To establish a *de novo* office of Citicorp Homeowners, Inc. and a *de novo* office of Citicorp Person-to-Person Financial Center, Inc. at a shared location in Edina, Minnesota. The activities in which the *de novo* office of Citicorp Homeowners, Inc. proposes to engage are: the making or acquiring of loans and other extensions of credit, secured or unsecured, for consumer and other purposes; the sale of credit related life and accident and health insurance by licensed agents or brokers, as required; the sale at retail of money orders and travelers checks, and the sale of consumer oriented finadncial management courses; the servicing, for any person, of loans and other extensions of credit; the making, acquiring, and servicing, for its own account and for the account of others, of extensions of credit to individuals secured by liens on residential or non-residential real estate; and the sale of mortagage life and mortgage disability insurance directly related to extensions of mortgage loans. The proposed service area for the *de novo* office of Citicorp Person-to-Person Financial Center, Inc. and the *de novo* office of Citicorp Homeowners, Inc. shall be comprised of the entire State of Minnesota for all the aforementioned proposed activities. Comments on this application must be received not later than May 26, 1983.

Board of Governors of the Federal Reserve System, April 26, 1983.

William W. Wiles,

Secretary of the Board.

The Assistant Secretary for Health annnounces the dates and other information for the following conference scheduled to assemble during the month of August 1983:

Name: Public Health Comference on Records and Statistics.

Date and Time: August 22–24, 1983, 9:00 a.m.

Place: Capital Hilton Hotel, 16th and K Streets, N.W., Washington, D.C. 20036. Open to the Public (Registration required).

Purpose: The Nineteenth National Meeting of the Public Health Conference on Records and Statistics (PHCRS) is sponsored by the National Center for Health Statistics. This national Conference is recognized as one of the paramount meetings for workers in the field of public health statistics. The theme of the Conference is "Priorities in Health Statistics," and presentations and discussions on the program will include the following subjects: health promotion and disease prevention programs, goals, priorities, and data needs; programs regarding health care costs, such as the cost of cancer care and the National Medical Care Utilization and Expenditure Survey; vital registration and statistics; monitoring and evaluating health programs; statistical perspectives on the U.S. mental health service delivery system; and evaluating Medicare and Medicaid reimbursement eligibility and coverage.

Anyone wishing to obtain an agenda, registration information, or other relevant information concerning the Conference should contact: Program Development Staff, National Center for Health Statistics, Room 2–28, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, telephone 301–436–7122.

April 16, 1983

Manning Feinleib,

Director, National Center for Health Statistics.

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Colorado 36730]

Colorado; Realty Action, Non-competitive Lease of Public Lands in Garfield County

The following described land is being considered for lease under Section 302 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2762; 43 U.S.C. 1732) at no less than the appraised fair market rental which is estimated to be approximately $9,000 annually, or $750.00 per month.

Sixth Principal Meridian

T. 5 S., R. 93 W.,
Sec. 13, SE¼SE¼NE¼SW¼, E½E½SE¼SW¼, NE¼SE¼NW¼SE¼, S½S½NW¼SE¼, and SW¼SE¼;
Sec. 24, N½N½NE¼NE¼, and NE¼NE¼NE¼NW¼.

The area described aggregates approximately 75.0 acres in Garfield County.

The land is located five miles north of Rifle, Colorado, adjoining the existing Rifle Golf Course, near Rifle Gap.

Lease of the above described lands has been proposed by Rifle Gap Land Company of Rifle, Colorado to expand the existing nine hole Rifle Golf Course to eighteen holes, using some or all of the public land area described above and adjacent to their privately owned lands. The proposed use is consistent with Bureau of Land Management land use planning and with local planning and zoning.

The Bureau of Land Management is considering a longterm (approximately 10 years) noncompetitive lease to Rifle Gap Land Company dependent upon the company filing an application for lease and including information required by Title 43 Code of Federal Regulations, part 2920.52. The terms and conditions applicable to any lease issued under this notice are those in 43 CFR 2920.7. Special stipulations that would be included in a lease, as well as other information about the proposal, can be reviewed in the Bureau of Land Management Glenwood Springs Resource Area Office, 50629 Hwy. 6 and 24, P.O. Box 1009, Glenwood Springs, Colorado 81601, telephone (303) 945–2341.

The lessee would be required to reimburse the United States for reasonable administrative and other costs incurred by the United States in processing the lease and for monitoring construction, operation, maintenance, and rehabilitation of the facilities authorized. The reimbursement of costs would be in accordance with the provisions of 43 Code of Federal Regulations 2920.6.

For a period of 45 days from the date of publication of this notice in the **Federal Register** interested parties may submit comments to the District manager, Bureau of Land Management, Grand Junction District Office, 764 Horizon Drive, Grand Junction, Colorado 81501. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination.

David A. Jones,

District Manager.

[INT DEIS 83-21]

Draft Southern Malheur Grazing Management Environmental Impact Statement; Public Meetings and DEIS Availability

AGENCY: Bureau of Land Management, Interior.

ACTION: Public meeting on Southern Malheur grazing management DEIS.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act or 1969, the Department of the Interior has prepared a Draft Environmental Impact Statement for the Southern Malheur EIS area. The proposal involves implementing a livestock grazing program on public lands within the Southern Malheur EIS area of the Vale District in southeastern Oregon.

Public reading copies will be available for review at the following locations:

Bureau of Land Management, Office of Public Affairs, 825 N.E. Multnomah Street, Portland, Oregon;
Bureau of Land Management, Vale District Office, 100 East Oregon Street, Vale, Oregon 97918;
Library, University of Oregon, Eugene, Oregon;
Library, Treasure Valley Community College, Ontario, Oregon;
Library, Portland State University, 727 SW Harrison, Portland, Oregon;
Malheur County Library, Ontario, Oregon; and
Library, Oregon State University, Corvallis, Oregon.

A limited number of copies are available upon request to the BLM Oregon State Office or the Vale District Office.

Informal public information meetings will be held at 7:30 p.m. on June 7, 1983 at the Lions Den in Jordan Valley, Oregon and at 7:30 p.m. on June 9, 1983 at the Bureau of Land Management Office in Vale, Oregon.

Written comments on the draft EIS may be sent to: District Manager, Bureau of Land Management, P.O. Box 700, Vale, Oregon 97918.

Comments should be postmarked on or before June 30, 1983 to be considered in preparation of the Final Southern Malheur EIS.

FOR FURTHER INFORMATION CONTACT: Gerry Fullerton, Oregon State Office, Telephone: (503) 231–6955.

Dated: April 13, 1983.

Stanley D. Butzer,

Deputy State Director for Lands and Renewable Resources.

BILLING CODE 4310-84-M

Ely District Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given, in accordance with Pub. L 94–579 that a meeting of the Ely District Grazing Advisory Board will be held Wednesday, June 8, 1983.

The meeting will convene at 10:00 a.m. (p.d.s.t.) in the conference room of the BLM District Office in Ely, Nevada. The agenda for the meeting will include: (1) Minutes of the previous meeting, (2) Schell MFP III decisions, (3) Schell Wilderness EIS, (4) status of Egan RMP, (5) allotment categorization, (6) update on wild horse program, (7) new grazing regulations and range management policy, (8) solicitor's opinion on water rights, (9) public comment period, (10) oil and gas exploration, and (11) Advisory Board concerns and recommendations.

The meeting is open to the public. Interested individuals may present oral statements to the Board at approximately 2:00 p.m. (p.d.s.t.). June 8, 1983. Written statements must be submitted to the Ely District Office by close of business June 7, 1983

Summary minutes of the Advisory Board meeting will be maintained at the District Office and available for public inspection and reproduction upon request.

DATE: June 8, 1983.

ADDRESS: Bureau of Land Management, Star Route 5, Box 1, Ely, Nevada 89301.

FOR FURTHER INFORMATION CONTACT: Kathy Lindsey, 702–289–4865.

Dated: April 25, 1983.

George W. Cropper,

Acting District Manager.

[C-0102703]

Colorado; Partial Termination of Withdrawal Application and Opening of Lands

April 25, 1983.

Bureau of Reclamation, United States Department of the Interior, filed applications for withdrawal and reservation of additional lands for the Fryingpan-Arkansas Project. Notices were published on March 16, 1967, as FR Doc. 67–2668, November 15, 1968, as FR Doc. 68–13976, June 11, 1969, as FR Doc. 69–6906, and October 7, 1971, as FR Doc. 71–14710. The applicant agency has cancelled these applications insofar as they affect the following described lands:

Sixth Principal Meridian

Paragraph 1.
T. 17 S., R. 86 W.,
Sec. 15, S½.
T. 12 S., R. 79 W.,
Sec. 5, lots 3, 4, S½NW¼, and SW¼;
Sec. 6, lots 1, 2, 5, 6, 7, S½NE¼, SE¼NW¼, E½SW¼, and SE¼ excluding portion invaded by Patent Nos. 7142, 39730, 1066, and 3104;
Sec. 8, E½NE¼, excluding portion invaded by Patent No. 4581;
Sec. 9, W½W½, excluding portions invaded by Patent Nos. 1158, 4581, and 390409.
T. 9 S., R. 80 W.,
Sec. 19, lots 3, 4, and W½NE¼SW¼, excluding portions invaded by Patent Nos. 27851, 37897, 20726, 22546, 328236, 329245, and 16662;
Sec. 30, lot 1, excluding portions invaded by Patent Nos. 16662, 1000292, and 11144.
T. 10 S., R. 80 W.,
Sec. 7, lot 3.
T. 11 S., R. 80 W.,
Sec. 26, lot 9;
Sec. 36, lot 7.
T. 12 S., R. 80 W.
Sec. 1, E½ of lot 1.
T. 9 S., R. 81 W.,
Sec. 36, N½NE¼NW¼; and SE¼, excluding portions invaded by Patent Nos. 21589, 9474, and 22036.

The area described aggregates approximately 1,656 acres.

San Isabel National Forest

Paragraph 2.
T. 10 S., R. 80 W.,
Sec. 31, lot 3;

VOL
48
ISS
85
MY
2
1983
UMI

Sec. 32, SE¼SE¼.
T. 11 S., R. 80 W.,
Sec. 7, lot 1, E½NE¼, SW¼NE¼, and N½SE¼;
Sec. 28, W½W½SW¼;
Sec. 29, E½E½SE¼.
T. 9 S., R. 81 W.,
Sec. 10, N½N½, SW¼NE¼, S½NW¼, and SW¼;
Sec. 11, NE¼;
Sec. 15, SW¼;
Sec. 16, SE¼;
Sec. 20, NW¼;
Sec. 21, NE¼.
T. 11 S., R. 81 W.,
Sec. 25 SW¼NW¼, and W½SW¼, excluding portions invaded by Patent No. 22099;
Sec. 35, N½NE¼;
Sec. 36, NW¼NW¼.

The area described aggregates approximately 1,879 acres.

3. Therefore, pursuant to the regulations contained in 43 CFR 2310.1–4, at 10:00 a.m. on June 6, 1983, the public lands in paragraph one shall be open to operation of the public land laws generally, including location and entry under the U.S. mining laws, subject to valid existing rights, the provisions of existing withrawals, and the requirements of applicable law. Appropriation of lands under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possessioin are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

4. Therefore, at 10:00 a.m. on June 6, 1983, the forest lands in paragraph two shall be open to such forms of disposition as may by law be made of national forest land, subject to valid existing rights.

The lands have been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be directed to the Chief, Lands and General Mining Law Section, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202.

Robert D. Dinsmore,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310–84–M

[C–1262, C–0123847]

Colorado; Order Opening Lands Withdraw for Federal Power Projects 321 and 501

April 25, 1983.

The Federal Energy Regulatory Commission (formerly Federal Power Commission) issued an order dated September 23, 1980, vacating, in their entirety, orders which withdrew lands for transmission line project Nos. 321 and 501. This order affects the following described public and national forest lands:

Project No. 321

New Mexico Principal Meridian

1. All portions of the following described lands lying within 50 feet of the center line of the transmission line crossing these lands:

T. 45 N., R. 7 E.,
secs. 11, 14, 23, 24, 25.
T. 46 N., R. 7 E.,
sec. 1.
T. 47 N., R. 7 E.,
sec. 36.
T. 46 N., R. 8 E.,
secs. 7, 8, 17, 33.

Rio Grande National Forest

2. All portions of the following described lands lying within 50 feet of the center line of the transmission line crossing these lands:

T. 45 N., R. 7 E.,
sec. 12.
T. 47 N., R. 7 E.,
sec. 24.
T. 45 N., R. 8 E.,
secs. 5, 7, 8.
T. 46 N., R. 8 E.,
secs. 6, 20, 29, 32.
T. 47 N., R. 8 E.,
secs. 19, 20, 30.

The areas described aggregate approximately 166 acres which were withdrawn by Power Project 321.

Project 501

Sixth Principal Meridian

3. All portions of the following described lands lying within 50 feet of the center line of the transmission line crossing these lands:

T. 9 S., R. 79 W.,
secs. 1, 13, 14.

Pike National Forest

4. All portions of the following described lands lying within 50 feet of the center line of the transmission line crossing these lands:

T. 8 S., R. 78 W.,
sec. 31.
T. 9 S., R. 78 W.,
secs. 6 through 9, 15, 16, 18.

The areas described aggregate approximately 56 acres which were withdrawn by Power Project 501.

5. Therefore, at 10:00 a.m., on June 6, 1983, the public lands in paragraphs one and three shall be open to operation of the public land laws generally, subject to any valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. The State of Colorado has waived its preference right for highway right-of-way or material sites on the public land as provided by the Federal Power Act of June 10, 1920, 16 U.S.C. 818.

6. Therefore, at 10:00 a.m., on June 6, 1983, the national forest land described in paragraphs two and four shall be open to such forms of disposition as may by law be made of national forest land.

Any valid applications received prior to the opening time and date shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The lands have been and remain open to applications and offers under the mineral leasing law and to location and entry under the U.S. mining laws.

Inquiries concerning these lands should be directed to the Chief, Lands and General Mining Law Section, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202.

Robert D. Dinsmore,

Chief, Branch of Lands and Mineral Operations.

Fish and Wildlife Service

Issuance of Permit for Marine Mammals; Bolt Beranek & Newman Inc.

On March 11, 1983 a notice was published in the Federal Register (48 FR 10483), that an application had been filed with the Fish and Wildlife Service by Bolt Beranek and Newman Inc., Cambridge, MA for an amendment to their permit to use an air gun array by a seismic exploration vessel to provide acoustic response data for this type of sound source.

Notice is hereby given that on April 20, 1983, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Endangered Species Act of 1972 (16 U.S.C. 1539), the Fish and Wildlife Service issued a permit (PRT 2–9740), to Bolt Beranek and Newman subject to certain conditions set forth therein.

The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Room 605, 1000 N. Glebe Road, Arlington, Virginia.

Dated: April 27, 1983.
Larry LaRochelle,
Acting Chief, Permit Branch, Federal Wildlife Permit Office.

Endangered Species Permit, Receipt of Applications; San Diego Zoo et al.

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT 2–10316
Applicant: San Diego Zoo, San Diego, CA

The applicant requests a permit to import two captive-born male mouse lemurs (*Microcebus murinus*) from the Rotterdam Zoo, Netherlands, for enhancement of propagation.

PRT 2–10315
Applicant: Woodland Park Zoo, Seattle, WA

The applicant requests a permit to import one pair of captive-born mouse lemurs (*Microcebus murinus*) from the Rotterdam Zoo, Netherlands, for enhancement of propagation.

PRT 2–10197
Applicant: Joe Savage, Los Angeles, CA

The applicant requests a permit to export and reimport one captive-bred leopard (*Panthera pardus*) for purposes of conservation exhibition.

PRT 2–10314
Applicant: Woodland Park Zoo, Seattle, WA

The applicant requests a permit to import one captive-born male jaguarundi (*Felis yagouaroundi*) from Blijdorp Zoo, the Netherlands, for enhancement of propagation.

PRT 2–10311
Applicant: Woodland Park Zoo, Seattle, WA

The applicant requests a permit to import one captive-born male gorilla (*Gorilla gorilla*) from Zoo Zurich, Switzerland, for enchancement of propagation.

PRT 2–10276
Applicant: Paul Nelson Seeley, Denver, CO

The applicant requests a permit to take larval fish of Colorado squawfish (*Ptychocheilus lucius*), humpback chub (*Gila cypha*) and bonytail chub (*G. elegans*) from Colorado River near DeBeque, CO, for scientific research.

PRT 2–10351
Applicant: Lincoln Park Zoo, Chicago, IL

The applicant requests a permit to import one captive-born mandrill (*Papio sphinx*) from the Ueno Zoo, Tokyo, Japan for enhancement of propagation.

PRT 2–10353
Applicant: Biosphere Educational Films, Monterey, CA

The applicant requests a permit to take (harass) through photography, endangered Hawaiian birds for enhancement of propagation and survival under the definition of Conservation Exhibition.

PRT 2–10341
Applicant: International Animal Exchange, Ferndale, MI

The applicant requests a permit to purchase in interstate commerce one female white-handed gibbon (*Hylobates lar*) from Seneca Park Zoo, Rochester, NY, for enhancement of propagation.

PRT 2–10347
Applicant: UTA Collection of Vertebrates, University of Texas, Arlington, TX

The applicant requests a permit to export and reimport accessioned museum specimens of Endangered and Threatened animals for scientific research.

PRT 2–10049

Applicant: Dr. Joel Friedman, Murray Hill, NJ

The applicant requests a permit to take blood samples from endangered sea turtles for scientific research.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Rd., Arlington, Virginia, or by writing to the U.S. Fish & Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications within 30 days of the date of this publication by submitting written data, views, or arguments to the above address. Please refer to the appropriate PRT 2 # when submitting comments.

Dated: April 27, 1983.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 4310–55–M

Minerals Management Service

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Pacific Outer Continental Shelf (OCS); Getty Oil Co. et al.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of environmental documents prepared for proposed oil and gas operations on the Pacific OCS Region.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal Regulations 40 CFR (§ 1501.4 and § 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related environmental assessments (EAs) and findings of no significant impact (FONSIs), prepared by the Minerals Management Service for the following oil and gas activities proposed on the Pacific OCS Region. This listing includes all proposals for which environmental documents were prepared by the Pacific OCS Region in the 6-month period preceding this notice.

EXPLORATION PLANS

Operator	Location	FONSI date
Getty Oil Company	OCS–P 0394, 0395 (15 miles N.W. of Point Sal, California).	Oct. 1, 1982.
Conoco, Inc	OCS–P 0320 (8 miles W. of Point Conception, California).	Oct. 19, 1982.
ARCO Oil and Gas Company	OCS–P 0431, 0434, 0437 (6 miles W. of Purisima Point, California).	Nov. 12, 1982.
Penzoil Oil and Gas, Inc	OCS–P 0427, 0432 (3 miles W. of Purisima Point, California).	Do.
Exxon Company, U.S.A	OCS–P 0329, 0461 (5 miles S. of El Capitan, California).	Do.
Phillips Petroleum Company	OCS–P 0436, 0439 (3 miles S.W. of Purisima Point, California).	Nov. 18, 1982.
Chevron U.S.A. Inc	OCS–P 0401, 0407, 0414 (13 miles W. of Point Sal, California).	Dec. 23, 1982.
Getty Oil Company	OCS–P 0449 (16 miles N.W. of Point Conception, California).	Do.
Phillips Petroleum Company	OCS–P 0408 (10 miles W. of Point Sal, California)	Dec. 29, 1982.
Gulf Oil Corporation	OCS–P 0412 (18 miles W. of Point Sal, California)	Feb. 4, 1983.
Chevron U.S.A. Inc	OCS–P 0393 (22 miles N.W. of Point Sal, California)	Feb. 8, 1983.
ARCO Oil and Gas Company	OCS–P 0444 (3 miles W. of Point Arguello, California).	Feb. 9, 1983.
Sun Exploration and Production Company	OCS–P 0231 (11 miles S. of Goleta Point, California).	Do.
Exxon Company, U.S.A	OCS–P 0467 (8 miles S. of Goleta Point, California)	Do.
Exxon Company, U.S.A	OCS–P 0438, 0440 (4 miles N.W. of Point Arguello, California).	Feb. 14, 1983.

The documents are available for inspection in the public information room at the Pacific OCS Region office. Persons interested in obtaining information about EAs and FONSIs proposed for activities on the Pacific OCS are encouraged to contact the Minerals Management Service office in the Pacific OCS Region.

FOR FURTHER INFORMATION CONTACT: Regional Supervisor, Field Operations, Pacific OCS Region, Minerals Management Service, 1340 West Sixth Street, Suite 160, Los Angeles, California 90017; (213) 688–7120.

SUPPLEMENTARY INFORMATION: The Minerals Management Service prepares EAs and FONSIs for proposals which relate to exploration for oil and gas resources on the Pacific OCS Region. The EAs examine the potential environmental effects of activities described in proposals and present Minerals Management Service's conclusions regarding the significance of those effects. EAs are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA section 102(2)(C). A FONSI is prepared in those instances where the Minerals Management Service finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This constitutes the public notice of availability of environmental documents required under the NEPA regulations.

Reid T. Stone,

Regional Manager.

AGENCY: National Park Service—Fredericksburg and Spotsylvania County Battlefield Memorial National Military Park.

ACTION: Notice of preplanning comment period and public meetings on draft general management plan.

SUMMARY: During the next 18 months the National Park Service will be developing a General Management Plan and Land Protection Plan which will guide the future of Fredericksburg and Spotsylvania Battlefields. During this process, the public will be asked to participate during several phases.

The first is the Preplanning Phase where the various management, land acquisition, and development issues are identified. To assist in this phase, the National Park Service has printed a Preplanning Newsletter containing a mail-in Public Response Form which will be available to the public in early May. In addition, two public meetings have been scheduled to solicit the public's views on issues.

Dates and Locations:

Tuesday, May 17, 1983, 7 p.m.
Fredericksburg Battlefield, Visitor Center, 1013 Lafayette Blvd., Fredericksburg, VA. 22404

Thursday, May 19, 1983, 7 p.m.
Spotsylvania Sr. High School, Route 208, Spotsylvania, Va. 22553

Public comment during this phase of the planning process will be accepted until June 3, 1983. Comments should be addressed to: Superintendent, Fredericksburg and Spotsylvania County Battlefield Memorial National Military Park, P.O. Box 679, Fredericksburg, Va. 22404.

Dated: April 21, 1983.

Don H. Castleberry,

Acting Regional Director, Mid-Atlantic Region.

BILLING CODE 4310–70–M

Martin Luther King, Jr., National Historic Site and Preservation District; Meeting

Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Martin Luther King, Jr., National Historic Site Advisory Commission will be held at 10:30 a.m. on Tuesday, May 24, 1983, at the Martin Luther King, Jr., Community Center, Conference Rooms A and B, 450 Auburn Avenue, N.E., Atlanta, Georgia 30312.

The purpose of the Martin Luther King, Jr., National Historic Site Advisory Commission is to consult and advise with the Secretary of the Interior on matters of planning, development and administration of the Martin Luther King, Jr., National Historic Site. The purpose of this meeting will be for the National Park Service to present the alternatives for the General Management Plan to the Commission.

The members of the Advisory Commission are as follows:

Mr. William Allison, Chairman
Mr. John H. Calhoun, Jr.
Dr. Elizabeth A. Lyon
Mr. C. Randy Humphrey
Mrs. Christine King Farris
Mr. Handy Johnson, Jr.
Mr. Howard H. Arnold, III
Mrs. Freddye Scarborough Henderson
Mrs. Millicent Dobbs Jordan
Mr. John W. Cox
Reverend Joseph L. Roberts, Jr.
Mrs. Coretta Scott King, Ex Officio Member
Director, National Park Service, Ex Officio Member

The meeting will be open to the public; however, facilities and space for accommodating members of the public are limited. Any member of the public may file with the commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting or who wish to submit written statements may contact Janet C. Wolf, Superintendent, Martin Luther King, Jr., National Historic Site, 522 Auburn Avenue, N.E., Atlanta, Georgia 30312, Telephone 404/221–5190 Minutes of the meeting will be approximately 4 weeks after the meeting.

Dated: April 22, 1983.

Neal G. Guse,

Acting Regional Director, Southeast Region.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

[No. 39998]

Motor Carriers; Allied Van Lines, Inc.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioner's existing operations granted at 47 FR 56424 (December 16, 1982) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioner's future contracts is granted.

DATES: Comments are due on May 17, 1983. The provisional exemption of petitioner's future contracts will become final on June 1, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 39998, Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Elaine Dobbins, (202) 275–6272
or
Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosytems, Inc., Room 2227, 12th and Constitution Ave., N.W., Washington, D.C. 20423, or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

Decided: April 25, 1983.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of approved exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 1343*, 367 I.C.C. 113 (1982), 47 FR 53309 (November 24, 1982).

DATES: The exemptions will be effective on May 4, 1983. Petitions for reconsideration must be filed by April 25, 1983. Petitions for stay must be filed by April 14, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW, Washington, D.C. 20423; or call (202) 289–4357 in the DC metropolitan area; or (800) 424–5403 Toll-free outside the DC area.

Decided: April 22, 1983.

Agatha L. Mergenovich,

Secretary.

[No. MC–F–15100]

Pick's Pack Hauler, Inc—Purchase Exemption—Nebraska Carriers, Inc.

Addresses:
Send pleadings to:
(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423
and
(2) Petitioner's representative: A. J. Swanson, Quaintance, Swanson & Johnson, P.O. Box 1103, Sioux Falls, SD 57101.

Pleadings should refer to No. MC–F–15100.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the purchase by Pick's Pack Hauler of a portion of the operating rights of Nebraska Carriers, Inc. in No.

MC-153207 (Sub-No. 4) X, Part (3) and the corresponding underlying authority.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett.

[No. MC-F-15133]

Algocen Transport Holdings Limited—Continuance in Control Exemption—Thibodeau—Finch Express Limited and Algocen Transport, Inc.

Addresses:
Send pleadings to:
(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423
and
(2) Petitioner's representative: Robert D. Schuler, 100 West Long Lake Road, Suite 102, Bloomfield Hills, MI 48013.

Pleadings should refer to No. MC-F-15133.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(5), the continuance in control by Algocen Transport Holdings Limited of Thibodeu-Finch Express Limited (No. MC-129573) and Algocen Transport, Inc. (No. MC-166343).

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

BILLING CODE 7035-01-M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 1, Members: Parker, Chandler and Fortier.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 4, (202) 275-7669.

Volume No. OP4-FC-251

MC-FC-81361. By decision of April 21, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1 approved the transfer to CALIFORNIA FREIGHT EXPEDITERS, a corporation, Hayward, CA, of Certificate No. MC-121766 (Sub-No. 2), issued May 5, 1982, to S. ROSS TRUCKING COMPANY, INC., Hayward, CA, authorizing the transportation of (A) over irregular routes, general commodities (except classes A and B explosives, household goods, and commodities in bulk), between points in CA, OR, and WA; and (B) over regular routes, transporting general commodities (except classes A and B explosives, household goods, commodities in bulk and those requiring special equipment) (1) between Santa Rosa and Los Angeles, CA, over U.S. Hwy 101, serving all intermediate points and off-route points in Sonoma, Marin, San Francisco, San Mateo, Santa Clara, Monterey, San Louis Obispo, Santa Barbara, Ventura and Los Angeles Counties, CA, (2) between San Francisco and Roseville, CA, over Interstate Hwy 80, serving all intermediate and off-route points in San Francisco, Alameda, Contra Costa, Solano, Yolo, and Sacramento Counties, CA, (3) between junction California Hwy 4 and Interstate Hwy 80 (near Pinole, CA) and Stockton, CA, over California Hwy 4, serving all intermediate and off-route points in Contra Costa and San Joaquin Counties, CA, (4) between Sacramento, CA, and the California-Mexico border, over interstate Hwy 5, serving all intermediate and off-route points in Sacramento, San Joaquin, Stanislaus, Merced, Fresno, Kings, Kern, Ventura, Los Angeles, Orange and San Diego Counties, CA, (5) between San Francisco and San Luis Obispo, CA, over California Hwy 1, serving all intermediate and off-route points in San Francisco, San Mateo, Santa Cruz, Monterey and San Luis Obispo Counties, CA, (6) between Sacramento and Wheeler Ridge, CA, over California Hwy 99, serving all intermediate and off-route points in Sacramento, San Joaquin, Stanislaus, Merced, Madera, Fresno, Tulare and Kern Counties, CA, (7) between Los Angeles and Indio, CA, over Interstate Hwy 10, serving all intermediate and off-route points in Los Angeles, San Bernardino and Riverside Counties, CA, (8) between junction Interstate Hwys 15E and 10 (near Colton, CA) and San Diego, CA, over interstate Hwy 15E and Temporary Interstate Hwy 15E, serving all intermediate and off-route points in San Bernardino, Los Angeles, Riverside and San Diego Counties, CA, and (9) between junction Interstate Hwys 580 and 80 and junction Interstate Hwys 580 and 5, over Interstate Hwy 580, serving all intermediate and off-route points in Alameda, Contra Costa and San Joaquin Counties, CA. Transferee holds Certificate No. MC-127434. Representative: Ann M. Pougiales, 100 Bush St., 21st Floor, San Francisco, CA 94104, attorney for applicants.

BILLING CODE 7035-01-M

[No. MC-F-15321]

Motor Carriers; Grand Trunk Corp.—Control—the Milwaukee Motor Transportation Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of application.

SUMMARY: The Grand Trunk Corporation (GTC) seeks authority under 49 U.S.C. 11343 to acquire indirect control of The Milwaukee Motor Transportation Company (MMT) through ownership of the capital stock of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW). MMT is wholly-owned by MILW.

This application is directly related to MILW's Amended Plan of Reorganization filed with the Commission under section 77 of the Bankruptcy Act. Notice of the Amended Plan is published in this issue of the **Federal Register** under Finance Docket No. 28640 (Sub-No. 9), *Chicago, Milwaukee, St. Paul and Pacific Railroad Company—Reorganization—Acquisition by Grand Trunk Corporation.*

DATES: The procedural schedule established in Finance Docket No. 28640 (Sub-No. 9) will apply to this proceeding. Comments on the Amended Plan of Reorganization are due May 27, 1983.

ADDRESSES: An original and 20 copies of all pleadings referring to Finance Docket No. 28640 (Sub-No. 9) should be sent to: Rail Section, Room 5349, Interstate Commerce Commission, Washington, D.C. 20423.

and one copy to applicants' representatives:

Robert H. Wheeler, Isham, Lincoln & Beale, Three First National Plaza, Suite 5200, Chicago, IL 60602
and
Basil Cole, Dechert, Price & Rhoads, 1730 Pennsylvania Ave., NW., Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245
or
Joseph C. Levin, (202) 275-7936.

SUPPLEMENTARY INFORMATION: The operating rights sought to be controlled include general commodity authority over regular routes between points in WI, IL, IN, KY, MI, MO, KS, IA, NE, MN, ND, SD, MT, ID, WA and OR, which are in part restricted to service which is auxiliary to, or supplemental to rail service, and are subject to various keypoint restrictions, as authorized in Certificate No. MC-19778 and subnumbers thereunder. The operating authority sought to be controlled also includes irregular route authority for commodities generally used in building construction projects and is generally concentrated in MT, SD and surrounding states.

The complete procedural schedule and additional information are contained in the Commission's decision in Finance Docket No. 28640 (Sub-9). To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289-4357 (D.C. Metropolitan area) or toll free (800) 424-5403.

Decided: April 25, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,
Secretary.

[FR Doc. 83-11594 Filed 4-29-83; 8:45 am]
BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 to Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,
Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C.

10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 5 at (202) 275-7289.

Volume No. OP5-196

Decided: April 21, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

W-1369, filed April 12, 1983. Applicant: JAMES OTIS PEARCY, d.b.a. PEARCY MARINE, 16128 Bal Harbour Dr., Houston, TX 77058. Representative: James Otis Pearcy, (same address as applicant), (713) 333-5793. Transporting *general commodities* (except classes A and B explosives), between ports in WA and AK (except Anchorage).

Note.—This application contemplates operations which should result in decreased energy consumption in comparison with existing energy consumption in the affected area. To the extent traffic will be diverted from existing transportation modes, greater energy efficiencies may be obtained without disruption to existing patterns of energy distribution or to development of energy resources. The application is, in all respects, consistent with prevailing goals and objectives of the National Energy Policy.

MC 31389 (Sub-345), filed April 11, 1983. Applicant: McLEAN TRUCKING COMPANY, 1920 West First Street, Winston-Salem, NC 27104. Representative: Daniel R. BILLING CODE 7035-01-M

Motor Carrier, Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the

service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–257

The following applications were filed in Region 1. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway St., Room 501, Boston, MA 02114.

Supporting shippers: There are five supporting shippers, their statements may be examined at the Regional office listed.

MC 167546 (Sub-6-1TA), filed April 20, 1983. Applicant: JAMES D. HERBEL d.b.a. EXPRESSIT, 1530 Johnston Ave., Richland, WA 99352. Representative: James D. Herbel, 3405 S. 176th Ave., Suite 117, Seattle, WA 98188. *Air freight and general commodity shipments (except Classes A & B explosives) weighing 100 pounds or less in a motor vehicle in which no one package exceeds 100 pounds* between points in the U.S., for 270 days. Supporting shipper: Horizon Air, Tri-cities Airport, Pasco, WA.

MC 167333 (Sub-6-1TA), filed April 20, 1983. Applicant: DAVID A. MUNNS d.b.a. DAVID A. MUNNS TRUCKING, Rt. 3, Box 361 Rexburg, ID 83440. Representative: Timothy R. Stivers, P.O. Box 1576, Boise, ID 83701. *Chemicals and fertilizers* (except hazardous wastes) from points in MT, OR, UT, WA and WY to the facilities utilized by Camas Fertilizer at or near Rexburg, ID, for 270 days. Supporting shipper: Camas Fertilizer, Rt. 3, Box 356, Rexburg, ID 83440.

MC 167544 (Sub-6-1TA), filed April 19, 1983. Applicant: STATEWIDE CONSTRUCTION CO., INC., P.O. Box 178, Rawlins, WY 82301. Representative: David L. Welhouse (same address as applicant). *Stone, precast concrete, and building materials* between WY on the one hand and on the other points in the U.S. (except AK and HI) for 270 days. Supporting shippers: Colorado Lien Company, P.O.B. 1961, Ft. Collins, CO 80522; and Patchen Sheet Metal and Roofing Co., P.O.B. 1002, Rawlins, WY 82301.

MC 167543 (Sub-6-1TA), filed April 18, 1983. Applicant: DORIS M. PAULSRUD, d.b.a. WYOMING TOWING SERVICE, INC., P.O. Box 1017, Rawlings, WY 82301. Representative: (Same as applicant.) *Bulk Petroleum products and wrecker service for disabled and wrecked vehicles*, between points in UT and CO for 270 days. Supporting shippers: There are six shippers. Their statements may be examined at the Regional Office listed.

MC 138624 (Sub-6-7TA), filed April 22, 1983. Applicant: CLIFF REED, INC., 510 Willow Creek Rd., Corvallis, MT 59828. Representative: Timothy R. Stivers, P.O. Box 1576, Boise, ID 83701. *Fertilizer*, from points in ID to points in WA and OR, for 270 days. Supporting shipper: Chevron Chemical Co., P.O. Box 6148, Kennewick, WA 99336.

MC 167588 (Sub-6-1TA), filed April 22, 1983. Applicant: D-A-M EXPRESS, INC., 142 No. Lincoln, Shelley, ID 83274. Representative: Dale Ball, (same as applicant). (1) *General Commodities* (except class A and class B, explosives and household goods), between points in WA, OR, CA, NV, ID, UT, AZ, MT, WY, CO, NM, SD, ND, NE, KS, OK and TX, for 270 days. Supporting shippers: Century Enterprises, 123 Cook St., Denver, CO 80206; Roberts Hardware and Roberts Elevator, Roberts, ID 83444.

BILLING CODE 7035-01-M

[No. 38991]

Rail Carriers; Carolina Freight Carriers Corporation and Red Arrow Freight Lines, Inc.; Interline Division Agreement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of agreement and request for comments.

SUMMARY: A petition has been filed by Carolina Freight Carriers Corporation and Red Arrow Freight Lines, Inc., seeking Commission approval of an agreement concerning interchange of traffic and division of revenues under 49 U.S.C. 10706(b)(2).

The petition may be inspected at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C.

DATES: Comments on this application should be filed on May 31, 1983.

ADDRESS: Send an original and 10 copies of comments to: No. 38991, Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Leonard L. Arnaiz (202) 275-7831, or Howell I. Sporn (202) 275-7691.

SUPPLEMENTARY INFORMATION: Under the provisions of 49 U.S.C. 10706(b)(2), common carriers subject to the Act may submit to the Commission for approval any agreement between or among two or more such carriers "concerning rates * * * divisions, or rules related to them * * *". If such agreement is approved, the antitrust laws do not apply to parties and other persons with respect to the making and carrying out of the agreement. An agreement will be approved if the Commission finds that the agreement fulfills each statutory requirement under section 10706(b)(3), unless the Commission finds that the agreement is inconsistent with the transportation policy set forth in 49 U.S.C. 10101(a).

Part I of the subject agreement provides that Carolina and Red Arrow will accept from the other all shipments tendered which are consigned to points on their lines, and/or the lines of their connections, subject to the provisions of the carriers' tariffs filed with the Commission. If contains provisions concerning such matters as the handling of extra or accessorial charges and undercharge adjustments.

Part II details the method by which the carriers will divide the revenues, other than accessorial charges, generated by operation of the agreement. It includes provisions governing division of both two-line and three-line revenues.

The Commission is presented with a novel issue since this is the first such agreement to be filed under section 10706(b)(2). While the subject agreement is embraced by the terms of that section, it is not clear that Commission approval is necessary for the operation of the agreement since numerous carriers presently operate under interline agreements similar to the one between Carolina and Red Arrow, and have not submitted those agreements for Commission review. Further, the statute does not require submission of the agreement to the Commission but merely states that carriers "may" submit their agreements to the Commission for approval. We are concerned that to grant unnecessary immunity could be inconsistent with the transportation policy of section 10101(a).

Comments are invited on the proposed agreement with special attention to the following: (1) Does this agreement fulfill each requirement under section 10706(b)(3), (2) Is the agreement consistent with the transportation policy set forth in 49 U.S.C. 10101(a), including whether the requested antitrust immunity is necessary? and (3) What other matters, if any, should be considered by the Commission in deciding whether to approve the agreement?

It does not appear that this action will significantly affect the quality of the human environment or conservation of energy resources. Comments on these issues are, however, invited.

(49 U.S.C. 10706(b)(2), and 10706(g))

Decided: April 25, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Commissioner Andre concurred in the issuance of this notice.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-11587 Filed 4-29-83; 8:45 am]

BILLING CODE 7035-01-M

[Finance Docket No. 28640 (Sub-9)]

Rail Carriers; Chicago, Milwaukee, St. Paul and Pacific Railroad Company Reorganization; Acquisition By Grand Trunk Corporation

AGENCY: Interstate Commerce Commission.

ACTION: Acceptance of amended plan of reorganizaation and scheduling of proceedings.

SUMMARY: The Commission accepts the Amended Plan of Reorganization of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company filed under section 77 of the Bankruptcy Act, and sets a schedule for the proceedings.

DATES: Comments on the Amended Plan of Reorganization are due May 27, 1983. The complete procedural schedule is contained in the Commission's decision.

ADDRESSES: An original and 20 copies of all pleadings referring to Finance Docket No. 28640 (Sub-No. 9) should be sent to: Rail Section, Room 5343, Interstate Commerce Commission, Washington, DC 20423; and a copy to applicants' representatives:

Robert H. Wheeler, Isham, Lincoln & Beale, Three First National Plaza, Suite 5200, Chicago, IL 60602, and Basil Cole, Dechert, Price & Rhoads, 1730 Pennsylvania Ave., NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275-7245, or Joseph C. Levin (202) 275-7936.

SUPPLEMENTARY INFORMATION: The complete procedural schedule for conduct of this proceeding and additional information are contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423 or call 289-4357 (D.C. Metropolitan area) or toll free (800) 424-5403.

Notice of a related transaction in No. MC-F-15231 is published in this issue of the Federal Register. The Grand Trunk Western Company (GTW) also seeks authority under 49 U.S.C. 11103 to use certain terminal facilities. In Finance Docket No. 28640 (Sub-No. 9A), GTW seeks to use terminal facilities of Consolidated Rail Corporation, in connection with this proposal, GTW also seeks an exemption from 49 U.S.C. 10901, pursuant to 49 U.S.C. 10505, for the construction and operation of a connection between GTW and Conrail lines at Hays, IN. In Finance Docket No. 28640 (Sub-No. 9B), GTW seeks authority to use terminal facilities of the Indiana Harbor Belt Railroad and the Baltimore and Ohio Chicago Terminal Railroad Company in Chicago.

Decided: April 25, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Application No. 6]

Rail Carriers; Chlorine Institute Rail Shippers Discussion Group

AGENCY: Interstate Commerce Commission.

ACTION: Notice of filing of agreement and request for comments.

SUMMARY: An application for approval of an agreement under 49 U.S.C. 10706(a)(5)(A) has been filed by the Chlorine Institute Rail Shippers Discussion Group, on behalf of members who own or lease rail cars. The agreement would allow the members to discuss among themselves the amount of compensation to be charged rail carriers for the use of privately owned cars. The

Commission is seeking public comment prior to acting on the application.

DATES: An original and 10 copies of comments from interested parties should be filed by May 22, 1983.

ADDRESS: The application may be inspected at the Office of the Secretary, Interstate Commerce Commission, in Washington, D.C.

Comments should be addressed to: Rail Section, Room 5344, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer (202) 275–7245.

SUPPLEMENTARY INFORMATION: On March 16, 1983, the Chlorine Institute Rail Shippers Discussion Group filed an application for approval of an agreement that would permit its members to discuss among themselves the amount of compensation to be charged rail carriers for the use of privately owned cars.

Shippers entering into such agreements and seeking antitrust immunity must apply to the Commission for approval under 49 U.S.C. 10706(a)(5)(A). The Commission will approve an agreement only upon finding that it furthers the rail transportation policy set forth in 49 U.S.C. 10101a. If necessary, the Commission can impose conditions to further that policy. If the agreement is approved, the antitrust laws do not apply to parties and other persons with respect to making and carrying out the agreement.

Comments are invited on the proposed agreement, with special attention to the following subjects:

(1) How will this agreement further the transportation policy set forth in 49 U.S.C. 10101a? (Is the requested antitrust immunity necessary?)

(2) Are there any anti-competitive effects that may result because of the agreement?

(3) What safeguards, if any, are necessary to ensure that the proposed agreement will not have an undesirable anti-competitive effect or suppress competition among members of the organization?

(4) What other matters should the Commission consider in determining whether the agreement should be approved?

While it does not appear that this action will have a significant effect on the quality of the human environment or conservation of energy resources, comments on these issues are also invited.

(49 U.S.C. 10706(a)(5))

Dated: April 25, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importation of Controlled Substances; Application

Pursuant to Section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(h)), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under Section 1002(a) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of Title 21, Code of Federal Regulations (CFR), notice is hereby given that on January 13, 1983, McNeilab, Inc., 603 East Fourth Street, Wilmington, Delaware 19801, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Raw Opium (9600)	II
Concentrate of Poppy Straw (9670)	II

As to the basic classes of controlled substances listed above for which application for registration has been made, any other applicant therefor, and any existing bulk manufacturer registered therefor, may file written comments on or objections to the issuance of such registration and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, N.W., Washington, D.C. 20537, Attention: DEA **Federal Register** Representative (Room 1203), and must be filed no later than June 1, 1983.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42 (b), (c), (d), (e) and (f). As noted in a previous notice at 40 FR 43745–46 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 U.S.C. 958(a), 21 U.S.C. 823(a), and 21 CFR 1311.42 (a), (b), (c), (d), (e), and (f) are satisfied.

Dated: April 20, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 83-11637 Filed 4-29-83; 8:45 am]

BILLING CODE 4410-09-M

Importers of Controlled Substances; Registration

By Notice dated October 5, 1982, and published in the **Federal Register** on October 14, 1982, (47 FR 45999), U.S. Pharmacopeial Convention, Inc., 12601 Twinbrook Parkway, Rockville, Maryland 20852, made application to the Drug Enforcement Administration to be registered as an importer of the basic classes of controlled substances listed below:

Drug	Schedule
Lysergic Acid Diethylamide (7315)	I
Tetrahydrocannabinols (7370)	I
4-Methyl-2,5-Dimethoxy-Amphetamine (7395)	I
Psilocybin (7437)	I
Psilocin (7438)	I
DL-Methyl-2-Brom-LSD (7340)	I

No comments or objections have been received. Therefore, pursuant to Section 1008 (a) of the Controlled Substances Import and Export Act and in accordance with Title 21, Code of Federal Regulations § 1311.42, the above firm is granted registration as an importer of the basic classes of controlled substances listed above.

Dated: April 20, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control Drug Enforcement Administration.

[FR Doc. 83-11636 Filed 4-29-83; 8:45 am]

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Application

Pursuant to § 1301.43(a) of Title 21 of the Code of Federal Regulations (CFR), this is notice that on January 13, 1983, NcNeilab, Inc., 603 East Fourth Street, Wilmington, Delaware 19801, made application to the Drug Enforcement Administration (DEA) for registration as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Codeine (9050)	II
Morphine (9300)	II
Thebaine (9333)	II

Any other such applicant and any person who is presently registered with DEA to manufacture such substances, may file comments or objections to the issuance of the above application and may also file a written request for a hearing thereon in accordance with 21 CFR 1301.54 and in the form prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, N.W., Washington, D.C. 20537, Attention: DEA **Federal Register** Representative (Room 1203), and must be filed no later than June 1, 1983.

Dated: April 20, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control Drug Enforcement Administration.

BILLING CODE 4410-09-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Federal Council on the Arts and the Humanities; Arts and Artifacts Indemnity Panel Advisory Committee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is hereby given that a meeting of the Arts and Artifacts Indemnity Panel of the Federal Council on the Arts and the Humanities will be held at Old Post Office Building, 1100 Pennsylvania Avenue, NW., from 9:00 a.m. to 5:30 p.m. on May 18, 1983.

The purpose of the meeting is to review applications for Certificates of Indemnity submitted to the Federal Council on the Arts and the Humanities for exhibitions beginning after July 1, 1983.

Because the proposed meeting will consider commercial and financial data and because it is important to keep values of objects, methods of transportation and security measures confidential, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 16, 1978, I have determined that the meeting would fall within exemptions (4) and (9) of 5 U.S.C. 552(b)(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. Stephen McCleary, National Endowment for the Humanities, Washington, D.C. 20506.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

National Council on the Arts; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that a meeting of the National Council on the Arts will be held on May 13–14, 1983 from 9:00 a.m.–5:30 p.m. in the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW. (Council Room, Room #M–04, first floor, 12th Street entrance), Washington, D.C.

A portion of this meeting will be open to the public on Friday, May 13, 1983 from 9:00 a.m.–5:30 p.m. and Saturday, May 14, 1983 from 1:45–5:30 p.m. Topics for discussion will include Program Reviews & Guidelines discussions for State Programs, Literature, and Music Recording; touring & presenting; cross-cutting program issues; international activities; mission statement and health of the fields.

The remaining sessions of this meeting on Saturday, May 14, 1983 from 9:00 a.m.–12:30 p.m. are for the purpose of Council review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **FEDERAL REGISTER** of February 13, 1980 these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

Dated: April 21, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Forms Submitted to OMB for Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, NSF is posting this notice of information collection that will affect the public.

Agency Clearance Officer: Herman G. Fleming, (202) 357–9421.

OMB Officer: Gwendolyn Pla, (202) 395–7313.

Title: Evaluation study of NSF's *Five-Year Outlook on Science and Technology.*

Affected Public: Individuals on mailing list who receive copies of the *Outlook* report.

Number of Responses: 2,600; total number of hours, 1,300.

Abstract: The Five-Year Outlook on Science and Technology is required in Title II of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (Pub. L. 94–282). Three volumes of reports have been prepared since 1979. The present study will measure the effectiveness of reports in meeting the legislative mandate.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Decay Heat Removal Systems; Meeting

The ACRS Subcommittee on Decay Heat Removal Systems will hold a meeting on May 18, 1983 in Room 1046, 1717 H Street, NW., Washington, DC. The Subcommittee will discuss generic safety issues associated with decay heat removal and a draft Brookhaven National Laboratory Report, "Grouping of LWRs According to their Decay Heat Removal Capability".

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that

appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Wednesday, May 18, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Anthony Cappucci (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., e.d.t.

Dated: April 27, 1983.

Advisory Committee on Reactor Safeguards, Subcommittee on Human Factors; Meeting

The ACRS Subcommittee on Human Factors will hold a meeting on May 19, 1983, Room 1046, 1717 H Street, NW., Washington, DC.

In accordance with the procedures outlined in the Federal Register on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings wil be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Thursday, May 19, 1983—8:30 a.m. until the conclusion of business.

The Subcommittee will meet:

(a) To review the priorities assigned in NUREG–0933, A Prioritization of Generic Safety Issues, to human factors related safety issues;

(b) To review proposed human factors related modifications to the "General Design Criteria for Nuclear Power Plants," 10 CFR Part 50 Appendix A;

(c) To be briefed by the Office of Inspection and Enforcement on recent activities at the NRC's incident response center;

(d) To review the Human Factors Research Budget for FY 1985 and 1986; and

(e) To discuss Dr. G. Salvendy's proposal for training human factors engineers relative to the safe design and operation of nuclear power plants.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, David Fischer (telephone 202/634–1414) between 8:15 a.m. and 5:00 p.m., e.s.t.

Dated: April 27, 1983.

BILLING CODE 7590-01-M

[Docket No. 50–293]

Boston Edison Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 66 to Facility Operating License No. DPR–35 issued to Boston Edison Company (the licensee) which revised the Technical Specifications for operation of the Pilgrim Nuclear Power Station (the facility) located near Plymouth, Massachusetts. The amendment is efffective as of the date of issuance.

The amendment modifies the Technical Specifications (TSs) to incorporate: (1) A clarification to TSs 3.7.A.4.a(3) and 4.7.A.4.a(3), and their associated bases, to reflect the installation of alarm switches on the torus-drywell vacuum breakers and to describe in detail the applicable torus-drywell vacuum breaker alarm (2) corrections of an incorrect reference to a safety limit MCPR of 1.06 and (3) a change to the reporting requirements of TS 6.9.A.2 to reflect the guidance contained in Regulatory Guide 10.1 (Revision 4) regarding the addressee for monthly operating reports.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since it does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see: (1) The application for amendment dated January 14, 1983, (2) Amendment No. 66 to License No. DPR–35, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 22nd day of April 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch #2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–251]

Carolina Power and Light Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 69 to Facility Operating License No. DPR–23 issued to Carolina Power and Light Company (the licensee), which revised Technical Specifications for operation of the H. B. Robinson Steam Electric Plant, Unit No. 2, (the facility) located in Darlington County, South Carolina. The amendment is effective as of the date of issuance.

The amendment revises Technical Specifications to change the particle size distribution specified for in-place testing of HEPA filters in the fuel and control room filter systems.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated October 22, 1982, (2) Amendment No. 69 to License No. DPR–23, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29550. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 26th day of April 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–358]

Cincinnati Gas & Electric Co. and William H. Zimmer Nuclear Power Station; Issuance of Director's Decision

By petition dated August 20, 1982, as supplemented on October 18, 1982, the Miami Valley Power Project (MVPP) requested that, among other things, the Commission order an immediate suspension of construction of the William H. Zimmer Nuclear Power Station. The petition has been considered under the provisions of 10 CFR 2.206.

The petition contains numerous allegations and supporting exhibits concerning deficiencies in construction of the Zimmer project and inadequacies in the quality assurance (QA) program for construction.

On November 12, 1982, the Commission issued an Order to Show Cause and Order Immediately Suspending Construction to Cincinnati Gas & Electric Company (CG&E), pursuant to 10 CFR 2.202. CLI–82–33, 16 NRC——(November 12, 1982), published in 47 FR 51959 (November 18, 1982). The order required an immediate halt to safety-related construction on the Zimmer Station and required the licensee to show cause why the suspension should not continue pending review and implementation of proposals to improve the licensee's management of the project, to verify the quality of construction work, and to ensure that any future construction conforms to the Commission's requirements. Because the Commission's order imposes remedies substantially similar to those requested by MVPP, its petition has been granted in part and denied in part pursuant to 10 CFR 2.206.

The reasons for the denial in part are explained in the "Director's Decision" under 10 CFR 2.206 (DD–83–02) which is available for public inspection in the Commission's Public Document Room 1717 H Street, N.W., Washington, D.C., and at the Clermont County Library, Third and Broadway Streets, Batavia, Ohio 45103.

A copy of the decision has been filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c). As provided in this regulation, the decision will become the final action of the Commission Twenty-five (25) days after issuance, unless the commission on its own motion institutes review of the decision within that time. The Commission has extended the time within which to review this decision until May 9, 1983.

Dated at Bethesda, Maryland, this 26th day of April 1983.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) the following information collection requirements for clearance under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission: New

2. The title of the information collection: 10 CFR 20.402, Theft or Loss of Licensed Material

3. The form number if applicable: NA

4. How often the collection is required: On occasion

5. Who will be required or asked to report: NRC Licensees

6. An estimate of the number of responses: 60

7. An estimate of the total number of hours needed annually to complete the requirement or request: 96

8. An indication of whether Section 3504(h), Pub. L. 96–511 applies: NA.

9. Abstract: The proposed rule would require licensees to report the loss or theft of all licensed material above an amount specified in the proposed rule.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 395–7340.

NRC CLearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland this 28th day of April 1983.

For the Nuclear Regulatory Commission.

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Co.; Granting of Relief From ASME Section XI Inservice Inspection Requirement

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Florida Power and Light Company (the licensee). The relief relates to the inservice inspection examination requirements and the acceptability of alternative methods at the Turkey Point Plant, Unit Nos. 3 and 4 (the facilities) located in Dade County, Florida. The ASME Code requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of the date of issuance.

The relief permits the licensee to perform inservice inspections in a manner or on a schedule different from that prescribed in Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda, as required by 10 CFR Part 50, because of inaccessibility, configuration of components, radiation level, or other valid reasons.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this relief.

For further details with respect to this action, see: (1) The application for relief dated February 25, 1977, as revised April 28, December 9, 1977, April 10, November 15, 1978, March 6, September 18, 1979, October 15, 1980, and June 14, 1982, (2) the Commission's letter dated April 26, 1983,. and (3) Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 26th day of April 1983.

[Docket Nos. 50-315 and 50-316]

Indiana and Michigan Electric Co.; Issuance of Amendments To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 72 to Facility Operating License No. DPR-58 and Amendment No. 54 to Facility Operating License No. DPR-74 issued to Indiana and Michigan Electric Company (the licensee) which revised Technical Specifications for operation of the Donald C. Cook Nuclear Plant, Units Nos. 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications for oxygen content in the waste decay tanks and makes several administrative corrections which were inadvertently overlooked in the Technical Specifications issued by Amendment Nos. 69 and 51 dated February 7, 1983 for Units 1 and 2, respectively.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated April 14, 1983, (2) Amendment Nos. 72 and 54 to License Nos. DPR-58 and DPR-74, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Iowa Electric Light and Power Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 88 to facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specifications to incorporate the limiting conditions for operation during fuel cycle 7 by: (1) Adding the Maximum Axial Planar Linear Heat Generation Rate (MAPLHGR) operating limits based on the General Electric (GE) analysis for the two new bundle types (P8DRB299 and P8DRB284H) added to the core; and (2) changing Minimum Critical Power Ratio (MCPR) operating limits based on the GE analysis for both 8x8 and P8x8R fuel types.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated January 14, 1983, as supplemented April 7, 1983, (2) Amendment No. 88 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401. Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 3.15, Revision 1, "Standard Format and Content of License Applications for Storage Only of Unirradiated Power Reactor Fuel and Associated Radioactive Material," describes the detailed information that is needed by the NRC staff in its review of an application for a license to authorize the receipt, possession, and storage of unirradiated fuel assemblies and associated radioactive materials for eventual use in a nuclear power reactor and suggests a format for its presentation.

Comments and suggestions in connection with: (1) Items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of active guides may be purchased at the current Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office. Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publications Sales Manager.

Virginia Electric and Gas Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 87 to Facility Operating License No. DPR-32 issued to Virginia Electric and Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit No. 1 (the facility) located in Surry County, Virginia. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to raise the control rod bank insertion limits.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated April 14, 1983, (2) Amendment No. 87 to License No. DPR-32, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. And at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. PENSION BENEFIT GUARANTY CORPORATION

Pendency of Request for Exemption From Bond/Escrow Requirement Relating to Sale of Assets by an Employer That Contributes to a Multiemployer Plan: Avnet, Inc. et al.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of withdrawal of request.

SUMMARY: On November 17, 1982, the Pension Benefit Guaranty Corporation published a notice of pendency in the Federal Register, 47 FR 51635, soliciting public comment on a joint request PBGC had received from Avnet, Inc. and Carol Cable Company, Inc. ("Avnet") for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974. The effect of this notice is to advise interested persons

that Avnet has withdrawn this request. Accordingly, PBGC will take no further action on the request.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006; (202) 254–4862. (This is not a toll-free number.)

Issued at Washington, D.C. on this 27th day of April 1983.

Consideration of Blanket Approval of Certain Plan Amendments Requiring PBGC Approval Under Act Section 4220

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Request for public comment.

SUMMARY: This notice advises the public of and seeks comment on the Pension Benefit Guaranty Corporation's proposal to grant blanket approvals for two types of plan amendments that require PBGC approval under section 4220 of the Employee Retirement Income Security Act of 1974, as amended. Under section 4220, certain plan amendments adopted after April 28, 1983 may not be put into effect without PBGC approval. PBGC shall disapprove an amendment if it finds that the amendment creates an unreasonable risk of loss to plan participants and beneficiaries or to PBGC. PBGC has tentatively determined that two of the amendments subject to its approval can never create an unreasonable risk of loss to participants or to PBGC. Therefore, PBGC is considering granting a blanket approval for these amendments, thus eliminating the need for plan sponsors to request individual approval. The effect of this notice is to solicit the views of the public on these proposed blanket approvals under section 4220.

DATE: Comments must be submitted on or before June 16, 1983.

ADDRESS: All written comments should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006. Comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Attorney, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4862.

SUPPLEMENTARY INFORMATION: Under section 4220(a) of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act, certain amendments to multiemployer pension plans adopted after April 28, 1983 may only be put into effect with the approval of the Pension Benefit Guaranty Corporation or if the PBGC fails to disapprove the amendment within 90 days after receipt of a copy of the amendment and the request for approval. Under section 4220(c), PBGC shall disapprove an amendment if it determines that the amendment creates an unreasonable risk of loss to plan participants and beneficiaries or to PBGC. These rules apply to plan amendments authorized by sections 4201–4219 of the Act.

Contemporaneously with the publication of this notice, PBGC is also publishing a notice listing the amendments covered by section 4220.

In reviewing the covered amendments, PBGC has tentatively determined that two of them can never have the effect of creating an unreasonable risk of loss to plan participants and beneficiaries or to PBGC. Therefore, PBGC is considering granting a blanket approval for these amendments. This would benefit the affected plans by eliminating the need for the plan sponsor to submit the amendment for PBGC approval. It would similarly remove an administrative burden for PBGC. The two amendments under consideration are those authorized by sections 4203(c)(4) and 4205(c) of the Act.

Section 4203(c) provides a special withdrawal rule for plans that primarily cover employees in the entertainment industry ("entertainment plan"). Under the special rule, an employer that is obligated to contribute to such a plan for work performed in the entertainment industry, primarily on a temporary or project-by-project basis, is considered to have withdrawn only if—

(i) The employer ceases to have an obligation to contribute under the plan, and

(ii) Continues (or resumes within 5 years) to perform work in the jurisdiction of the plan of the type for which contributions were previously required without contributing to the plan for such work.

Section 4203(c)(4) permits an entertainment plan to adopt an amendment under which the special withdrawal rule will not apply to a group or class of otherwise eligible employers; instead, the general withdrawal rules of section 4203(a) will apply to that group or class of employers. The effect of a section 4203(c)(4) amendment would be to broaden the circumstances under which certain entertainment industry employers incur liability as a result of a cessation of contributions to the plan. For example, in a plan adopting the section 4203(c)(4) amendment, going out of business would constitute a withdrawal for employers covered by the amendment.

Therefore, because a section 4203(c)(4) amendment broadens the events that give rise to withdrawal liability in an entertainment plan, PBG has tentatively concluded that the adoption of this amendment cannot create an unreasonable risk of loss to plan participants and beneficiaries or to the PBGC. Accordingly, since this amendment would never satisfy the standard for disapproval under section 4220(c), a blanket approval for all such amendments is appropriate.

PBGC notes that this approval would cover a plan's adoption of a section 4203(c)(4) amendment, but not a subsequent repeal of the amendment. If a plan adopted a section 4203(c)(4) amendment under a blanket approval from PBGC and later decided to repeal or limit the application of the amendment, that later action would be subject to PBGC approval under section 4220.

Section 4205(c)(1) of the Act allows a retail food industry plan to be amended to substitute "35 percent" for the "70 percent" partial withdrawal liability rule of section 4205(b)(1)(A). Under the generally applicable 70 percent rule, an employer incurs a partial withdrawal from a plan if the employer's contribution base units in each of 3 consecutive years do not exceed 30 percent of the employer's contribution base units for the high base year. Section 4205(c)(1) permits a retail food industry plan (*i.e.*, a plan in which the majority of the covered employees are employed in the retail food industry) to be amended to provide that an employer incurs a partial withdrawal if in each of 3 consecutive years, its contribution base units do not exceed 65 percent of its contribution base units for the high base year. Thus, this amendment will result in a partial withdrawal for smaller declines in covered work than would result under the statutory rule (a 35 percent decline as compared to a 70 percent decline).

Under section 4205(c)(2), an amendment adopted under paragraph (c)(1) must also include rules for "the equitable reduction of withdrawal liability in any case in which the number of the plan's contribution base units, in the 2 plan years following the plan year of withdrawal of the employer, is higher than" the plan's contribution base units immediately after the partial withdrawal. Therefore, the employer's liability for its partial withdrawal is reduced under this amendment only when the plan's overall number of contribution base units has increased by more than the amount necessary to offset the employer's decline in covered work under the plan.

Therefore, the effect of an amendment under section 4205(c) will always be to provide a retail food industry plan with at least as much, and usually greater, protection against declines in covered work than is provided by the statutory rule. Accordingly, PBGC has tentatively determined that such an amendment cannot create an unreasonable risk of loss to plan participants and beneficiaries or to the PBGC and should therefore, be granted a blanket approval by PBGC.

Similar to amendments under section 4203(c)(4), this approval would extend only to the adoption of a section 4205(c) amendment and not to its subsequent repeal. The latter would be subject to PBGC approval under section 4220. Adjustments to the provisions for reduction of liability under section 4205(c)(2) would be covered by the general approval since, given the parameters set forth in section 4205(c)(2), such adjustments cannot negate the overall protective effect of the amendment.

As a final point, PBGC stresses that the blanket approval that would be granted to amendments authorized by sections 4203(c)(4) and 4205(c) would operate only with respect to amendments properly adopted pursuant to those sections. Plan amendments that do not comply with the conditions contained in sections 4203(c)(4) and 4205(c) are not authorized by those sections and are therefore without effect. This result would not be altered by PBGC's decision to grant the proposed blanket approvals discussed herein.

PBGC requests all interested persons to comment on these proposed actions. All comments will be made part of the record. Comments must be submitted by June 16, 1983.

Issued at Washington, D.C. on this 26th day of April 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

Multiemployer Pension Plan Amendments Requiring PBGC Approval After April 28, 1983

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Interpretation.

SUMMARY: This notice sets forth a list of those plan amendments by multiemployer pension plans which, if adopted after April 28, 1983, may not be put into effect without the approval of the Pension Benefit Guaranty Corporation. Section 4220 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act, provides that no plan amendment authorized by sections 4201–4219 of the Act that is adopted after April 28, 1983 may be put into effect, unless it is first approved by PBGC or PBGC fails to disapprove the amendment within 90 days after receipt of a copy of the amendment and request for approval. Because sections 4201–4219 authorize the adoption of a large number of plan amendments and rules, some pursuant to PBGC regulations and others not, there is uncertainty as to which of these actions will require PBGC approval after April 28, 1983. The effect of this notice is to provide the public with a listing of the specific amendments that are subject to this requirement.

DATE: The plan amendments listed in this notice must be submitted for PBGC approval if adopted after April 28, 1983.

ADDRESS: Inquiries concerning this notice and requests for approval of plan amendments should be submitted to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006.

FOR FURTHER INFORMATION CONTACT: J. Ronald Goldstein, Attorney, Office of the Executive Director, Policy and Planning (140), at the above address; (202) 254–4862.

SUPPLEMENTARY INFORMATION: Sections 4201–4219 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act, set forth rules relating to withdrawals from multiemployer pension plans and an employer's liability for a withdrawal. Those sections authorize various modifications to the statutory rules. In some instances, *e.g.* section 4203(f), the Pension Benefit Guaranty Corporation is authorized to promulgate regulations permitting plans to adopt certain amendments to the statutory rules. In other cases, *e.g.* section 4209(b), plans are authorized directly by the statute to adopt certain amendments. Finally, in some instances, *e.g.*, section 4219(c)(7), plans are authorized to vary the statutory requirements by plan rules, rather than by plan amendment.

Section 4220(a) of the Act provides that "if an amendment to a multiemployer plan authorized by any preceding section of this part is adopted more than 30 months after the effective date of this section (April 26, 1980), the amendment shall be effective only if the corporation approves the amendment, or, within 90 days after the corporation receives notice and a copy of the amendment from the plan sponsor, fails to disapprove the amendment." Excepted from this rule are amendments permitted by section 4211(c)(5) (dealing with the adoption of certain alternatives to the statutory methods for allocating a plan's unfunded vested benefits), which may be adopted only in accordance with that section (section 4220(b)). PBGC may disapprove an amendment submitted under section 4220(a) only if it determines that the amendment creates an unreasonable risk of loss to plan participants and beneficiaries or to PBGC (section 4220(c)).

Because of the multiplicity of plan amendments and rules covered by sections 4201–4219, the purpose of this notice is to clarify which are subject to section 4220.

Since section 4220(a) specifically refers to "an amendment" authorized by sections 4201–4219, it does not apply to plan rules that may be adopted under those sections. Further, if a plan chooses to implement by amendment an action that under sections 4201–4219 may be undertaken through plan rules, that amendment would not be subject to section 4220.

In addition, section 4220 applies only to plan amendments authorized directly by the statute, and not to those which are authorized pursuant to PBGC regulations. In those cases where sections 4201–4219 direct or permit PBGC to issue regulations allowing certain plan amendments, the regulations will contain whatever restrictions or conditions on the plan amendments PBGC deems necessary to protect plan participants and the multiemployer insurance system.

VOL 48 ISS 85 MAY 2 1983 UMI

Accordingly, PBGC has determined that separate approval under section 4220 in that case is unnecessary to achieve such protection and would only create an additional administrative burden on multiemployer plans. Consequently, PBGC has determined that approval under section 4220 of the Act is required only for the following plan amendments:

1. *Section 4203(c)(4).* Allows an entertainment industry plan to amend itself to provide that the special entertainment withdrawal rule would not apply to a group or class of employers under the plan.

2. *Section 4203(b)(1)(B)(ii).* Permits a non-construction industry plan to amend itself to apply the special construction withdrawal rule to construction industry employers participating in the plan.

3. *Section 4205(c)(1).* Allows a retail food industry plan to be amended to substitute "35 percent" for "70 percent" partial withdrawal liability test.

4. *Section 4205(d).* Permits a plan described in section 404(c) of the Internal Revenue Code [1] to amend itself to provide other conditions for partial withdrawal liability.

5. *Section 4209(b).* Permits a plan to adopt by amendment the alternative statutory *de minimis* rule.

6. *Section 4210(b)(2).* Allows a non-construction industry plan to adopt by amendment the six-year "free look" rule.

7. *Section 4211(c)(1).* Permits plans (other than construction industry plans) to adopt by plan amendment one of the three statutory alternatives for determining the employer's share of unfunded vested benefits.

8. *Section 4211(c)(4)(D).* Requires a plan using the direct attribution method to adopt one of three statutory methods for determining the employer's allocable share of plan assets.

9. *Section 4211(d)(1).* Requires a plan described in section 404(c) of the Internal Revenue Code to use the rolling-5 allocation method unless an alternative is adopted by plan amendment.

10. *Section 4211(d)(2).* Sections 4204 (sale of assets), 4209 (*de minimis* rule), 4219(c)(1) (20 year cap on withdrawal liability payments) and 4225 (limitation on dissolution or complete sale of employer) do not apply to a section 404(c) plan unless the plan amends itself to provide otherwise.

11. *Section 4219(c)(1)(C)(ii)(I).* Allows a plan to adopt by amendment the statutory alternative for computing the annual withdrawal liability payment amount for plan years ending before 1986.

12. *Section 4219(c)(1)(C)(iii).* Permits a plan to amend itself to substitute a 5-year period (increasing by one year for each succeeding year up to 10) for the 10-year period used to compute the annual withdrawal liability amount under either the normal statutory formula or the alternative.

If a multiemployer pension plan adopts any of the above amendments after April 28, 1983, the amendment must be submitted for PBGC approval in accordance with section 4220, and may only be put into effect with PBGC's approval or if PBGC fails to disapprove the amendment within 90 days after submission, as provided under section 4220.

Issued at Washington, D.C. on this 26th day of April 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

[1] A plan established prior to January 1, 1964 as a result of an agreement between employer representatives and the United States during a period of government operation, under seizure powers, of the major part of the productive facilities of an industry.

SMALL BUSINESS ADMINISTRATION

[Application No. 04/04-5224]

Ellison Investment Group, Inc.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 et seq.), has been filed by Ellison Investment Group, Inc. (Applicant), Route 5, Box 999X, Brooksville, Florida 33512, with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1983).

The officers, directors and sole shareholder of the Applicant are as follows:

President, Director, sole shareholder
Robert E. Ellison, 5301 Seminole Avenue, Tampa, Florida 33603
Vice President, Director
William G. Premaza, 16007 Hanna Road, Lutz, Florida 33549
Secretary, Treasurer, Director
James R. Ellison, 9404 N. 21st Street, Tampa, Florida 33612

The Applicant, a Florida corporation, will begin operations with $505,000 of paid-in capital derived from the sale of 1,000 shares of common stock.

The Applicant will conduct its activities primarily in the following Florida counties: Pasco, Polk, Pinellas and Hillsbrough.

Applicant intends to provide assistance to qualified socially or economically disadvantaged small business concerns.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the Applicant include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the Applicant under this management, including adequate profitability and financial soundness, in accordance with the Act and the SBA Rules and Regulations.

Notice is hereby give that any person may, not later than 15 days from the date of publication of this notice, submit to SBA written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Brooksville, Florida.

(Catalog of Federal Domestic Assistance Program No. 59.001, Small Business Investment Companies)

Dated: April 26, 1983.

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

BILLING CODE 8025-01-M

[License No. 06/06-0188]

Mercantile Dallas Corp.; Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Mercantile Dallas Corporation, 1704 Main Street, Dallas, Texas 75222, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), (15 U.S.C. 661 *et seq.*), has filed an application with the Small Business Administration pursuant to Section 312 of the Act and covered by § 107.1004(b)(1) of the Regulations governing small business investment companies (13 CFR 107.1004 (1983)), for approval of a conflict of interest transaction falling within the scope of the above Sections of the Act and Regulations.

The Licensee proposes to make a $1,425,000 five year, loan to Boorhem-Fields, Inc. (Boorhem-Fields), P.O. Box 1177, Paris, Texas 75460. Messers. William Boorhem and Joseph Fields, the principals in Boorhem-Fields, are both directors of Merchants and Planters Bank (M & P Bank) Sherman, Texas. M & P Bank is a subsidiary of Mercantile Texas Corporation, an Associate of the Licensee under Section 107.3 of the SBA Regulations, because it owns 10 or more percent of the stock of the Licensee. Because of these affiliations, the Licensee's proposed financing to Boorhem-Fields falls within the purview of § 107.1004 of the Regulations and requires SBA approval.

Notice is hereby given that any interested party may, not later than 15 days from the date of publication of this Notice, submit written comments to the Associate Administrator for Finance & Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Dallas, Texas and Paris, Texas areas.

DEPARTMENT OF STATE

[Public Notice CM-8/627]

Oceans and International Environmental and Scientific Affairs Advisory Committee; Partially Closed Meeting

The Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee will meet at 9:00 a.m., Tuesday, May 24, 1983, in Room 1408, Department of State, Washington, D.C.

At this meeting, officers responsible for Antarctic affairs in the Department of State will discuss key issues and problems involving the Antarctic in the context of current domestic and international developments. This session will be open to the public. The public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairman. As access to the Department of State is controlled, persons wishing to attend the May 24 meeting should enter the Department through the Diplomatic ("C" Street) Entrance. Department officials will be at the Diplomatic Entrance to escort attendees to Room 1408.

The Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee will also meet on Monday, May 23, 1983, at the National Academy of Sciences, 2101 Constitution Avenue, NW., in sessions which will not be open to the public. As these sessions will include discussion of classified material, they have been closed pursuant to Section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552b(c)(1) and 5 U.S.C. 552b(c)(9)(B). The disclosure of classified material and revelation of considerations which go into policy development would substantially undermine and frustrate the U.S. position in future negotiations. The purpose of these discussions will be to elicit views concerning the further development of United States policy regarding Antarctic resources, particularly Antarctic mineral resources. This portion of the meeting will include classified briefings and examination and discussion of classified documents pursuant to Executive Order 12356.

Requests for further information on the meetings should be directed to R. Tucker Scully of OES/OPA, Room 5801, Department of State. He may be reached by telephone on (202) 632-3262.

Dated: April 19, 1983.

James L. Malone,

Chairman.

Region III Advisory Council; Meeting

The U.S. Small Business Administration Region III Advisory Council, located in the geographical area of Pittsburgh, will hold a public meeting at 9:30 a.m. on Wednesday, May 4, 1983, at the William Penn Hotel, Room 1266, 530 William Penn Place, Pittsburgh, Pennsylvania 15230, to discuss such matters as may be presented by members, staff of the U.S. Small Business Administration, or others present.

For further information, write or call Joseph M. Kopp, District Director, U.S. Small Business Administration, 960 Penn Avenue, Convention Tower, Fifth Floor, Pittsburgh, Pennsylvania 15222; (412) 644-4306.

Office of the Secretary

[Public Notice 861]

Privacy Act of 1974; Proposed Amendments to Medical Records System

Notice is hereby given that the Department of State proposes two amendments to the existing medical records system pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a(o)) and the Office of Management and Budget Circular No. A-108, Transmittal Memorandum No. 1, dated September 30, 1975 (40 FR 45887, October 3, 1975).

The first amendment provides for maintaining medical records in health units at overseas posts on employees and dependents covered by the Department of State's Medical Program. These records will be composed primarily of medical information acquired at post and supporting information on employees and their dependents when seen in consultation by a Foreign Service Medical Officer or Foreign Service Nurse. The information in these records will ultimately be consolidated in each person's medical record maintained by the Department of State, Washington, D.C.

The second amendment provides for a change in configuration in the medical record system to allow for partial automation in the retrieval of medical information now contained on hard copy and microfilm. This change will assist in the 17,000 Medical Clearance decisions made each year by facilitating information retrieval and matching medical problems of individuals with overseas conditions. In addition, the change will help to improve medical care for overseas employees and their dependents by identifying health problems and facilitating followup. It will also fully support epidemiological health studies and provide the capability to follow health trends in persons assigned overseas.

Any persons interested in commenting on this modified system of medical records may do so by submitting comments in writing to the Information and Privacy Coordinator, Foreign Affairs Information and Management

VOL 48 ISS 85 MAY 2 1983 UMI

Center, Room 1239, Department of State, 2201 C Street, N.W., Washington, D.C. 20520. If no comments are received within 60 days of the publication of this notice, these amendments to the medical records system will go into effect.

The proposed amended Medical Records System, State-24, will read as set forth below.

Dated: April 19, 1983.

Jerome W. Van Gorkom,

Under Secretary of State for Management.

STATE-24

SYSTEM NAME:

Medical Records.

SYSTEM LOCATION:

Department of State, 2201 C Street, N.W., Washington, D.C. 20520 and Health Units at Overseas Posts.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees and dependents of the Department of State, the Agency for International Development, the U.S. Information Agency, ACTION, and other agencies under the Medical Program.

CATEGORIES OF RECORDS IN THE SYSTEM:

Reports of Medical examinations and related documents; reports of treatments and other health services rendered to individuals; narrative summaries of hospital treatments; personal medical histories; reports of on-the-job injuries or illnesses; employee assignment histories; and reports on medical evacuation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

22 U.S.C. 911, 912; 22 U.S.C. 1156–1159; 42 U.S.C. 4561; 21 U.S.C. 1180; 22 U.S.C. 3926; 5 U.S.C. 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The information contained in these records is used to effectively administer the Department of State's medical program. These records are utilized and reviewed by medical and administrative personnel of the Office of Medical Services on a need-to-know basis in normal day-to-day operations. These . . . Medical Files are not available to other offices in the Department of State, the Agency for International Development, the U.S. Information Agency, ACTION, or other participating agencies. Records are released only with the written permission of the subject individual to private physicians, hospitals, legal representatives, congressional representatives, and others under the premise of the "Prudent Physician Rule." Also see "Routine Uses" paragraphs of Prefatory Statement.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Hard copy, microfiche; and computer media.

RETRIEVABILITY:

By individual name.

SAFEGUARDS:

All employees of the Department of State have undergone a thorough background security investigation. Access to the Department of State building and its annexes is controlled by security guards, and admission is limited to those individuals possessing a valid identification card or individuals under proper escort. All records containing personal information are maintained in secured file cabinets or in restricted areas, access to which is limited to authorized personnel.

RETENTION AND DISPOSAL:

Retention of these records varies depending upon the specific kind of record involved. They are retired or destroyed in accordance with published schedules of the Department of State. More specific information may be obtained by writing the Information and Privacy Coordinator, Room 1239, Department of State, 2201 C Street, N.W., Washington, D.C. 20520.

SYSTEM MANAGER(S) AND ADDRESS:

Executive Officer, Medical Services, Room 2909, Department of State, 2201 C Street, N.W., Washington, D.C. 20520.

NOTIFICATION PROCEDURE:

Individuals who have cause to believe that the Office of Medical Services might have records pertaining to them should write to the Information and Privacy Coordinator, Room 1239, Department of State, 2201 C Street, N.W., Washington, D.C. 20520. The individual must specify that she/he wishes the records of the Office of Medical Services to be checked. At a minimum, the individual must include: name; date and place of birth; current mailing address and zip code; signature; the agency served by the medical program with which the individual was or is an employee or a dependent, and the approximate dates of such employment or dependency.

RECORD ACCESS PROCEDURES:

Individuals who wish to gain access to or amend records pertaining to them should write to the Information and Privacy Coordinator (Address above).

CONTESTING RECORD PROCEDURES:

(See above).

RECORDS SOURCE CATEGORIES:

The Individual; hospitals; clinics; private physicians, medical professionals employed by the Department of State.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Implementation of Emergency Jobs Legislation

Funds approved under the emergency jobs legislation enacted on March 24, 1983, (referred to in this Notice as the "jobs legislation"), will be administered by the Federal Aviation Administration (FAA) in accordance with the applicable provisions of the Surface Transportation Assistance Act of 1982 (STAA) (Pub. L. 97–424), the emergency jobs legislation itself, as well as the requirements of the Airport and Airway Improvement Act of 1982 (AAIA) (Pub. L. 97–248, 49 U.S.C. 2201 *et seq.*). Notice is hereby given that the FAA is implementing a plan of fund distribution in accordance with the requirements of these statutes.

The STAA added new discretionary authority to the Airport Improvement Program (AIP) by amending section 507(a) of the AAIA. This amendment specifies that these funds are to be used only for construction, reconstruction, or repair begun after enactment of this amendment (January 6, 1983). It further specifies that preference is to be given to projects that increase safety or capacity. FAA field personnel will assist sponsors where necessary in determining project eligibility under this amendment.

The emergency jobs legislation amended section 302 of the Department of Transportation and Related Agencies Appropriation Act of 1983 (Pub. L. 97–369) by increasing the obligational ceiling for airport grants by $150 million, so that the ceiling is now $750 million. This amendment also states that first consideration is to be given to projects where the preappliction is filed with the FAA on or before June 1, 1983.

Section 101(b)(5) of the jobs legislation specifies that grants for airport development (referred to in the legislation as "Rebuilding Aviation Infrastructure") made from the $150 million in jobs legislation funds are to be distributed in accordance with sections 101 (b)(1) or (b)(4). The FAA has determined that section 101(b)(1) is applicable to the Airport Improvement Program.

Section 101(b)(1)(A) of the jobs legislation specifies that one-third of the funds ($50 million) will be distributed for use within the 50 states, the District of Columbia, and Puerto Rico based on the relative number of unemployed individuals in each state. This distribution is to be made as follows:

Alabama	$1,128,686
Alaska	99,535
Arizona	582,728
Arkansas	436,409
California	5,639,800
Colorado	587,795
Connecticut	516,464
Delaware	95,279
District of Columbia	127,547
Florida	1,961,361
Georgia	846,057
Hawaii	100,908
Idaho	220,872
Illinois	2,973,119
Indiana	1,408,138
Iowa	598,534
Kansas	354,103
Kentucky	774,726
Louisiana	802,172
Maine	194,266
Maryland	747,639
Massachusetts	1,014,904
Michigan	2,850,386
Minnesota	857,366
Mississippi	494,632
Missouri	947,724
Montana	158,274
Nebraska	242,397
Nevada	235,029
New Hampshire	162,452
New Jersey	1,284,097
New Mexico	246,882
New York	2,970,365
North Carolina	1,136,005
North Dakota	111,447
Ohio	2,904,279
Oklahoma	429,944
Oregon	697,058
Pennsylvania	3,164,692
Puerto Rico	907,066
Rhode Island	231,772
South Carolina	673,177
South Dakota	94,795
Tennessee	1,134,514
Texas	2,540,015
Utah	254,289
Vermont	82,007
Virginia	943,598
Washinton	1,066,314
West Virginia	619,408
Wisconsin	1,275,817
Wyoming	95,531

In addition, section 101(b)(1)(B) of the jobs legislation specifies that one-sixth of the funds ($25 million) will be distributed for use among "long-term unemployment states" based on the relative number of qualified long-term unemployed individuals in each state. This distribution is to be made as follows:

Alabama	$929,057
Arizona	479,661
Arkansas	359,221
California	4,642,286
District of Columbia	104,988
Illinois	2,447,283
Indiana	1,157,434
Kentucky	637,700
Louisiana	660,292
Michigan	2,346,239
Mississippi	407,147
Nevada	193,459
New Mexico	202,804
Ohio	2,390,590
Oregon	573,770
Pennsylvania	2,604,953
Puerto Rico	746,852
Rhode Island	190,778
South Carolina	554,112
Tennessee	933,852
Washington	877,715
West Virginia	509,852
Wisconsin	1,050,164

Section 101(b)(1)(C) of the jobs legislation specifies that the remaining half of the funds ($75 million) is to be distributed in accordance with the provisions of the AAIA, as amended; that is, treated as discretionary funds.

Finally, section 101(c) of the jobs legislation requires that grantees receiving funds appropriated under this act, the extent practicable, maximize the creation of new employment opportunities to individuals who were unemployed at least 15 of the 26 weeks preceding enactment of the jobs legislation (March 24, 1983). This section also requires obligation and disbursement of funds as rapidly as possible. The AIP job legislation funds will be administered to accomplish these two objectives through appropriate certification from grantees at the time of preapplication submission. The language of this certification will read as follows:

"With respect to the airport development project for which this preapplication is submitted, the sponsor makes the following certifications: (1) The sponsor shall, to the extent practicable, utilize Federal funds received to accomplish this project in a manner which maximizes immediate creation of new employment opportunities to individuals who were unemployed at least 15 of the 26 weeks immediately preceding the date of enactment of the "Emergency Jobs Legislation" enacted on March 24, 1983; and (2) The sponsor further certifies that Federal funds received to accomplish this project will be disbursed as rapidly as possible so as to provide prompt assistance for the unemployed.

Date of certification: _____

Signature of representative of airport sponsor: _____

Name of Sponsor: _____

BILLING CODE 4910-13-M

Federal Railroad Administration

[FRA Waiver Petition Dockets HS–83–1 through HS–83–7]

Petition for Exemption From the Hours of Service Act

In accordance with 49 CFR 211.41 and 211.9, notice is hereby given that seven railroads have petitioned the Federal Railroad Administration (FRA) for an exemption from the Hours of Service Act (83 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64a(e)). Each petition requests that the individual railroad be granted authority to permit certain employees to continuously remain on duty for in excess of twelve hours.

The Hours of Service Act currently makes it unlawful for a railroad to require or permit specified employees to continuously remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad, which employs no more than fifteen employees who are subject to the statute, to seek an exemption from this twelve hour limitation.

Each railroad seeks this exemption so that it can permit certain employees to remain continuously on duty for periods not to exceed sixteen hours. Each petitioner indicates that granting this exemption is in the public interest and will not adversely affect safety. Additionally, each petitioner asserts that it employs no more than fifteen employees and has demonstrated good cause for granting this exemption. The railroads seeking this exemption are as follows:

Dakota Rail, Docket Number HS–83–1
Duluth and Northeastern Railroad, Docket Number HS–83–2
Great Southwest Railroad, Docket Number HS–83–3
Algers, Winslow and Western Railroad, Docket Number HS–83–4
City of Prineville Railway, Docket Number HS–83–5
North Central Oklahoma Railway, Docket Number HS–83–6
Andalusia and Conecuh Railroad, Docket Number HS–83–7

Interested persons are invited to participate in these proceedings by submitting written views and comments. FRA has not scheduled an opportunity for oral comments since the facts do not appear to warrant it. Communications concerning these proceedings should identify the appropriate Docket Number (e.g., Docket Number HS–83–1) and must be submitted in triplicate to the Docket Clerk, Office of the Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. Communications received before January 10, 1983, will be considered by the FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments, during regular business hours in Room 7321A, Nassif Building, 400 Seventh Street. SW., Washington, D.C. 20590.

(Sec. 5 of the Hours of Service Act of 1969 (45 U.S.C. 64a), 1.49(d) of the regulations of the Office of the Secretary, 49 CFR 1.49(d))

Issued in Washington, D.C. on April 26, 1983.

Joseph W. Walsh,
Associate Administrator for Safety.

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

[Docket No. IP82–15; Notice 2]

B. F. Goodrich Co.; Grant of Petition for Determination of Inconsequential Noncompliance

This notice grants the petition by B. F. Goodrich Company of Akron, Ohio, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.119, Motor Vehicle Safety Standard No. 119, *New Pneumatic Tires for Vehicles Other Than Passenger Cars*. The basis of the petition was that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on August 12, 1982, and an opportunity afforded for comment (47 FR 35062).

Paragraph S6.5(c) of Standard No. 119 requires tires to be marked with the tire size designation as listed by, among other organizations, the Tire and Rim Association (T&RA). Several years ago T&RA added the suffix "LT" denoting light truck application to tire size 8–17–5 load range "D" Extra Miler XL tires. This information was not added to three of petitioner's molds, and consequently since 1979 more than 21,000 tires have been produced lacking the suffix.

Petitioner argued that the noncompliance was inconsequential because the size has been specified and used only for light truck application and it is aware of no problems or complaints arising from the omission.

No comments were received on the petition.

NHTSA's review of the 1982 T&RA yearbook verifies that the tire in question, 8–17.5, has been specified to be used only for light truck applications and service. No passenger car tires of this size are produced by domestic manufacturers, nor do 17.5 inch rims exist for passenger cars. Since no confusion apparently exists in the market place and there have been no reports of accidents or erroneous installations, petitioner is judged to have met its burden of persuasion that the noncompliance herein described is inconsequential as it relates to motor vehicle safety and its petition is hereby granted.

The engineer and attorney primarily responsible for this notice are Art Neill and Taylor Vinson, respectively.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on April 22, 1983.

Courtney M. Price,
Associate Administrator for Rulemaking.

BILLING CODE 4910-59-M

[Docket No. IP82–14; Notice 2]

B. F. Goodrich Co.; Grant of Petition for Determination of Inconsequential Noncompliance

This notice grants the petition by B. F. Goodrich Co. of Akron, Ohio, to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 3181 et seq.) for a noncompliance with 49 CFR 571.109, *New Pneumatic Tires–Passenger Cars*. The basis of the petition is that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published on August 12, 1982, and an opportunity afforded for comment (47 FR 35062).

Paragraphs S4.3 (b) and (c) of Standard No. 109 require that the sidewall of each passenger car tire be labeled with the composition of the cord materials used in the plies branded on both sides of the tire. Goodrich produced approximately 325 tires with

ply information appearing on one side only. The tire in question is the P235/75R15 XLM blackwall.

Goodrich argued that the noncompliance is inconsequential because the failure to label has no impact upon safety, and the tires otherwise comply with Standard No. 109.

No comments were received on the petition.

The tires in question are certified as conforming to Standard No. 109. Thus, there is no compromise to safety in the choice of cord materials used in these tires. The absence on one sidewall of information concerning cord materials should not cause any confusion among consumers since they select tires primarily on the basis of method of construction (radial, bias) instead of materials (nylon, rayon, polyester, etc.). Further, although it is important to ensure that tires on the same axle are matched in terms of method of construction, differences in materials do not present the same concerns. Accordingly, petitioner has met its burden of persuasion that the noncompliance herein discussed is inconsequential as it relates to motor vehicle safety and its petition is hereby granted.

The engineer and attorney primarily responsible for this notice are Art Neill and Taylor Vinson, respectively.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on April 22, 1983.

BILLING CODE 4910-59-M

[Docket No. IP83–3; Notice 1]

General Motors Corp.; Receipt of Petition for Determination of Inconsequential Noncompliance With Vehicle Identification Number Regulation

General Motors Corporation of Warren, Michigan, has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 *et seq.*) for an apparent noncompliance with 49 CFR 571.115, *Vehicle Identification Number*, on the basis that it is inconsequential as it relates to motor vehicle safety.

This notice of receipt of a petition is published under section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

GM has determined that 61 of its 1982 model Chevrolet C–10 and K–10 trucks, and GMC C–15 and K–15 trucks have an incorrect gross vehicle weight rating designator in the vehicle identification number, required by Motor Vehicle Safety Standard No. 115. The designator incorrectly given is "C", indicating a GVWR of 4001 to 5000 pounds, while the correct letter is "E", as the trucks actually have a GVWR of 6200 pounds.

Petitioner argues that the noncompliance is inconsequential as it relates to motor vehicle safety since it would not result in a potential overloading, nor does it jeopardize traceability of the vehicles in the event of a recall. The trucks are intended to carry a load greater than that indicated in the erroneous character, and the uniqueness of the VIN's assure traceability of the trucks. Nevertheless, GM intends to provide the owners of the 61 trucks with a letter informing them of the error to minimize possible difficulties with State registration. The National Auto Theft Bureau will also be informed.

Interested persons are invited to submit written data, views and arguments on the petition of General Motors Corporation, described above. Comments should refer to the docket number and be submitted to: Docket Section, Room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date, will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the Federal Register pursuant to the authority indicated below.

The engineer and attorney primarily responsible for this notice are Nelson Erickson and Taylor Vinson, respectively.

Comment closing date: June 1, 1983.

(Sec. 102, Pub. L. 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

BILLING CODE 4910-59-M

[Docket No. IP82–17; Notice 2]

General Motors Corp.; Grant of Petition for Determination of Inconsequentiality

This notice grants the petition by General Motors Corp. of Warren, Michigan ("GM" herein), to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.110, Motor Vehicle Safety Standard No. 110, *Tire Selection and Rims for Passenger Cars*. The basis of the petition was that noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of this petition was published on September 16, 1982, and an opportunity afforded for comment (47 FR 40970).

Approximately 23,428 1982 model Oldsmobile Toronado passenger cars equipped with front bench seats may carry tire inflation placards (required by Standard No. 110) with an incorrect seating capacity and vehicle capacity weight. The placards indicate that the front seating capacity is two persons when the correct capacity is three, that the occupant capacity is five when actually it is six, and that the total vehicle capacity weight is 920 pounds when it is 1070 pounds.

GM argues that the incorrect seating capacity noncompliance is inconsequential because it is obvious to anyone comparing the tire placard to the actual front seating accommodations that the placard must be in error. Further, even if the vehicle were loaded with an additional 150 pounds beyond that specified on the placard, its tire load limits would not be exceeded, because the vehicle would be loaded to the design capacity proper for six-passenger Toronados. The error has now been corrected.

One comment was received on the petition, supporting it.

Petitioner has shown that when the vehicle is loaded with an additional 150 pounds beyond that specified on the placard, the vehicle is at the design capacity specified for six-passenger Toronados, and that the tire load limits will not be exceeded. Accordingly, petitioner has met its burden of persuasion that the noncompliance herein described is inconsequential as it relates to motor vehicle safety, and its petition is granted.

The engineer and attorney primarily responsible for this notice are P. L. Moore and Taylor Vinson, respectively.

(Sec. 102, Pub. L. 93-402, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 40 CFR 1.50 and 49 CFR 501.8)

Issued on April 22, 1983.

BILLING CODE 4910-59-M

DEPARTMENT OF THE TREASURY

Fiscal Service

Treasury Current Value of Funds Rate

AGENCY: Bureau of Government Financial Operations, Fiscal Service, Treasury.

ACTION: Notice of rate for use in Federal debt collection and discount evaluation.

SUMMARY: Pursuant to Section II of the Debt Collection Act of 1982 (31 U.S.C. 3717), the Secretary of the Treasury is responsible for computing and publishing the percentage rate to be used in assessing interest charges for outstanding debts on claims owed the Government. Treasury's Cash Management Regulations (I TFM 6-8000) also prescribe use of this rate by agencies as a comparison point in evaluating the cost-effectiveness of a cash discount. Notice is hereby given, therefore, that the applicable rate will change from 13% to 11% for the fourth quarter of FY 1983.

DATES: The rate will be in effect for the period beginning on July 1, 1983 and ending on September 30, 1983.

FOR FURTHER INFORMATION CONTACT: Inquires should be directed to the Cash Management Regulations and Compliance Staff, Bureau of Government Financial Operations, Department of the Treasury, Treasury Annex No. 1, PB-711, Washington, D.C. 20226, Telephone: 202/634-5131.

SUPPLEMENTARY INFORMATION: The rate reflects the current value of funds to the Treasury for use in connection with Federal cash management systems and is based on investment rates set for purposes of Pub. L. 95-147, 91 Stat. 1227. Computed each year by averaging investment rates for the twelve-month period ending every September 30 for applicability effective January 1, the rate is subject to quarterly revisions if the annual average, on a moving basis, changes by 2 per centum. The rate in effect for the fourth quarter of FY' 83 reflects the average investment rates for the twelve-month period ended March 31, 1983. The applicable rate will be published on or around the end of the first month of a given quarter for use during the succeeding calendar quarter.

Dated: April 26, 1983.

Russell D. Morris,

Assistant Commissioner.

BILLING CODE 4810-35-M

VETERANS ADMINISTRATION

Advisory Committee on Former Prisoners of War; Meeting

The Veterans Administration gives notice under 38 U.S.C. 211 that a meeting of the Advisory Committee on Former Prisoners of War will be held at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC 20420, June 1 and 2, 1983. The purpose of the Committee is to consult with and advise the Administrator of Veterans' Affairs on the administration of benefits under title 38, United States Code, for veterans who are former prisoners of war and on the needs of such veterans with respect to compensation, health care, and rehabilitation.

The session will convene at 9 a.m. each day. The June 1st session will be held in Room 817, and the June 2nd session will be held in the Omar N. Bradley Conference Room. These sessions will be open to the public up to the seating capacity of the room. Because this capacity is limited, it will be necessary for those wishing to attend to contact Miss Linda Gardner, Administrative Assistant to the Chief Benefits Director, Veterans Administration Central Office (phone 202/389-2455) prior to May 20, 1983.

Members of the public may direct questions or submit prepared statements for review by the Committee in advance of the meeting, in writing only, to Mr. H. B. Mars, Deputy Director, Compensation and pension Service, Department of Veterans Benefits, Room 400, Veterans Administration Central Office. Submitted material must be received at least five days prior to the meeting. Such members of the public may be asked to clarify submitted material prior to consideration by the Committee.

Summary minutes of the meeting and rosters of the Committee members may be obtained from Miss Linda Gardner at the aforementioned address.

Dated: April 22, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

BILLING CODE 8320-01-M

Advisory Committee on Women Veterans; Establishment

In accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92-463) and Office of Management and Budget Circular A-63, as revised, and after consultation with the Administrator, General Services Administration, the Administrator of Veterans Affairs has determined that the establishment of the Advisory Committee on Women Veterans is necessary and in the public interest.

The Committee is being established to review existing information, render expert advisory opinions, and make recommendations to the Administrator's staff concerning the needs of women veterans with respect to health care, rehabilitation benefits, compensation, outreach programs and other programs adminstered by the Veterans Administration. The Committee will be composed of persons from within and outside the Federal Government to be broadly representative of the special population and to possess expertise in the diverse areas of concern.

Comments of interested persons concerning the establishment of this committee or recommendations for membership may be submitted to Susan H. Mather, M.D., Medical Service (111), Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, DC 20420, phone (202) 389-2450.

Dated: April 25, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10 a.m. Wednesday, May 4, 1983.

LOCATION: Third floor hearing room, 1111 18th Street NW., Washington, D.C.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. *Mid-Year Review: Smoke Detectors; PPPA Data Needs*
   The Commission will consider fiscal year 1983 resource issues relating to (1) Smoke Detector Project, and (2) PPPA data needs.
2. *Hazardous Dyes; Status Report*
   The staff will brief the Commission on the current status of the Hazardous Dyes Project. The purpose of this project is to identify dyes which may be potentially hazardous to consumers.
3. *Gas Heating System Project: Status Report*
   The staff will brief the Commission on document relating to the Gas Heating Systems Year End Report for fiscal year 1982 and provide an update on current activities related to gas heating systems.

For a recorded message containing the latest agenda information, call 301-492-5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Ave., Bethesda, Md. 20207; 301-492-6800.

NUCLEAR REGULATORY COMMISSION

DATE: Friday, April 29, 1983 and Week of May 2, 1983.

PLACE: Commissioners' Conference Room, 1717 H Street NW., Washington, D.C.

STATUS: Open and closed.

MATTERS TO BE DISCUSSED:

Friday, April 29:

2:00 p.m.:
Briefing on Uranium Mill Tailing Standards (Public Meeting)

Wednesday, May 4:

10:30 a.m.:
Briefing on the State of the Nuclear Industry (Public Meeting)

1:30 p.m.:
Discussion of Possible Enforcement Action (Closed—Exemption 5)

3:15 p.m.:
Discussion of Indian Point (Closed—Exemption 10)

Thursday, May 5:

10:00 a.m.:
Discussion of Kerr-McGee v. NRC and Consolidated Cases (Mill Tailings Case) (Closed—Exemption 10)

ADDITIONAL INFORMATION:

Affirmation of Review of ALAB-701; Waste Confidence Order; and Rule on Extended Spent Fuel Storage scheduled for April 21, *postponed.*

On April 21 the Commission voted 4-0 (Commissioner Asselstine not present) to hold Affirmation of 10 CFR Part 50, held that day.

Discussion of Regulatory Reform Task Force—Administrative Proposals—Backfit Rule scheduled for April 27, *postponed.*

AUTOMATIC TELEPHONE ANSWERING SERVICE FOR SCHEDULE UPDATE: (202) 634-1498. Those planning to attend a meeting should reverify the status on the day of the meeting.

DEPARTMENT OF EDUCATION

Additional Final Funding Priorities for Research and Training Centers for the National Institute of Handicapped Research for Fiscal Year 1983

AGENCY: Education Department.

ACTION: Additional Final Funding Priorities for Research and Training Centers for the National Institute of Handicapped Research For Fiscal Year 1983.

SUMMARY: The Secretary announces final priorities for research to be supported by the National Institute of Handicapped Research (NIHR) in fiscal year 1983. NIHR program regulations authorize the Secretary to establish priorities by reserving funds to support particular research activities (See 34 CFR 352.32). Departmental administrative regulations require that if priorities are not already established within program regulations, they must first be proposed for public comment before they are announced as final. These priorities were published as proposed priorities for fiscal year 1983 in the **Federal Register** on December 1, 1982 (47 FR 54142). These final priorities inform potential grant applicants and others of the additional research priorities in which NIHR intends to hold competitions for Research and Training Centers in fiscal year 1983.

EFFECTIVE DATE: Unless Congress takes certain adjournments, these priorities will take effect 45 days after publication in the **Federal Register**. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Edythe Glazer, National Institute of Handicapped Research, 330 C Street, SW., Room 3511, Washington, D.C. 20202. Telephone: (202) 245–0555, TTY for deaf individuals (202) 472–4217.

SUPPLEMENTARY INFORMATION: The following two priorities were proposed for fiscal year 1983 in the **Federal Register** (47 FR 54142, December 1, 1982) and public comment was invited. In that Notice, the public was advised that these two priorities had been proposed and finalized, with somewhat different wording, for fiscal year 1982, but that none of the applications received was deemed worthy of funding by the agency's scientific review process. However, because of the importance of these priority areas, the Secretary proposed them again for fiscal year 1983 and received public comments which are discussed under the "Summary of Comments and Responses" section of this Notice, along with the modifications that have been amde as a result of the comments.

Program Information: NIHR is authorized to support research and related activities in a variety of program areas and through several program authorities. The two priorities identified in this announcement are for Research and Training Centers (RTCS), which are described below.

Research and Training Centers (RTCs) conduct coordinated and advanced programs of rehabilitation research, and provide training to rehabilitation personnel engaged in research or the provision of services. RTCs must be operated in collaboration with institutions of higher education and must be associated with a rehabilitation service program. Ideally each Center conducts a program of research, scientific evaluation, and training activities in an area which contributes substantially to the solution of problems in that area, advances the state-of-the-art, and becomes a recognized Center of excellence in a given subject area. Each Center is encouraged to develop practical applications for all of its research findings through a scientific evaluation process which tests and validates its findings, as well as related findings of other Centers. Center training programs generally disseminate and encourage the utilization of new rehabilitation knowledge through such means as development of or contribution to undergraduate and graduate texts and curricula, in-service training, and continuing education.

Funding Priorities

- *Improving Rehabilitation Services for Handicapped Persons in the Pacific Basin, including the U.S. Territories, American Samoa, Guam, and all of the Islands of Hawaii.*

The Center to be funded must investigate, develop and test innovative methods in the delivery of appropriate rehabilitation services in remote geographic locations.

This will require an assessment of need based on the collection and analysis of reliable data on the incidence and prevelence of disability, including an analysis of the characteristics and situational factors associated with disabilities and the demographic distribution of disability among the population and its subgroups, and the development of methods for identifying, locating and gaining access to and for handicapped individuals. Such a Center must also develop methods for the involvement of existing professional and paraprofessional personnel, utilizing innovative training and referral methods to assure that the most appropriate and cost-effective systems are developed for the delivery of rehabilitation services.

The Center must demonstrate through affiliation and involvement with all agencies authorized and required to provide rehabilitation services in these areas that the successful results of research will be adopted and utilized by those agencies in the provision of appropriate and coordinated rehabilitation and related services to meet the unique rehabilitation needs of handicapped individuals in the Pacific Basin.

- *Improving Rehabilitation for Native Americans.*

While the prevalence of disabling conditions among Native Americans is generally acknowledged to be high, it is apparent that Native Americans are often isolated from rehabilitation services by linguistic, cultural, attitudinal, and geographic barriers which may not be evident to either the disabled person or the service agency. Research is needed to assess the need for rehabilitation services and the unique service delivery problems experienced by disabled Native Americans of all ages and by the service delivery system. The proposed Research and Training Center must determine the incidence and prevalence of disability among Native Americans and identify related factors such as demographic characteristics, vocational history, geographic distribution, and type of service system contacts, and analyze rehabilitation service needs. Culturally sensitive methods must be developed to assess client potential and rehabilitation needs and to develop appropriate rehabilitation and training approaches to meet those needs. The Center must also develop methods to evaluate the perceived barriers to appropriate service delivery and design and test improved models of service delivery. Particular attention should be given to solutions to comprehensive needs of disabled Native American children for habilitation and rehabilitation.

Such a Center must involve Native American organizations and individuals in various capacities in all facets of the development and operation of the Center, and applicants must include evidence of the involvement of Native American organizations in policymaking and administration of the RTC. It is also important that such a Center form a network of linkages with the various service delivery systems which relate to Native Americans, including Federal, regional, tribal, State, local, and private agencies in order to demonstrate methods of diffusing findings and utilizing existing resources to improve services.

Such a Center must provide training to rehabilitation service providers, researchers, and managers/policymakers to increase their sensitivity to the unique rehabilitation needs of Native Americans and their awareness of innovative methods to meet these needs. This training should involve collaborative sponsorship with other Research and Training Centers, as well as with public, private, and tribal rehabilitation, health, and human services agencies.

The Center is expected to develop materials to enhance consumer and public education on rehabilitation needs of disabled Native Americans for use by disabled Native Americans and others.

All new research instruments, service delivery models, training packages, and educational materials should be appropriately tested and validated.

Each of these Centers will be funded for a period of up to 60 months and in an amount up to $300,000.

Summary of Comments and Responses

On December 1, 1982, the Secretary published in the **Federal Register** these proposed priorities for public comments. Summaries of the comments received and the Secretary's responses to these comments are printed below.

Comment: Several commenters emphasized the importance of involving Native American organizations in the operation of the RTC. One commenter suggested that competition be restricted to Native American groups, and one suggested that evidence of tribal endorsement be required on every application. Another commenter wanted priority consideration to applications from Native American groups.

Response: Some change has been made. NIHR legislation and regulations specify types of institutions which are eligible applicants for RTC awards and Departmental regulations do not permit NIHR to exclude any statutorily eligible applicants from competition. However, the priority has been modified to state even more emphatically that evidence of Native American involvement in all phases of the RTC, including policymaking and administration, is required if the application is to be considered responsive to the priority.

Comment: Seven commenters urged that the RTC focus in some way on the problems of handicapped Native American children, while one mentioned the elderly as another population for special attention.

Response: Some change has been made. The priority has been modified to state that the RTC should include attention to the habilitation and rehabilitation needs of disabled Native American children. However, the Secretary believes that a comprehensive approach to the unique needs of the Native American population is needed and within the finite resources of the proposed Center, does not intend to specify further conditions requiring focus on subpopulations.

Comment: Several commenters empahsized the need for cultural and linguistic sensitivity, integration of Native American healing practices, and providing cultural support for patients removed from the normal environment.

Response: No change has been made. The priority emphasized culturally sensitive techniques and practices. It is not the Secretary's intention to further limit the responses of applicants as to the best ways to approach culturally suitable practices and research.

Comment: Some commenters suggested focusing on or requiring attention to, specific disabilities such as otitis media, sensory deficits, and fetal alcohol syndrome among Native Americans.

Response: No change has been made. The Secretary is interested in research to meet a full spectrum of rehabilitation needs and does not intend to restrict researchers in their proposed approaches to the problem.

Comment: Several commenters suggested that there be a clear empahsis on vocational rather than medical rehabilitation in the RTC on Native Americans.

Response: No change has been made. The secretary points to the empahsis of the priority on improved models of service delivery for comprehensive rehabilitation services.

Comment: Some commenters emphasized the need for training of rehabilitation professionals, particularly culturally relevant training.

Response: No change has been made. The priority clearly requires that training be culturally sensitive and appropriate.

Comment: One commenter opposed the funding as possibly setting a precedent for establishing RTCs in geographic or ethnic areas, when in the respondent's opinion RTCs should approach rehabilitation problems on a more universal scope.

Response: No change has been made. The Secretary has stated the justification for focusing on unique rehabilitation needs of these two populations to include the unique cultural and geographic isolation; frequency of disabling conditions; poor access to service or inadequate service delivery mechanisms; and the clear guidance of the Congress that NIHR undertake these activities. Further, the Secretary believes that service delivery models developed by these Centers should have broad application to other rural and dispersed populations.

BILLING CODE 4000-01-M

Application Notice for Transmittal of Applications for Research and Training Centers for Fiscal Year 1983

AGENCY: Education Department.

ACTION: Application notice for transmittal of applications for research and training centers for fiscal year 1983.

SUMMARY: Applications are invited for new Rehabilitation Research and Training Centers for fiscal year 1983 under the National Institute of Handicapped Research in the two priority areas stated below.

Authority for this program is contained in Section 204(b)(1) of the Rehabilitation Act of 1973, as amended by Pub. L. 95-602 (29 U.S.C. 762(b)(1)).

Closing Date for Transmittal of Applications: Applications for grant awards must be mailed or hand delivered by June 30, 1983.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.133, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

An applicant must show proof of mailing, consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S., Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered. Amendments received after the closing date also will not be considered in the review of the application.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept hand-delivered applications between the hours of 8:00 a.m. and 4:30 p.m. (Washington, D.C. time), daily except Saturdays, Sundays, and Federal holidays. An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: NIHR is authorized to support research and related activities under several program authorities. The priorities identified in this Notice cover research and related activities to be conducted through Rehabilitation Research and Training Centers (RTCs). A description of the RTC program is contained in the Notice of Additional Final Funding Priorities for Fiscal Year 1983 published in this issue of the Federal Register. Awards are made under this program to States and public or private agencies and organizations including institutions of higher education.

NIHR is permitted to make awards for periods up to 60 months. It is the intention of NIHR to provide financial assistance to successful applicants through grants or cooperative agreements. If, at the time of the award, NIHR determines that substantial Federal programmatic involvement is warranted, it will negotiate cooperative agreements with the successful applicants.

The purpose of the awards is to support the establishment and operation of Rehabilitation Research and Training Centers to conduct coordinated and advanced programs of rehabilitation research and to train rehabilitation research personnel and service providers.

Available Funds: NIHR expects to fund new Centers in each of these two priority areas.

- Improving Rehabilitation Services for Handicapped Persons in the Pacific Basin, including the U.S. Territories, American Samoa, Guam, and all of the Islands of Hawaii.
- Improving Rehabilitation for Native Americans

A full description of each priority area is contained in the Notice of Additional Final Funding Priorities for Research and Training Centers for Fiscal Year 1983 which is published in this issue of the Federal Register.

The Secretary intends to fund at least one grant or cooperative agreement in an amount up to $300,000 in each of these two areas, assuming satisfactory applications and continued availability of funds. However, this Notice does not bind the U.S. Department of Education to fund projects in any or all of these areas, or to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulation.

Application Forms: Application forms and further information may be obtained by writing to or calling the National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3511, 330 C Street, S.W., Washington, D.C. 20202. (Attention: Peer Review Unit); 202/245-0555.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages.

However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

Applicable Regulations: Regulations governing the program include the following:

(a) Education Department General Administrative Regulations (EDGAR) 34 CFR Parts 74, 75, 77, and 78; and

(b) National Institute of Handicapped Research Regulations, 34 CFR Parts 350 and 352; and

(c) The Additional Final Funding Priorities for Research and Training Centers for the National Institute of Handicapped Research for Fiscal Year 1983 which are published in this issue of the Federal Register; and

(d) Applicants for fiscal year 1983 grants should base their applications on Section 204(b)(1) of the Act, applicable NIHR regulations in 34 CFR Parts 350 and 352, and EDGAR.

FOR FURTHER INFORMATION CONTACT:
Ms. Edythe Glazer, National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3511, 330 C Street, S.W., Washington, D.C. 20202. Telephone: 202/245-0555, TTY for deaf individuals 202/472-4217.

Part III

Department of Transportation

Federal Aviation Administration

Motor Vehicles Carrying Passengers for Hire on Washington National Airport

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 159

[Docket No. 23623; Notice No. 83-4]

Motor Vehicles Carrying Passengers for Hire on Washington National Airport

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice proposes the establishment of a permit system for taxicab drivers picking up passengers at Washington National Airport. Taxicab service at National Airport is an important component of ground transportation to the Airport, and taxicab traffic at the Airport is substantial. Existing FAA regulations, and the taxicab regulations of local jurisdictions in the Washington, D.C. area, have proven insufficient to maintain a desirable quality of service to the public and the efficient control of taxicab operations at the Airport. The proposed permit requirement is intended to enhance the quality of taxicab service to Airport patrons and to promote the operational control of taxicab dispatching and traffic on the Airport.

DATES: Comments must be submitted on or before July 11, 1983.

ADDRESSES: Comments may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-24), Docket No. 23623, 800 Independence Avenue, SW., Washington, D.C. 20591, or delivered in duplicate to: Room 915G, 800 Independence Avenue, SW., Washington, D.C. 20591. Comments must be marked: Docket No. 23623. Comments received may be inspected at Room 915G between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Edward Faggen, Legal Counsel, AMA-7, Hangar 9, Washington National Airport, Washington, D.C. 20001, Telephone: (703) 557-8123.

SUPPLEMENTARY INFORMATION:

Comments Invited

This Advance Notice of Proposed Rulemaking is being issued in accordance with the FAA's policy of encouraging the early public participation in rulemaking proceedings. An ANPRM is issued when FAA finds there is a need to consider rulemaking but the resources of the FAA and reasonable outside inquiry do not yield a sufficient basis to propose a specific course of action. It would be helpful, therefore, to invite public participation in identifying and selecting a course of action before an NPRM is developed and issued.

Interested persons are invited to participate in these preliminary rulemaking procedures by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address above. All communications received on or before the closing date for comments will be considered by the Administrator before taking further rulemaking action. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 23623." The postcard will be date/time stamped and returned to the commenter. The proposals contained in this notice may be changed in light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket. If it is determined to be in the public interest to proceed with further rulemaking after considering the available data and comments received in response to this Advance Notice, a Notice of Proposed Rulemaking will be issued.

Availability of ANPRM

Any person may obtain a copy of this ANPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center (APA-430), 800 Independence Avenue, SW., Washington, D.C. 20591 or by calling (202) 426-8058. Communications must identify the notice number of this ANPRM. Persons interested in being placed on the mailing list for future ANPRM's and NPRM's should also request a copy of Advisory Circular No. 11-2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

Washington National Airport is owned and operated by the Federal Government. The Secretary of Transportation has control over and responsibility for the care, operation, maintenance, and protection of the Airport, and the authority to promulgate rules and regulations necessary for this purpose. (Act of June 29, 1940, 54 Stat. 686, as amended by 61 Stat. 94; 72 Stat. 731; and 80 Stat. 931). This responsibility has been delegated to the Administrator, Federal Aviation Administration (FAA), and redelegated, in part, to the Director, Metropolitan Washington Airports.

Ground transportation connections at airports are an essential component of air travel. At National Airport, more than 1,200,000 taxicab trips are made from the Airport to area destinations each year, many with multiple passengers, and roughly 25 percent of air passengers at the Airport use taxicabs for the ground transportation segment of their air travel. Transportation by taxicab is especially prominent at National Airport because of the Airport's close proximity to Washington metropolitan area business centers and the high proportion of business travelers using the Airport.

As proprietor of National Airport, FAA has taken an active role in the planning and accommodation of all forms of ground transportation services at the Airport: private auto, limousine, and metrorail as well as taxicab. Efforts to manage taxicab service at the Airport have taken various forms. Taxicabs presently serve National Airport under an "open" cab system by which any locally licensed taxicab driver may pick up passengers at the Airport upon entry into the dispatching system and payment of a $.50 fee. For several years prior to 1974, however, responsibility for the availability of taxicabs for passenger pick-up was delegated by contract to a single concessionaire. The concessionaire employed individual drivers to provide taxi services from the Airport. FAA regulations prohibited non-contract drivers from picking up passengers at the Airport except in response to a pre-arranged request.

This "closed" taxicab system provided FAA with a relatively high degree of control over the number of authorized cabs, the conduct of contract drivers, and the condition of contract taxicab vehicles. The major disadvantage of the closed system was that the supply of the concessionaire's taxicabs was often insufficient to handle passenger demand, resulting in overloading of cabs and the necessity to call in non-concession cabs. Further, the closed system required the uneconomical practice of "dead heading" by the non-concession cabs that were forced to return from the Airport without a fare. Consequently, the system fostered considerable unauthorized soliciting of passengers. Drives who were not associated with the concessionaire often attempted to solicit fares at the Airport without regard to FAA-desgnated pickup areas or concession rights. This resulted in serious obstruction of traffic on the Airport and placed a strain on the Airport police force.

In January, 1974, FAA terminated the closed taxi concession and amended Airport regulations (now 14 CFR 159.2) to provide for an open taxi system. A subsequent amendment to Part 159 in May 1976 (41 FR 19623) established the system that is in effect today. Taxicab pick-up zones were established, and, as part of a roadway improvement program, improved exclusive taxicab feeder lanes were developed to segregate traffic in the terminal area. Under the present open system, any taxi driver who is licensed to operate a taxicab in the City of Alexandria, the City of Falls Church, Arlington County, Fairfax County, Montgomery County, Prince Georges County, or the District of Columbia can pick up passengers for hire at the Airport in the taxicab pick-up zone upon payment of a $.50 fee per trip and compliance with certain regulations. Taxicabs discharging passengers, or picking up a particular passenger outside of the designated pick-up zone in response to a prior call, are not required to enter the dispatching system or to pay the $.50 fee. Dispatching of cabs is performed by a contractor who is reimbursed out of the proceeds of the $.50 fee.

Present Situation

In many respects, the open taxicab system at National Airport has been satisfactory. The system has been especially successful in providing an adequate number of taxicabs to meet passenger demand at all times, including peak and off-peak hours. Moreover, this continuous availability of taxicabs has resulted from prevailing supply and demand conditions, and has not required intervention by FAA. The availability of an adequate supply of taxicabs is a key component of the quality of taxicab service provided to arriving air passengers. Due to the large number of licensed taxi drivers in the area, an open cab system can best meet the extensive demand for cabs at the Airport.

The open cab system in its present configuration is not without problems, however. Most complaints received concern the conduct of individual drivers. Frequent complaints are received about drivers for abusive or inconsiderate behavior toward passengers; for overcharging of passengers; for the refusal to take passengers assigned by the dispatcher, particularly to short-haul destinations with lower fares; for the soliciting of additional passengers after one passenger or group has been loaded; for engaging in arguments with dispatchers and for failure to obey the dispatcher's directions; and for blocking roadways and parking areas while waiting to enter the cab line.

Between January 1979, and December 1981, FAA received more than 200 written complaints relating to the conduct of taxi drivers at the Airport. Of these complaints, the greatest number related to discourteous or abusive conduct by drivers (89) and overcharging (66). The Washington Metropolitan Area Transit Commission, which regulates fares on taxi trips between the Airport, the District, and Maryland, received more than 850 complaints between July 1979 and June 1982 from taxicab passengers relating to National Airport taxi trips, and the number of such complaints has increased each year. The taxicab licensing agencies of the various local jurisdictions whose drivers serve the Airport have also received complaints on their respective drivers, although FAA does not routinely receive copies of such complaints. It can reasonably be assumed that for each formal written complaint received, several other persons with similar grounds to complain did not do so. The substantial number and chronic nature of the complaints received is an indication that service to taxicab passengers at National Airport, while virtually always available, is not being provided at a desirable level of quality.

Soliciting for passengers by drivers is a problem not directly reflected by passenger complaints. Drivers continue to solicit and pick up passengers without entering the system, to avoid waiting in the cab line and paying the fee. In addition to the resulting loss of revenue, and the unfairness to drivers waiting properly in line, soliciting adds to the serious congestion problems at the Airport. The curbside space available for pick-up and discharge of vehicle passengers in front of the passenger terminals at National Airport is extremely limited, and must accommodate private vehicles, limousines, and buses as well as taxicabs. Taxicab drivers who stop to solicit passengers in areas other than FAA-designated taxi loading areas block lanes of roadway and obstruct the flow of traffic past the terminals.

An additional problem brought to FAA's attention by observation and verbal complaint, but not represented by a substantial number of formal complaints, is the lack of knowledge of the local area on the part of some taxi drivers. Licensing tests administered by some local jurisdictions to test the knowledge of new taxi drivers have not adequately addressed this problem, in part because drivers may operate on trips between National Airport and local points which are totally outside of the driver's licensing jurisdiction.

Finally, there are often many more taxicab vehicles on the Airport than the cab system can handle efficiently. The cab lines and loading areas at the Main Terminal, North Terminal, and Commuter Terminal can accommodate a total of approximately 375 vehicles at the present time. Often many more than 375 cabs are on the Airport at one time, with the overflow cabs cruising the roadways or waiting in parking and loading areas until they can enter the cab line. This overflow is a significant cause of traffic congestion on the Airport which results in delays to Airport users and to the cab drivers themselves.

The need to improve the quality of Airport ground transportation service to the traveling public, and to provide more efficient movement and control of vehicle traffic on the Airport, has caused FAA as proprietor of National Airport to issue this ANPRM. By its consideration of rulemaking related to the regulation of driver conduct, FAA is not suggesting that the actions of taxi drivers constitute the only problem with taxi service at National Airport, nor is FAA suggesting that all taxi drivers or even a majority of drivers routinely violate Airport regulations. For example, as a result of heavy private vehicle traffic at the Airport and the limited space available to accommodate that traffic, the vehicle lanes in front of the terminals are extremely congested. This congestion makes traffic control difficult and causes delay for taxi passengers as well as other Airport patrons. Additionally, the Airport taxi dispatching operation can affect the quality of service provided to taxi passengers, independent of the conduct of the taxi drivers. For these reasons, FAA is investigating ways to upgrade taxi facilities and ways to improve the efficiency of the taxi dispatching system at the Airport, as well as considering the revision of driver regulation.

However, driver misconduct has been a sufficient contributing source of the problem to indicate the need for specific regulatory action, in conjunction with related efforts to improve facilities and dispatching operations.

Present Enforcement

Cab drivers who operate at National Airport are subject to regulation from three sources: first, the authority exercised by the driver's licensing jurisdiction (i.e., city or county); second, the regulation of interstate fares by the Washington Metropolitan Area Transit Commission (WMATC); and third, the FAA Airport police enforcement of the Federal regulations applicable to the Airport, including traffic and dispatching regulations. Despite these controls FAA has not achieved the desired levels of service and traffic management at the Airport. This is apparently due not only to the nature of the problem but also to the unique taxicab jurisdictional situation existing at National Airport.

Each of the seven licensing jurisdictions listed in 14 CFR Part 159, at § 159.2(c)(4), maintains some degree of regulation of taxicab drivers. Regulations typically cover fares, driver qualifications and conduct, insurance, and condition of vehicles. However, there are distinct limitations on the authority of the local jurisdictions to regulate taxi service at National Airport. First, and most basic, the authority of each local jurisdiction is limited to drivers licensed in that jurisdiction. Since drivers from all seven jurisdictions conduct business at the Airport, no one jurisdiction has any overall interest in or authority over the taxicab situation at the Airport.

Second, of the seven licensing jurisdictions only Arlington County has any claim to territorial jurisdiction over taxicab driver conduct on the Airport. The Airport is located within the boundaries of Arlington County, and, presumably, the County can take action (such as suspension or revocation) against Arlington County-licensed taxi drivers for their actions on the Airport. The authority of the other six jurisdictions to take any action against drivers for their conduct at the Airport is less clear. Alexandria, Falls Church, and Fairfax County apparently have such authority under a Virginia State law enacted expressly for that purpose. (Code of Virginia, Title 56, Section 56–291.3:6). By contrast, the District of Columbia and Montgomery County and Prince Georges County, Maryland, apparently have no express jurisdiction over a taxicab operating between their respective jurisdictions and the Airport. All such trips are interstate. Also, acts that are violations of local taxi regulations on Airport trips (such as overcharging or refusal to carry) often occur outside of the boundaries of those licensing jurisdictions. In summary, it is unclear to what extent any or all of the seven licensing jurisdictions have sufficient authority to take enforcement actions against their licensed taxi drivers for conduct associated with National Airport operations. Even where such authority exists, it has rarely resulted in the impositions of sanctions on drivers for Airport-related incidents.

In contrast to the local governments involved, WMATC does have certain express regulatory authority over taxi trips between National Airport and points in the District of Columbia and Montgomery and Prince Georges Counties. WMATC regulation is limited to fares and insurance, however, and the Commission's enforcement actions have been addressed primarily to cases of egregious overcharging on trips between the Airport and the District. Because WMATC does not license taxi drivers or grant interstate taxi operating authority, it has no power to revoke that authority. To enforce its rules, WMATC, under the terms of the Washington Metropolitan Area Transit Regulation Compact, must institute a suit in U.S. District Court to enjoin the violating driver from continuing to violate the regulations, or to have the violator's interstate operating authority revoked by court order. The WMATC has increased its efforts to impose sanctions on drivers who violate Commission regulations, and has been successful in several cases decided to date. However, the number of enforcement actions has been small, and, the Commission's limited power and resources to enforce overcharging violations have not tended to deter other kinds of unacceptable conduct by taxi drivers at the Airport. Also, WMATC has no authority with respect to taxi trips entirely within Virginia, which encompasses many of the taxi trips originating at the Airport.

The third and most direct source of control of taxicab operations on the Airport is through enforcement of Federal laws and regulations by FAA Airport police. FAA regulations pertaining to taxicabs at National and Dulles Airports are set forth at 14 CFR 159.2 and 159.4. The Airport Taxicab regulations are specific in defining prohibited conduct, and there is no question as to the authority of the Airport police to enforce the regulations. However, FAA regulation has not been entirely successful either in controlling excess taxicab traffic or in deterring driver misconduct.

At present, FAA enforcement of Airport regulations is accomplished through the Federal court system. There is no procedure for seeking civil penalties for violation of the Airport taxi regulations. Pursuant to 14 CFR 159.191(a), any person who willfully and knowingly violates any rule in Part 159 is guilty of a misdemeanor, and shall be fined not more than $500.00, or imprisoned for not more than 6 months, or both. (Section 159.191(b), which permits the Airport Manager to exclude such a person from the Airport "when necessary under the circumstances," is not considered by FAA to be sufficient specific authority for the routine suspension or revocation of a violator's Airport operating privileges.) In most cases, suspected violators are ticketed by issuance of a Traffic Violation Notice. Defendants are assigned a hearing date which is usually about six weeks after the violation. The hearing is held before a U.S. Magistrate of the U.S. District Court for the Eastern District of Virginia, Alexandria Division. In accordance with Federal law, the defendant may elect to proceed with hearing before the Magistrate or to have his case heard befoe a judge of the U.S. District Court.

Since violation of the taxicab regulations is a misdemeanor, drivers may be cited (or arrested) only by a police officer who actually witnesses the violation or who has obtained a warrant for the arrest of the driver. The probability that an Airport police officer will witness any particular violation of § 159.2 is rather low, due to the limited number of officers available at any given time for a curbside duty station. In theory, officers acting on a third-party complaint such as the complaint of a taxi passenger could obtain an arrest warrant from the U.S. Magistrate, upon a showing of probable cause. As a practical matter, however, this procedure is not frequently invoked for violations of Airport taxicab regulations.

When a violation is witnessed and the driver cited, the violation must be prosecuted by the office of the United States Attorney for the Eastern District of Virginia, before the U.S. Magistrate or in U.S. District Court, in the same manner as any other misdemeanor. The U.S. Attorney's office is responsible for all of Federal prosecutions in the Eastern District of Virginia (and for many civil matters). While Airport taxicab cases tend to be of relatively less importance than many other Federal criminal cases, the number of Airport taxi cases is extremely large. In the U.S. Magistrate's Court in Alexandria, one day each week is devoted exclusively to cases from National and Dulles Airports, with hearings conducted in two or three courtrooms simultaneously. Approximately 75 percent of these cases involve violations of Part 159 by taxi drivers at National Airport. The number of citations may exceed the capacity of the system, and cases have to be dropped for lack of time and resources to prosecute them.

If a taxicab driver is convicted of a violation of § 159.2, the fine generally imposed is $25.00, and is not of consequence to the violator. A conviction is often not recorded by the local licensing jurisdiction or hack commission, so a taxicab driver may be convicted of violating Airport taxicab regulations without affecting his driver's license or taxicab operating authority. While FAA intends to improve coordination with local jurisdictions on taxi regulation, referral of Part 159 convictions to local licensing agencies would not substantially improve the Airport taxi situation. First, as previously noted, enforcement of Airport-related violations by the local jurisdictions has not been frequent in any case. Second, many Airport regulations are unique to the Airport (e.g., the requirement to obey dispatchers and the prohibition on soliciting). Violations of these rules would not constitute violations of local regulations for which local disciplinary action could be taken. Finally, and such enforcement would vary from jurisdiction to jurisdiction, and would be entirely beyond FAA control or influence.

By FAA's observation there has been no lack of diligence and effort on the part of the law enforcement, prosecuting, or judicial components of the Federal criminal justice system with respect to handling of Airport taxicab cases. However, given the frequency and repetitive nature of the violations of § 159.2, it appears that the existing remedies are too limited and the procedures too cumbersome to assure consistent and adequate redress for violations of the airport taxicab regulations.

Proposed Regulation

In consideration of the above, it is FAA's conclusion that action is necessary to improve the present taxicab situation at National Airport, and that any fine-tuning of present enforcement mechanisms would be insufficient to bring about the improvements desired. Accordingly, FAA is actively considering the establishment of a licensing or permit requirement for taxicab drivers who pick up passengers for hire at National Airport. If a permit system is found not to be feasible, alternative consideration may be given to adopting some form of a "closed" system as existed prior to 1974. As previously noted, FAA does not consider taxi driver regulation to be the only aspect of the Airport taxi situation which needs to be addressed. The taxi permit system would, therefore, be an integral part of a larger program directed toward improvement of taxi facilities and passenger services generally.

The Airport taxi permit would apply only to taxicab drivers who carry passengers for hire from the Airport. The permit requirement would be in addition to all present licensing requirements of local jurisdictions and of WMATC, and would not replace any of those requirements or diminish the responsibility of those bodies for enforcement of their respective laws and regulations. At present, only taxi drivers licensed in one of the seven local jurisdictions listed in § 159.2(c)(4) may pick up passengers at the Airport. This would not be changed, and FAA would not undertake to license drivers or grant permits to drivers who were not already licensed by one of the local jurisictions listed. The permit program would impose the minimum burden possible on Airport taxi drivers consistent with its purpose.

In essence, the Airport taxi permit would represent permission for the individual driver to conduct business on the Airport. By displaying the permit, a taxi driver could continue to pick up passengers within the established dispatching system and otherwise operate as at present, in accordance with Airport taxi regulations. In the event a taxi driver is found, after a hearing of the facts, to have violated Airport taxi regulations, the permission granted by the permit would be temporarily suspended or revoked. During the suspension or revocation, the driver could continue to conduct business as a taxicab driver in accordance with the license issued by his own licensing jurisdiction, but could not pick up passengers at the Airport. Because the issuance of permits and the sanctions imposed under the permit program would be entirely administrative in nature, drivers would enjoy the procedural protections for civil proceedings embodied in administrative law, but not those attendant to the criminal process.

FAA believes the public would benefit from an Airport taxi permit program because the program would improve the ability of FAA to deal effectively with drivers who disregard the Airport's regulations. The sanctions of suspension or revocation of a driver's Airport taxi permit would be a direct and efficient deterrent to misconduct by drivers interested in continuing to serve the Airport. At present, no comparable deterrent exists. Additionally, suspension and revocation will reduce the public's exposure to drivers who violate Airport regulations; the worse a driver's conduct, the greater the duration and frequency of that driver's exclusion from the Airport.

FAA believes there will be a net benefit to taxicab drivers as well as to the general public from an Airport taxi permit program. Each time a driver unlawfully solicits passengers, or double loads a cab, or avoids the cab line and the toll gate, he does so to the detriment of all the drivers who enter the system properly and take the passenger assigned by the dispatcher. A system which removes from the Airport those drivers who disobey Airport regulations effectively rewards those drivers who follow the rules. If all taxi passengers are loaded within the system, one individual or pre-formed group to a cab, a driver in the cab line will move up more quickly and will be able to obtain more fares in a given period of time.

Taxi drivers will not avoid the controls and sanctions exercised by FAA under the permit system simply by attempting to operate without a permit. First, the right to operate within and utilize the Airport taxi dispatching system will be a substantial incentive to obtain a permit, and the number of taxi drivers who refuse to apply for a permit can be expected to be small. Second, the few drivers who do attempt to solicit without permits, or with suspended or revoked permits, will be subject to the enforcement procedures presently in effect with sanctions imposed by the U.S. Magistrate. FAA believes this enforcement will be more effective than at present because fewer violators will be involved, and because the requirement to display a permit will make it relatively easy for police officers to identify individuals who do not have the right to pick up passengers at the Airport.

FAA contemplates that the Airport taxicab permit program would incorporate the following basic features:

1. Airport taxi permits would be issued to persons curtently licensed as taxi operators by Alexandria, Falls Church, Arlington County, Fairfax County, Montgomery County, Prince George's County, or the District of Columbia who apply for the Airport taxi permit and pay an application fee. The fee would cover at a minimum the direct and allocated costs of administering the permit program, and would be payable upon initial application and annually thereafter. It is contemplated that the

fee would be in the vicinity of $100 per year. As an alternative to issuing permits to all applicants, the number of Airport taxi permits may be limited in some manner to help relieve the problems of overcrowding and insufficient space at the Airport for waiting cabs.

2. Permits would consist of an ID card with a photograph of the holder. Permit cards would be issued to individual drivers but would remain the property of the Government. A taxi driver would not be permitted to enter the taxi lanes to pick up passengers at the Airport without displaying a permit to police officers or dispatchers. In the event an electronic gate control system is installed in the cab lanes, the permit cards could be made machine-readable to provide automatic admission of drivers holding current permits. Permits would not be transferrable, and therefore would not constitute a property right which could be bought and sold by drivers, as in the taxi "medallion" systems established by some municipalities.

3. Grounds for suspension or revocation of permits would be the violation of the provisions of § 159.2. Maximum sanctions for violation of Airport taxi regulations would be specified for each particular offense. Sanctions would range from suspension of the driver's Airport taxi permit from 5 days to 6 months to revocation of the permit for one year. Repeat offenses would incur a longer suspension than a first offense. Revocation would be imposed for certain serious violations or for accumulation of a certain number of suspensions. The sanctions which could be imposed under the permit program would apply only to the taxi regulations set forth in § 159.2, and could not be applied for violation of other sections of Part 159, for example Subpart B—Motor Vehicle Rules. The existing criminal enforcement provisions of Part 159 would remain in effect for all sections of this Part, including § 159.2.

4. A licensed taxicab driver who violated § 159.2 would be issued a "hack complaint," similar to a traffic ticket, by an FAA Airport police officer. An officer could issue a hack complaint upon witnessing a violation himself or upon the complaint of a third party, such as a taxi dispatcher or passenger. The hack complaint would specify the charge and hearing date.

5. The driver would be required to appear at a hearing before a designated hearing officer at a location provided by FAA at National Airport. The driver would be entitled to be represented by counsel and to call witnesses. If the driver is found to have violated § 159.2, the appropriate sanction would be imposed by the hearing officer, and the driver's Airport taxi permit would be surrendered to the hearing officer at the hearing.

6. After a permit suspension, a driver could pick up his permit at the Airport immediately upon expiration of the suspension period. After a permit revocation, the driver could reapply for a permit after expiration of the revocation period.

7. A driver whose permit was suspended or revoked could appeal that decision to the Director, Metropolitan Washington Airports, or to an administrative board composed of Airport and/or Department of Transportation officials, within a specified time after the hearing. The decision of the Director or the board would represent final agency action, and would be appealable under Section 10 of the Administrative Procedures Act, 5 U.S.C. 701 *et seq.* Both the hearing and the appeal would be conducted in accordance with the requirements of section 9 of the Administrative Procedures Act, 5 U.S.C. 558, and with the general requirements of administrative law, but not necessarily with the specific provisions of Sections 5, 7, and 8 of the Act, 5 U.S.C. 554, 556, and 557.

List of Subjects in 14 CFR Part 159

Airports, Taxicabs and taxicab licensing.

Regulatory Flexibility Act Consideration

The Regulatory Flexibility Act of 1980 (Pub. L. No. 96-354, 94 Stat. 1164; Chapter 6 of the Administrative Procedure Act, 5 U.S.C. 601 *et seq.*), requires FAA to meet certain requirements with respect to FAA rules which have a "significant economic impact on a substantial number of small entities." Individual taxi drivers, or at least those who own and drive their own cabs, could be considered "small entities" for this purpose. Inasmuch as several thousands of taxi drivers in the Washington, D.C., metropolitan area serve National Airport on a full-time or part-time basis, an Airport taxicab permit program would have an impact on a "substantial number" of drivers.

Whether this impact is a "significant economic impact" on those drivers is less clear. In terms of proportionate costs, the annual fee would probably be less than one percent of a full-time owner/operator's annual costs. In absolute terms, payment of a $100.00 fee (for example) once each year would be a minimal burden on drivers conducting business at National Airport. Equivalent or higher fees for airport taxi licenses are not uncommon: e.g., Baltimore/Washington International Airport, $200.00 per year; New Orleans International Airport, $200.00 per year; San Diego International Airport, $200.00 per year; Spokane International Airport, $250.00 per year. Moreover, the negative economic impact of the annual fee and the time required to obtain the permit (approximately one hour each year) would be offset by any gain realized in operating efficiency as a result of the permit program. For example, if the reduction of unlawful soliciting of fares results in more rapid movement of the taxi line, then drivers using the line will be assigned more fares in a given period of time, and will earn more income.

An alternate impact could be realized by drivers who were unable to obtain an airport taxi permit if the number of permits were limited in some manner. Such drivers could continue to conduct business off the airport and to bring passengers to the airport. Therefore, the impact in each case would be limited to the amount of each driver's income earned by picking up passengers at the airport, less the amount the driver could earn off-airport over the same period of time.

Because it is unclear whether the impacts of an Airport taxi permit program would meet the threshold requirements for a Regulatory Flexibility Analysis, FAA is requesting information on the economic impacts and benefits for individual taxi drivers.

Request for Information

Persons responding to this notice are invited to specifically address the following questions and supply any other information they consider pertinent to FAA's decision on further rule making on this subject:

1. What impact, if any, would an Airport taxi permit system have on the licensing of taxi operators and enforcement of taxi regulations by the Washington Metropolitan Area Transit Commission and the local jurisdictions in the Washington, D.C., area?

2. What would be the economic impact of an annual Airport taxi permit fee on the level of fares set by WMATC and the Washington, D.C., area local jurisdictions which regulate taxi fares?

3. What would be the impacts of an Airport taxi permit requirement on individual taxicab drivers who conduct business at National Airport, including economic, operational, and service impacts?

4. If the number of permits were limited, what would be the economic impact on individual drivers who were unable to obtain permits? Specifically, what portion of total income do local taxi drivers earn picking up passengers at National Airport? How much more income, if any, do drivers earn picking up passengers on the Airport than they could earn off-airport in the same period of time?

5. Should FAA establish an additional permit requirement for taxicab vehicles as well as for taxi drivers?

6. How should the adjudication and appeal of proposed sanctions be conducted? What specific elements of administrative procedure are required and/or desirable for incorporation in the administrative hearing and appeal process?

7. Should a written test on Airport procedures and regulations, and/or knowledge of the metropolitan area be a prerequisite to issuance of an Airport taxi permit?

8. Should the number of Airport taxi permits issued by limited? If so: (a) How should that number be determined? (b) What allocation method should be used (e.g., first-come first-served, an allotment to each local jurisidction, etc.)?

9. Would a closed taxicab system, under which one or more contracts were awarded for exclusive taxicab service from the Airport, be a practical alternative to a permit system if a permit system is determined not to be acceptable?

10. What other improvements should FAA consider implementing to provide better consumer protection of Airport taxi passengers and to permit taxi drivers to operate more efficiently and to better serve Airport patrons? For example, should a short-haul system be established that gives a preference to drivers that have previously waited in line for a lower fare short-haul?

(Secs. 2 and 4 of the Act for the Administration of Washington National Airport, 54 Stat. 686 as amended by 61 Stat. 94; sec. 313 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354); sec. 6, Department of Transportation Act (49 U.S.C. 1655))

Note.—The FAA has determined that this document involves a regulation which is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). The regulatory impact of the proposal is judged to be minimal and a detailed evaluation is not required.

Issued in Washington, D.C. on March 24, 1983.

James A. Wilding,

Director, Metropolitan Washington Airports.

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 881]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 26, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PB: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary

[FR Doc. 83-11972 Filed 4-29-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume 882]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 26, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd. Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

[FR Doc. 83-11073 Filed 4-29-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume 883]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: April 26, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source date from the Form 121 for this and all previous notices is available on magnetic tape from the National technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 Ft rule)
102-4: New onshore reservoir
102-5: New reservior on old OCS lease
Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal Seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation
Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

NATIONAL SCIENCE FOUNDATION

45 CFR Part 650

Policies and Procedures for Inventions and Patents Resulting From Grants, Cooperative Agreements, and Contracts

AGENCY: National Science Foundation.

ACTION: Final rule with request for comments.

SUMMARY: This regulation revises the current NSF patent regulation to bring NSF patent policies and procedures into compliance with the Presidential Memorandum entitled "Government Patent Policy" issued on February 18, 1983. The policies and procedures set forth apply to all contracts, grants, and cooperative agreements awarded by the Foundation after April 30, 1983.

DATES: The effective date of this amendment is April 30, 1983. Comments, however, are welcome and will be considered in making future revisions to this regulation.

ADDRESS: All comments should be addressed to: NSF Intellectual Property Attorney Office of the General Counsel, Room 501 National Science Foundation, Washington, D.C. 20550.

FOR FURTHER INFORMATION CONTACT: John Chester, NSF Intellectual Property Attorney, at (202) 357–9447. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: This amendment revises the current NSF patent regulation published in the **Federal Register** on August 30, 1982, at 47 FR 38124 and at 45 CFR Part 650. It brings NSF patent regulations into compliance with the Presidential Memorandum entitled "Government Patent Policy" issued February 18, 1983, by eliminating disparate treatment of those grantees and contractors not covered by Chapter 38 of Title 35 of the United States Code (commonly called the "Bayh-Dole Act"). No significant change is made to the policies or procedures affecting grantees and contractors who are covered by the Bayh-Dole Act.

As stated in the revised § 650.1, this regulation applies to all grants, cooperative agreements, and contracts awarded by the Foundation after April 30, 1983. A separate patent regulation for contracts may be published following the issuance of the Federal Acquisition regulations.

Because it merely implements the direction of the Presidential Memorandum and continues current NSF policies, public comments were not obtained before making this regulation effective.

The Foundation has determined that this regulation is not a major rule as defined in Executive Order 12291 of February 17, 1981 (3 CFR 1981 Comp., p. 127).

List of Subjects in 45 CFR Part 650

Government procurement, Grant programs—science and technology, Inventions and patents, Nonprofit organizations, Small businesses.

Edward A. Knapp,

Director.

Accordingly, Title 45 of the Code of Federal Regulations is amended by revising Part 650 to read as follows:

PART 650—PATENTS

Sec.

650.1 Scope of part.
650.2 National Science Foundation patent policy.
650.3 Source of authority.
650.4 Standard patent rights clause.
650.5 Special patent provisions.
650.6 Awards not primarily for research.
650.7 Awards affected by international agreements.
650.8 Requests for greater rights.
650.9 Retention of rights by inventor.
650.10 Unwanted inventions.
650.11 Inventions also supported by another Federal agency.
650.12 Utilization reports.
650.13 Waivers.
650.14 Exercise of march-in rights.
650.15 Request for conveyance of title to NSF.
650.16 Appeals.
650.17 Background rights.
650.18 Subcontracts.
650.19 Retroactive application.
650.20 Delegation of authority.
Appendix A—Optional format for confirmatory license.

Authority: 35 U.S.C. 200 *et seq.*, commonly called the Bayh-Dole Act, as implemented by Office of Management and Budget Circular A–124; Secs. 11(e) and 12(a) of the National Science Foundation Act, as amended (42 U.S.C. 1870(e) and 1871(a)); and the Presidential Memorandum entitled "Government Patent Policy", issued February 18, 1983.

§ 650.1 Scope of part.

This part contains the policies, procedures, and clauses that govern allocation of rights to inventions made in performance of NSF-assisted research. It applies to all funding agreements entered into by the Foundation after April 30, 1983, that relate to performance of scientific or engineering research. Although not published as part of the Federal Procurement Regulations (Title 41 of the Code of Federal Regulations), this part is consistent with those regulations and its provisions apply to contracts as well as to grants and cooperative agreements.

§ 650.2 National Science Foundation patent policy.

As authorized by the National Science Board at its 230th meeting, October 15–16, 1981, the Director of the National Science Foundation adopted the following statement of NSF patent policy.

(a) As required by the Bayh-Dole Act and the Presidential Memorandum entitled "Government Patent Policy" issued February 18, 1983, the Foundation will use the Patent Rights clause prescribed by the Office of Management and Budget in all its funding agreements for the performance of experimental, developmental, or research work, including contracts for the operation of Government-owned research facilities, *unless* the Foundation determines that some other provision would better serve the purposes of that Act or the interests of the United States and the general public.

(b) In funding agreements covered by a treaty or agreement that provides that an international organization or foreign government, research institute, or inventor will own or share patent rights, the Foundation will acquire such patent rights as are necessary to comply with the applicable treaty or agreement.

(c) The Foundation will claim no rights to inventions in funding agreements made primarily for the support of education or training, such as fellowships and traineeships. A disclaimer of interest in inventions will be included in such awards.

(d) If an awardee elects not to retain rights to an invention, the Foundation will allow the inventor to retain the principal patent rights unless the awardee shows that it would be harmed by that action.

(e) The Foundation will normally allow any patent rights not wanted by the awardee or inventor to be dedicated to the public through publication. However, if another Federal agency is known to be interested in the relevant technology, the Foundation may give it an opportunity to review and patent the invention so long as that does not inhibit the dissemination of the research results to the scientific community.

(f) The Foundation will waive the restrictions imposed by the Bayh-Dole Act on the assignment or exclusive licensing of NSF-supported inventions by a nonprofit organization when that appears to serve the policy and objective of the Act. For identified inventions, the Foundation will waive the restrictions if the nonprofit organization obtains from the prospective assignee or licensee a firm commitment to develop and commercialize the invention. In any industry-university joint research award, the Foundation will waive the restrictions at the time of award if the nonprofit organization shows that they are unfair considering the industrial participant's contribution or that the project will not be undertaken unless they are waived.

(g) In funding agreements not controlled by the Bayh-Dole Act, the Foundation will waive any of the rights or conditions normally reserved or imposed if the grantee or contractor demonstrates (i) that the interests

of the United States and the general public will be better served thereby, or (ii) that it is making a substantial contribution of funds, facilities, or equipment to the work performed under the funding agreement.

(h) As far as practical, the Foundation will apply the intent of this policy to funding agreements entered into before the effective dates of the Bayh-Dole Act and the Presidential Memorandum.

§ 650.3 Source of authority.

(a) 35 U.S.C. 200 *et seq.*, commonly called the Bayh-Dole Act, took effect on July 1, 1981. That law controls the allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, during federally-supported experimentation, research, or development. Government-wide implementing regulations are contained in Office of Management and Budget Circular A–124, dated February 10, 1982.

(b) Section 11 (e) of the National Science Foundation Act of 1950, as amended, (42 U.S.C 1870(e)) provides:

> The Foundation shall have the authority * * * to do all things necessary to carry out the provisions of this Act, including, but without being limited thereto, the authority— * * *(e) to acquire by purchase, lease, loan, gift, or condemnation, and to hold and dispose of by grant, sale, lease, or loan, real and personal property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act.

(c) Section 12(a) of the NSF Act (42 U.S.C. 1871(a)) provides:

> Each contract or other arrangement executed pursuant to this Act which relates to scientific research shall contain provisions governing the disposition of inventions produced thereunder in a manner calculated to protect the public interest and the equities of the individual or organization with which the contract or other arrangement is executed * * *.

(d) The Presidential Memorandum entitled "Government Patent Policy" issued February 18, 1983, directs Federal agencies, to the extent permitted by law, to apply to all research performers the policies of the Bayh-Dole Act. Under the provisions of the National Science Foundation Act quoted above, the Foundation is permitted to apply the Bayh-Dole policies without restriction.

§ 650.4 Standard patent rights clause.

(a) The following Patent Rights clause will be used in every funding agreement awarded by the Foundation that relates to scientific or engineering research unless a special patent clause has been negotiated (see § 650.5).

Patent Rights (April 1983)

a. Definitions

(1) "Invention" means any invention or discovery which is or may be patentable or otherwise protectable under title 35 of the United States Code.

(2) "Subject invention" means any invention of the grantee conceived or first actually reduce to practice in the performance of work under this grant.

(3) "Practical application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are to the extent permitted by law or Government regulations available to the public on reasonable terms.

(4) "Made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

(5) "Small business firm" means a small business concern as defined at section 2 of Pub. L. 85–536 [15 USC 632] and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standard for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.3–8 and 13 CFR 121.3–12, respectively, will be used.

(6) "Nonprofit organization" means a university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 USC 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 USC 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

b. Allocation of Principal Rights

The grantee may retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the grantee retains title, the Federal Government shall have a non-exclusive, non-transferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world. If the award indicates it is subject to an identified international agreement or treaty, the Foundation also has the right to direct the grantee to convey to any foreign participant such patent rights to subject inventions as are required to comply with that agreement or treaty.

c. Invention Disclosure, Election of Title and Filing of Patent Applications by Grantee

(1) The grantee will disclose each subject invention to the National Science Foundation (NSF) within two months after the inventor discloses it in writing to grantee personnel responsible for the administration of patent matters. The disclosure to NSF shall be in the form of a written report and shall identify the grant under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding of the nature, purpose, operation, and, to the extent known, the physical, chemical, biological or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to NSF, the grantee will promptly notify NSF of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the grantee.

(2) The grantee will elect in writing whether or not to retain title to any such invention by notifying NSF within twelve months of disclosure to the grantee; provided that in any case where publication, on sale or public use has initiated the one year statutory period wherein valid patent protection can still be obtained in the United States, the period for election of title may be shortened by NSF to a date that is no more than 60 days prior to the end of the statutory period.

(3) The grantee will file its initial patent application on an elected invention within two years after election or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the United States after a publication, on sale or public use. The grantee will file patent applications in additional countries within either ten months of the corresponding initial patent application, or six months from the date when permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure to NSF, election, and filing may, at the discretion of NSF, be granted.

d. Conditions When the Government May Obtain Title

(1) The grantee will convey to NSF, upon writen request, title to any subject invention:

(i) If the grantee fails to disclose or elect the subject invention within the times specified in c. above, or elects not to retain title.

(ii) In those countries in which the grantee fails to file patent applications within the times specified in c. above; provided, however, that if the grantee has filed a patent application in a country after the times specified in c. above but prior to its receipt of the written request of NSF the grantee shall continue to retain title in that country.

(iii) In any country in which the grantee decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in a reexamination or opposition proceeding on, a patent on a subject invention.

e. Minimum Rights to Grantee

(1) The grantee will retain a nonexclusive, royalty-free, license throughout the world in each subject invention to which the Government obtains title except if the grantee fails to disclose the subject invention within the times specified in c. above. The grantee's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the grantee is a party and includes the right to grant sublicenses of the same scope to the extent the grantee was legally obligated to do so at

the time the grant was awarded. The license is transferable only with the approval of NSF except when transferred to the successor of that part of the grantee's business to which the invention pertains.

(2) The grantee's domestic license may be revoked or modified by NSF to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions in the Federal Property Management Regulations. This license will not be revoked in that field of use or the geographical areas in which the grantee has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of NSF to the extent the grantee, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, NSF will furnish the grantee a written notice of its intention to revoke or modify the license, and the grantee will be allowed thirty days (or such other time as may be authorized by NSF for good cause shown by the grantee) after the notice to show cause why the license should not be revoked or modified. The grantee has the right to appeal, in accordance with applicable regulations in the Federal Property Management Regulations concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

f. Grantee Action To Protect Government's Interest

(1) The grantee agrees to execute or to have executed and promptly deliver to NSF all instruments necessary to: (i) establish or confirm the rights the Government has throughout the world in those subject inventions for which the grantee retains title, and (ii) convey title to NSF when requested under paragraph d. above, and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The grantee agrees to require, by written agreement, its employees, other than clerical and non-technical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the grantee each subject invention made under this grant in order that the grantee can comply with the disclosure provisions of paragraph c. above, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. The disclosure format should require, as a minimum, the information requested by c.(1) above. The grantee shall instruct such employees through the employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The grantee will notify NSF of any decision not to continue prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than thirty days before the expiration of the response period required by the relevant patent office.

(4) The grantee agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statement: "This invention was made with Government support under (identify the grant) awarded by the National Science Foundation. The Government has certain rights in this invention."

(5) The grantee or its representative will complete, execute, and forward to NSF a confirmation of a License to the United States Government within two months of filing any domestic or foreign patent application.

(6) The grantee or its representative will forward to NSF a copy of any United States patent covering a subject invention within two months after it is issued.

g. Subcontracts

(1) The grantee will include this clause, suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental, or research work. The subcontractor will retain all rights provided for the grantee in this clause, and the grantee will not, as part of the consideration for awarding the subcontract, obtain rights in the subcontrator's subject inventions.

(2) In the case of subcontracts, at any tier, when the prime award by the Foundation was a contract (but not a grant or cooperative agreement), NSF, subcontractor, and contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Foundation with respect to those matters covered by this clause.

h. Reporting on Utilization of Subject Inventions

The grantee agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the grantee or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the grantee, and such other data and information as NSF may reasonably require. The grantee also agrees to provide additional reports in connection with any march-in proceedings undertaken by NSF in accordance with paragraph j. of this clause. To the extent data or information supplied under this section is considered by the grantee, its licensee or assignee to be privileged and confidential and is so marked, NSF agrees that, to the extent permitted by 35 USC 202(c)(5), it will not disclose such information to persons outside the Government.

i. Preference for United States Industry

Notwithstanding any other provision of this clause, the grantee agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by NSF upon a showing by the grantee or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

j. March-in Rights

The grantee agrees that with respect to any subject invention in which it has acquired title, NSF has the right in accordance with procedures in OMB Circular A–124 and NSF regulations at 45 CFR 650.13 to require the grantee, an assignee or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the grantee, assignee, or exclusive licensee refuses such a request, NSF has the right to grant such a license itself if NSF determines that:

(1) Such action is necessary because the grantee or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the grantee, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the grantee, assignee, or licensee; or

(4) Such action is necessary because the agreement required by paragraph i. of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

k. Special Provisions for Grants With Nonprofit Organizations

If the grantee is a nonprofit organization, it agrees that:

(1) Rights to a subject invention in the United States may not be assigned without the approval of NSF, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (provided that such assignee will be subject to the same provisions as the grantee);

(2) The grantee may not grant exclusive licenses under United States patents or patent applications in subject inventions to persons other than small business firms for a period in excess of the earlier of:

(i) Five years from first commercial sale or use of the invention, or

(ii) Eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis NSF approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will not be deemed to end the exclusive period to different subsequent products covered by the invention;

(3) The grantee will share royalties collected on a subject invention with the inventor; and

(4) The balance of any royalties or income earned by the grantee with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, will be utilized for the support of scientific research or education.

l. Communications

All disclosures, elections, confirmations of the Government license, copies of patents, and other routine communications should be sent to the NSF Patent Paralegal, Office of the General Counsel, National Science Foundation, 20550. Requests for waivers and other exceptional communications with the Foundation regarding this clause should be addressed to the NSF Intellectual Property Attorney, Office of the General Counsel, National Science Foundation, Washington, DC, 20550.

(b) When the above clause is used in a funding agreement other than a grant, "grant" and "grantee" may be replaced by "contract" and "contractor" or other appropriate terms.

§ 650.5 Special patent provisions.

(a) At the request of the prospective awardee or on recommendation from NSF staff, the NSF Intellectual Property Attorney, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, many negotiate special patent provisions:

(1) When the NSF Intellectual Property Attorney determines that restriction or elimination of the right of a prospective awardee to retain title to any subject invention will better promote the policy and objectives of Chapter 38 of Title 35 of the United States Code or the National Science Foundation Act (The NSF Intellectual Property Attorney will prepare the report to the Comptroller General if required by Part 7.b. of OMB Circular A–124.);

(2) When a prospective awardee that is not a small business firm or domestic nonprofit organization shows that any of the rights or conditions normally reserved or imposed by the clause in § 650.4(a) should be waived because:

(i) The interests of the United States and the general public will be better served thereby as, for example, where the prospective awardee is uniquely or highly qualified but cannot or will not accept the standard Patent Rights clause; or

(ii) The prospective awardee is making a substantial contribution of funds, facilities, or equipment to the work performed under the award;

(3) When the research is to be performed outside the United States; or

(4) When other exceptional circumstances exist.

§ 650.6 Awards not primarily for research.

(a) Awards not primarily intended to support scientific or engineering research need contain no patent provision. Examples of such awards are travel and conference grants.

(b) NSF fellowships and traineeships are primarily intended to support education or training, not particular research, and the Foundation claims no rights to inventions made by fellows or trainees. The following provision will be included in each fellowship or traineeship program announcement and made part of the award:

Intellectual Property Rights

The National Science Foundation claims no rights to any inventions or writings that might result from its fellowship or traineeship awards. However, fellows and trainees should be aware that the NSF, another Federal agency, or some private party may acquire such rights through other support for particular research. Also, fellows and trainees should note their obligation to include an Acknowledgement and Disclaimer in any publication.

§ 650.7 Awards affected by international agreements.

(a) Some NSF awards are made as part of international cooperative research programs. The agreements or treaties underlying many of these programs require an allocation of patent rights different from that provided by the Patent Rights clause in § 650.4(a). Therefore, as permitted by part 8.d. of OMB Circular A–124, paragraph b. of the standard Patent Rights clause in § 650.4(a) has been modified to provide that the Foundation may require the grantee to transfer to a foreign government or research performer such rights in any subject invention as are contemplated in the international agreement. The award instrument will identify the applicable agreement or treaty.

(b) After an invention is disclosed to the Patent Paralegal, the recipient of an award subject to an international agreement will be informed as to what rights, if any, it must transfer to foreign participants. Recipients may also ask the Program Manager to provide them with copies of the identified international agreements before or after accepting an award.

§ 650.8 Requests for greater rights.

A "deferred determination" clause was routinely included in NSF awards made on or before March 31, 1983, and may occasionally be used as a special patent rights clause under § 650.5. Recipients of that clause may request that they be allowed to retain the principal patent rights to their subject inventions after those inventions are disclosed to the NSF Patent Paralegal. Such a request should be made as soon as possible after the invention is disclosed and should state the requestor's intention and, to the extent known, plans to commercialize the invention. The NSF Intellectual Property Attorney, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, will normally allow the inventing organization to retain the principal patent rights, subject to the terms and conditions imposed by the Patent Rights clause of § 650.4(a), unless he or she determines that would be inconsistent with the policies of the National Science Foundation Act of 1950, as amended; the 1983 Presidential Memorandum on "Government Patent Policy"; or, if applicable, the Bayh-Dole Act.

§ 650.9 Retention of rights by inventor.

If an awardee elects not to retain rights to an invention, the inventor may request the NSF Intellectual Property Attorney for permission to retain principal patent rights. Such requests should be made as soon as possible after the awardee notifies the NSF Patent Paralegal that it does not want to patent the invention. Such requests will normally be granted unless the awardee shows that it would be harmed by that action. As required by part 11. of OMB Circular A–124, the inventor will be subject to the same conditions that the awardee would have been, except that the special restrictions imposed on nonprofit organizations will not apply to the inventor.

§ 650.10 Unwanted inventions.

(a) The Foundation will normally allow any patent rights not wanted by the awardee of inventor to be dedicated to the public through publication. Except as provided in paragraph (b) of this section, the NSF Patent Paralegal will acknowledge a negative election by encouraging the awardee and inventor

VOL

UMI

to promptly publish all the research results.

(b) If the NSF Patent Paralegal or Program Manager believes that another Federal agency is interested in the relevant technology, the Patent Paralegal, after receiving the awardee's election not to patent and after ascertaining that the inventor also does not want to patent, may send a copy of the invention disclosure to that agency to give it an opportunity to review and patent the invention. Unless the agency expresses an interest in the invention within thirty days, the Patent Paralegal will acknowledge the awardee's negative election by encouraging prompt publication of all research results. If the agency does express an interest in patenting the invention, the Patent Paralegal, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, will transfer to it all rights to the invention.

§ 650.11 Inventions also supported by another Federal Agency.

Part 16.c. of OMB Circular A–124 provides that in the event that an invention is made under funding agreements of more than one agency, the agencies involved will, at the request of the grantee or contractor or on their own initiative, designate one agency to be responsible for the administration of the invention. Whenever the NSF Patent Paralegal finds that another Federal agency also supported an NSF subject invention, he or she will consult with the grantee or contractor and the other agency to determine if a single agency should be designated to administer the Government's rights in the invention. With the concurrence of the cognizant Program Manager and Grants or Contracts Officer, the Patent Paralegal may transfer to, or accept from, another Federal agency, all rights in a jointly-supported invention.

§ 650.12 Utilization reports.

Until the form for and frequency of the utilization reports required by paragraph h of the standard Patent Rights clause are established by the Lead Agency overseeing implementation of the Bayh-Dole Act (see part 10.a. of OMB Circular A–124), the Foundation will not normally request such reports. This section will be amended to describe the reporting requirements when they are established.

§ 650.13 Waivers.

(a) Requests for extension of time to disclose to the NSF Patent Paralegal, make an election to retain title to, or file a patent on a subject invention will be granted unless the NSF Intellectual Property Attorney determines that such an extension would either imperil the securing of valid patent protection or unacceptably restrict the publication of the results of the NSF-supported research.

(b) The restrictions on assignment and exclusive licensing by nonprofit organizations imposed by subparagraphs k(1) and k(2) of the Patent Rights clause in § 650.4(a) will be waived when that appears to serve the policy and objective of the Bayh-Dole Act. The NSF Intellectual Property Attorney may waive the restrictions either at the time of award or for an identified invention. Some circumstances under which the restrictions will normally be waived are described in section 6 of the NSF Patent Policy (§ 650.2).

(c) The preference for United States industry imposed by paragraph i of the clause in § 650.4(a) may be waived by the NSF Intellectual Property Attorney as provided in that paragraph.

(d) The NSF Intellectual Property Attorney may waive on behalf of the Foundation and the Government some or all of the rights normally reserved in a subject invention if the award under which the invention was made was not controlled by the Bayh-Dole Act and the inventing organization demonstrates that the NSF made a very limited contribution to the discovery or that the interests of the United States and the general public will be served thereby.

(e) Requests for waiver under this section should be addressed to the NSF Intellectual Property Attorney and should explain why waiver is justified under the stated criteria. The Intellectual Property Attorney will obtain the concurrence of the cognizant Program Manager and Grants or Contracts Officer before taking any action under this section. The requester will be given a written explanation of the reasons for denial of a request covered by this section.

§ 650.14 Exercise of march-in rights.

(a) The procedures established by this section supplement those prescribed by part 13. of OMB Circular A–124 and apply to all march-in rights held by the Foundation including those resulting from funding agreements not covered by the OMB Circular.

(b) Petitions requesting that the NSF exercise a march-in right should be addressed to the NSF Intellectual Property Attorney. Such petitions should:

(1) Identify the patent or patent application involved and the relevant fields of use of the invention;

(2) State the grounds for the proposed march-in;

(3) Supply evidence that one or more of the four conditions creating a march-in right (lack of practical application, unsatisfied health or safety needs, unmet requirements for public use, or failure to prefer United States industry) is present; and

(4) Explain what action by the Foundation is necessary to correct that condition.

(c) If evidence received from a petitioner or from the Foundation's administration of the Patent Rights clauses indicates that one or more of the four conditions creating a march-in right might exist, the NSF Intellectual Property Attorney will informally review the matter as provided in part 13.b. of OMB Circular A–124. If that informal review indicates that one or more of the four conditions creating a march-in right probably exists, the Intellectual Property Attorney will initiate a formal march-in proceeding by issuing a written notice to the patentholder. That notice will provide all the information required by part 13.c. of OMB Circular A–124. The patentholder may submit information and argument in opposition to the proposed march-in in person, in writing, or through a representative.

(d) If the NSF Intellectual Property Attorney determines that a genuine dispute over material facts exists, he or she will identify the disputed facts and notify the NSF General Counsel. The General Counsel will establish a cross-directorate fact-finding panel. The panel will establish its own fact-finding procedures, within the requirements of part 13.e. of OMB Circular A–124, based on the dimensions of the particular dispute. The Intellectual Property Attorney will serve as secretary to the panel, but will not take part in its deliberations. Written findings of facts will be submitted to the General Counsel, sent by certified mail to the patentholder, and made available to all other interested parties.

(e) The NSF General Counsel will determine whether and how the Foundation should exercise a march-in right as provided in part 13.g. of OMB Circular A–124.

§ 650.15 Request for conveyance of title to NSF.

(a) The procedures established by this section apply to the exercise of the Foundation's right under paragraph d. of the Patent Rights clause in § 650.4(a) to request conveyance of title to a subject invention if certain conditions exist.

(b) The NSF Intellectual Property Attorney may request the recipient of an NSF award to convey to the Foundation or a designee title in one or more countries to any invention to which the awardee has elected not to retain title. The Intellectual Property Attorney may also request immediate conveyance of title to a subject invention if the awardee fails (1) to submit a timely invention disclosure, (2) to make a timely election to retain patent rights, or (3) to file a timely patent application; but only if he or she determines that such action is required to preserve patent rights.

(c) The NSF Intellectual Property Attorney will informally review any apparent failure by an awardee to comply with the requirements of paragraph c. of the Patent Rights clause in § 650.4(a). The interested institution, the inventor, the patentholder, and any other interested party will be given an opportunity to explain why a particular invention was not disclosed, why an election was not made, or why a patent application was not filed. If the Intellectual Property Attorney determines that a genuine dispute over material facts exists, a cross-directorate fact-finding panel will be appointed by the General Counsel. The panel will establish its own fact-finding procedures, within the requirements of part 13.e. of OMB Circular A–124, based on the dimensions of the particular dispute. Written findings of facts will be submitted to the Intellectual Property Attorney, sent by certified mail to the patentholder, and made available to all other interested parties.

(e) The NSF Intellectual Property Attorney will determine whether the Foundation should request conveyance of title or if it should retain title obtained under § 650.15(b).

§ 650.16 Appeals.

(a) All actions by the NSF Intellectual Property Attorney under § 650.8 denying a request for greater rights, under § 650.13 denying a request for waiver, under § 650.14(d) denying the existence of a material dispute under § 650.15(e) requesting conveyance of title, or under § 650.19 refusing retroactive application of the Bayh-Dole Act may be appealed to the Director of the Foundation by an affected party within thirty days. A request under § 650.15(b) to immediately convey title to the Foundation may be appealed to the General Counsel by the titleholder within five days.

(b) In reviewing the actions of the NSF Intellectual Property Attorney, the Director, or his or her designee, will consider both the factual and legal basis for the action or determination and its consistency with the policies and objectives of the Foundation and, if applicable, the Bayh-Dole Act (35 U.S.C. 200 to 206) and OMB Circular A–124.

§ 650.17 Background rights.

The Foundation will acquire rights to a research performer's pre-existing technology only in exceptional circumstances where, due to the nature of the research being supported, the Foundation requires greater control over resulting inventions. The NSF Intellectual Property Attorney, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, will negotiate the background rights provision. If the affected awardee is a small business firm or nonprofit organization, the provision will conform to the requirements of the Bayh-Dole Act (35 U.S.C. 202(f)) as implemented by part 15 of OMB Circular A–124.

§ 650.18 Subcontracts.

Awardees should normally use the Patent Rights clause in § 650.4(a) in all subcontracts. At the request of the awardee or on recommendation from NSF staff, the Intellectual Property Attorney, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, may direct the awardee to insert into subcontracts relating to scientific research a patent provision other than that contained in § 650.4(a) of this regulation. Special patent provisions may be negotiated for subcontracts under § 650.5.

§ 650.19 Retroactive application.

The provisions of § 650.8 apply to all inventions disclosed after the effective date of this regulation under funding agreements that contain a deferred determination clause, including those awarded before July 1, 1981, to small business firms and nonprofit organizations. At the request of the awardee, the Intellectual Property Attorney, with the concurrence of the cognizant Program Manager and Grants or Contracts Officer, may also apply those provisions to inventions disclosed under awards which contain special patent clauses or were covered by an Institutional Patent Agreement with the Foundation.

§ 650.20 Delegation of authority.

The General Counsel is responsible for implementing this regulation and is authorized to make any exceptions to or extensions of the NSF Patent Policy as may be required by particular circumstances. The General Counsel will designate persons to serve as the NSF Intellectual Property Attorney and Patent Paralegal. Those individuals are authorized to carry out the functions assigned them by this regulation.

Appendix A to Part 650—Optional Format for Confirmatory License

The following format may be used for the confirmatory license to the Government required by subparagraph f(5) of the Patent Rights clause in § 650.4(a). The form given in 41 CFR 1–9.105(b) or any equivalent instrument may also be used.

License to the United States Government

This instrument confirms to the United States Government, as represented by the National Science Foundation, an irrevocable, nonexclusive, nontransferable, royalty-free license to practice or have practiced on its behalf throughout the world the following subject invention:

(invention title)
(inventor(s) name(s))
(patent application number and filing date)
(country, if other than United States)
(NSF Disclosure No.).

This subject invention was made with NSF support through:

(grant or contract number)
(grantee or contractor).

Principal rights to this subject invention have been left with the licensor.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday).

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday

TABLE OF EFFECTIVE DATES AND TIME PERIODS—MAY 1983

This table is for determining dates in documents which give advance notice of compliance, impose time limits on public response, or announce meetings.

Agencies using this table in planning publication of their documents must allow sufficient time for printing production.

In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or a holiday, the next Federal business day is used. (see 1 CFR 18.17)

A new table will be published in the first issue of each month.

Dates of FR publication	15 days after publication	30 days after publication	45 days after publication	60 days after publication	90 days after publication
May 2	May 17	June 1	June 16	July 1	August 1

CFR CHECKLIST; 1982/83 ISSUANCES

This checklist, prepared by the Office of the Federal Register, is published in the first issue of each month. It is arranged in the order of CFR titles, and shows the revision date and price of the volumes of the Code of Federal Regulations issued to date for 1982/83. New units issued during the month are announced on the back cover of the daily **Federal Register** as they become available.

For a checklist of current CFR volumes comprising a complete CFR set, see the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $615 domestic, $153.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 86
Tuesday, May 3, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Animal and Plant Health Inspection Service

[Docket No. 82–070]

9 CFR Part 92

Ports Designated for the Importation of Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document, on an emergency basis, amends the regulations concerning ports designated for the importation of animals by designating International Falls, Minnesota, as a port for the importation of horses from Canada. This is necessary in order to eliminate unnecessary administrative activities, and to reflect the fact that a veterinarian is now available on a regular basis at International Falls, for port activities with respect to horses.

DATES: Effective date of this interim rule is May 3, 1983.

Written comments must be received on or before June 27, 1983.

ADDRESS: Written comments concerning this interim rule should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday to Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. M. R. Crane, Veterinary Services, APHIS, USDA, Room 840, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Background

Regulations in 9 CFR Part 92 (the regulations), with certain exceptions, require horses to be inspected and to be accompanied by certain documentation as a condition of entry into the United States from Canada. The regulations allow these horses to be imported only through designated ports listed or incorporated by reference in the regulations, or at ports designated for horses in special cases upon approval by the Deputy Administrator, Veterinary Services with the concurrence of the Secretary of the Treasury. This is necessary to ensure that the horses are imported at a place serviced by U.S. Customs, and to ensure that the horses are imported only at ports having qualified personnel for performing Animal and Plant Health Inspection Services (APHIS) inspections and making other APHIS determinations concerning whether horses meet specified requirements for entry into the United States.

This document designates International Falls, Minnesota, as a designated port of entry for horses from Canada.

Even though International Falls has not been listed as a designated port for any animals, upon request APHIS frequently has allowed horses to be imported at International Falls in accordance with the procedures established for allowing the importation of horses in special cases. Importers bringing horses from certain areas in south central Canada have requested that they be allowed to bring their horses into the United States at International Falls because it is more convenient than the nearest designated port of entry. The two nearest designated ports to International Falls are at Pembina, North Dakota, which is 225 miles to the west, and Sault Ste. Marie, Michigan, which is 600 miles to the east.

In the past APHIS has sent people considerable distances to conduct the necessary port activities for horses imported at International Falls. The nearest APHIS personnel have had to travel approximately 300 miles to process the importations. However, APHIS has now made arrangements for International Falls to be serviced on a regular basis by an accredited veterinarian who practices in International Falls and who is to be paid on a fee for service basis. International Falls already has regular U.S. Customs service for importations from Canada. Accordingly, it is necessary to designate International Falls as a designated port of entry for horses from Canada in order to eliminate the requirement that the Deputy Administrator approve each importation with the concurrence of the Secretary of the Treasury, and to reflect the fact that a veterinarian is now available at the port on a regular basis.

It was decided to designate International Falls as a port of entry only for horses because no unloading or holding facilities are available there to the government for handling other animals. Port activities for horses do not require unloading or holding facilities, since they can be easily unloaded and inspected in the open while being tied or hand held. Port activities for other animals require unloading and holding facilities.

Further, it was decided to only allow the importation of horses from Canada

VOL
48
ISS
86
MY
3
1983
UMI

at International Falls. It does not appear that there is a demand for importing horses from other than Canada at International Falls. Also, any horse from Canada not allowed to be imported could be turned back without the need for the use of facilities. However, it would be necessary to have holding and quarantine facilities for other international traffic in horses and International Falls does not have such facilities.

Emergency Action

Dr. S. T. Wilson, Jr., Director, National Program Planning Staffs, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, has determined that an emergency situation exists which warrants publication of this interim rule without opportunity for public comment at this time. This action is necessary to eliminate unnecessary administrative activities and to reflect the fact that a veterinarian is now available at the port on a regular basis.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action are impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency interim action effective less than 30 days after publication of this document in the **Federal Register**. Comments will be solicited for 60 days after publication of this document, and this emergency interim action will be scheduled for review so that final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Executive Order 12291 and Regulatory Flexibility Act

This interim rule has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this action will have an annual effect on the economy of less than $2,000; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived the review process required by Executive Order 12291 and the Department of Agriculture has waived the requirements of Secretary's Memorandum 1512–1.

Certification Under the Regulatory Flexibility Act

Mr. James O. Lee, Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. It is anticipated that only approximately 50 importations of horses annually will be offered for entry into the United States from Canada through International Falls, Minnesota, as compared with more than 20,500 horses imported into the United States at all other Canadian ports. In addition, this action will be beneficial to importers by relieving them of unnecessary travel time and expenses.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Transportation.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

§ 92.3 [Amended]

Accordingly, § 92.3 in 9 CFR Part 92 is amended as follows:

1. The material after "Canadian border ports." is designated as paragraph (b)(1).

2. A new paragraph (b)(2) is added to read as follows:

§ 92.3 Parts designated for the importation of animals.

* * * * *

(b) * * *

(1) * * *

(2) International Falls, Minnesota, is designated as a port of entry for horses from Canada.

* * * * *

(Sec. 2, 32 Stat. 792, as amended, secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134c, and 134f; 7 CFR 2.17, 2.51, and 371.2 (d))

Done at Washington, D.C., this 27th day of April 1983.

K. R. Hook,

Acting Deputy Administrator Veterinary Services.

[FR Doc. 83-11780 Filed 5-2-83; 8:45 am]

BILLING CODE 3410-34-M

9 CFR Part 92

[Docket No. 83-043]

Restrictions on Importation of Horses From Italy

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document adds Italy to the list of countries from which or through which horses are prohibited importation into the United States because of contagious equine metritis (CEM). This action is necessary because CEM has now been found to exist in Italy, and restrictions on the importation of horses from Italy are needed in order to protect the livestock of the United States from the disease.

DATE: Effective date: The foregoing amendment shall become effective April 27, 1983, except for horses then in transit to the United States from Italy (i.e., loaded aboard a commercial carrier and en route to the United States).

Comments must be received on or before June 27, 1983.

ADDRESS: Written comments concerning this action should be submitted to T. O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. D. E. Herrick, USDA, APHIS, VS, Federal Building, Room 838, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8530.

SUPPLEMENTARY INFORMATION:

Background

On December 9, 1982, an interim rule was published in the **Federal Register** (47 FR 55368–55369), which amended § 92.2(i)(1) of 9 CFR Part 92 (the regulations) by deleting Italy from this list of countries from which or through which horses are prohibited importation into the United States because of contagious equine metritis (CEM). That interim rule was based on information then available to the Department which indicated that CEM did not exist in Italy.

Written comments were solicited in response to the interim rule, but none were received. However, since the interim rule was published, additional information has been received by the Department which indicates that CEM in fact does exist in Italy. Three Italian mares recently were tested for CEM and found to be positive for the disease. These test results were confirmed on March 28, 1983. Based on these test results, which establish that fact that CEM does exist in Italy, this document amends § 92.2(i)(1) of the regulations by adding Italy to the list of countries from which or through which horses are prohibited importation into the United States. This action is necessary in order to prevent the introduction of CEM into the United States.

Executive Order 12291 and Emergency Action

This action has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291.

Dr. Saul T. Wilson, Jr., Director, National Program Planning Staffs, VS, APHIS, USDA, has determined that an emergency situation exists which warrants publication without prior opportunity for a public comment period on this interim action. This amendment imposes restrictions on the importation of horses into the United States from Italy, and should be made effective immediately in order to protect United States horses from the introduction of CEM.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this emergency interim action are impracticable, unnecessary and contrary to the public interest, and good cause is found for making this emergency interim action effective less than 30 days after publication of this document in the **Federal Register**. Comments have been solicited for 60 days after publication of this document, and this emergency interim action will be scheduled for review so that a final document discussing comments received and any amendments required can be published in the **Federal Register** as soon as possible.

Certification Under the Regulatory Flexibility Act

James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. Approximately 50 horses per year were imported from Italy prior to imposition of the CEM restrictions, and only 4 horses from Italy have been imported since the December 9, 1982, interim rule became effective and restrictions were lifted. This compares with approximately 6,000 horses imported into the United States each year from countries where CEM is known to exist and approximately 40,000 horses of all classes imported into the United States in Fiscal Year 1982.

List of Subjects in 9 CFR Part 92

Animal diseases, Contagious Equine Metritis (CEM), Imports, Livestock and livestock products, Quarantine, Transportation.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, Part 92, Title 9, Code of Federal Regulations, is amended by revising § 92.2(i)(1) to read as follows:

§ 92.2 General prohibitions; exceptions.

* * * * *

(i)(1) Except as provided in paragraph (i)(2) of this section notwithstanding the other provisions of this part concerning the importation of horses into the United States, the importation of all horses from the following listed countries and the importation of all horses which have been in any such country within the 12 months immediately preceding their export to the United States is prohibited because of the existence of CEM in such countries: Australia, Austria, Belgium, Denmark, Ireland, Italy, Japan, Federal Republic of Germany, France, Sweden, and the United Kingdom (England, Scotland, Northern Ireland, Wales and the Isle of Man).

[Docket No. 83-044]

Specifically Approved States To Receive Mares Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which added New York to the list of specifically approved States authorized to receive certain mares imported into the United States from countries affected with contagious equine metritis (CEM). This action is taken because the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, determined that New York has laws or regulations in effect to require the additional inspection, treatment and testing of such horses to further ensure their freedom from CEM as required by the regulations.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Mark P. Dulin, VS, APHIS, USDA, Room 844–AAA, Federal Building, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Background

Section 92.2(i)(2) of the regulations in 9 CFR Part 92, among other things, authorizes the importation of certain female horses (mares over 731 days of age) into the United States from countries affected with contagious equine metritis (CEM) when specific requirements to prevent their introducing CEM into the United States are met, and the animals imported are moved into approved States for further inspection, treatment and testing.

A document published in the **Federal Register** on February 16, 1982, (47 FR 6609–6610), set forth an interim rule amending § 92.4(a)(8)(ii) of the regulations in 9 CFR Part 92 by adding New York to the list of States approved to receive these mares. The addition of New York to the list was based on the finding that it meets certain criteria concerning treatment, testing and handling procedures for these mares.

VOL

1983
UMI

The interim rule was made effective on the date it was signed, February 5, 1982, in order to relieve as soon as possible unnecessary restrictions that had been placed on importers of these mares.

Comments were solicited for 60 days after publication of the amendment. No comments were received. The factual situation which was set forth in the document of February 16, 1982, still provides a basis for the amendment. Accordingly, it has been determined that the amendment should remain effective as published in the **Federal Register** on February 16, 1982.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291 and the Department of Agriculture has waived the requirements of Secretary's Memorandum 1512–1.

This action affirms an interim rule which provides a means by which mares over 731 days of age from countries affected with CEM and bound for New York can be imported directly into New York. Otherwise, the mares would be allowed to be imported only to other States which have been approved to receive these mares from countries affected with CEM. The nearest State to New York approved to receive these mares from countries affected with CEM is Virginia. This action should result in a decrease of transportation costs for such horses.

In fiscal yedr 1982, 310 of these mares were imported into New York, and it is anticipated that approximately the same number of these mares will be imported into New York in coming years. It is further anticipated that the number of these mares imported into the United States from countries affected with CEM wil. be insignificant compared with horses of all classes imported into the United States. In fiscal year 1982, 38,983 horses of all classes were imported into the United States.

Under the circumstances explained above, Mr. James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 9 CFR Part 92

Animal disease, Canada, Imports, Livestock—livestock products, Mexico, Poultry—poultry products, Quarantine, Transportation, Wildlife.

(Sec. 2, 32 Stat. 792, as amended, secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134c, 134f; 7 CFR 2.17, 2.51, and 371.2(d))

Done at Washington, D.C., this 27th day of April 1983.

K. R. Hook,

Acting Deputy Administrator Veterinary Services.

Specifically Approved States To Receive Mares Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which added South Carolina to the list of specifically approved States authorized to receive certain mares imported into the United States from countries affected with contagious equine metritis (CEM). This action is taken because the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, determined that South Carolina has laws or regulations in effect to require the additional inspection, treatment and testing of such horses to further ensure their freedom from CEM as required by the regulations.

EFFECTIVE DATE: May 3, 1983

FOR FURTHER INFORMATION CONTACT: Dr. Mark P. Dulin, VS, APHIS, USDA, Room 844–AAA, Federal Building, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Background

Section 92.2(i)(2) of the regulations in 9 CFR Part 92, among other things, authorizes the importation of certain female horses (mares over 731 days of age) into the United States from countries affected with contagious equine matritis (CEM) when specific requirements to prevent their introducing CEM into the United States are met, and the animals imported are moved into approved States for further inspection, treatment and testing.

A document published in the **Federal Register** on March 17, 1982, (47 FR 11509–11511), set forth an interim rule amending § 92.4(a)(8)(ii) of the regulations in 9 CFR Part 92 by adding South Carolina to the list of States approved to receive these mares. The addition of South Carolina to the list was based on the finding that it meets certain criteria concerning treatment, testing, and handling procedures for these mares.

The interim rule was made effective on the date it was signed, March 11, 1982, in order to relieve as soon as possible unnecessary restrictions that had been placed on importers of these mares.

Comments were solicited for 60 days after publication of the amendment. No comments were received. The factual situation which was set forth in the document of March 17, 1982, still provides a basis for the amendment. Accordingly, it has been determined that the amendment should remain effective as published in the **Federal Register** on March 17, 1982.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291 and the Department of Agriculture has waived the requirements of Secretary's Memorandum 1512–1.

This action affirms an interim rule which provides a means by which mares over 731 days of age from countries affected with CEM and bound for South Carolina can be imported directly into

South Carolina. Otherwise, the mares would be allowed to be imported only to other States which have been approved to receive these mares from countries affected with CEM. The nearest State to South Carolina approved to receive these mares from countries affected with CEM is Virginia. This action should result in a decrease of transportation costs for such horses.

It is anticipated that 40 or fewer of these mares will be imported into South Carolina annually. It is further anticipated that the number of these mares imported into the United States from countries affected with CEM will be insignificant compared with horses of all classes imported into the United States. In fiscal year 1982, 4 of these mares were imported into South Carolina, compared with 38,983 horses of all classes imported into the United States.

Under the circumstances explained above, Mr. James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock—livestock products, Mexico, Poultry—poultry products, Quarantine, Transportation, Wildlife.

(Sec. 2, 32 Stat. 792, as amended, secs. 2, 4, 11, 76 Stat. 129, 130, 132; 21 U.S.C. 111, 134a, 134c, 134f, 7 CFR 2.17, 2.51, and 371.2(d))

[Docket No. 83-050]

Specifically Approved States To Receive Mares Imported From CEM-Affected Countries

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which added Colorado to the list of specifically approved States authorized to receive certain mares imported into the United States from countries affected with contagious equine metritis (CEM). This action is taken because the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, determined that Colorado has laws or regulations in effect to require the additional inspection, treatment and testing of such horses to further ensure their freedom from CEM as required by the regulations.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Mark P. Dulin, VS, APHIS, USDA, Room 844–AAA, Federal Building, Hyattsville, MD 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION:

Background

Section 92.2(i)(2) of the regulations in 9 CFR Part 92, among other things, authorizes the importation of certain female horses (mares over 731 days of age) into the United States from countries affected with contagious equine metritis (CEM) when specific requirements to prevent their introducing CEM into the United States are met, and the animals imported are moved into approved States for further inspection, treatment and testing.

A document published in the **Federal Register** on April 6, 1982, (47 FR 15097–15098), set forth an interim rule amending § 92.4(a)(8)(ii) of the regulations in 9 CFR Part 92 by adding Colorado to the list of States approved to receive these mares. The addition of Colorado to the list was based on the finding that it meets certain criteria concerning treatment, testing, and handling procedures for these mares.

The interim rule was made effective on the date it was signed, April 5, 1982, in order to relieve as soon as possible unnecessary restrictions that had been placed on importers of these mares.

Comments were solicited for 60 days after publication of the amendment. No comments were received. The factual situation which was set forth in the document of April 6, 1982, still provides a basis for the amendment. Accordingly, it has been determined that the amendment should remain effective as published in the **Federal Register** on April 6, 1982.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been determined to be not a "major rule." The Department has determined that this action will not have a significant annual effect on the economy, will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not have any adverse effects on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291 and the Department of Agriculture has waived the requirements of Secretary's Memorandum 1512–1.

This action affirms an interim rule which provides a means by which mares over 731 days of age from countries affected with CEM and bound for Colorado can be imported directly into Colorado. Otherwise, the mares would be allowed to be imported only to other States which have been approved to receive these mares from countries affected with CEM. The nearest State to Colorado approved to receive these mares from countries affected with CEM is California. This action should result in a decrease of transportation costs for such horses.

It is anticipated that 40 or fewer of these mares will be imported into Colorado annually. It is further anticipated that the number of these mares imported into the United States from countries affected with CEM will be insignificant compared with horses of all classes imported into the United States. Since March 1982, there have been no mares from countries affected with CEM imported into Colorado. However, 38,983 horses of all classes were imported into the United States during fiscal year 1982.

Under the circumstances explained above, Mr. James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 101

[Rev. 2—Amdt. 29]

Delegation of Authority To Conduct Program Activities in Field Offices

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Disaster Program, Part II of 13 CFR 101.3–2, "Delegation of Authority to Conduct Program Activities in Field Offices," has been canceled as a field program. Space formerly used in 13 CFR 101–3–2 by this program is reserved.

The program is not a Central Office activity with disaster authority therein transferred to the Associate Administrator for Finance and Investment in Central Office Delegation of Authority No. 12, Amendment 1 (48 FR 9979), and redelegation documents No. 12–C (48 FR 9980), and 12–D (48 FR 9981), as published in the **Federal Register** on March 9, 1983. This is a technical amendment necessary to implement the above delegations.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald Allen, Paperwork Management Branch, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416. Telephone No. (202) 653–8538.

SUPPLEMENTARY INFORMATION: Part 101 consists of rules relating to the Agency's organization and procedures; therefore, notice of proposed rulemaking and public participation thereon as prescribed in 5 U.S.C. 553 is not required and this amendment to Part 101 is adopted without resort to those procedures.

List of Subjects in 13 CFR Part 101

Authority delegations (Government agencies), Administrative practice and procedure, Organization and functions (Government agencies).

For the reasons set forth in the preamble and pursuant to authority in Section 5(b)(6) of the Small Business Act, 15 U.S.C. 634, Part 101, 13 CFR 101.3–2 is amended as set forth below:

§ 101.3–2 [Amended]

13 CFR 101.3–2, Part II *Disaster Program* is canceled with the space reserved as follows:

* * * * *

Part II—[Reserved]

* * * * *

(Sec. 5(b)(6) of the Small Business Act; 15 U.S.C. 634)

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release No. 34-19698]

Delegation of Authority to Director of the Division of Market Regulation

AGENCY: Securities and Exchange Commission.

ACTION: Final rule amendment.

SUMMARY: The Commission is amending its rules governing delegation of authority with respect to the Securities Exchange Act of 1934 ("Act") to delegate authority to the Director of the Division of Market Regulation to grant exemptions from certain provisions of the rule governing the dissemination of quotation information.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: William W. Uchimoto, (202) 272–2409, Division of Market Regulation, Securities and Exchange Commission, Room 5193, 450 5th Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is amending its rules governing delegation of authority to delegate to the Director of the Division of Market Regulation the authority to grant exemptions from Rule 11Ac1–1 ("Rule"), pursuant to paragraph (d) of the Rule.[1] The Commission finds, in accordance with the Administrative Procedure Act ("APA") [5 U.S.C. 553(b)(3)(B)], that this amendment relates solely to agency organization, procedures, or practice and that notice and procedures pursuant to the APA are therefore not necessary, and that such amendment shall be adopted, effectively immediately.

[1] The Director of the Division of Market Regulation currently has delegated authority only to grant exemptions from paragraph (c)(1) of the Rule to responsible brokers or dealers acting in the capacity of third market makers within the meaning of the Rule. *See* 17 CFR 240.200.30–3(a)(28).

List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of information, Privacy, Securities.

The Securities and Exchange Commission, pursuant to the Act, and particularly Sections 2, 6, 11A and 23 (15 U.S.C. 78b, 78f, 78k–1 and 78w), thereof, and the Delegation of Functions Act, 15 U.S.C. 78d–1, hereby adopts an amendment to Section 200.30–3(a).

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

The Commission hereby revises paragraph (a)(28) of § 200.30–3, 17 CFR Chapter II to read as follows:

§ 200.30–3 Delegation of authority to Director of Division of Market Regulation.

* * * * *

(a) * * *

(28) To grant exemptions from Rule 11Ac1–1 ("Rule") [§ 240.11Ac1–1], pursuant to paragraph (d) of the Rule.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is publishing for adoption technical amendments relating to various rules, forms and schedules under the Securities Act of 1933 (the "Securities Act") [15 U.S.C. 77a et seq. (1976 and Supp. IV 1980)] and the Securities Exchange Act of 1934 (the "Exchange Act") [15 U.S.C. 78a et seq. (1976 and Supp. IV 1980)]. These actions relate primarily to technical omissions and errata in the Integrated Disclosure Release adopted by the Commission on March 3, 1982.[1] The following rules, forms and schedules are affected by these amendments: Items 401, 503 and 601 of Regulation S–K [17 CFR Part 229]; Securities Act Industry Guides 4 and 5 [17 CFR 229.801]; Securities Act Rules 134, 175, 432 and 494 [17 CFR 230]; Securities Act Forms C–2 [17 CFR 239.4], D–1 [17 CFR 239.6], D–1A [17 CFR 239.7], S–1 [17 CFR 239.11], S–2 [17 CFR 239.12], S–3 [17 CFR 239.13], S–8 [17 CFR 239.16], S–14 [17 CFR 139.23] and S–15 [17 CFR 239.29]; Exchange Act Rules 3b–6, 13a–13 and 13e–3 [17 CFR 240]; and Exchange Act Forms 8–K [17 CFR 249.308] and 10–K [17 CFR 249.310].

The amendments are being adopted as proposed with only minor modifications.[2] First, the reference to Part I of Form 10–K in Instruction 3 to Paragraph (b) of Item 401, which relates to the options allowed for presenting required information about directors and officers, is not being revised.

Second, the following additional technical changes are being adopted:

(a) Paragraph (e) of Item 11 of Form S–1, Information with Respect to the Registrant, has been amended to correct the cross-reference to Item 15 of Form S–1.

(b) Paragraphs (a)(i)(A) and (B) of Item 12 (Incorporation of Certain Information by Reference) of Form S–15 have been amended to provide a correct reference to Rule 14a–3(b)(6) under the Exchange Act in subparagraph (A), and Rule 14a–3(b)(1) under the Exchange Act in subparagraph (B).

(c) Instruction G(3) of Form 10–K (Information to be Incorporated by Reference) has been amended to provide a correct reference to

[1] Release No. 33-6383 (March 3, 1982) [47 FR 11380, March 16, 1982].

[2] Pursuant to the Commission's request for comment, three letters of comment were submitted. The comment letters are available for public inspection and copying at the Commission's Public reference Room (*See* File No. S7–961).

Instruction 3 to Item 401(b) of Regulation S–K.

(d) Item 13(d) of Form 10–K (Exhibits, Financial Statement Schedules and Reports on Form 8–K) has been amended to reflect changes made in Accounting Series Release No. 302 ("ASR 302").[1] ASR 302 generally eliminates the filing of separate financial statements by parent companies in certain instances. Consistent with ASR 302, paragraphs (1) and (3) of Item 13(d) have been deleted and the remaining paragraphs renumbered.

The Commission hereby finds pursuant to Section 553(d) of the Administrative Procedure Act [5 U.S.C. 553(d) (1949)] that publication in the Federal Register 30 days prior to effectiveness is not necessary because the amendments are technical and correcting in nature.

List of Subjects in 17 CFR Parts 229, 230, 239, 240 and 249

Reporting and recordkeeping requirements, Securities.

Text of Amendments

In accordance with the foregoing, Title 17, Chapter II, of the Code of Federal Regulations is amended as follows:

PART 229—STANDARD INSTRUCTIONS FOR FILING FORMS UNDER SECURITIES ACT OF 1933 AND SECURITIES EXCHANGE ACT OF 1934—REGULATION S–K

1. By revising Instruction 3 to Paragraph (b) in § 229.401 to read as follows:

§ 229.401 (Item 401) Directors and executive officers.

* * * * *

Instructions to Paragraph (b) of Item 401.

* * * * *

3. The information regarding executive officers called for by this Item need not be furnished in proxy or information statements prepared in accordance with Schedule 14A under the Exchange Act (§ 240.14a–101 of this chapter) by those registrants relying on General Instruction G of Form 10–K under the Exchange Act (§ 249.310 of this chapter), *Provided*, That such information is furnished in a separate item captioned "Executive officers of the registrant" and included in Part I of the registrant's annual report on Form 10–K.

* * * * *

2. By revising paragraphs (d)(3)(i), (3)(v), (4)(i) and the first sentence of (4)(ii) and adding a new paragraph (d)(3)(vi) to § 229.503 to read as follows:

§ 229.503 (Item 503) Summary information, risk factors and ratio of earnings to fixed charges.

* * * * *

(d) Ratio of earnings to fixed charges.

* * * * *

(3) * * *

(i) Add to pretax income the amount of fixed charges computed pursuant to paragraph (d)(4) of this section, adjusted to exclude (A) the amount of any interest capitalized during the period and (B) the actual amount of any preferred stock dividend requirements of majority-owned subsidiaries and fifty-percent-owned persons which were included in such fixed charges amount but not deducted in the determination of pretax income.

* * * * *

(v) Registrants other than public utilities may add to earnings the amount of previously capitalized interest amortized during the period.

(vi) A registrant which is a rate-regulated public utility shall not reduce fixed charges (see paragraph (4) below) by any allowance for funds used during construction, but rather, shall include any such allowance in the determination of earnings under this paragraph.

(4)(i) The term "fixed charges" shall mean the total of (A) interest, whether expensed or capitalized; (B) amortization of debt expense and discount or premium relating to any indebtedness, whether expensed or capitalized; (C) such portion of rental expense as can be demonstrated to be representative of the interest factor in the particular case; and (D) preferred stock dividend requirements of majority-owned subsidiaries and fifty-percent-owned persons, excluding in all cases items which would be or are eliminated in consolidation.

(ii) If the registrant is a guarantor of debt of a less than fifty-percent-owned person or of an unaffiliated person (such as a supplier), the amount of fixed charges associated with such debt should not be included in the computation of the ratio unless the registrant has been required to satisfy the guarantee or it is probable that the registrant will be required to honor the guarantee and the amount can reasonably be estimated.

* * * * *

3. By revising the first sentence of paragraph (b)(8) and by adding a period after the word "filed" and capitalizing the word "Where" in paragraph (b)(25) in § 229.601 to read as follows:

§ 229.601 (Item 601) Exhibits.

* * * * *

(b) *Description of exhibits.*

* * * * *

(8) *Opinion re tax matters*—For filings on Form S–11 under the Securities Act (§ 239.18) or those to which Securities Act Industry Guide 5 applies, an opinion of counsel or of an independent public or certified public accountant or, in lieu thereof, a revenue ruling from the Internal Revenue Service, supporting the tax matters and consequences to the shareholders as described in the filing when such tax matters are material to the transaction for which the registration statement is being filed.

* * * * *

(25) *Power of attorney*—If any name is signed to the registration statement or report pursuant to power of attorney, manually signed copies of such power of attorney shall be filed.

* * * * *

§ 229.601 [Amended]

4. By amending Securities Act Industry Guide 4 in § 229.601 to revise subparagraph 1 of Item 1 and Item 11 to read as follows (Securities Act Industry Guide 4 does not appear in the Code of Federal Regulations):

Guide 4. Prospectus Relating to Interests in Oil and Gas Programs.

1. * * *

(1) Terms of Offering: State the title and general nature of the securities being offered; the maximum aggregate amount of the offering; the minimum aggregate amount necessary to initiate the program; the disposition of the funds raised if they are not sufficient for that purpose; the minimum subscription price; the period of the offering; any provisions for additional assessments; and a brief description of the proposed method of distribution, including the amount of any commission to be paid. If funds received from investors are not to be held in trust or in special account pending expenditure in the program, appropriate disclosures should be set forth including when appropriate reference to exposure to claims of creditors of the custodian of the funds.

The tabular presentation specified in item 501(c)(7) of Regulation S–K (§ 229.501(c)(7)) may be omitted;

* * * * *

11. *Management.* Furnish the information required by Items 401 through 403 of Regulation S–K (§§ 229.401 through 403) as to the management and operating companies.

* * * * *

5. By amending Securities Act Industry Guide 5 in § 229.601 to delete

[1] Securities Act Release No. 33-6339 (November 6, 1981) [46 FR 56171, November 16, 1981].

paragraph 18 and to renumber paragraphs 19 through 21 as paragraphs 18 through 20 (Securities Act Industry Guide 5 does not appear in the Code of Federal Regulations).

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

6. By revising paragraph (a)(14)(ii) in § 230.134 to read as follows:

§ 230.134 Communications not deemed a prospectus.

* * * * *

(a) * * *

(14) * * *

(ii) For the purpose of paragraph (a)(14)(i) of this section, the term "nationally recognized statistical rating organization" shall have the same meaning as used in Rule 15c–3–1(c)(2)(vi)(F) under the Securities Exchange Act of 1934 (17 CFR 240.15c3–1(c)(2)(vi)(F)).

* * * * *

7. By revising paragraph (b)(2) introductory text and paragraph (b)(2)(i) in § 230.175 to read as follows:

§ 230.175 Liability for certain statements by issuers.

* * * * *

(b) * * *

(2) Information which is disclosed in a document filed with the Commission, in Part I of a quarterly report on Form 10–Q (§ 249.308a of this chapter) or in an annual report to shareholders meeting the requirements of Rules 14a–3(b) and (c) or 14c–3 (a) and (b) under the Securities Exchange Act of 1934 (§§ 240.14a–3 (b) and (c) or 240.14a–3 (a) and (b) of this chapter) and which relates to (i) the effects of changing prices on the business enterprise, presented voluntarily or pursuant to Item 303 of Regulation S–K (§ 229.303 of this chapter) or Item 9 of Form 20–F (§ 249.220f of this chapter) "Management's discussion and analysis of financial condition and results of operations," or Item 302 of Regulation S–K (§ 229.302 of this chapter), "Supplementary financial information," or Rule 3–20(c) of Regulation S–X (§ 210.3–20(c) of this chapter), or

* * * * *

8. By revising § 230.432 to read as follows:

§ 230.432 Additional information required to be included in prospectuses relating to tender offers.

Notwithstanding the provisions * * * not otherwise required to be included therein, required by Rule 14d–6(e)(1) (§ 240.14d–6(e)(1) of this chapter) to be included in all such tender offers, requests or invitations, published or sent or given to the holders of such securities.

9. By revising paragraph (e) in § 230.494 to read as follows:

§ 230.494 Newspaper prospectuses.

* * * * *

(e) If the registrant or any of the underwriters knows or has reasonable grounds to believe that it is intended to stabilize the price of any security to facilitate the offering of the registered security, there shall be placed in the newspaper prospectus, in capital letters, the statement required by Item 502(d) of Regulation S–K (§ 229.502(d) of this chapter) to be included in the full prospectus.

* * * * *

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

§ 239.4 [Amended]

10. By removing § 239.4, Form C–2, for certain types of certificates of interest in securities.

§ 239.6 [Amended]

11. By removing Form D–1, for certificates of deposit, in § 239.6.

§ 239.7 [Amended]

12. By removing Form D–1A, for certificates of deposit issued by issuer of securities called for deposit in § 239.7.

13. By revising paragraph (e) of Item 11 and paragraph (b) of Item 16 of Form S–1 in § 239.11 to read as follows (Form S–1 does not appear in the Code of Federal Regulations):

§ 239.11 Form S–1 [Amended]

* * * * *

Item 11. Information with respect to the Registrant. Furnish the following information with respect to the Registrant:

* * * * *

(e) Financial statements meeting the requirements of Regulation S–X (17 CFR Part 210) (Schedules required under Regulation S–X shall be filed as "Financial Statement Schedules" pursuant to Item 15, Exhibits and Financial Statement Schedules, of this Form) as well as any Financial information required by Rule 3–05 and Article 11 of Regulation S–X.

* * * * *

Item 16. Exhibits and Financial Statement Schedules.

* * * * *

(b) Furnish the financial statement schedules required by Regulation S–X (17 CFR Part 210) and Item 11(e) of this Form. These schedules shall be lettered or numbered in the manner described for exhibits in paragraph (a).

* * * * *

14. By amending Item 12 of Form S–2 in § 239.12 by revising the introductory paragraph (a) and paragraphs (a)(3)(i) and (b) to read as follows (Form S–2 does not appear in the Code of Federal Regulations):

§ 239.12 Form S–2 [Amended]

* * * * *

Item 12. *Incorporation of Certain Information by Reference.*

(a) The documents listed (1), (2), and, if applicable, the portions of the documents listed in (3) and (4) below, shall be specifically incorporated by reference into the prospectus, by means of a statement to that effect in the prospectus listing all such documents. In lieu of incorporating portions of the documents listed in (3) and (4) below, the registrant may incorporate by reference its entire annual or quarterly report to security holders.

* * * * *

(3) * * *

(i) description of business furnished in accordance with the provisions of Rule 14a–3(b)(6) under the Exchange Act (§ 240.14a–3(b)(6) of this chapter):

* * * * *

(b) The registrant may also state, if it so chooses, that specifically described portions of its annual or quarterly report to security holders, other than those portions required to be incorporated by reference pursuant to paragraphs (a)(3) and (4) above, are not part of the registration statement. In such case, the description of portions which are not incorporated by reference or which are excluded shall be made with clarity and in reasonable detail.

* * * * *

15. By amending Item 11 of Form S–3 in § 239.13 to revise paragraph (b) to read as follows (Form S–3 does not appear in the Code of Federal Regulation):

§ 239.13 Form S–3 [Amended]

Item 11. *Material changes*

* * * * *

(b) Include in the prospectus, if not incorporated by reference therein from the reports filed under the Exchange Act specified in Item 12(a), a proxy or information statement filed pursuant to Section 14 of the Exchange Act, a prospectus previously filed pursuant to Rule 424 (b) or (c) under the Securities Act (§ 230.424 (b) or (c) of this chapter) or a Form 8–K filed during either of the two preceding fiscal years: (i)

Information required by Rule 3-05 and Article 11 of Regulation S-X (17 CFR Part 210); (ii) restated financial statements prepared in accordance with Regulation S-X if there has been a change in accounting principles or a correction in an error where such change or correction requires a material retroactive restatement of financial statements; (iii) restated financial statements prepared in accordance with Regulation S-X where one or more business combinations acounted for by the pooling of interest method of accounting have been consumated subsequent to the most recent fiscal year and the acquired businesses, considered in the aggregate, are significant pursuant to Rule 11-01(b), or (iv) any financial information required because of a material disposition of assets outside the normal course of business.

* * * * *

18. By revising Form S-8 in § 239.16 to delete the instruction to Item 5; and to revise subparagraph (1)(a) of General Instruction A; Note 1 to General Instruction C; the introductory paragraph and paragraph (b) of Item 15; and the signature provision; and Instruction 1 to the signature provision to read as follows (Form S-8 does not appear in the Code of Federal Regulations):

§ 239.16 Form S-8 [Amended]

General Instructions

A. Rule as to use of Form S-8.

(1) * * *

(a) Securities of such issuer to be offered to its employees, or to employees of its subsidiaries or parents, pursuant to any employee benefit plan.

(See Rule 405 of Regulation C (§ 230.405 of this chapter) defining "employee benefit plan").

* * * * *

C. Unavailability of the Form S-8 Prospectus for Reoffers or Resales.

* * * * *

Notes.—1. Registered securities may be included in a reoffer prospectus if they have been or will be acquired by the selling security holder pursuant to the plan. If after the effective date the issuer wishes to add any person who has acquired or will acquire any registered securities pursuant to the plan to the list of selling shareholders, the issuer may do so by filing a post-effective amendment or by use of a prospectus filed pursuant to Rule 424(c) under the Securities Act (§ 230.424(c) of this chapter).

* * * * *

PART I—INFORMATION REQUIRED IN THE PROSPECTUS

* * * * *

Item 15. Incorporation of Certain Documents by Reference.

The issuer and, where interests in the plan are being registered, the plan, shall incorporate by reference into the prospectus the documents listed in (a) through (c) below and shall state that all documents subsequently filed by them pursuant to Sections 13(a), 13(c), 14 and 15(d) of the Securities Exchange Act of 1934, prior to the filing of a post effective amendment which indicates that all securities offered have been sold or which deregisters all securities then remaining unsold, shall be deemed to be incorporated by reference in the prospectus and to be a part thereof from the date of filings of such documents. Copies of these documents are not required to be filed with the registration statement.

* * * * *

(b) All other reports filed pursuant to Sections 13(a) or

15(d) of the Securities Exchange Act of 1934 since the end of the fiscal year covered by the annual reports or the prospectus referred to in (a) above.

Signatures

* * * * *

The Plan. Pursuant to the requirements of the Securities Act of 1933, the plan has duly caused this registration statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of ———, State of ———, on the ——— Day of 19—.

(The Plan)

By ———

(Signature and Title)

Instructions. 1. The registration statement shall be signed by the registrant, its principal executive officer or officers, its controller or principal accounting officer, and by at least a majority of the board of directors or persons performing similar functions. Where interests in the plan are being registered, the registration statement shall be signed by the plan. If the signing person is a foreign person. * * *

17. By amending the heading of Part II of Form S-14 in § 239.23 to read as follows:

§ 239.23 Form S-14 [Amended]

Part II. Information Not Required in Prospectus

18. By amending Item 12 of Form S-15 in § 239.29 to revise paragraphs (a)(i) (A) and (B) and (b) to read as follows (Form S-15 does not appear in the Code of Federal Regulations):

§ 239.29 Form S-15 [Amended]

* * * * *

Item 12. Incorporation of Certain Information by Reference

(a) * * *

(i) * * *

(A) description of business furnished in accordance with the provisions of Rule 14a-3(b)(6);

(B) certified financial statements furnished in accordance with the provisions of Rule 14a-3(b)(1);

* * * * *

(b) The issuer may also state, if it so chooses, that specifically described portions of its annual or quarterly report to security holders, other than those portions required to be incorporated by reference pursuant to paragraphs (a)(i) and (iv) above, are not part of the registration statement. In such case, the description of portions which are incorporated by reference or which are excluded shall be made with clarity and in reasonable detail.

* * * * *

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

19. By revising the introductory text to paragraph (b)(2) and paragraph (b)(2)(i) in § 240.3b-6 to read as follows:

§ 240.3b-6 Liability for certain statements by issuers.

* * * * *

(b) * * *

(2) Information which is disclosed in a document filed with the Commission in Part I of a quarterly report on Form 10-Q (§ 249.308a of this chapter) or in an annual report to shareholders meeting the requirements of Rules 14a-3 (b) and (c) or 14c-3 (a) and (b) under the Securities Exchange Act of 1934 (§§ 240.14a-3 (b) and (c) or 240.14c-3 (a) and (b) of this chapter) and which relates to (i) the effects of changing prices on the business enterprise, presented voluntarily or pursuant to Item 303 of Regulation S-K (§ 229.303 of this chapter) or Item 9 of Form 20-F (§ 249.220f of this chapter), "Management's discussion and analysis of financial condition and results of operations," or Item 302 of Regulation S-K (§ 229.302 of this chapter), "Supplementary financial information," or Rule 3-20(c) of this chapter) or

* * * * *

20. By amending paragraph (c)(1) of § 240.13a-13 to read as follows:

§ 240.13a-13 Quarterly reports on Form 10-Q (§ 249.308a of this chapter).

* * * * *

(c) * * *

(1) Life insurance companies and holding companies having only life insurance subsidiaries for quarters in fiscal years ending on or before December 20, 1983, if they do not meet the test specified in Item 302(a)(5)(i) of Regulation S-K (§ 229.302 of this chapter) or

* * * * *

21. By revising Instruction 2(a) to paragraph (e) of § 240.13e-3 to read as follows:

§ 240.13e-3 Going private transactions by certain issuers or their affiliates.

* * * * *

(e) *Disclosure of certain information.*

* * *

Instructions. * * *

2. * * *

(a) The following summary financial information for (i) the two most recent fiscal years and (ii) the latest year-to-date interim period and corresponding interim period of the preceding year:

Income Statement:
Net sales and operating revenues and other revenues
Income before extraordinary items
Net Income
Balance Sheet (at end of period):
Working capital
Total assets
Total assets less deferred research and development charges and excess of cost of assets acquired over book value.
Shareholder's equity
Per Share:[1]
Income per common share before extraordinary items
Extraordinary items
Net income per common share (and common share equivalents, if applicable)

* * * * *

Net income per share on a fully diluted basis

* * * * *

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

22. By amending Item 7 of Form 8-K in § 249.308 to redesignate paragraph (a)(3) as paragraph (a)(4); to add a new paragraph (a)(3); and to revise paragraph (b)(2) to read as follows (Form 8-K does not appear in the Code of Federal Regulations):

§ 249.308 Form 8-K [Amended]

Item 7. Financial Statements, Pro Forma Financial Information and Exhibits.

* * *

(a) * * *

(3) With regard to the acquisition of one or more real estate properties, the financial statements and any additional information specified by Rule 3-14 of Regulation S-X shall be filed

(b) * * *

(2) The provisions of (a)(4) above shall also apply to pro forma financial information relative to the acquired business.

* * * * *

23. By revising the last sentence of General Instruction G of Form 10-K in Section 249.310 to read "See Instruction 3 to Item 401(b) of Regulation S-K (Section 229. 401(b) of this Chapter)."

24. By revising General Instruction I of Form 10-K and Item 13(d) in § 249.310 to read as follows (Form 10-K does not appear in the Code of Federal Regulations):

§ 249.310 Form 10-K [Amended]

* * * * *

I. Registrants filing on Form S-18.

If the registrant is subject to the reporting requirements of Section 15(d) of the Exchange Act and such obligation arises solely because the registrant has filed a registration statement on Form S-18 (§ 239.28 of this chapter) which has become effective during the last fiscal year, the registrant may comply with the disclosure requirements of Form S-18 Item 16, Description of Business; Item 18, Interest of Management and Others in Certain Transactions; and Item 20, Remuneration of Directors and Officers, in lieu of complying with the disclosure requirements of Item 1, Business; Item 11, Management Remuneration; and Item 13, Certain relationships and related transactions, herein. Item 6 of this Form, Selected Financial Data, may be omitted at the election of such registrant.

* * * * *

Item 13. Exhibits, Financial Statement Schedules and Reports on Form, 8-K.

* * * * *

(d) Registrants shall file, as financial statement schedules to this Form, the financial statements required by Regulation S-X (17 CFR Part 210) which are excluded from the annual report to shareholders by Rule 14a-3(b) including (1) separate financial statements of subsidiaries not consolidated and fifty percent or less owned persons; (2) separate financial statements of affiliates whose securities are pledged as collateral and (3) schedules.

* * * * *

Statutory Authority

These amendments are being adopted pursuant to authority in Sections 6, 7, 8, 10 and 19(a) of the Securities Act of 1933 and Sections 12, 13, 14, 15(d) and 23(a) of the Securities Act of 1934.

(Secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85, secs. 205, 209, 48 Stat. 906, 908; sec. 301, 54 Stat. 857; sec. 8, 68 Stat. 685; sec. 1, 79 Stat. 1051; sec. 308(a)(2), 90 Stat. 57; secs. 12, 13, 14, 15(d), 23(a), 48 Stat. 892, 895, 901; secs. 1, 3, 8, 49 Stat. 1375, 1377, 1379; sec 203(a), 49 Stat. 704; Sec. 202, 68 Stat. 683; secs. 3, 4, 5, 6, 78 Stat. 565–568, 569, 570–574; secs. 1, 2, 3, 82 Stat. 454, 455; secs. 28(c), 1, 2, 3–5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 10, 18, 89 Stat. 117, 118, 119, 155; sec. 308(b), 90 Stat. 57; secs. 202, 208, 204, 91 Stat. 1494, 1498, 1499, 1500; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 78l, 78m, 78n, 78o(d), 78w(a))

By the Commission.

April 22, 1983.

George A. Fitzsimmons,

Secretary.

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of announcement of effective date for final rule.

SUMMARY: This notice announces the effective date for the final rule published in the Federal Register on March 22, 1983 (48 FR 11928) that implemented a new program involving direct underwriting of insured single family mortgage loans by approved mortgage lenders. The effective date provision of the rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, subject to waiver, and announced that future notice of the effectiveness of the rule would be published in the Federal Register.

Thirty calendar days of continuous session of Congress have expired since the rule was published.

DATE: The effective date for the final rule published March 22, 1983 (48 FR 11928) is May 3, 1983. Information collection requirements contained in this regulation (sections 200.163 and 200.164)

have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Number 2502–0274.

FOR FURTHER INFORMATION CONTACT:
Grady J. Norris, Assistant General Counsel for Regulations, Department of Housing and Urban Development, Room 10278, 451 7th Street, SW., Washington, D.C. 20410, telephone No. (202) 755–7055. (This is not a toll-free number.)

Dated: April 27, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

POSTAL RATE COMMISSION

39 CFR Part 3002

[Docket No. RM83–7; Order Nos. 490 and 495]

Order of the Commission Amending Organizational Rules; Correction

Issued: April 26, 1983.

AGENCY: Postal Rate Commission.

ACTION: Final rule; correction.

SUMMARY: On March 30, 1983 (48 FR 13167), the Postal Rate Commission published a final rule which changed some of its organizational rules. The Commission is issuing a correction to that rule. The correction is necessary to make clear the removal of § 3002.8.

FOR FURTHER INFORMATION CONTACT:
David F. Stover, General Counsel, 2000 L Street, NW., Washington, D.C. 20268 (telephone: 202/254–3824).

SUPPLEMENTARY INFORMATION:

On March 22, 1983, the Commission issued a Final Rule which changed some of its organizational rules. 48 FR 13167–13168 (March 30, 1983). Among them was the elimination of § 3002.8. We are issuing this correction to make this clearer. Accordingly under "§ 3002.8", at 48 FR at 13168, the first sentence numbered "2." should be corrected to read as follows: "Section 3002.8, Office of Public Information, is removed and § 3002.9 is redesignated § 3002.8."

By the Commission.

Cyril J. Pittack,

Acting Secretary.

BILLING CODE 7715–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A–9–FRL 2186–1]

Approval and Promulgation of Implementation Plans; State of Arizona

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: On November 12, 1981, EPA proposed action on draft revisions to the State Implementation Plan (SIP) for Arizona. These draft revisions were later adopted and officially submitted by the State on June 3, 1982, to meet the requirements of Part C, Subpart 1, of the Clean Air Act for preconstruction review of new and modified major stationary sources of those air pollutants regulated under the Act. Today's notice takes final action under the Clean Air Act to approve these revisions.

EFFECTIVE DATE: This action is effective May 3, 1983.

FOR FURTHER INFORMATION CONTACT:
David P. Howekamp, Director, Air Management Division, Region 9, Environmental Protection Agency, 215 Fremont Street, San Francisco, CA 94105, Attn.: Julie A. Rose (415) 974–8236, New Source Section.

ADDRESS: A copy of today's revision to the Arizona SIP is located at: The Office of the Federal Register, 1100 L Street, N.W., Room 8401, Washington, D.C. 20408.

SUPPLEMENTARY INFORMATION:

Background

The Arizona Department of Health Services (ADHS) drafted regulations for New Source Review (NSR) and Prevention of Significant Deterioration (PSD). These regulations contain the preconstruction review requirements for new and modified major stationary sources. On November 12, 1981 (46 FR 55714) EPA proposed to approve these draft revisions if adopted by the ADHS without substantive changes and submitted by the Governor's designee. On June 3, 1982, the Governor's designee for Arizona submitted these regulations as a revision to the Arizona SIP.

Public Comments

During the public comment period, EPA received comments from the Arizona Electric Power Cooperative, Inc., Arizona Public Service Company, and Salt River Project. All comments are specifically identified and responded to in EPA's Public Comment Technical Support Document (contained in Document File NAP–AZ–04–NSR/PSD at the ADHS, EPA Library in Washington, D.C., and the Region 9 Office).

EPA Actions

EPA is taking final action under Section 110 and Part C, Subpart 1, of the Clean Air Act to approve the ADHS regulations for PSD submitted on June 3, 1982. In addition, EPA is not taking action in this notice on Rule R9–307 (Innovative control technology exemption) since revisions to this rule were officially submitted to EPA as a SIP revision after EPA's proposed approval. These revisions are not consistent with the provisions of 40 CFR 51.24(s)(2)(iv)(b).

The definitions of Stationary Source contained in Arizona Rule R9–3–101(146) apply under State law to both Arizona's PSD program and Arizona's NSR program for nonattainment areas. EPA is approving Rule R9–3–101(146) only under Part C, Subpart 1, of the Clean Air Act as providing adequate definitions for an acceptable PSD plan. EPA is taking no action on the definitions under Part D of the Act. Although Rule R9–3–101(146) will be applicable to Arizona's nonattainment NSR program under State law, the definitions will not be approved by EPA as satisfying the requirements of Part D of the Act. EPA is taking no action at this time on any of the recent amendments to Arizona's nonattainment program. The NSR portion of the regulations will be acted upon in a future **Federal Register**, and the regulations approved by EPA on May 5, 1982 will continue to be the approved Part D SIP for Arizona.

The detailed requirements for a PSD program are contained in 40 CFR 51.24, "Prevention of Significant Deterioration of Air Quality." Presently, EPA is administering the PSD program in the State of Arizona under the federal regulation 40 CFR 52.21, "Prevention of Significant Deterioration of Air Quality." Upon approval of the PSD regulations, federal regulation 40 CFR 52.21 will be rescinded as applicable for most new sources constructing in Arizona after the date of SIP approval and the PSD program will be administered by the ADHS. The State does not have jurisdiction for sources located on Indian lands and for most sources in Maricopa and Pima counties. EPA retains authority for those areas and sources not under State jurisdiction.

EPA has a responsibility to take final action as soon as possible in order to minimize any delays in the processing of permits. Therefore, EPA finds that good cause exists for making this action immediately effective.

Supplementary Issues

With respect to sources potentially impacting Federal Class I areas (i.e., within 100 kilometers of such areas), the State agrees to transmit to the EPA Administrator a copy of each permit application relating to a major stationary source or major modification (with materials supporting the preliminary determination) and provide notice to the Administrator of every action related to the consideration of such permit.

With respect to the exemption of portable sources provided in Rule R9–3–304, the State agrees to restrict the use of the exemption to sources which will be temporary. In order to be eligible for the exemption, sources must provide notice to the State at least 10 days prior to the relocation.

Regulatory Process

Under Executive Order 12291, today's action is not major. It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA and any EPA response are available for public inspection at the locations listed in the **ADDRESSES** section of this notice.

Under the Clean Air Act, any petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by July 5, 1983. This action may not be challenged later in proceedings to enforce its requirements.

Incorporation by reference of the State Implementation Plan for the State of Arizona was approved by the Director of the Federal Register on July 1, 1982.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

Authority: Sec. 110, 129, 160, to 160, and 301(a) of the Clean Air Act as amended (42 U.S.C. 7410, 7429, 7470, to 7479, and 7601(a))

Dated: April 22, 1983.

Lee L. Verstandig,

Acting Administrator

PART 52—[AMENDED]

Subpart D of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

Subpart D—Arizona

1. Section 52.120, is amended by adding paragraph (c)(54)(i)(B) to read as follows:

§ 52.120 Identification of plan.

* * * * *

(c) * * *

(54) * * *

(i) * * *

(B) New or amended rules R9–3–101 (Nos. 3, 7, 8, 17, 18, 19, 20, 21, 29, 34, 35, 37, 56, 61, 62, 63, 68, 69, 75, 77, 78, 79, 88, 89, 90, 91, 98, 99, 101, 117, 122, 129, 133, 136, 146, and 157; 53 and 123 are deleted); R9–3–217; R9–3–301; R9–3–304; R9–3–305; R9–3–306 (paragraph A only); R9–3–320 (Repealed and Reserved); R9–3–1101 (paragraphs A, C, and D); Appendix 1; and Appendix 2.

* * * * *

2. Section 52.144 is revised to read as follows:

§ 52.144 Significant deterioration of air quality.

(a) The requirements of sections 160 through 165 of the Clean Act are not met, since the plan as it applies to stationary sources under the jurisdiction of the Pima County Health Department and the Maricopa County Department of Health Services and stationary sources locating on Indian lands does not include approvable procedures for preventing the significant deterioration of air quality.

(b) *Regulation for preventing significant deterioration of air quality.* The provisions of § 52.21 (b) through (w) are hereby incorporated and made a part of the applicable State plan for the State of Arizona for that portion applicable to the Pima County Health Department and the Maricopa County Department of Health Services and sources locating on Indian lands.

[BC Docket No. 81–467; RM–3915; BC Docket No. 81–818; RM–3960; RM–4033; RM–4034]

FM Broadcast Stations in Marco, Florida; Naples and Key West, Florida

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action substitutes FM commercial Channel 276A for Channel 249A in Naples, Florida, and modifies the license of Station WSGL, Naples, to specify operation on Channel 276A in response to a proposal by WRMF, Inc. It

also adds Channel 224A to Marco, Florida, and modifies the license of Station WFYN, Key West, Florida, to specify operation on Channel 222 in lieu of Channel 223, in response to a proposal by Sunshine Broadcasting, Inc.

EFFECTIVE DATE: June 27, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip S. Cross, Mass Media Bureau, (202) 632-5414.

Report and Order (Proceeding Terminated)

In the Matter of; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Marco, Florida) BC Docket 81-487, RM-3915; Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Naples and Key West, Florida) BC Docket No. 81-818, RM-3960, RM-4033, RM-4034.

Adopted: April 8, 1983.

Released: April 26, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration its *Further Notice of Proposed Rule Making and Order to Show Cause* in this proceeding, published in the **Federal Register** on August 19, 1982 (47 FR 36244). The *Further Notice* proposed six options for the assigment of FM channels to Naples, Marco and Key West, Florida. The *Show Cause Order* concerned the proposed modification of licenses for two FM stations in Naples and Key West, Florida, so that certain of the options could be implemented.

2. The communities and channel assignments involved are as follows:

A. Palm Beach, Florida

WRMF, Inc. ("WRMF"), licensee of Station WRFM-FM, Palm Beach, requests the substitution of Channel 276A for Channel 249A at Naples on which Station WSGL(FM) operates. The substitution would enable WRMF to relocate its facilities to a site which would otherwise be short-spaced to WSGL. From the new site, WRMF states that it would serve an additional 864,617 persons. WSGL does not oppose the substitution.

B. Marco, Florida

Sunshine Broadcasting, Inc. ("Sunshine") requested that Channel 276A be assigned to this community as its second FM outlet. The proposal is mutually exclusive with WRMF's request in A above. To resolve the conflict, we proposed the assignment of Channel 221A or 249A to Marco. Sunshine objected on the ground that because of site restrictions neither channel is useable. Sunshine counterproposed the use of Channel 224A with a substitution and modification of license for Station WFYN-FM, Key West, Florida, to operate on Channel 222 instead of 223.

C. Key West, Florida

Florida Keys Broadcasting Corporation ("WFYN") opposed a modification of its license to operate on Channel 222 instead 223 and requested a hearing. Subsequently, in view of WRMF's offer to reimburse WFYN for $25,000 of its expenses in changing frequency, WFYN consented to the modification on the condition that the agreement be more particularized and WFYN promptly obtains authority to operate with improved facilities (application File No. 820222AX) on the new frequency.

D. Naples, Florida

Number 1 Broadcasting, Inc. ("Number One") proposes that Channel 276A be added to Naples as its fifth FM outlet rather than substituted for Channel 249A as proposed by WRMF.

3. The various options, which we proposed, contained combinations of assignments which included Channel 221A, 224A or 276A for Marco; Channel 249A and/or Channel 276A for Naples; and Channel 222 for Key West. Comments were filed by WRMF, Sunshine, Roger's Media Service, Sterling Communications Corporation ("WSGL") and Deltona Broadcasting Company, Inc. Reply comments were filed by WRMF. WFYN filed a request for hearing, a motion to accept a supplement thereto and the supplement itself.

4. WRMF (Palm Beach) contends that the public interest would best be served by adoption of its proposal to substitute Channel 276A for Channel 249A at Naples and modify the license of WSGL (Naples) to operate on Channel 276A. WRMF stresses that the proposal would enable WRMF to change its Palm Beach transmitter location and its antenna height so that it could increase its coverage from 1,595 to 4,080 square miles and serve an additional 864,617 people. WRMF states that for some time it has operated short-spaced to WSGL and has been unable to make better use of its Class C facility. With the short-spacing, WRMF has been limited to 100 kW at 340 feet above average terrain whereas our Rules permit Class C stations to operate with a maximum antenna height of 2,000 feet.

5. WRMF had filed an application (BPH-800720AD) to change transmitter site and to increase antenna height to 1,350 feet above average terrain. That proposed new site would increase the short-spacing to WSGL to 8.13 miles. WRMF had requested a waiver of § 73.213(f) of our Rules regarding separation requirements, which was denied. Thus, WRMF requested the channel substitution of 276A for 249A at Naples to allow the improvements of its facilities as proposed in its application. WRMF states that its proposal would place Palm Beach County and Martin County entirely within the station's proposed 1 mV/m contour and cover most of Broward County and parts of St. Lucie, Hendry and Dade Counties, thereby serving an additional 864,611 people.

6. The assignment of Channel 276A to Naples as its fifth FM assignment, rather than as a substitute for Channel 249A, was proposed originally by Number One. Inasmuch as Number One did not respond to our *Notice*, we concluded that it has no further interest in the proposal. However, comments were filed by Rogers supporting the proposal and stating that it would apply for operation on Channel 276A, if it were assigned as a fifth FM outlet in Naples.

7. In support, Rogers states that the proposal to assign an additional Naples channel would increase the overall diversity of programming rather than maintain the *status quo*. Rogers asserts that the assignment of a fifth FM channel to Naples would reflect the continued and rapid growth of Naples and Collier County over the past ten years. The population of Naples is said to have increased from 12,042 in 1970 to 17,581 in 1980. Rogers reports that employment growth in the manufacturing sector of Collier County increased by 118.6% during that period, ranking it third in growth among Florida's 67 counties. Rogers concludes that the past and continuing population growth and affluent nature of the area indicate that a fifth FM channel assignment in Naples would be desirable.

8. Comments by Sunshine assert that Channel 276A is the better channel for assignment to Marco but it will alternately apply for authority to operate on Channel 249A, as it counterproposed. Sunshine claims that Channel 221A is not suitable for assignment to Marco because of site availability problems. Sunshine contends that if a choice had to be made between Marco and Naples for a new FM assignment, Marco with only one assignment should be preferred over Naples with four assignments. Sunshine states that the provision of a second local FM service to Marco would better fulfill the objectives of section 307(b) of the Communications Act than a fifth local FM service to Naples. Sunshine adds that, although it is not withdrawing its commitment to file an application to operate at Marco, if there is a delay and Channel 276A is made available at Naples, Sunshine might apply at Naples instead of Marco.

9. Deltona, permittee of Channel 226, Marco, contends that Marco is too small a community to support an additional FM station. Deltona argues that the operation of two FM stations in Marco would fragment the market to the point that neither could remain viable.

10. WSGL reiterates its willingness to have its license modified to specify operation on Channel 276A if fully reimbursed by WRMF. Nevertheless, WSGL asserts that the assignment of Channel 276A to Marco, as a second FM assignment, is to be preferred to its use in Naples either as a fifth FM assignment or to replace Channel 249A in order to accommodate the site change for WRMF. WSGL points to Marco's being a growing community which increased from a population of 1,500 in 1970 to an estimated 8,500 in 1980 with a peak winter population of 12,000.

11. WSGL asserts that in the event Channel 276A is assigned to Naples, it should be a replacement for Channel 249A to accommodate the WRMF change. WSGL contends that Naples' four FM assignments already exceed the Commission's former guidelines and that while the guidelines are no longer determinative (BC Docket No. 80-130)[1] the guidelines should be taken into consideration in comparing competing applications.

12. In reply comments, WRMF reiterates its support for the proposals to substitute channels in Naples and to add Channel 221A or 224A to Marco. WRMF opposes the addition of Channel 276A to Naples on the grounds that no showing has been made of special circumstances or need for a fifth FM assignment there; that a new FM assignment (Channel 228A) was made to Naples in 1981 to meet growing needs of the community; that the present facilities in Naples are adequate to meet the needs and diversity of the community; that the addition of Channel 276A would deprive 864,617 people of WRMF's service; and that a fifth FM assignment to Naples clearly does not constitute efficient or equitable distribution of broadcast facilities. WRMF also stated that it would make a financial contribution of up to $25,000 toward the cost of changing WFYN's frequency so Sunshine could operate on Channel 224A in Marco.

13. WRMF filed a motion to accept additional comments. In support thereof, WRMF stated that the comments contain facts which have not previously been submitted for the record but should be considered by the Commission in reaching its judgment in this proceeding. Although WRMF makes no showing as to why these facts could not have been submitted within the specified periods for comments and reply comments, we conclude that the nature of the facts is such as to constitute a fundamental public interest consideration in the assignment of FM channels and that the additional comments should be accepted.[2]

14. The comments include an engineering statement that the WRMF proposal to improve its facilities would provide a first FM service to an area of 329 square miles in the central part of southern Florida. WRMF states that this represents 13.2 percent of the 2,485 square miles of its proposed 1 mV/m coverage area. WRMF submits that the population density in that area is probably small and that an exact population count is not known to be available. On the other hand, WRMF contends that an additional Class A FM station at Naples could not provide a first FM service to any area. WRMF also demonstrates that its proposal would provide a second FM service to an area 88 square miles, which is 3.5 percent of the proposed increase of its 1.0 mV/m coverage.

15. WFYN filed a request for hearing on the matter of modifying its license to specify operation on Channel 222 instead of Channel 223. WFYN states that the proposal presents two substantial problems. The problems are that it would impose significant financial and competitive burdens upon a licensee that is already carrying the burden of operating in a small and highly competitive market with a long-declining population; and that it might constitute a *de facto* downgrading of the WFYN authorization from Class C to Class C-1 status if the Commission adopts certain rule changes proposed in BC Docket No. 80-90. WFYN contends that operation on Channel 222 would limit its future ability to move the transmitter location further up the Keys to obtain a higher tower. WFYN also contends that the useability of Channel 221A in Marco is a matter of dispute between Sunshine and WRMF and that the Commission should first get more data from the parties and resolve the question before looking toward a modification of the WFYN license.[3]

16. WFYN subsequently filed a motion to accept a supplement to its request for hearing, pursuant to §§ 1.3 and 1.415(d) of our Rules. WFYN states that the supplement is needed to respond to the reimbursement offer made by WRMF in its reply comments. We find that good cause has been shown, and the motion is granted.

17. In its supplement, WFYN states that, in view of WRMF's offer to reimburse WFYN for up to $25,000 of the expenses that it might reasonably and prudently incur in voluntarily changing its channel, WFYN would be willing to withdraw its request for hearing if certain conditions are met. The conditions are that the matters at issue in this proceeding can be resolved expeditiously so that WFYN may receive authority to operate on Channel 222 with the improved facilities specified in its pending application for increase in power (File No. 820222AX) by year-end; and that WRMF and WFYN can reach agreement on a specific reimbursement figure. WFYN states that it remains seriously concerned by the fact that the channel change may in the future prove to have been a *de facto* downgrading of its current authorization from Class C to Class C-1. WFYN further states that, however, if this proceeding can be resolved promptly and in a manner that will achieve the noted public and private benefits, WFYN is prepared to leave that problem for resolution in a future proceeding.

Conclusions

18. This case involves the Commission's priorities for conflicting FM channel assignments in accordance with the provisions of Section 307(b) of the Communications Act of 1934, as amended. The *Second Report and Order, Revision of FM Assignment Policies and Procedures*, BC Docket No. 80-130, 90. F.C.C. 2d 88 (1982) set forth the followng priorities:

(1) First-time aural service
(2) Second full-time aural service
(3) First local service
(4) Other public interest considerations

Using these priorities, we are called upon first to compare the need for allowing Station WRMF to change its site by the substitution of Channel 276A

[1] *Second Report and Order, Revision of FM Assignment Policies and Procedures*, 90 F.C.C. 2d 88 (1982).

[2] No objections have been raised to acceptance of the additional comments.

[3] WFYN submits that the hearing request should be initiated only if it is determined that neither Channel 221A nor Channel 276A should be assigned to Marco.

VOL 48 ISS 86 MY 3 1983 UMI

or Channel 249A at Naples against utilizing Channel 276A to provide an additional station at Naples. If the latter request is chosen, the need to compare the desirability of using Channel 276A at Naples with the use of that channel at Marco may also be necessary depending on the resolution of a few preliminary issues with regard to certain suggested alternative channels at Marco.

19. With respect to the first priority, none of the proposals herein would appear to provide a first full-time aural service. However, WRMF makes a showing that it could provide a first FM service to an area of 329 square miles of land area, and we have traditionally placed a very high priority on the provision of such service. Neither the Marco proposal nor the Naples proposal for the addition of Channel 276A could provide a first full-time aural service.

20. Concerning the area in which WRMF would provide a first FM service, we have not been provided with an estimate on the amount of population expected to be served. Our own analysis of the area, after looking at several maps, was inconclusive. However, we did notice the existence of a few small populated areas. On the basis of this finding, we believe the provision of a first FM service to an area of some population, albeit small, is of a greater priority than any of the factors weighing in favor of the Naples request. See *Lockhart, Texas*, 47 R.R. 2d 1598 (1980). The Lockhart case recognized the priority of a first FM service to an area in according qualitative judgments to a comparative proceeding of this type. We have also considered the fact that Naples is, or will be, well served by the four existing and one pending (Channel 288A) stations. As for the unserved area, proposed to be reached by WRMF's site change, we regard the potential for an increase in population in that area as a possibility. Accordingly, we find that the Naples substitution should be preferred to an additional station there. As such, we need not compare the use of Channel 276A at Naples and Marco. Concerning the reimbursement question, WRMF has stated that it would cover the costs of Station WSGL for its frequency change.

21. WRMF has also committed itself to reimburse WFYN for up to $25,000 of its reasonable costs in changing from Channel 223 to Channel 222 so that Channel 224A can be assigned to Marco. Sunshine, the Marco proponent, has argued that it should not be required to reimburse WFYN because the real beneficiary of WFYN's change of channels is WRMF. WFYN has withdrawn its request for a hearing on the modification of its license upon two conditions, that its application for increase in power (File No. 820222AX) is timely granted and that a specific reimbursement figure is agreed upon. In fact, WFYN's application was granted on October 29, 1982. As to the reimbursement of WFYN's expenses, we expect that WRMF and WRYN will reach an agreement on what constitutes a reasonable figure. In view of WRMF's willingness to reimburse WFYN, we do not reach the question of the extent to which Marco has benefitted from the Key West substitution of channels. Therefore, we have not required the ultimate Marco beneficiary to participate in the reimbursement. See, *e.g., Elizabethtown, Kentucky*, 26 F.C.C 2d 162 (1970).

22. As for Deltona's objection to the assignment of Channel 224A to Marco, the issue of economic impact is more appropriately considered at the application stage rather than in a rule making proceeding. See, *e.g. Beaverton, Michigan*, 44 R.R. 2d 55 (1978); and *Grand Junction, Colorado*, 26 R.R. 2d 513 (1973). Finally, as for WFYN's contention that we should seek further data from WRMF and Sunshine to resolve their conflicting views on whether Channel 221A could be used in Marco, we have no showing of site availability. Further, Sunshine has stated that it would not be interested in applying for authority to operate on Channel 221A in Marco. With no interest expressed by Sunshine or others in the use of Channel 221A in Marco, we see no reason to further pursue its assignment here.

23. For the reasons set forth above, we conclude that the public interest would be served by the substitution of Channel 276A for Channel 249A in Naples, Florida, and the assignment of Channel 224A to Marco, Florida.

24. Authority for adoption of the amendments herein is contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules.

25. Accordingly, *it is ordered*, That effective June 27, 1983, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, *is amended* as follows:

City	Channel No.
Key West, Florida	222, 254, 258, 296A.
Marco, Florida	224A, 266.
Naples, Florida	226A, 233, 276A, 296A.

26. *It is further ordered*, That pursuant to § 316(a) of the Communications Act of 1934, as amended, effective June 27, 1983, the license of Sterling Communications Corporation for Station WSGL, Naples, Florida, *is modified* to specify operation on Channel 276A, in lieu of Channel 249A, with the condition that it will be reimbursed by WRMF, Inc. for the reasonable costs involved in changing frequencies.

27. *It is further ordered*, That the license of Florida Keys Broadcasting Corporation for Station WFYN, Key West, Florida; *is modified* to specify operation on Channel 222 in lieu of Channel 223 with the condition that reimbursement of the reasonable costs incurred in changing frequencies will be provided by WRMF, Inc. The license modifications of Stations WSGL and WFYN are subject to the following conditions:

(a) The licensee shall file with the Commission a minor change application for a construction permit (Form 301) specifying the new facilities.

(b) Upon grant of the construction permit, program tests may be conducted in accordance with § 73.1620.

(c) Nothing contained herein shall be construed to authorize a major change in transmitter location or to avoid the necessity of filing an environmental impact statement pursuant to § 1.1301 of the Commission's Rules.

28. *It is further ordered*, That the Secretary shall send a copy of this *Order* by *certified mail, return receipt requested*, to: Sterling Communications Corporation, Box 8899, Naples, Florida, 33941; and Florida Keys Broadcasting Corporation, Box 2515, Key West, Florida, 33040.

29. *It is further ordered*, That this proceeding is terminated.

30. For further information concerning the above, contact Philip S. Cross, Mass Media Bureau, (202) 632–5414.

47 CFR Part 73

Radio Broadcast Services; Amendment of the Commission's Rules To Incorporate Certain Editorial Changes

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order revises § 73.3542 of the Commission's Rules relating to radio broadcast services to bring the rule into conformance with revisions to Section 309(f) of the Communications Act, which now allows the Commission to issue special temporary authorizations for 180-day periods when extraordinary circumstances necessitate temporary operations.

EFFECTIVE DATE: April 21, 1983.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Michael E. Teaney, Mass Media Bureau, (202) 632–6485.

List of Subjects in 47 CFR Part 73

Communications equipment.

Order

In the matter of Amendment of § 73.3542 of the Commission's Rules to incorporate certain editorial changes.

Adopted: April 15, 1983.

Released: April 21, 1983.

1. On September 13, 1982, Section 309(f) of the Communications Act of 1934 was amended [1] to expand the Commission's ability to grant special temporary authority (STA). Prior to this amendment, the Commission's authority to grant STA's was limited to a period of ninety days and only in situations involving emergency conditions. Once issued, an STA could be renewed only for one additional period of ninety days. With the amendment of Section 309(f), the Commission may now authorize a radio station to operate under special temporary authority for up to 180 days without prior notice of the application when extraordinary circumstances necessitate temporary operations. The special temporary authority may be renewed for additional periods of 180 days each, at the discretion of the Commission.

2. To implement the Commission's expanded STA authority for broadcast stations, we are amending § 73.3542 of the Rules, as indicated in the Appendix. The amendments adopted herein impose no additional burdens upon licensees or the public. We conclude that adoption of these amendments as shown in the Appendix will serve the public interest. Because the amendments impose no additional burdens and raise no issues upon which public comments would be useful, compliance with the notice and comment provisions of the Administrative Procedure Act, 5 U.S.C. 553(b)(3)(B), is unnecessary. Because the amendments adopted herein are editorial and pertain to agency practice and procedure, compliance with the notice and comment and effective date provisions is not required. 5 U.S.C. 553(b)(A) and 553(d)(3). Authority for the amendments adopted herein is contained in Sections 4(i), 303(r) and 309(f) of the Communications Act of 1934, as amended, and § 0.283 of the Commission's Rules and Regulations, 47 CFR 0.283.

3. In view of the foregoing, it is ordered, effective April 21, 1983, that § 73.3542 of the Commission's Rules and Regulations is amended as set forth in the Appendix hereto.

[1] The Communications Amendments Act of 1982, Pub. L. 97–259, Section 114, amended Section 309(f) of the Communications Act of 1934, as amended, 47 U.S.C. Section 309(f).

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Laurence E. Harris,

Chief, Mass Media Bureau.

Appendix

PART 73—[AMENDED]

Section 73.3542 is amended by revising the introductory texts of paragraphs (a) and (b) to read as follows:

§ 73.3542 [Amended]

(a) Temporary authority may be granted to a licensee or permittee of a broadcast station to operate such station for a period not to exceed 180 days. Requests should be filed with the FCC at least 10 days prior to the date of the proposed operation. Requests should be accompanied by a statement giving full particulars regarding the purpose for the request.

* * * * * * *

(b) Temporary authority may be granted in circumstances requiring emergency operation to serve the public interest. Such situations include: emergencies involving danger to life and property; during a national emergency proclaimed by the President or the Congress of the U.S.A.; and during the continuance of any war in which the United States is engaged, and where such action is necessary for the national defense or security or otherwise in furtherance of the war effort.

Proposed Rules

Federal Register
Vol. 48, No.86
Tuesday, May 3, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 21

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Acquisition and Relocation for Federal and Federally Assisted Programs

AGENCY: Office of Operations, USDA.

ACTION: Notice of model regulations and request for comments.

SUMMARY: The Department of Transportation (DOT), at the request of the Office of Management and Budget, published in the **Federal Register** on April 14, 1983, 48 FR 16198, a notice of proposed rulemaking (NPRM) under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act). This proposed DOT rule, developed by an interagency working group, is intended to eventually serve as a model for regulations to be issued by all other Federal agencies with programs covered by the Uniform Act. Those agencies will be requested by OMB to review their existing regulations and to revise them to be substantially identical to the final DOT regulations.

State and local agencies and individuals affected by programs of the United States Department of Agriculture may wish to review and comment on the proposed regulation within the prescribed period. Appropriate DOT officials will be available to respond to any questions which may arise on this matter. To the extent possible, it is intended that all major issues be resolved through the DOT NPRM and that the subsequent rules of this agency will adhere closely to the DOT model. Copies of comments sent to DOT may also be sent to the Director, Office of Operations, in this Department.

DATE: Comments must be received by the Department of Transportation on or before May 31, 1983.

ADDRESS: Send comments to Docket Clerk, OST Docket No. 79, Department of Transportation, 400 7th St., SW., Room 10241, Washington, D.C. 20590. Copies of comments sent to DOT may also be sent to Director, Office of Operations, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Mrs. Ladelle H. Ray, Office of Operations, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–5113.

Done in Washington, D.C., this 27th day of April 1983.

Frank Gearde, Jr.,

Director, Office of Operations.

[FR Doc. 83–11735 Filed 5–3–83; 8:45 am]

BILLING CODE 3410–HL–M

Agricultural Marketing Service

7 CFR Part 52

United States Standards for Grades of Grapefruit Juice

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The purpose of this proposed rule is to revise the voluntary U.S. Standards for Grades of Grapefruit Juice. The proposed rule was developed by the United States Department of Agriculture (USDA) at the request of major segments of the citrus industry. This proposed rule would: (1) Allow additional dilution ratios in frozen concentrated grapefruit juice; (2) amend the required Brix for grapefruit juice from concentrate to conform to the requirements of the Food the Drug Administration (FDA) Standards of Identity for Grapefruit Juice; and (3) make minor editorial changes. Its effect would be to improve the standards and promote orderly and efficient marketing of grapefruit juice.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Comments should reference the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Paul Jennings, Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, Telephone (202) 447–6247.

SUPPLEMENTARY INFORMATION: This rule has been revised under USDA procedures and Executive Order 12291 and has been designated as a "nonmajor" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost or prices to consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant effects on competition, employment, investments, productivity, innovations, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed rule will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601), because this reflects current marketing practices.

The currently effective standards for grades of frozen concentrated grapefruit juice do not allow for dilution ratios other than three parts water to one part concentrate. Some processors of frozen concentrated grapefruit juice market products that have higher concentration than is allowed in the currently effective standards. These products must be graded as concentrated grapefruit juice for manufacturing, which does not represent the intended use of the products. Providing other dilution ratios would promote orderly marketing of these products.

The United States Standards for Grades of Grapefruit Juice, effective September 17, 1981, cited the FDA Standards of Identity for Grapefruit Juice as the minimum requirement for degrees Brix in both grapefruit juice and grapefruit juice from concentrate. The FDA requirement was nine (9) percent soluble solids. On June 4, 1982, the FDA stayed the soluble solids requirement in the Standards of Identity for Grapefruit

Juice. On September 15, 1982, the USDA published in the **Federal Register** a revision of the United States Standards for Grades of Grapefruit Juice to require a minimum of nine (9) percent soluble solids in both grapefruit juice and grapefruit juice from concentrate. On October 1, 1982, the FDA amended the Standards of Identity for Grapefruit Juice to set the minimum soluble solids requirement at ten (10) percent for grapefruit juice from concentrate. The effective date of the FDA minimum solids requirement is July 1, 1983. This proposal would change the soluble solids requirement in the grade standards for grapefruit juice from concentrate from nine (9) percent to ten (10) percent. This proposed action would align the grade standards with the FDA Standards of Identity.

Several editorial changes in the definition of terms and in Tables I through V would promote better understanding and uniformity.

List of Subjects in 7 CFR Part 52

Processed fruits and vegetables, Food grades and standards.

Accordingly, the United States Standards for Grades of Grapefruit Juice (7 CFR 52.1221–52.1230) would be revised to read as follows:

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

* * * * *

Subpart—United States Standards for Grades of Grapefruit Juice

Sec.

52.1221 Product description.
52.1222 Styles.
52.1223 Color.
52.1224 Definitions of terms.
52.1225 Recommended sample unit size.
52.1226 Grades.
52.1227 Factors of quality and analysis.
52.1228 Requirements for grades.
52.1229 Sample size.
52.1230 Lot requirements.

Authority: Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, as amended, 1090, as amended (7 U.S.C. 1622, 1624).

Subpart—United States Standards for Grades of Grapefruit Juice

§ 52.1221 Product description.

(a) "Grapefruit juice" is the product represented as defined in the Standards of Identity for Grapefruit Juice (21 CFR 146.132), issued under the Federal Food, Drug, and Cosmetic Act.

(b) "Grapefruit juice from concentrate" is the product represented as defined in the Standards of Identity for Grapefruit Juice (21 CFR 146.132), issued under the Federal Food, Drug, and Cosmetic Act.

(c) "Frozen concentrated grapefruit juice" is processed by concentrating and preserving by freezing the product represented as defined in the Standards of Identity for Grapefruit Juice (21 CFR 146.132), issued under the Federal Food, Drug, and Cosmetic Act.

(d) "Concentrated grapefruit juice for manufacturing" is processed by concentrating and preserving by physical means the product represented as defined in the Standards of Identity for Grapefruit Juice (21 CFR 146.132), issued under the Federal Food, Drug, and Cosmetic Act. The finished product may not contain any additives except cold-pressed oil, to standardize flavor, and chemical preservatives permissible under provisions of the Federal Food, Drug, and Cosmetic Act.

(e) "Dehydrated grapefruit juice" is processed by concentrating and preserving by dehydration the product represented as defined in the Standards of Identity for Grapefruit Juice (21 CFR 146.132), issued under the Federal, Food, Drug, and Cosmetic Act.

§ 52.1222 Styles.

(a) Unsweetened.

(b) Sweetened (Sweetener added).

§ 52.1223 Color.

(a) White or amber.

(b) Pink or red.

§ 52.1224 Definitions of terms.

In these U.S. standards, unless otherwise required by the context, the following terms shall be construed, respectively, to mean:

(a) *Acid* means the percent, by weight, of total acidity (calculated as anhydrous citric acid).

(b) *Appearance* means the physical properties of grapefruit juice which are evaluated by the human eye.

(c) *Brix* means the total soluble solids as determined when tested with a Brix hydrometer and applying the applicable temperature correction. The Brix may be determined by any other method that gives equivalent results.

(d) *Brix/Acid Ratio* means the ratio of the degrees Brix of the juice to the grams of anhydrous citric acid per 100 grams of the juice.

(e) *Brix value* means the refractometric sucrose value determined in accordance with the "International Scale of Refractive Indices of Sucrose Solutions" and to which the applicable correction for acid is added. The Brix value is determined in accordance with the refractometric method outlined in the "Official Methods of Analysis of the Association of Offical Analytical Chemists."

(f) *Brix value/Acid Ratio* means the ratio of the Brix value of the concentrate, in degrees Brix, to the grams of anhydrous citric acid per 100 grams of concentrate.

(g) *Coagulation* means curdling of grapefruit juice.

(h) *Color.*—(1) *Good color* means the grapefruit juice is representative of juice expressed from mature, well-ripened grapefruit; and the grapefruit juice may show fading and lack of luster.

(2) *Reasonably good color* means the grapefruit juice may be slightly, but not materially, affected by scorching, oxidation, or caramelization.

(i) *Defects* means juice cells, seeds or portion of seeds, specks, particles of membrane, core, peel, or any other distinctive features that adversely affect the appearance or drinking quality of grapefruit juice.

(1) *Practically free from defects* means defects in excess of that normally expected in grapefruit juice are not present.

(2) *Reasonably free from defects* means the presence of defects does not seriously affect the appearance or drinking quality of grapefruit juice.

(j) *Flavor.*—(1) *Good flavor* means:

(i) *Grapefruit juice* that is typical of freshly extracted juice from mature, well-ripened grapefruit. The grapefruit juice may be slightly affected by processing, packaging or storage conditions.

(ii) *Grapefruit juice from concentrate* that is typical of juice from mature, well-ripened grapefruit. The grapefruit juice may be slightly affected by processing, packaging or storage conditions.

(iii) *Frozen concentrated grapefruit juice* that is typical of freshly extracted juice from mature, well-ripened grapefruit; and does not have more than slight trace of bitterness.

(iv) *Concentrated grapefruit juice for manufacturing* that is practically free from traces of scorching, caramelization, oxidation, and terpene.

(v) *Dehydrated grapefruit juice* that is free from terpene, caramelization, oxidation, and rancid flavors.

(2) *Reasonably good flavor* means:

(i) *Grapefruit juice* that is materially but not seriously affected by bitterness, terpene, processing, storage, or container flavors.

(ii) *Grapefruit juice from concentrate* that is materially but not seriously affected by bitterness, terpene, processing, storage, or container flavors.

(iii) *Frozen concentrated grapefruit juice* that is fairly typical of freshly

extracted grapefruit juice, no more than slightly affected by bitterness, and is free from abnormal flavors of any kind.

(iv) *Concentrated grapefruit juice for manufacturing* that is no more than slightly affected by scorching, caramelization, or oxidation. It may have a trace of terpene, but is free from any other abnormal flavors.

(v) *Dehydrated grapefruit juice* that is no more than slightly affected by scorching, caramelization, oxidation, or terpene flavors, but is free from any other abnormal flavors.

(k) *Free and suspended pulp* means the particles of membrane, core, peel, and similar material that separate from suspension by centrifuging.

(l) *Reconstituted juice* means the product obtained by thoroughly mixing the concentrate with the amount of water prescribed on the label or other appropriate directions.

(m) *Reconstitutes properly* means, that upon mixing with water, the concentrate dissolves readily and has no material coagulation or separation.

(n) *Recoverable oil* means the volume of oil that may be recovered from grapefruit juice as determined by the "Official Methods of Analysis of the Association of Official Analytical Chemists."

(o) *Sample unit* means a portion of grapefruit juice used for grading.

(p) *Terpene* means a specific flavor found in oils and resins.

§ 52.1225 Recommended sample unit size.

The requirements for all factors of quality and analysis are based on the following:

(a) The entire contents of a container;

(b) A representative portion of the contents of a container;

(c) A combination of the contents of two or more containers; or

(d) A portion of unpacked product.

§ 52.1226 Grades.

(a) *U.S. Grade A* is the quality of grapefruit juice that meets the applicable requirements of Table I through V.

(b) *U.S. Grade B* is the quality of grapefruit juice that meets the applicable requirements of Tables I through V.

(c) *Substandard* is the quality of grapefruit juice that fails to meet the requirements for "U.S. Grade B."

§ 52/1227 Factors of quality and analysis.

The grade for a lot of product is based on observation and analysis of grapefruit juice and reconstituted grapefruit juice for the following quality and analytical factors:

(a) *Quality:*

(1) Appearance;
(2) Coagulation;
(3) Color;
(4) Defects;
(5) Flavor;
(6) Reconstitution; and
(7) Total score points.

(b) *Analytical:*

(1) Brix measurement or Brix value measurement;
(2) Brix/acid ratio or Brix value/acid ratio;
(3) Free and suspended pulp; and
(4) Recoverable oil.

§ 52.1228 Requirements for grades.

Maximum	14.0:1	14.0:1	None	None
Recoverable oil (percent by volume): Maximum	0.020		0.025	

[1] Reconstituted prior to grading.

§ 52.1229 Sample size.

The sample size to determine acceptance with the requirements of these standards shall be as specified in the sampling plans and procedures in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products" (7 CFR 52.1 through 52.83).

§ 52.1230 Lot requirements.

A lot of grapefruit juice is considered as meeting the requirements for quality if:

(a) The requirements specified in Tables I, II, III, IV, and V, as applicable, are met; and

(b) The sampling plans and procedures in 7 CFR 52.1 through 52.83 are met.

Done at Washington, D.C., on April 27, 1983.

William T. Manley,
Deputy Administrator, Marketing Program Operations.

[Release No. IC-13183; File No. S7-973]

Exemption From Section 22(d) To Permit the Sale of Redeemable Securities at Prices That Reflect Different Sales Loads

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission today is publishing for public comment a rule that would exempt, under certain conditions, registered investment companies and the principal underwriters of and dealers in such companies' shares from section 22(d) of the Investment Company Act of 1940, which generally requires that such shares be sold to the public only at a current public offering price described in the prospectus. The Commission believes that the proposed rule would obviate the necessity for such companies to file applications requesting exemptive relief from section 22(d) in many circumstances where applications must now be filed and would permit greater competition in the pricing of mutual fund shares.

If the proposed rule is adopted, rules 22d–1 through 22d–5 will become superfluous and, therefore, obsolete. Accordingly, the Commission proposed to rescind them should the proposed rule be adopted.

DATE: Comments must be received by August 1, 1983.

ADDRESS: Send comments in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549 (Reference to File No. S7–973). All

VOL 48 ISS 86 MY 3 1983 UMI

comments received will be available for public inspection and copying in the Commission Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Bruce Mendelsohn, Chief, (202) 272–2048 or Jeffrey S. Puretz, (202) 272–3036, Office of Regulatory Policy, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for public comment proposed rule 22d–6 under the Investment Company Act of 1940 ("Act") [15 U.S.C. 80a–1 et seq.] which would exempt, under certain conditions, a registered investment company that is the issuer of redeemable securities, a principal underwriter of such securities, or a dealer therein from section 22(d) of the Act [15 U.S.C. 80a–22(d)]. The Commission believes that the proposed rule is consistent with the purposes of the Act, as discussed below. It further believes that the rule would result in no diminution of investor protection while both obviating the necessity for investment companies to file a substantial number of applications requesting exemption from section 22(d) of the Act and permitting greater competition in the pricing of the shares of investment companies.

This release summarizes the legislation and administrative history of section 22(d) of the Act, the reasons for the proposed rule, and the provisions of the proposed rule. The appendix to this release discusses these matters in detail. The appendix will be published in the SEC Docket; a copy of the appendix may be obtained directly from the Commission by contacting the above-mentioned contact persons.

Background

Section 22(d) of the Act prohibits a registered investment company and a principal underwriter [1] of or a dealer [2] in its redeemable securities from selling such securities to "any person" [3] except at a current public offering price described in its prospectus.[4] This section effectively prohibits price competition in sales loads on mutual fund shares at the retail level.

1. Purposes of Section 22(d)

Since there is relatively little in the Act's legislative history to explain the purpose of section 22(d),[5] it is not clear that retail price maintenance was itself the purpose of the section. In the years since the enactment of the Act, arguments have been advanced that section 22(d) was intended as a means to prevent three abuses that existed in the distribution of investment company shares prior to 1940. These arguments are discussed in the appendix to this release and are summarized herein.

The first of the abuses that the Act has been said to address was riskless trading by insiders and the dilution of fund assets that resulted under the system of backward pricing utilized prior to passage of the Act and for many years thereafter. Under the backward pricing system, the price of a mutual fund share was based upon the fund's net asset value per share determined at the close of the market on the previous day. If the market gained, an investor could purchase fund shares near the end of the day at the price based upon the previous day's valuation, knowing that the net asset value of the shares was greater than the price he was paying, thereby diluting the interests of existing shareholders. the transaction could be made riskless by redeeming the shares the following day, before a new (and possibly lower) price reflecting that day's market activity was established. While payment of a sales load made riskless trading impossible, since the sales load would more than offset any profit that could result from one day's increase in the value of a fund's shares, certain insiders and favored customers could often purchase fund shares without paying a sales load. Since the overwhelming majority of open-end funds at the time of the act were load funds, the enactment of section 22(d) greatly reduced the possibility of dilution occurring from such riskless trading practices by requiring all investors to pay the same sales load.

The second purpose which has been suggested for section 22(d) was to avoid disruption in the orderly distribution of mutual fund shares and the development of a secondary market in such shares. Prior to 1940, authorized dealers who distributed a fund's shares were generally bound by contract with the principal underwriter to charge a single price described in the prospectus, and were not given the discretion to lower share prices. Non-contract dealers were able to compete with contractual dealers by paying investors wishing to sell shares a little more than the published redemption price and offering the shares at less than the published sales price. This situation apparently led to a somewhat active secondary market, the so-called "bootleg market," which is said to have resulted in the cancellation of many selling agreements between underwriters and contractual dealers and threatened to undermine the orderly distribution system.[6] Representatives of the industry have contended that an orderly distribution system under the control of the funds facilitates the funds' ability to offer constant redemption of their shares. It has been argued that section 22(d) was intended to preserve such orderly distribution by eliminating competition from non-contract dealers.

The third abuse arguably addressed by section 22(d) was discrimination among investors resulting from a fund charging different prices to different investors. While commentators have differed on whether section 22(d) was intended to address price discrimination,[7] it appears that Congress contemplated that more than one offering price could be charged different investors since it used the phrase "a current public offering price described in the prospectus" rather than "the price." In this regard, the Commission has long viewed volume and group discounts and other specified types of discounts as consistent with the purposes of section 22(d). It has granted a large number of exemptions by rule and by order premised on the theory that discrimination is not unjust, and thus the purpose of the section is not

[1] Section 2(a)(29) of the act [15 U.S.C. 80a–2(a)(29)] defines principal underwriter for an issuer of redeemable securities to be any underwriter who as principal purchases or has the right to purchase from such company securities for distribution, or as agent for such company sells such security to a dealer or the public or both.

Section 2(a)(40) of the Act [15 U.S.C. 80a–2(a)(40)] defines underwriter to be any person who purchases from an issuer with a view to the distribution of any security.

[2] Section 2(a)(11) of the Act [15 U.S.C. 80a–2(a)(11)] defines dealer to be any person engaged in buying and selling securities for his own account as part of a regular business.

[3] Section 2(a)(28) of the Act [15 U.S.C. 80a–2(a)(28)] defines person as a natural person or a company.

[4] Section 22(d) further provides that the prohibition against selling redeemable securities except at a current public offering price described in the prospectus does not apply to sales of such securities to a dealer, a principal underwriter, or the issuer of the securities where the securities are offered to the public by or through an underwriter.

J. 975, 980 (arguing that legislative history does not support prevention of discrimination as a purpose).

violated, if there is a rational basis for the variation in sales load. At the same time, the Commission has expressed concern that retail price maintenance may be unfair when investors requiring different levels of sales efforts must be charged the same sales load.[8]

2. Prior Studies and Recommendations

The effect of section 22(d) on the pricing and distribution of mutual fund shares has been the subject of substantial analyses and numerous reports by the Commission. A history of such matters is presented in the appendix, and the concerns of the Commission are summarized herein. In a report to Congress in 1966, the Commission noted that because section 22(d) prohibits competition among retail dealers, competition among distributors (principal underwriters) had had the effect of raising rather than lowering mutual fund share prices to investors. Underwriters, instead of competing for sales through lower sales loads to investors, had competed for the favor of the retailers who sell the shares by increasing the sales loads and thus the retailers' compensation.[9]

In the 1970 amendments to the Investment Company Act, Congress adopted an amendment to section 22(b) of the Act [15 U.S.C. 80a–22(b)] that gave rulemaking authority with Commission oversight to the National Association of Securities Dealers, Inc. ("NASD") to prevent mutual fund shares from being sold at excessive rates. In its 1971 letter of transmittal accompanying its Institutional Investor Study Report, the Commission stated that "fixed rates on orders (for fund shares) above a given size can no longer be justified" and suggested that ways of reducing costs of acquiring shares be found.[10]

The Commission held hearings in 1973 to obtain the views of interested persons with respect to what changes in mutual fund distribution might be desirable. At those hearings, most industry representatives opposed repeal of section 22(d). After the hearings, the Commission submitted another report to Congress, recommending that it be permitted to pursue a program that would lay the groundwork for a gradual and orderly introduction of price competition in the sales of mutual fund shares through administrative action.[11] Since announcing that program, the Commission has taken a number of steps toward modifying regulation of the mutual fund distribution system, including easing restrictions on mutual fund advertising and approving an NASD rule amendment that set a ceiling on sales loads and tied incremental increases in sales loads to the services offered by a dealer. In addition, the Commission has adopted several additional rules exempting certain transactions from the provisions of section 22(d) and has been receptive to applications for exemptive relief.[12] The staff has also taken no-action positions in numerous situations in which funds have stated their intention to use reduced sales loads.

Discussion

1. Reasons for the Rule

a. Appropriate Business Judgment Determination

Over the last few years, the Commission has implemented a policy of reducing its involvement and that of its staff in regulating the decisions of investment companies to the extent that such reduced involvement is consistent with investor protection. The Commission views the decision to establish a pricing system that permits variations in sales loads to be one that is particularly appropriate for management to make. Since rule 22c–1 [17 CFR 270.22c–1], as discussed hereafter, has eliminated the possibility of dilution resulting from the "riskless trading" practices described earlier, the determination of whether to permit variations in sales loads now involves basically a consideration of marketing factors. Investment companies and their underwriters are in the best position to know and assess such factors.

The Commission further believes that the determination of whether to permit price variations is a business judgment determination in which it is appropriate for the Commission to reduce its involvement because sufficient investor protections are provided elsewhere in the securities laws, as discussed in the appendix and summarized herein. Section 15(c) of the Act [15 U.S.C. 80a–15(c)] requires that the terms of any underwriting contract or of the renewal of any underwriting contract be approved by the vote of a majority of directors who are neither parties to such contract nor interested persons of such parties. Inasmuch as the terms of such a contract would reflect any price variations that an underwriter has determined to permit, the directors would be apprised of such variations and would have an opportunity to consider the effect of such variations on the fund.

Where fund shares are to be sold at negotiated loads, further investor protections against excessive or unjust discriminatory prices are provided by provisions of the Securities Act of 1933 [15 U.S.C. 77a et seq.], the Securities Exchange Act of 1934 [15 U.S.C. 78a–1 et seq.], and NASD rules, which provide disclosure requirements and professional standards for brokers-dealers, in addition to limiting the maximum amount of sales loads.

b. Changes in Circumstances

Since enactment of the Act, circumstances have changed so as to diminish substantially several concerns relating to the alleged purposes of section 22(d). These changed circumstances, reflecting both regulatory and marketplace developments, are discussed in the appendix and summarized herein.

As noted above, the concern of dilution of fund assets arising from "riskless trading" by insiders was addressed by the adoption of rule 22c–1 under the Act [17 CFR 270.22c–1], which prohibits "backward pricing" and requires instead "forward pricing" whereby the price of shares is based upon a fund's net asset value per share next determined after receipt of an order for purchase (generally at the close of business on the day of a sale), rather than the previous day. Rule 22c–1, by eliminating the possibility of a purchaser or seller taking advantage of any discrepancy between a fund's current net asset value and a sales price based upon the previous day's net asset value, renders retail price maintenance unnecessary as a method of preventing dilution from riskless insider trading.

The concern of unjust price discrimination among purchasers has been substantially dispelled by the results achieved under Securities Exchange Act rule 19b–3 [17 CFR 240.19b–3], which, since its adoption in 1975, has prohibited the national securities exchanges' prior practice of requiring their members to charge fixed brokerage commissions. Market experience under rule 19b–3 has shown that commission rates have fallen into rational patterns that reflect the sales costs involved and the services provided.

The concern of maintaining an orderly market in mutual fund shares should be considered in light of industry and regulatory developments. It has been argued since before enactment of the

[12] The Commission receives approximately 30 applications per year requesting exemptive relief from section 22(d) or the rules thereunder.

Act that an ongoing continuous sales effort by contractual dealers is necessary to prevent the funds from experiencing net redemptions of their shares, and that a secondary market would undermine the contractual distribution system. The number and size of no-load funds, however (even excluding money market funds), has grown over the years. In this regard, because of regulatory changes, it is now possible to provide investors with more information through fund advertising. Moreover, as the Commission has relaxed the restrictions against retail price competition by rule and by order, funds have established numerous types of plans whereby fund shares are sold at a greater variety of reduced sales loads. These developments suggest that some mutual funds may find that it is in their best interests either to establish distribution plans that reflect greater price flexibility or to permit the dealers in their shares to negotiate sales loads with investors. In any event, mutual funds and their underwriters would seem to be in a better position than the Commission to make that determination. Under the proposed rule, funds that believe that retail price maintenance is desirable for them could continue it.

c. Cost

In the years since 1974, mutual funds have filed an increasing number of applications seeking exemptive relief from section 22(d) and requests for interpretation thereof.[13] Not only have funds incurred costs in preparing applications for exemption or requests for interpretive advice, but the processing of these applications and inquiries has imposed a substantial burden on the staff. Furthermore, there have undoubtedly been instances in which investment companies have not pursued a system of varied sales loads because of the cost and delay involved in applying for exemptive relief.[14] Accordingly, the Commission believes that it is appropriate to dispense with, or at least minimize, its involvement with decisions of mutual funds concerning the pricing of their shares and to permit investment companies the flexibility to determine what pricing system is best for them and their investors.

[13] In that time, the Division of Investment Management has issued, pursuant to delegated authority, over 100 orders of exemption. In addition, the Division has answered over 100 written interpretive requests and numerous other inquiries concerning the section and the rules adopted thereunder.

[14] The Commission's records show no applications have been submitted for orders permitting negotiated sales loads.

2. The Proposed Rule

The proposed rule provides that a company may adopt a pricing system that includes rates (1) described in a schedule, (2) that are determined by a process of negotiation, or (3) which combine such two methods.[15] This provision is intended to give investment companies maximum flexibility in establishing the pricing of their shares. As state previously, rules 22d–1 through 22d–5 permit companies some flexibility, subject to various conditions, to establish certain scheduled variations in sales loads. Proposed rule 22d–6 would expand this flexibility to permit companies to establish any scheduled variation if the company complies with the conditions of the proposed rule. Rule 22d–6 would also provide that companies may permit negotiated sales loads subject to the same conditions, but only in those situations where the sales load is negotiated and agreed to at the time of purchase and not at the time of redemption.[16]

The conditions under the proposed rule are far more general in their terms than has been the case either in prior rules promulgated under section 22(d) or in individual orders exempting companies from the provisions of section 22(d). This departure reflects the judgment that investment companies should determine what factors are important in determining the best pricing system for their shares. The Commission believes that the proposed rule provides flexibility to registrants without sacrificing appropriate investor protection, and is consistent with the purposes fairly intended by the policy and provisions of the Act, including section 22(d). It does not require mutual funds to sell their shares pursuant to a distribution plan that permits reduced or negotiated sales loads or to change their current distribution system. It is a permissive rule that recognizes that under certain conditions designed to protect investors, mutual funds may unfix the sales loads charged on their redeemable securities. If a fund wishes to introduce new variations or negotiation in its distribution, it would have to comply with the rule's conditions; otherwise, it must continue to sell its securities at uniform prices [17] or seek an order exempting it from section 22(d).

As discussed more fully in the appendix, the proposed rule would require an investment company to set forth in its prospectus specific information concerning the various prices of its securities or the manner in which such amounts can be determined, and where applicable, that the sales load is subject to negotiation. The rule would also require that the prospectus describe the circumstances under which either a scheduled or negotiated sales load would be available.

Several additional disclosures requirements would be imposed where a company's sales load is subject to negotiation. The prospectus would have to disclose the maximum sales load that may be charged. Prior to final agreement on the price, the seller would have to disclose the sales load as a percentage of the total price paid for the shares and as a percentage of the net amount invested. The principal underwriter would be required either to undertake by written agreement to comply with the requirements of this provisions, or, if the company's shares are distributed by the underwriter through independent dealers, to enter into written agreements with such dealers whereby the dealers undertake to comply with such provisions.

As mentioned above, the Commission has adopted in the past rules 22d–1 through 22d–5 exempting certain transactions from the provisions of section 22(d) in limited circumstances. Since proposed rule 22d–6 would exempt a much broader range of transactions, present rules 22d–1 through 22d–5 would become superfluous and, therefore, obsolete. Accordingly, the Commission proposes to rescind those rules if it adopts rule 22d–6 as proposed, effective on the date of adoption.

[15] For instance, a company may sell its shares at sales loads determined by a sliding scale of specific percentages up to a certain break point and by negotiation above that break point. Or, it may decide to set forth specific sales loads for shares purchased directly from the company, principal underwriter, or transfer agent but to permit dealers in the company's shares to negotiate sales loads. In those situations in which a fund decides to allow dealers the flexibility to negotiate sales loads, but sets forth in its prospectus specific sales loads with respect to purchases directly from the company, the transfer agent, or the principal underwriter, it would be the position of the Commission that under general anti-fraud theories, a dealer could not charge a purchaser a higher sales load than is available directly from the fund without adequate disclosure of such fact. *See* Letter to Charles Schwab & Co., Inc., (pub. avail. February 8, 1982), permitting a broker-dealer to charge for services in connection with the purchase of shares of a no-load mutual fund where the fee is reasonable for the services provided, taking into consideration that the investor could acquire shares directly.

[16] An investor who negotiates the sales load at redemption is in an inferior bargaining position and may be subject to overreaching by the company or sales personnel. This situation would arise most often where shares are sold subject to a deferred sales load.

[17] In this regard, section 22(d) would continue to require that investment company shares be sold only at uniform prices described in the prospectus. Since the proposed rule would exempt investment companies, principal underwriters, and dealers only to the extent and under such conditions as determined by the Commission to be consistent with the protection of investors, in the Commission's view, existing antitrust immunity afforded by section 22(d) would not be affected by the proposed rule. See, *United States* v. *National Association of Securities Dealers*, 422 U.S. 694, 699 (1975).

Text of Proposed Rule

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

It is proposed to amend Part 270 of Chapter II of Title 17 of the Code of Federal Regulation by adding § 270.22d–6 to read as follows:

§ 270.22d–6 Exemption from section 22(d) to permit sales of redeemable securities at prices which reflect varying sales loads.

A registered investment company that is the issuer of redeemable securities, a principal underwriter of such securities or a dealer therein shall be exempt from the provisions of section 22(d) to the extent necessary to permit the sale of such securities at prices that reflect variations in or elimination of the sales load which are established pursuant to a schedule that offers such variations in or elimination of the sales load to particular classes of investors or transactions, or pursuant to negotiation at the time of purchase between the seller and the investor, or pursuant to a combination of such two methods, *Provided* that the following conditions are met:

(a) The prospectus of the company discloses:

(1) The amounts of the sales loads or the method by which such amounts can be readily ascertained; or that the sales load is subject to negotiation; and

(2) The circumstances under which such sales loads or negotiation shall be available; and

(b) If the company's prospectus provides that the sales load is subject to negotiation,

(1) The prospectus of the company discloses the maximum sales load that may be charged; and

(2) The seller discloses, prior to final agreement on a particular price, the sales load, if any, as a percentage of the total price paid and the percentage of the net amount invested to a purchaser of the company's shares; and

(3) The negotiation is permitted pursuant to a written agreement between the company and the principal underwriter of its shares whereby the underwriter undertakes either:

(i) To comply with the requirements of paragraph (b)(2) of this section; or

(ii) If the shares are distributed through independent dealers, to enter into a written agreement with any dealer in the company's shares whereby the dealer undertakes to comply with the requirements of paragraph (b)(2) of this section.

(4) The exemption provided by this section shall be available to the company and the principal underwriter of its shares notwithstanding a failure of a dealer in the company's shares to make the disclosure required by paragraph (b)(2) of this section, *Provided* that:

(i) The company and the principal underwriter have no reason to believe that a dealer is not complying with the requirements of paragraph (b)(2), or where there is reason to believe that a dealer is not so complying, reasonable steps are taken to end such non-compliance; and

(ii) The company and the principal underwriter have complied with all the provisions of this section.

Statutory Basis

Rule 22d–6 would be adopted by the Commission pursuant to the authority granted the Commission in sections 6(c) [15 U.S.C. 80a–6(c)] and 38(a) [15 U.S.C. 80a–37(a)] of the Act.

Summary of Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 regarding proposed rule 22d–6. The Analysis notes that the proposed rule may have a significant economic impact on small investment companies and small broker-dealers by obviating the need for such entities to file applications for exemptive relief if they wish to employ variations in sales loads other than those permitted under current rules. The Analysis further states that if the proposed rule generates greater retail competition in the sale of mutual fund shares, such competition may have an adverse economic impact on small investment companies and broker-dealers, citing testimony by representatives of independent broker-dealers at Commission hearings in 1973, who argued against repeal of section 22(d). The Analysis submits that it is difficult to assess whether the proposed rule would cause greater competition in the retail sales of fund shares, and that it is difficult to assess whether any such increased competition would affect such entities, and if so, how they would be affected.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Jeffrey S. Puretz, Office of Regulatory Policy, Securities and Exchange Commission, Room 5103, 450 Fifth Street, N.W., Washington, D.C. 20549.

By the Commission.

Dated: April 22, 1983.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-190 (Texas—6 Addition IV)]

Texas; High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Travis Peak Formation in Nacogdoches County, Texas, be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on June 13, 1983.

Public Hearing: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on May 13, 1983.

VOL 48 ISS 86 MY 3 1983 UMI

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Walter W. Lawson, (202) 357–8556.

SUPPLEMENTARY INFORMATION:

In the matter of High-Cost Gas produced from tight formations; notice of proposed rulemaking by Director, OPPR; Docket No. RM79–76–190 (Texas—9 Addition IV).

Issued April 28, 1983.

I. Background

On March 14, 1983, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Travis Peak Formation located in Nacogdoches County, Texas, be designated as a tight formation. The Commission previously adopted recommendations that portions of the Travis Peak Formation in the Sym-Jac, West (Hosston) Field (Order No. 154 issued June 10, 1981, in Docket No. RM79–76 (Texas—9)) and the Bear Grass Area of east Texas (Order No. 180 issued October 8, 1981, in Docket No. RM79–76 (Texas—9 Addition)) be designated as tight formations. There are currently under consideration recommendations that additional areas of the Travis Peak Formation be designated as tight formations (all of Texas Railroad Commission Districts 5 and 6 in Docket No. RM79–76 (Texas—9 Addition II) and the Melrose, South (Travis Peak) Field in Docket No. Rm79–76–171 (Texas—9 Addition III). Notices of Proposed Rulemaking issued December 15, 1981 and March 14, 1983, respectively). Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that an additional area of the Travis Peak be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas' recommended addition to the Travis Peak Formation is located in the Martinsville (Travis Peak) Field immediately south of the town of Martinsville in eastern Nacogdoches County, Texas, Railroad Commission District 6. The recommended area includes all acreage within a 2.5 mile radius of the Getty Oil Company, Manuel Herrera No. 1 well located in the Jose Huerra Survey, A–289, and is on the south flank of the Sabine uplift. The above named well is the only well producing from the formation; however, two other wells in the recommended area penetrated the formation but were abandoned.

The top of the Travis Peak Formation is encountered at subsea depths ranging from approximately 8,100 feet on the north to 8,500 feet on the south, in the recommended area.

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing on December 9, 1982, convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing state and federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980) notice is hereby given of the proposal submitted by Texas that the Travis Peak Formation as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before June 13, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–190 (Texas—9 Addition IV), and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NW., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than May 13, 1983.

Lists of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposed to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18 Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(36)(iv) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.* * * *

(36) *Travis Peak Formation in Texas. RM79–76 (Texas—9)* * * *

(iv) *Martinsville (Travis Peak) Field.*

(A) *Delineation of formation.* The designated portion of the Travis Peak Formation is located immediately south of the town of Martinsville in eastern Nacogdoches County, Texas, Railroad Commission District 6, and includes all of the area within a 2.5 mile radius around the Getty Oil Company, Manuel Herrera well No. 1 located in the Jose Huerra Survey, A–289.

(B) *Depth.* The designated portion of the Travis Peak is found at sub-sea depths ranging from approximately 8,100 feet on the north to 8,500 feet on the south.

BILLING CODE 6717–01–M

DELAWARE RIVER BASIN COMMISSION

18 CFR Part 410

Proposed Amendments to Comprehensive Plan

AGENCY: Delaware River Basin Commission.

ACTION: Proposed rules and public hearings.

SUMMARY: Notice is hereby given that the Delaware River Basin Commission will hold three public hearings in accordance with this notice to receive comments on proposed amendments to the Commission's Comprehensive Plan relating to water quality standards; water supply policy; diversions, releases and reservoir management during drought; water conservation policy; and a program of augmented conservation releases.

These proposed amendments stem from recommendations in the Commission's Final Level B Study and from a recent agreement by the Governors of the Commonwealth of Pennsylvania, the States of New York, New Jersey and Delaware, and the Mayor of New York City entitled *Interstate Water Management Recommendations of the Parties to the U.S. Supreme Court Decree of 1954 to the Delaware River Basin Commission Pursuant to Commission Resolution 78–20.* The 1954 Decree had proved to be inadequate in times of drought, exacerbating long-standing conflicts among the down-basin states and New York City over water use.

The proposed amendments are designed to apportion available water during shortages, assure that stream flow levels repel ocean water salt during droughts, institute conservation measures and protect fisheries and recreational uses.

DATES: The public hearings are scheduled as follows: May 25, 1983 at 3:00 p.m.; June 2, 1983 from 1:00 to 5:00 p.m., resuming at 7:00 p.m.; and June 3, 1983 from 1:00 p.m. to 5:00 p.m., resuming at 7:00 p.m.

Written testimony submitted to the Secretary by June 15, 1983 will be included in the hearing record.

ADDRESS: The May 25, 1983 hearing will be held in the Pennsylvania West Room of the Philadelphia Centre Hotel, 1725 Kennedy Boulevard, Philadelphia, Pennsylvania.

The June 2, 1983 hearing will be held in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey.

The June 3, 1983 hearing will be held in the Banquet Hall of the Karsten Inn on Route 6 in Port Jervis, New York.

Written comments should be submitted to Susan M. Weisman, Delaware River Basin Commission, P.O. box 7360, West Trenton, New Jersey 08628.

FOR FURTHER INFORMATION CONTACT: Susan M. Weisman, Commission Secretary, Delaware River Basin Commission, Telephone 609–883–9500.

SUPPLEMENTARY INFORMATION: Explanatory material relating to these proposed amendments to the Comprehensive Plan may be examined at the Commission's offices. Persons wishing to testify at these hearings are requested to notify the Secretary in advance.

The subjects of the hearings will be as follows:

I. Amendments to the Comprehensive Plan Relating to Water Quality Standards

Article 3 of the Comission's *Basin Regulations—Water Quality* contains the Comprehensive Plan's water quality standards. Within this Article are certain salinity control standards for the Delaware estuary. The Commission is now considering amendments to its Comprehensive Plan and *Basin Regulations—Water Quality* to revise the salinity control standards. Specifically, it is proposed to:

1. Amend the Comprehensive Plan and subsection 3.30.3–C.12 of the *Basin Regulations—Water Quality* to read:

12. *Chlorides.* Maximum 30-day average concentration of 180 mg/l at River Mile 98.

2. Insert new Subsection 3.30.3–C.14 to read:

14. *Sodium.* Maximum 30-day average concentration of 100 mg/l at River Mile 98.

3. Delete Subsection 3.30.4–C.12.

II. Amendments to the Comprehensive Plan Relating to Water Supply Policy

Article 2 of the *Water Code of the Delaware River Basin* includes Commission policy relating to the conservation, development and utilization of Basin water projects. The planning and design of facilities and programs are dependent upon critical conditions during periods of drought. As droughts vary in severity, it is common practice to select, for planning and design of water supply facilities and programs, a drought of sufficient severity to assure the provision of dependable water supplies. Although past DRBC practice has been to assume the most severe drought of record, the Comprehensive Plan does not currently specify a drought criterion for planning and design. The Commission is now considering an amendment to the Comprehensive Plan to add a drought criterion, as recommended in the Final Level B Study and by the parties to the 1954 U.S. Supreme Court Decree. It is proposed to:

1. Amend the Comprehensive Plan and Article 2 of the *Water Code of the Delaware River Basin* by the addition of a new section 2.400 to read as follows:

2.400 *Design Streamflow Criteria*

2.400.1 *Water Supply.* The drought of record, which occurred in the period 1961–1967, shall be the basis for determination and planning of dependable water supply.

2.400.2 *Salinity Control.* The drought of record, which occurred in the period 1961–1967, shall be the basis for planning and development of facilities and programs for control of salinity in the Delaware estuary.

2.400.3 *Waste-Assimilative Capacity.* (See Section 4.30.7.7 of *Basin Regulations—Water Quality*—Administrative Manual—Part III).

III. Amendment to the Comprehensive Plan Relating to Diversions, Releases, and Reservoir Management During Drought

Diversions of water rom the Delaware River Basin to New York City and northeastern New Jersey, as well as downstream releases from the City's upper Basin reservoirs, are controlled by the 1954 amended Decree of the U.S. Supreme Court, except as may be modified during a Commission-declared state of emergency resulting from a drought or catastrophe pursuant to Section 3.3 of the Delaware River Basin Compact. Such a drought emergency has been declared on two occasions, and experience during these emergencies has shown the value of a drought operation formula setting forth diversion rates and streamflow objectives for guidance of reservoir operations. The Commission is now considering an amendment to the Comprehensive Plan to adopt such a drought operation formula. Specifically, it is proposed to:

1. Amend the Comprehensive Plan and Article 2 of the *Water Code of the Delaware River Basin* by the addition of new sections 2.5.3 and 2.5.4 to read as follows:

*2.5.3 *Schedule of Phased Reductions in Diversions, Releases and Flow Objectives During Drought*

A. Criteria Defining Conditions

For purposes of water management pursuant to Section 3.3 and Article 10 of

VOL 48 ISS 86 MAY 3 1983 UMI

the Compact, diversions of water from the Delaware River Basin by the City of New York and State of New Jersey, compensating reservoir releases from the New York City Delaware Basin Reservoirs, Reservoir releases from Beltzville Reservoir, Blue Marsh Reservoir, and Other reservoirs under the jurisdiction and control of the Commission, and streamflow objectives at the USGS gaging stations located at Montague, New Jersey, and Trenton, New Jersey, shall be governed by a schedule based upon a differentiation between "normal", "drought warning", and "drought" conditions defined by the combined storage in the Cannonsville, Pepacton and Neversink Reservoirs as set forth in Figure 1 entitled "Operation Curves for Cannonsville, Pepacton and Neversink Reservoirs". The division of the drought-warning zone into upper and lower halves shall be defined as a physically equal division, or 20 billions of gallons in each zone.

B. Schedule of Reductions

The schedules of phased reductions set forth in Tables 1 and 2 shall govern (1) the maximum allowable rates of diversion of waters from the Delaware River Basin by the City of New York and State of New Jersey; (2) the minimum compensating releases to be made by the City of New York from its reservoirs in the upper Delaware Basin; and the streamflow objectives at the USGS gaging stations located at Montague, New Jersey and Trenton, New Jersey.

During "drought" conditions as defined by the Figure entitled "Operation Curves for Cannonsville, Pepacton and Neversink Reservoirs", the streamflow objectives at the Montague and Trenton gaging stations shall be established as set forth in Table 2, in accordance with the seven-day average location of the 250 mg/l isochlor (the "salt front") in the Delaware Estuary.

C. Diversion Allowances and Release Requirements

(1) The City of New York may divert waters from the Delaware Basin at a maximum rate equivalent to the quantities set forth in Table 1.

(2) The State of New Jersey may divert waters from the Delaware River Basin, from the Delaware River or its tributaries in New Jersey, at a maximum rate equivalent to the quantities set forth in Table 1.

Downstream of R.M. 82.9	1,100	1,100	1,100	2,500	2,500	2,500

[1] Measured in statute miles along the navigation channel from the mouth of Delaware Bay.

(3) The City of New York shall release water from one or more of its storage reservoirs in the upper Delaware Basin in such quantities designed to maintain the minimum basic rates of flow at the USGS gaging station located at Montague, New Jersey, as set forth in Tables 1 and 2.

D. Computation of Diversions

(1) Diversions by the City of New York during "normal" conditions as defined by Figure 1, shall be computed as provided in Section III.A.4. of the Amended Decree of the U.S. Supreme Court in New Jersey v. New York, 347 U.S. 995 (1954). At no time during a twelve-month period of the Water Year, commencing June 1, shall the aggregate total quantity diverted by the City of New York, divided by the number of days elapsed since the preceding May 31, exceed the maximum permitted rate of diversion.

(2) Diversions by the State of New Jersey during "normal" periods as defined by Figure 1 shall be computed as provided in Section V.3 of the amended Decree of the U.S. Supreme Court in New Jersey v. New York, 347 U.S. 995 (1954). The total diversion by the State of New Jersey shall not exceed an average of 100 mgd in any calendar year. During the months of July, August, September, and October of any year, diversions by the State of New Jersey shall not exceed 100 mgd as a monthly average, and not more than 120 million gallons in any day shall be withdrawn.

(3) Diversions by the City of New York and State of New Jersey set forth in Table 1 during "drought warning" and "drought" conditions as defined by Figure 1 shall be computed as a daily running average, commencing on the day such drought warning or drought operations become effective, as provided in subsection E of this Section. If the allowable diversion for any condition period following entry into drought warning operations is not fully used, the unused portion may not be credited or used during subsequent periods.

(4) Upon return to normal conditions operations, following a period of drought warning or drought operations, diversions by the City of New York and State of New Jersey shall be computed as averages commencing upon the date of return to normal operations.

E. Effective Period for Drought Operating Schedule

(1) The schedule of diversion, release and streamflow objectives for "drought warning" operations as provided in Subsection B shall go into effect automatically whenever the combined storage in the New York City Delaware Basin Reservoirs declines below the drought warning line defined in Figure 1, and remains below that line for five consecutive days.

(2) The schedule of diversions, releases and streamflow objectives for "drought" operations as provided in Subsection B shall go into effect immediately whenever the combined storage in the New York City Delaware Basin Reservoirs declines below the drought line defined in Figure 1, and remains below that line for five consecutive days.

(3) When the combined storage in the New York City Delaware Basin Reservoirs (including the projected water runoff equivalent of actual snow and ice within the watersheds tributary to the reservoirs) reaches a level 15 billion gallons above the drought warning line as defined in Figure 1, and remains above that level for five consecutive days, the drought warning and drought operations schedules set forth in Subsection B shall automatically terminate, and normal operations shall be resumed as provided in the Amended Decree of the U.S. Supreme Court in New Jersey v. New York, 347 U.S. 995 (1954).

(4) Pursuant to Section 3.3(a) of the Compact, the Parties to the Decree of the U.S. Supreme Court in New Jersey v. New York, 347 U.S. 995 (1954), have given their unanimous consent to adoption and implementation by the Commission of the drought operation schedules provided in this section. The Parties have agreed that the drought operation formula will go into effect automatically, and be binding on parties for not less than 180 days following the triggering of drought warning operations, unless terminated automatically by improved storage conditions as provided in Subsection E.3. During the 180-day period following triggering of drought warning operations, authorized representatives of the City of New York, States of Delaware, New Jersey, and New York, and Commonwealth of Pennsylvania, as parties to the U.S. Supreme Court Decree, shall convene no less frequently than once each month to review current conditions, and they may extend, modify, or extend as modified the schedules provided in this section. If no unanimous agreement as to a continuing drought operation formula is reached within the 180-day period, all Parties shall be released from the terms of the formula and schedules and may pursue their rights and obligations under the Delaware River Basin Compact and the U.S. Supreme Court Decree.

2.5.4 *Drought Emergency Actions*

A. *Criteria Defining Conditions*

For purposes of water management pursuant to Section 3.3 and Article 10 of the Compact, the determination of drought warning and drought conditions shall be based upon the combined storage in the Cannonsville, Pepacton and Neversink Reservoirs, in accordance with Figure 1, entitled "Operation Curves for Cannonsville, Pepacton and Neversink Reservoirs". The division of the drought-warning zone into upper and lower halves shall be defined as a physically equal division, or 20 billions of gallons in each zone.

B. Drought Emergency Declaration

It is the policy of the Commission that a drought emergency will be declared for purposes of imposing mandatory in-basin conservation measures and other appropriate actions whenever combined storage in the New York City-Delaware Basin Reservoirs falls into the drought zone for five consecutive days as defined in Figure 1. Termination of a drought emergency will be considered by the Commission whenever combined storage in the New York City-Delaware Basin Reservoirs reaches a level of 40 billion gallons above the drought warning line as defined in Figure 1 and remains above that line for 30 consecutive days. The drought emergency will be terminated by the Commission whenever the combined storage in the New York City-Delaware Basin Reservoirs reaches 40 billion gallons above the drought warning line defined in Figure 1 and remains above that line for 60 consecutive days, unless the Commission unanimously agrees to extend the emergency.

C. Effect of Policy

This policy is not intended to extend, impair, or conflict with the Commission's authority under the Compact to declare or terminate a drought emergency or water-shortage emergency in the Basin, or subregion thereof, in other instances as conditions may require.

IV. Amendment to the Comprehensive Plan Relating to Water Conservation Policy

Article 2 of the *Water Code of the Delaware River Basin* includes Commission policy relating to the conservation of water. Current policy focuses on total water use throughout the Basin, emphasizing the importance of overall reduction and maximum efficiency of use. While conservation measures can provide significant benefits at any time, conservation during drought periods is especially critical. The distinction between depletive water uses (i.e., uses which permanently remove water from the Basin by evaporation, exportation and other routes) and water which is used, treated and returned to a watercourse is essential because of flow-salinity relationships in the Delaware Estuary and the need to maintain minimum fresh water flows during drought. The Commission is now considering an amendment to the Comprehensive Plan to add policy relating to depletive use reduction during drought, as recommended in the Final Level B Study Report and by the parties to the 1954 U.S. Supreme Court Decree. It is proposed to:

1. Amend the Comprehensive Plan and Article 2 of the *Water Code of the Delaware River Basin* by the addition of new Section 2.1.4 to read as follows:

2.1.4 *Depletive Use Reduction During Drought.* It shall be the policy of the Commission that conservation measures in the Basin designed for implementation during drought periods shall be based upon the objective of reducing overall depletive use of fresh water by 15 percent.

V. Application for Approval of the Following Project Pursuant to Section 3.8 of the Delaware River Basin Compact

New York State Department of Environmental Conservation (D–77–20 CP REVISED). A program to continue on a permanent basis, as conditioned, augmented conservation releases from the New York City Delaware River Basin Reservoirs. The purpose of the program, in effect since 1977 on an experimental basis, is to augment low streamflows below the Cannonsville, Pepacton and Neversink Reservoirs to protect and enhance the recreational use of waters affected by such releases. The proposed release levels are identical to the schedules contained in Rules and Regulations of the New York State Department of Environmental Conservation (Amended Part 671, Reservoir Releases Regulations: Cannonsville, Pepacton, and Neversink Reservoir adopted May 2, 1980). The release levels have been consented to by the City of New York in reliance upon mutual commitments made by the State and City of New York (Stipulation of Discontinuance in *The City of New York vs. The State of New York Department of Environmental Conservation*, Index No. 5840–80).

Susan M. Weisman,

Secretary.

April 22, 1983.

[FR Doc. 83-11346 Filed 5-2-83; 8:45 am]

BILLING CODE 6360-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 640

[Docket No. 82N–0400]

Additional Standards for Human Blood and Blood Products; Normal Serum Albumin (Human) and Plasma Protein Fraction (Human); Proposed Removal of Requirements for Samples, Protocols, and Official Release

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to remove the specific lot release requirements for both Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) to provide the agency the flexibility to modify or waive the lot release requirements for these two products when such requirements are unnecessary to assure that the products are safe and effective.

DATES: Comments by July 5, 1983. FDA is proposing that any final rule be effective on its date of publication in the **Federal Register.**

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph Wilczek, National Center for Drugs and Biologics (HFN–813), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301–443–1308.

SUPPLEMENTARY INFORMATION: Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) are injectable biological products regulated under section 351 of the Public Health Service Act (42 U.S.C. 262) and the regulations thereunder (21 CFR Parts 600 through 640). Both products are derived from fractionation of human blood and are similar in nature. Either product may be used in the treatment of a burn patient to overcome loss of fluids and sodium, in the treatment of a shock/trauma patient, or may be used to replace plasma proteins in a patient with a lower than normal level of protein in the blood.

In the **Federal Register** of May 31, 1977 (42 FR 27575), FDA published regulations for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) to safeguard the public health and to reflect changes in manufacturing techniques and testing procedures.

FDA is reviewing its existing regulations to reduce regulatory burdens on manufacturers. As a part of this review, the agency has determined that the specific lot release requirements in §§ 640.85 and 640.95 (21 CFR 640.85 and 640.95) for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human), respectively, are unnecessary to assure a safe, pure, potent, and efficacious product. Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) are stable biological preparations, free of the risk of hepatitis, whose manufacture and quality control testing are well understood.

The specific lot release regulations for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) supplement the general lot release regulation in § 610.2(a) (21 CFR 610.2(a)), which is applicable to any biological product. The specific lot release regulations for both products require the submission to FDA of a protocol (i.e., summary of the history of the manufacture of the lot), a specific quantity (sample(s)) of the product for required testing, and prohibit the manufacturer's release of the lot for distribution without notification of FDA's official release.

The general biologics regulation in § 610.2(a) authorizes the agency to require official lot release for any biological product at any time it believes lot release is necessary. Because the agency still has authority under § 610.2(a) to impose lot release requirements, the proposed removal of specific lot release requirements for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) will not affect FDA's authority to require offical lot release for these products when necessary. The agency now believes that it can obtain the same assurances of continued safety, purity, and potency for these products in a less costly and more efficient manner by using instead the authority for lot release in § 610.2(a). This proposal, if adopted, provides the agency the flexibility to modify or waive a manufacturer's lot release requirements when the safety and effectiveness of these products can be assured without such requirements.

The proposal would eliminate rather than impose a requirement and would, therefore, relieve a restriction within the meaning of 5 U.S.C. 553(d)(1) and 21 CFR 10.40(c)(4)(i). Accordingly, FDA intends that, if promulgated, the final rule will be effective upon the date of its publication in the **Federal Register**.

Accordingly, the agency is proposing to remove §§ 640.85 and 640.95 concerning samples, protocols, and official release for Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) and would rely instead on the provisions of § 610.2(a), as needed.

The agency has determined pursuant to 21 CFR 25.24(d)(10) (proposed December 11, 1979; 44 FR 71742) that this proposed action is of a type that does not individually or cumulatively have a singificant impact on the human evironment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In accordance with Executive Order 12291 and the Regulatory Flexibility Act, the agency has considered the impact of the proposal. FDA believes that the proposed removals will relieve a burden on manufacturers of Normal Serum Albumin (Human) and Plasma Protein Fraction (Human) by allowing more flexibility concerning lot-release requirements. The proposed removals are expected to have a favorable economic impact on the 15 current manufacturers of Normal Serum Albumin (Human) and the 6 current manufacturers of Plasma Protein Fraction (Human). The agency concludes that the proposed removals do not warrant designation as a major role under any of the criteria specified under section 1(b) of Excutive Order 12291. The agency certifies that a regulatory flexibility analysis is not required because the proposed removals would not have a significant impact on a substantial number of small entities.

List of Subjects in 21 CFR Part 640

Biologics, Blood.

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

§§ 640.85 and 640.95 [Removed]

Therefore, under the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C 262)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), it is proposed that Part 640 be amended by removing § 640.85 *Samples; protocols; official release* and § 640.95 *Samples; protocols; official release.*

Interested persons may, on or before July 5, 1983, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 20, 1983.

Joseph P. Hile,
Associate Commissioner for Regulatory Affairs.

[FR Doc. 83-11570 Filed 5-2-83; 8:45 am]
BILLING CODE 4160-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-4-FRL 2308-7; TN-009]

Approval and Promulgation of Implementation Plans; Tennessee; Prevention of Significant Deterioration, New Source Review in Nonattainment Areas, and Miscellaneous Regulations for Nashville/Davidson County

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The State of Tennessee has submitted regulations adopted by the Nashville-Davidson County Metropolitan Health Department (Metro) to meet EPA's requirements for the prevention of significant air quality deterioration (PSD) and New Source Review in nonattainment areas (NSR). In addition, the State has submitted reulations adopted by Metro concerning good engineering practice (GEP) stack height, control of volatile organic compounds (VOC), and an equivlent opacity standard for a source. All these regulations or actions apply to Davidson County, Tennessee or sources located there. EPA proposes to conditionally approve the above revisions with the understanding that changes will be made in the GEP stack height and the NRS regulations.

The effect of this proposed action will be to allow Metro to be responsible for the PSD, NSR, and GEP stack height requirements in Davidson County. In addition, Metro's submitted regulations will control emissions from certain VOC sources, and allow an equivalent opacity standard for a source (Ford Motor Company plant) in Davidson County.

DATE: EPA must receive your comments on or before June 2, 1983.

ADDRESS: Written comments should be addressed to Raymond S. Gregory of EPA Region IV's Air Management Branch (see EPA Region IV address below). Copies of the materials submitted by Tennessee may be examined during normal business hours at the following locations:

Division of Air Pollution Control
Tennessee Department of Public Health, 150 9th Avenue, North, Nashville, Tennessee 37203
Air Pollution Control Division, Metropolitan Health Department, Nashville-Davidson County, 311 23rd Avenue, North, Nashville, Tennessee 37203
Environmental Protection Agency, Region, IV, Air Management Branch, 345 Courtland Street, NE., Atlanta Georgia 30365.

FOR FURTHER INFORMATION CONTACT: Raymond S. Gregory, EPA Region, IV, Air Management Branch, at the address listed above or phone 404/881-3286 or FTS 257-3286.

SUPPLEMENTARY INFORMATION: On December 5, 1974, EPA published regulations for PSD under the 1970 amendments to the Clean Air Act. These regulations established a program for protecting areas with air quality cleaner than the national ambient air quality standards (NAAQS). Then, on August 7, 1977, the Clean Air Act Amendments of 1977 became law and changed the 1970 Act, mandating changes in EPA's PSD regulations and, among other things, requiring adoption of NSR regulations. In addition to mandating certain changes to EPA's PSD regulations, the new Clean Air Act, in sections 160–169, contains comprehensive new PDS requirements. These new requirements are to be incorporated by States into their implementation plans. On June 19, 1978 (43 FR 26380); May 13, 1980 (45 FR 31307); and August 7, 1980 (45 FR 52676), EPA promulgated guidance to assist States in preparing state implementation plan (SIP) revisions meeting the requirements for PSD and for NSR in, or near, nonattainment areas. Metro has complied with these requirements by adopting and submitting on October 9, 1981, a revised regulation No. 3. Revisions to this regulation were submitted on June 3 and November 22, 1982. Additional information clarifying portions of the regulation was submitted on September 1, and October 22, 1982.

Metro's PSD revisions do not provide that physical changes or changes in the method of operation of stationary sources that are not subject to PSD review will be subject to PSD review, if the changes themselves would be subject to PSD review if they were new sources, as is required by 40 CFR 51.24(b)(2)(i). EPA believes that this discrepancy is insignificant because Metro's revisions employ a dual source definition for PSD purposes rather than the plantwide definition required by 40 CFR 51.24(b)(6). As a result, any new unit added to an existing source will be subject to PSD review if the unit exceeds the minimum size limitations for new sources. EPA does not anticipate that many individual units will increase their emissions by more than 100% and escape PSD review due to this discrepancy. EPA therefore proposes to approve Metro's revisions despite this discrepancy.

Metro's PSD revisions also fail to require the reviewing authority to give the applicant written notification of its final permit determination and to make such notification available for public inspection. EPA believes that this discrepancy is also insignificant because, given the small size of Nashville-Davidson County, all interested parties should be involved in the permit process so closely that they will be aware of the final determination even without a specific notification provision in the regulations. EPA therefore proposes to approve Metro's provisions despite this discrepancy.

Metro's PSD revisions do not provide any protection for Class I areas. The revisions are currently approvable because there are no Class I areas within 100 km of Nashville-Davidson County. EPA will require Metro to revise its regulations to include Class I area protection at such time as a Class I area is designated within 100 km of Nashville-Davidson County.

The regulation applicable to NSR in or near nonattainment areas applies the "dual source" definition.

During EPA's review of the NSR revisions, an issue surfaced concerning the approvability of allowing offset credits for source shutdowns for other than replacement units.

EPA proposes to conditionally approve Metro's NSR revisions to allow for submittal of conforming amendments within twelve months from the date of conditional approval. If the twelve-month period expires and EPA is in the process of revising the new source review requirements, but has not finalized the changes, the Administrator could extend the deadline specified for corrective submittal.

Also, on June 3, 1982, revisions adopted by Metro concerning control of volatile organic compounds (VOC), GEP stack height and an equivalent opacity standard for two emission points at a Ford Motor Company plant were submitted. The VOC revisions include exempting methylene chloride from the definition of VOCs, inclusion of major sources of VQC as being major sources of ozone, and regulations applicable to surface coating of miscellaneous metal parts and products (aerospace components). The equivalent opacity standards were for emissions point 22 (25%) and 201 (45%) at the Ford Motor Company plant. These opacity standards are based on compliance with the mass emission standard.

The regulation adopted by Metro for GEP stack heights is approvable except for the lack of definition of "nearby" and "excessive concentration," and a provision required (40 CFR 51.18(e)) for notification of the public of the availability of certain fluid model demonstration studies and for providing an opportunity for public hearing for the same. EPA proposes to approve the GEP regulation on the condition that Metro adopt the required definitions and the provision for required public notice and opportunity for public hearing.

Although EPA is proposing conditional approval of Metro's revisions, it should be noted that certain portions of the revisions would require inclusion of vessel emissions in the review of certain stationary sources. In connection with EPA's recent amendments to SIP new source review requirements, 47 FR 27554 (June 25, 1982), several members of the maritime industry raised the claim that States are implicity preempted from requiring such reviews by the Ports and Waterways Safety Act, as amended, 46 U.S.C. 391(a) et seq. EPA is still considering these claims. Accordingly, a final decision on whether to approve the vessel emission provisions of the revised regulations will be deferred until this issue is resolved. It should also be noted, however, that any EPA decision on whether to approve these revisions, in so far as they apply to vessel emissions will not affect the applicability of the rules for purposes of State or local law.

Action: EPA has reviewed the submitted revisions and found them to be equivalent to present EPA requirements except for two areas. The first area is the lack of definitions of "nearby" and "excessive concentrations" and of a provision required in the GEP stack height regulations for notification of the public of the availability of certain fluid model demonstration studies and for providing an opportunity for public hearing for the same. EPA proposes to approve the GEP regulations on condition that Metro adopt the required revisions. The second area concerns the NSR regulations which must limit offset credits for source shutdowns to replacement units. EPA is today conditionally approving these two items based on the State's submitting the necessary conforming amendments by [twelve months from date of publication] and, during the

interim, implementing these regulations in a manner consistent with EPA requirements. Also, EPA is today proposing to approve the revisions by Metro for PSD, control of VOCs, and the equivalent opacity standard and is soliciting public comments on the proposed action.

As previously stated, written comments must be received on or before June 2, 1983. A thirty-day comment period is being used because the SIP submissions and the issues involved are not so complex as to warrant a longer comment period. At the close of the comment period, EPA will review all comments before publishing a notice of final rulemaking.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have significant economic impact on a substantial number of small entities (See 46 FR 8709).

Under Executive Order 12291, today's action is not major. It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA and any EPA response are available for public inspection at the locations listed in the **ADDRESSES** section of this notice.

Approval and Promulgation of Implementation Plans State of Missouri; 1982 Ozone and Carbon Monoxide Attainment Plan

Correction

In FR Doc. 83-9250 beginning on page 15493 in the issue of Monday, April 11, 1983, make the following corrections:

1. On page 15497, column one, paragraph designated as "4.", line four, "1978" should read "1987."

2. On page 15497, column one, paragraph designated as "4.", line seven, "plant" should read "plan."

3. On page 15497 column one, paragraph designated as "4", line nine, "contest" should read "context."

BILLING CODE 1505-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

43 CFR Part 426

Acreage Limitation: Bureau of Reclamation Rules and Regulations

AGENCY: Bureau of Reclamation, Interior.

ACTION: Proposed rules.

SUMMARY: The Bureau of Reclamation, Department of the Interior, proposes to issue rules and regulations establishing policies and procedures to meet the responsibilities of the Secretary of the Interior in administering title II of the Reclamation Reform Act of 1982 and other provisions of Federal Reclamation law. The rules and regulations will provide uniform criteria and procedures for all water user entities receiving irrigation water from Federal projects governed by Reclamation law. Public hearings on the proposed rules are being scheduled and will be announced in the Federal Register once dates and places have been established.

DATE: Comment period closes July 5, 1983.

ADDRESS: Comments on the proposed rules should be submited to: Vernon S. Cooper, Chief, Acreage Limitation Branch, Bureau of Reclamation, E&R Center, D-410, P.O. Box 25007, Denver, CO 80225; (303) 234-7195.

FOR FURTHER INFORMATION CONTACT: Vernon S. Cooper, Chief, Acreage Limitation Branch, Bureau of Reclamation, E&R Center, D-410, P.O. Box 25007 Denver, CO 80225; (303) 234-7195.

SUPPLEMENTARY INFORMATION: The Reclamation Reform Act of 1982, title II, Pub. L. 97-293 (96 Stat. 1261) was signed into law by President Reagan on October 12, 1982. The act is the culmination of an effort to modernize Reclamation law that began in the 95th Congress. The act, while retaining the basic principle of limiting the amount of land in the ownership which may receive water deliveries from Reclamation projects, introduces a new concept of full-cost pricing for some water deliveries. The act also makes a number of other changes to Reclamation law.

The Bureau of Reclamation initiated the preparation of rules and regulations shortly after the Reclamation Reform Act of 1982 was signed into law. During the period October 28 through December 14, 1982, comments were solicited on the suggested content of and format for the proposed rules. Toward this end a series of six public hearings were conducted throughout the West and in Washington, D.C., at which testimony form 50 individuals and organizations was presented. Numerous written comments were also received. All of these comments were carefully reviewed and considered in preparing the proposed rules.

The Interior Department requests special attention to the provisions of Section 426.9 Class 1 Equivalency. Interior is considering changing the method described herein for determining equivalency, using instead procedures reflecting physical factors alone. Consequently, Interior invites not only comments on this section but also proposals for a valid method of establishing equivalency based solely on physical factors influencing productivity.

Classification. The Department of the Interior considers these rules to be major rules under Executive Order 12291.

Regulatory Impact Analysis. Because of its potential economic impact, the Department has prepared a Preliminary Regulatory Impact Analysis of this regulation. The Preliminary Regulatory Impact Analysis examines the various alternatives the Department considered in preparing this rule, considers the cost and program implications of the alternatives, and explains the Department's reasons for making the choices resulting in the proposed rule. A copy of the Preliminary Regulatory Impact Analysis has been placed in the docket for this rulemaking and is available for public inspection in the offices of the Bureau of Reclamation in Boise, Sacramento, Boulder City, Salt Lake City, Amarillo, Billings, Denver, and Washington, D.C.

National Environmental Policy Act Compliance. A draft environmental assessment and draft FONSI (finding of no significant impact) which address the environmental impacts of these proposed rules and two other alternatives for administering the Reclamation Reform Act of 1982 have been prepared and are available for public review. Copies will be provided upon request. Comments on the assessment and FONSI may be incorporated with comments on the proposed rules. Decisions on the final disposition of these documents will be made following the public review process.

Small Entity Flexibility Analysis. The Department of the Interior certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Approximately 34,000 farm operations would come under the proposed rules. Of these, over 33,000 are farms of 960 acres or less and could be considered small entities. According to the Regulatory Impact Analysis prepared on the proposed regulations, the rules will not have a substantial effect on these farms. On the other hand, the rules will have a substantial effect on an estimated 900 farms presently operating more than 960 acres. However, those farms constitute less than 3 percent of all farm operations in Reclamation projects westwide.

Paperwork Reduction Act. The information collection requirements contained in § 426.10 will be submitted to the Office of Management and Budget for approval, as required by 44 U.S.C. 3501 *et seq.* The collection of this information will not be required until it has been approved by the Office of Management and Budget.

Authorship. The principal authors of these proposed rules are Phillip T. Doe and Vernon S. Cooper, Acreage Limitation Branch, Engineering and Research Center, Bureau of Reclamation.

List of Subjects in 43 CFR Part 426

Acreage limitation, Irrigation, Water resources.

Dated: April 29, 1983.

James G. Watt,

Secretary.

Part 426 is proposed to be added to read as follows:

PART 426—RULES AND REGULATIONS FOR PROJECTS GOVERNED BY FEDERAL RECLAMATION LAW

Sec.

426.1 Objectives.
426.2 Applicability.
426.3 Authority.
426.4 Definitions.
426.5 Contracts.
426.6 Ownership entitlement.
426.7 Leasing and full-cost pricing.
426.8 Operation and maintenance charges.
426.9 Class 1 equivalency.
426.10 Certification and reporting requirements.
426.11 Excess land.
426.12 Excess land appraisals.
426.13 Exemptions.
426.14 Residency.
426.15 Religious and charitable organizations.
426.16 Involuntary acquisition of land.
426.17 Land held by governmental agencies.
426.18 Commingling.
426.19 Water conservation.
426.20 Public participation.
426.21 Small reclamation projects.
426.22 Decisions and appeals.

Authority: Administrative Procedure Act, 60 Stat. 237, 5 U.S.C. 552; the Reclamation Reform Act of 1982, Pub. L. 97-293, Title II, 96 Stat. 1263, and the Reclamation Act of 1902, as amended and supplemented, 32 Stat. 388, (43 U.S.C. 371 et seq.).

§ 426.1 Objectives.

Reclamation law establishing terms and conditions pursuant to which project water may be supplied is designed:

(a) To provide viable farm opportunities on land receiving Reclamation project water.

(b) To distribute widely the benefits from the Reclamation program.

(c) To preclude the accrual of speculative gain in the disposition of excess land.

(d) To require reimbursement to the Federal Government of the full cost of providing irrigation water to landholdings which exceed established limits.

§ 426.2 Applicability.

(a) These proposed regulations are published for public comment. Subsequent to a review of the public comments, the rules will be modified as appropriate and shall become effective 30 days following publication in the Federal Register as final rulemaking.

(b) These regulations apply to all land subject to the acreage limitation and/or full-cost provisions of Reclamation law capable of receiving an irrigation water supply from a Reclamation project. (Included are excess lands, whether under recordable contract or not, and nonexcess land.)

(c) Sections 426.5 through 426.12 of these regulations apply variously to all districts subject to the acreage limitation and full-cost provisions of Reclamation law. The way in which they apply depends upon whether the district has: (1) A contract which was in force on October 12, 1982, (2) a contract which was amended after October 12, 1982, or (3) a contract which was entered into after October 12, 1982. Application of these sections will also vary depending upon whether an individual or entity subject to Reclamation law has made an irrevocable election to come under title II of the Reclamation Reform Act of 1982.

(d) The remainder of these rules, sections 426.13 through 426.22, may not apply to all districts, but if they do apply, they apply equally.

(e) In many cases, hypothetical examples illustrating the application of a specific rule have been provided. This approach is in direct response to the public's expressed need. The examples provided should not be construed, however, as being exclusive interpretations of a rule. They are provided only as an interpretative tool.

§ 426.3 Authority.

These rules and regulations are written under the authority vested in the Secretary by the Congress in the Administrative Procedure Act, 60 Stat. 237, 5 U.S.C. 552, the Reclamation Reform Act of 1982 (Pub. L. 97-293, 965 Stat. 1261), and the Reclamation Act of 1902, as amended and supplemented, 32 Stat. 388, 43 U.S.C. 371, et seq.

§ 426.4 Definitions.

As used in these rules:

(a) The term "arable land" means land which, when farmed in adequate size units for the prevailing climatic and economic setting and provided with essential onfarm improvements, will generate sufficient income under irrigation to pay farm production expenses; provide a return to the farm operation labor, management, and capital; and at least pay the operation, maintenance, and replacement costs of related project irrigation and drainage facilities.

(b) The term "contract" means any repayment or water service contract between the United States and a district providing for the payment of construction charges to the United States including normal operation, maintenance, and replacement costs pursuant to Federal Reclamation law.

(c) The term "dependent" means any natural person within the meaning of the term dependent in the Internal Revenue Code of 1954 (25 U.S.C. 152) as well as the regulations issued thereunder.

(d) The term "district" means any individual or any legal entity established under State law which has entered into a contract or is eligible to contract with the Secretary for irrigation water.

(e) The term "excess land" means land other than exempt land, capable of being served with water from any Federal project under Reclamation law, owned or controlled by any landholder in excess of the maximum allowable acreage under Reclamation law. In determining excess land, all land in all districts capable of receiving irrigation water and held by any landholder shall be considered.

(f) The term "exempt land" means irrigable land in a district to which the acreage limitation and pricing provisions of Reclamation law do not apply.

(g) The term "full cost" means an annual rate as determined by the Secretary that shall amortize the

VOL 48 ISS 86 MAY 3 1983 UMI

expenditures for construction properly allocable to irrigation facilities in service, including all operation and maintenance deficits funded, less payments, over such periods as may be required under Federal Reclamation law or applicable contract provisions, with interest on both accruing from the date of enactment of this act on costs outstanding at that date, or from the date incurred in the case of costs arising subsequent to October 12, 1982. Operation, maintenance, and replacement charges required under Federal Reclamation law shall be collected in addition to the full-cost payment.

(h) The term "individual" means any natural person, including his or her spouse, and including other dependents as defined and interpreted in the Internal Revenue Code of 1954 (26 U.S.C. 152).

(i) The term "irrevocable election" means the legal instrument which an individual landowner or lessee executes to make his or her land subject to title II of Pub. L. 97–293. This instrument may be executed by the landowner or lessee if the district in which his or her land is situated does not amend its contract to conform with title II.

(j) The term "irrigable land" means arable land under a specific project plan for which a water supply is or can be provided, and which is provided with or planned to be provided with irrigation, drainage, flood protection, and other facilities necessary for sustained irrigation. For the purpose of determining the areas to which acreage limitations are applicable, it is that acreage possessing permanent irrigated crop production potential, after excluding areas occupied by and currently used for homesites, farmstead buildings, and corollary permanent structures such as feedlots, equipment storage yards, and similar facilities, together with dedicated roads open for unrestricted use by the public. Areas used for field roads, farm ditches and drains, tailwater ponds, temporary equipment storage, and other improvements subject to change at will by the landowner, are included in the irrigable acreage.

(k) The term "irrigation water" means water made available for agricutural purposes from the operation of Reclamation project facilities pursuant to a contract with the Secretary.

(l) The term "landholding" means total acreage of one or more tracts of land situated in one or more districts owned and/or operated under a lease which is served with irrigation water pursuant to a contract with the Secretary. In determining the extent of a landholding, the Secretary shall add to any landholding held directly by a qualified or limited recipient that portion of any landholding held indirectly by such qualified or limited recipient which benefits that qualified or limited recipient in proportion to that landholding.

(m) The term "legal entity" means any business or property ownership arrangement established under State or Federal law, including, but not limited to, corporations, partnerships, associations, joint tenancies, and tenancies-in-common.

(n) The term "limited recipient" means any legal entity established under State or Federal law benefiting more than 25 natural persons.

(o) The term "prior law" means the Act of June 17, 1902, and acts supplementary thereto and amendatory thereof (43 U.S.C. 371) which were in effect prior to the enactment of the Reclamation Reform Act of 1982, Pub. L. 97–293 (96 Stat. 1263) as that law is amended or supplemented by sections 209 through 230 of the Reclamation Reform Act of 1982 (Pub. L. 97–293).

(p) The term "project" means any Reclamation or irrigation project, including incidental features thereof, authorized by Federal Reclamation law, constructed by the United States pursuant to such law, or in connection with which there is a repayment or water service contract executed by the United States pursuant to such law, or any project constructed by the Secretary through the Bureau of Reclamation for the reclamation of lands.

(q) The term "qualified recipient" means an individual who is a citizen of the United States or a resident alien thereof, or any legal entity established under State or Federal law which benefits 25 natural persons or less.

(r) The term "Reclamation fund" means a special fund established by the Congress under the Reclamation Act of June 17, 1902, as amended, for the receipts from the sale of public lands and timber, proceeds from the Mineral Leasing Act, and certain other revenues. The Congress makes appropriations from this fund for the investigation, construction, operation, and administration of Bureau of Reclamation projects. Collections from water users for reimbursable costs of these projects are returned to the fund unless Congress has specified otherwise for specific projects.

(s) The term "recordable contracts" means a written contract between the Secretary and a landowner capable of being recorded under State law, providing for the sale or disposition of lands held in excess of the ownership limitations of Federal Reclamation law.

(t) The term "resident alien" means any natural person within the meaning of the term as defined in the Act of June 27, 1952 (66 Stat. 163).

(u) The term "Secretary" means the Secretary of the Interior.

(v) The term "title II" as used herein means sections 203–208 of Pub. L. 97–293. Sections 209–230 of Pub. L. 97–293 apply to all land-holders and irrigation districts receiving water from a Federal irrigation project.

(w) The terms "wastewide" or "Reclamation wide" mean the 17 Western States in which Reclamation projects are located, namely: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming.

§ 426.5 Contracts.

(a) *In general.* Title II of Pub. L. 97–293 (reference to title II means "all applicable provisions of title II of Pub. L. 97–293") will be applied to repayment and water service contracts (hereafter contracts) by the following rules:

(1) *Contracts in force on October 12, 1982.* Contracts in force on October 12, 1982, shall continue in effect until amended to conform to title II or unless amended by title II (see §§ 426.13 and 426.14). In these rules, individuals or entities subject to the provisions of contracts in existence on October 12, 1982, are termed "parties subject to the 160-acre ownership limitation established by prior law."

(2) *New contracts.* Contracts executed after October 12, 1982, shall be subject to all provisions of title II. Districts which have an existing contract(s) with the United States but enter into a new contract after October 12, 1982, shall be subject to all provisions of title II. The execution dates of the new contract determines the date upon which II applies to the contract. In these rules, individuals and entities subject to the provisions of new contracts are termed either "qualified recipents" or "limited recipients."

(3) *Amended contracts.* (i) Contracts amended for conformance to Pub. L. 97–293. Contracts which are amended at the request of the district to conform with title II need be amended only to the extent required for conformance with that title. A district shall be subject to title II from the date the district's request is submitted to the Secretary. The district's request to the Secretary must be accompanied by a duly adopted resolution dated and signed by the governing board of the district obligating the district to take, in a timely manner, the action required by applicable State law to amend its contract. In these rules, individuals and entities subject to the provisions of these contracts are termed either "qualified recipients" or "limited recipients."

(ii) Contracts amended to provide additional or supplemental benefits. All contracts which are amended after October 12, 1982, to provide a district supplemental or additional benefits, shall be amended at the same time to conform with title II. Moreover, all existing provisions of those contracts become subject to review and amendment. The date that the contract amendment is executed by the Secretary will establish the date for determining the application of title II. All contract actions will be construed as providing supplemental or additional benefits except those actions which do not require the United States to expend significant funds, to commit to significant additional water supplies, or to substantially modify contract payments due the United States. More specifically, the following shall not be considered to provide additional or supplemental benefits: (*a*) The construction of those facilities for conveyance of irrigation water that were contracted for by the district on or before October 12, 1982, (*b*) minor drainage and construction work contracted for under a preexisting repayment or water service contract, (*c*) operation and maintenance payments, (*d*) the deferral of payments, provided the deferral is for a period of 6 months or less, (*e*) a temporary supply of irrigation water as set forth in § 426.13(a)(3), and (*f*) additional contract actions which the Secretary determines do not provide additional or supplemental benefits. In these rules, individuals and entities subject to the provisions of these contracts are termed either "qualified recipients" or "limited recipients."

(b) *Standard article for contract amendments.* New contracts executed after October 12, 1982, or contracts which are amended to conform to title II shall contain the following provision:

> The parties agree that the delivery of irrigation water pursuant to this contract is subject to Reclamation law, as amended and supplemented, including but not limited to the Reclamation Reform Act of 1982 (Pub. L. 97–293) and the regulations promulgated by the Secretary of the Interior under the authority of that act.

(c) *Individual elections to conform to title II.* (1) *Individual election.* Individual landowners or lessees may elect to be subject to title II even if the district does not amend its contract. The individual election is effected by executing an irrevocable election in a form provided by the Secretary. The landholder exercising the election shall be considered a qualified or limited recipient, as appropriate, and all land receiving or capable of receiving irrigation water in the recipient's landholding shall be subject to title II. The election shall be binding on the elector but not on the land listed in the irrevocable election.

(2) *Application to subsequent owner or lessees.* The application of title II to land capable of receiving irrigation water which was owned or leased by a qualified or limited recipient exercising an irrevocable election, but which is subsequently transferred or leased to another, shall be determined by the applicability of Reclamation law to the new landholder.

(3) *Disposition of irrevocable election forms.* The recipient's irrevocable election form shall be retained by the district in which the landholding is situated and a copy forwarded to the Bureau of Reclamation within 30 days. If the recipient is receiving irrigation water in more than one district, the elector must list on the election form the location of all land in the elector's landholding westside as well as the names of all districts in which land receiving irrigation water is situated. Copies of the election form shall be filed with each such district.

(4) *District reliance on election information.* The district shall be entitled to rely on the information contained in the election form without being required to make an independent investigation of the information. However, if the district has reason to believe the information is inaccurate or false, it will be the district's responsibility to report that fact to the Bureau of Reclamation.

(d) *Time limits.* (1) *District amendments.* There are no time limits on when a district may request its contract be amended to conform to title II.

(2) *Individual elections.* There are also no time limits on when an individual landowner or lessee may make an irrevocable election.

(3) *Other provisions.* The provisions of prior law apply to districts and individuals until conformance with title II is effected. Those provisions include westwide application of the 160-acre limitation as provided in § 426.6(d) and payment of full cost after April 12, 1987, on leased land above 160 acres as provided in § 426.7(c)(3).

§ 426.6 Ownership entitlement.

(a) *In general.* Ownership entitlement is determined by whether the landowner is a "qualified recipient," "limited recipient," or "a party subject to the 160-acre ownership limitation established by prior law." All land receiving or capable of receiving irrigation water on a regular basis shall be considered in the entitlement computations except as stipulated in paragraphs (e) and (f).

(b) *Qualified recipient entitlement.* Except as provided in § 426.9, a qualified recipient is entitled to irrigate 960 acres or less of owned land with irrigation water. This entitlement applies on a westwide basis. All individual ownership, multiownership, and trust arrangements are qualified recipients provided they meet the following conditions:

(1) *Individual landowners.* All individual landowners are qualified recipients if they are citizens of the United States or resident aliens thereof, and have met the contract requirements for a qualified recipient as set forth in § 426.5. As such, they are entitled to receive irrigation water for use on 960 acres or less of owned land on a westwide basis and owned land under recordable contract for the term of that contract term.

(i) The application of this rule may be illustrated by the following:

Example (1). Farmer X is a citizen of the United States and receives irrigation water on 160 acres owned in District A. District A amends its contract to conform to title II. Farmer X automatically becomes a qualified recipient by virtue of the district decision and is entitled to receive irrigation water on 960 acres or less of irrigable land in his ownership.

Example (2). Farmer Y is a citizen of Germany, but has taken up permanent residency in the United States. Farmer Y owns 160 acres in District A and desires to purchase an additional 800 acres. District A has not amended its contract to conform with title II. Farmer Y, however, decides to execute an irrevocable election. Farmer Y becomes eligible to receive irrigation water on 960 acres of land owned after the election. This eligibility as a qualified recipient remains in force so long as Farmer Y, as a resident alien, maintains permanent residency in the United States. If Farmer Y were to become a United States citizen, his eligibility as a qualified recipient would, of course, remain in force.

Example (3). Farmer Z is a citizen and resident of Switzerland. Farmer Z owns 160 acres receiving irrigation water in District A. District A amends its contract to conform to title II. Because Farmer Z, as an individual nonresident alien, cannot meet the requirements of either a qualified recipient or limited recipient and because he was receiving irrigation water prior to the district's contract amendment, Farmer Z may,

as set forth in § 426.11(k), place the land under recordable contract and continue to receive irrigation water at the contract rate for 5 years. (If the land were not placed under recordable contract or had Farmer Z not been receiving irrigation water prior to the district's contract amendment, the 160 acres owned would be ineligible for service until such time as it was sold to an eligible buyer or Farmer Z took up permanent residency in the United States.)

(2) *Husband and wife.* A husband and wife, and any other dependents, are considered as one individual landowner. They are considered to be a qualified recipient and are entitled to irrigate 960 acres of owned land on a westwide basis with irrigation water, *provided,* either husband or wife is a citizen of the United States or a resident alien thereof and the contract requirements as set forth in § 426.5 have been met.

(i) The application of this rule may be illustrated by the following:

Example (1). Farmer X and her husband are a qualified recipient by virtue of an irrevocable election. They own in joint tenancy 960 acres of land eligible for irrigation water. Their ownership entitlement has been satisfied and they are not eligible to receive irrigation water on any other land owned.

Example (2). Farmer Y and Farmer Z are a married couple, and each owns 480 acres of irrigated land under separate title in District A. District A has amended its contract to conform to title II. Even though the land is held in separate title, Farmer Y and Farmer Z have reached the limits of eligibility to receive irrigation water as a qualified recipient so long as they remain husband and wife.

(3) *Multiownership arrangement.* All multiownership legal entities are considered to be qualified recipients, provided that: the ownership is a legal entity established under State or Federal law, the entity does not benefit more than 25 natural persons, no member of the entity through this or in combination with any other ownership arrangement owns more than 960 eligible acres receiving irrigation water westwide, and the entity has met the contract requirements for a qualified recipient as set forth in § 426.5. As qualified recipients, they are eligible to receive irrigation water on 960 acres of land owned. The requirements of U.S. citizenship or U.S. residency for aliens does not apply to multiownership legal entities, provided the entity is established under State or Federal law and is authorized to own real property in the United States.

(i) The application of this rule may be illustrated by the following:

Example (1). XYZ Farms is a general partnership comprised of four individuals who own equal and separable interest in the 960-acre partnership. All other requirements as set forth in (3) have also been met. Therefore XYZ Farms satisfies the requirements for a qualified recipient and may receive irrigation water for all 960 acres in ownership. Moreover, the members of the partnership may also be qualified recipents outside their equal interest in XYZ Farms. If so, each may receive irrigation water on 720 acres or less in some ownership or ownerships other than XYZ Farms.

Example (2). Six brothers who are citizens and residents of Canada form a family corporation with each holding equal shares in the corporation. They are able to satisfy all other conditions set forth in (3); therefore, the corporation is a qualified recipient and as such is entitled to receive irrigation water on 960 acres or less of owned land. Then, too, the brothers can be qualified recipients outside their interest in the corporation, and each brother may receive irrigation on 800 acres or less owned in legal entities other than the family corporation, *provided,* none of the brothers has an individual ownership. The brothers cannot meet the requirements of a qualified recipient under individual ownership (1) since none are citizens of the United States or resident aliens thereof.

(4) *Trusts.* An individual or corporate trustee holding land in a fiduciary capacity is not subject to the ownership or pricing limitations imposed by title II nor any other provisions of Federal Reclamation law. However, the interest of each beneficiary (qualified or limited recipients) in trust land in combination with other land he/she may own shall not exceed the ownership entitlement of title II. Moreover, the quantity of land in a trust receiving irrigation water cannot exceed the ownership entitlement of title II.

(i) The application of this rule may be illustrated by the following:

Example (1). Bank X is the trustee for four trusts, each of which has more than one beneficiary. The trusts contain 960, 640, 800, and 400 acres, respectively. The land in the trust is in districts which have amended their contracts to conform to title II. Since the ownership and pricing limitations of title II do not apply to Bank X as trustee for the trusts, all 2,800 acres in the four trusts are eligible to receive irrigation water at the contract rate. However, if a beneficiary owned land or had other trust land which, when combined with his beneficial interest in the subject trust, caused him to exceed the 960-acre ownership limitation, that beneficiary would be required to designate the nonexcess land for which irrigation water could be supplied.

Example (2). Farmer X, a qualified recipient, establishes a testamentary trust by placing 640 acres of his land receiving irrigation water in a trust for his minor child upon his death. Farmer X designates his brother as trustee for the trust. The land is located in a district which has amended its contract to come under the provisions of title II. The brother, who is designated as trustee for the trust, owns 800 acres in the same district which receives an irrigation water supply. Farmer X dies, and the testamentary trust he has established is activated. The brother, as trustee, is entitled to receive irrigation water for the land in trust as well as the land he owns.

Note.—The land placed in the testamentary trust by Farmer X would be counted against his entitlement during his lifetime as long as the land remained in his ownership.

(C) *Limited recipient entitlement.* Except as provided in § 426.9, a limited recipient is entitled to irrigate 640 acres of owned land with irrigation water. This entitlement applies on a westwide basis. All legal entities established under State or Federal law benefiting more than 25 persons are limited recipients provided they have met the contract requirements for a limited recipient as set forth in § 426.5.

(1) The application of this rule may be illustrated by the following:

Example (1). ABC Fertilizer Company is a corporation registered in Nebraska and owns 640 acres in District A. District A has amended its contract to conform to title II. ABC Fertilizer Company benefits more than 25 persons and therefore automatically becomes a limited recipient, with all 640 acres of owned land in the corporation eligible to receive irrigation water.

Example (2). XYZ Land Company, a corporation benefiting more than 25 persons and registered in the State of California, owns 320 acres in District A. In the absence of district action, the company makes an irrevocable election to conform to title II. Thereby XYZ Land Company becomes a limited recipient and is entitled to receive irrigation water on 640 acres or less owned.

Example (3). CDE Development Company is a corporation with more than 25 shareholders which chose to incorporate in the Greater Antilles. CDE Development Company buys 320 acres in a district which has amended its contract to conform to title II. However, until such time as CDE Development Company establishes itself as legal entity under State or Federal law none of its land is eligible for irrigation water. Had CDE Development Company been receiving irrigation water on 160 acres prior to the district's amendment, it could have continued to receive irrigation water for 5 years under the conditions set forth in 426.11.

Example (4). Corporation X owns 640 acres in District A as does Corporation Y. Both are subsidiaries of Corporation Z. District A has amended its contract to conform to title II. The landholdings of Corporation X and Y, since they are subsidiaries of Corporation Z, are counted against the entitlement of the parent corporation, Corporation Z. Corporation Z is a limited recipient; therefore, only 640 acres of the 1,280 acres are eligible to receive irrigation water.

Example (5). Farmer X, a qualified recipient, owns 960 acres of land receiving an irrigation water supply. Farmer X is also a shareholder in the XYZ Corporation, a limited recipient, which receives irrigation water for 640 acres it owns. Farmer X's interest in the land in the XYZ Corporation is not counted against his entitlement because the corporation is a limited recipient, and, in the case of limited recipients, the interest of the individual shareholders is not considered for purposes of determining their entitlement. Thus, Farmer X is entitled to receive irrigation water for the 960 acres he owns, and the XYZ Corporation is entitled to receive irrigation water for the 640 acres it owns.

(d) *Parties subject to the 160-acre ownership limitation established by prior law.* (1) *Individuals.* Individuals are entitled to receive irrigation water on no more than 160 acres owned. The 160-acre entitlement applies on a westwide basis.

(2) *Husband and wife.* A husband and wife are entitled to receive irrigation water on 320 acres or less of land jointly owned westwide.

(3) *Tenants-in-common.* Each individual in a tenancy-in-common is entitled to receive irrigation water on an interest of 160 acres or less provided that no participant in this or any other ownership arrangement receives Federal irrigation water on more than 160 acres owned westwide.

(4) *Partnerships.* Each partner in a partnership is entitled to receive irrigation water on 160 acres or less owned westwide provided: (i) each partner has a separable interest in the partnership and the right to alienate that interest, and (ii) no partner through this or any other ownership arrangement receives Reclamation project water on more than 160 acres westwide.

(5) *Corporations.* All corporations are considered to be individual entities and as such are entitled to receive irrigation water on 160 acres owned westwide.

(6) *Trusts.* Lands held by an individual or corporate trustee in a fiduciary capacity are not subject to the ownership limitations imposed by prior law. However, the interest of each beneficiary in the trust land in combination with other land he/she may own shall not exceed the ownership entitlement of prior law.

(e) *Exemptions from ownership limitation.* Land owned in districts in which the irrigation obligation has been paid out or in which the district has been exempted, will not be counted against ownership entitlement, § 426.13(a) (1) and (2). Neither will isolated tracts, § 426.13(a)(4), be counted against ownership entitlement.

(f) *How ownership entitlement is to be computed.* With the exception of land under recordable contract, § 426.11(e), all designated nonexcess land, § 426.11(b), and all acreage receiving irrigation water on other than a temporary or short-term basis, as defined in § 426.13(a)(3), from a Reclamation project in a district which is subject to acreage limitation shall be counted against the appropriate ownership entitlement, i.e., qualified recipient, limited recipient, etc.

(g) *Multidistrict ownerships.* Landowners may own land in more than one district (multidistrict ownerships). Only one of the districts in which a landowner owns land need amend its contract in order to automatically make the multidistrict landowner subject to the requirements for and the benefits of a qualified or limited recipient. The land owned by that recipient in all districts becomes subject to the acreage entitlement of a qualified or limited recipient. Similarly, if a landower with multidistrict ownership makes an irrevocable election in one district, the land owned in all districts which is capable of receiving irrigation water becomes subject to the recipient's acreage entitlement.

(1) The application of this rule may be illustrated by the following.

Example (1). Landowner X is a U.S. citizen and owns 160 acres in each of Districts A, B, C, and D. All of this land is receiving irrigation water. District A amends its contract to conform to title II. Thereby, landowner X automatically becomes a qualified recipient by virtue of the fact he or she is a U.S. citizen and is entitled to receive irrigation water on 960 acres owned westwide. Since, in this case, Landowner X's total present ownership is 640 acres, he or she would be entitled to receive irrigation water on another 320 acres owned.

Example (2). Landowner Y is a citizen of the United States and owns 160 acres in each of Districts A, B, C, D, E, and F. All of his land is receiving irrigation water. In the absence of district action, Landowner Y makes an irrevocable election in District A. By this action Landowner Y automatically becomes a qualified recipient and all owned land receiving water in Districts B, C, D, E, and F must be included in entitlement considerations. Since in this case the landowner already owns 960 acres receiving irrigation water, he owns the maximum entitlement.

(h) *Loss of eligibility.* (1) An owner who is receiving the benefit of irrigation water, and acquires additional land receiving irrigation water, shall lose eligibility on any newly purchased land that exceeds the owner's entitlement. Eligibility shall be reestablished if the land is redesignated as nonexcess, § 426.11(b), or is sold at a price approved by the Secretary to an eligible owner who does not hold excess land.

(i) The principles of this rule are illustrated by the following:

Example. Farmer X meets all of the criteria for a qualified recipient as set forth in (b)(1). Farmer X irrigates 960 acres of owned land in District A as he is entitled to do. Subsequent to his determination of eligibility, Farmer X buys a 320-acre farm in District B which is also receiving irrigation water. All land purchased by Farmer X in District B thereby becomes ineligible for service until such time as Farmer X sells the farm in District B at a price approved by the Secretary or designates the 320 acres as nonexcess. If Farmers X redesignates the 320 acres in District B as nonexcess eligible to receive irrigation water, Farmer X must declare an equal amount of land in District A as excess. This land then becomes ineligible to receive irrigation water until such time it is sold at a price approved by the Secretary.

§ 426.7 Leasing and full-cost pricing.

(a) *What constitutes a lease.* A lease is a contract by which one party (the landlord or lessor) gives to another (the tenant or lessee) the use and possession of lands (including, in some cases, associated buildings, machinery, etc.) for a specified time and for agreed upon payments (cash or other consideration). The lessee assumes an economic interest in the operation and management of the leased land.

(1) *Exceptions.* Management arrangements or consulting agreements in which the manager or consultant performs a service for the landowner for a fee but assumes no risk in the operation of the land shall not be considered a lease. A contract arrangement for nonreclamation dependent activities which allow for limited use of the land shall also not be considered a lease. Examples of such activities are incidental grazing or use of crop residue from irrigated crops grown on the land. Land which is subleased (the lessee transfers his/her interest to a sublessee) will be attributed to the landholding of the sublessee.

(b) *The form and provisions of a lease.* (1) *Present leases.* All leases must be in writing and made available by the leaseholders to the Secretary for inspection at the Secretary's request. The term of the lease may not exceed 10 years, including any exercisable option, except in the case of a lease of land for the production of perennial crops having an average life of more than 10 years. In that case, the lease may be for a period of time equal to the average life of the prennial crop, as determined by the Secretary, provided the lease does not exceed 25 years.

(2) *Written leases in existence prior to October 12, 1982.* Land under written leases which were in existence prior to October 12, 1982, and which have a remaining term of longer than 10 years will become ineligible to receive irrigation water after October 12, 1992, unless the leased land is used for the production of perennial crops having an average life of more than 10 years. In that case, the lease may be for a period

of time equal to the average life of the perennial crop, as determined by the Secretary, provided the lease does not exceed 25 years.

(c) *Full-cost pricing thresholds on leased land.* Although there is no restriction on the amount of land an eligible lessee may lease, there is a limit on the amount of land for which a lessee may receive irrigation water at the rate applicable under previous contracts if he or she resides in a district which has amended its contract or made an irrevocable election. The lessee must pay the full cost for irrigation water delivered to all leased land that exceeds the lessee's entitlement.

(1) *Full-cost threshold for qualified recipients.* Qualified recipients are entitled to receive irrigation water for landholdings (land owned and/or leased) of 960 acres at the rate specified in the district contract except as provided in § 426.9. The qualified recipient must pay the full cost for irrigation water delivered to all land leased in excess of 960 acres owned and/or leased.

(i) The application of this rule may be illustrated as follows:

Example (1). Farmer X, a qualified recipient, receives irrigation water at the contract rate on 960 acres in his ownership in District A. Farmer X leases another 160 acres in each of Districts A and B. In order to receive irrigation water on the leased land, he must pay the full cost for that water.

Example (2). Farmer Y, a qualified recipient, owns and receives irrigation water on 960 acres in District A. Farmer Y decides to lease all 960 acres to another qualified recipient, Farmer Z. Farmer Z, however, already farms 960 acres receiving irrigation water. Therefore, the full cost would have to be paid for any irrigation water on land leased from Farmer Y by Farmer Z.

(2) *Limited recipients.* Limited recipients who were receiving irrigation water prior to October 1, 1981, are entitled to receive irrigation water for landholdings of 320 acres owned and/or leased at the rate specified in the district contract except as provided in § 426.9. The full cost must be paid for irrigation water delivered to all land in the landholding exceeding 320 acres. Limited recipients who were not receiving irrigation water prior to October 1, 1981, must pay the full cost of irrigation water delivered to *all* land in the landholding.

(i) The application of this rule may be illustrated by the following:

Example (1). ABC Farms is a limited recipient which owns and was receiving irrigation water on 640 acres in District A prior to October 1, 1981. Of the total, 480 acres were and continue to be under recordable contract. ABC Farms may continue to receive irrigation water at the contract water rate on the 640 acres until the end of the recordable contract period. It may also amend the recordable contract to allow it to own and receive irrigation water on 640 acres owned. If it amends the recordable contract, it will be allowed to receive irrigation water at the contract rate on 320 acres in perpetuity, but it must pay full cost on the additional 320 acres owned and on any other eligible land it might lease.

Example (2). XYZ Farms, a limited recipient, owns 640 acres of land eligible to receive irrigation water. The purchase of the land took place after October 1, 1981, and XYZ Farms was not receiving irrigation water on any other land prior to October 1, 1981. Therefore, in order for XYZ Farms to receive irrigation water for any eligible land, it must pay the full cost for that water.

Example (3). FGH Fertilizer Company buys 160 acres of land receiving irrigation water in District A. The purchase of the land is made subsequent to October 1, 1981. However, the company was leasing 160 acres in District B prior to October 1, 1981, and continues to lease and receive irrigation water for that leased land. Therefore, since the company was receiving irrigation water in District B prior to October 1, 1981, and has continued to receive it, the 160 acres recently purchased are eligible to receive irrigation water at the contract water rate. If FGH Fertilizer Company buys or leases additional land, the company would have to pay the full cost for any irrigation water delivered to that additional land since the full-cost threshold for a limited recipient receiving irrigation water prior to October 1, 1981, would be exceeded.

(3) *Lessees subject to the 160-acre ownership limitation established under prior law.* There is no full-cost pricing requirement until April 12, 1987, for individuals or entities which have not become a qualified or limited recipient through a contract amendment or irrevocable election. Therefore, there will be no full-cost pricing on irrigation water made available to land leased by these individuals or entities until April 12, 1987. After April 12, 1987, all leased land in a nonamending district receiving irrigation water in a landholding exceeding 160 acres will be subject to full-cost pricing.

(d) *Exemptions from full-cost pricing.* Leased or owned land which has been exempted will not be subject to full-cost payment except as provided in § 426.13(a)(4).

(e) *Restrictions on designating full-cost land.* An eligible landholder who leases (but does not own) land receiving irrigation water may designate that portion of the leased land which is to receive water at the contract rate. A qualified recipient may only designate leased land for full-cost service. However, a limited recipient which both owns and leases land receiving irrigation water must designate all leased land above the full-cost threshold for full-cost service before the recipient is entitled to designate owned land above the full-cost threshold for full-cost service.

(f) *Multidistrict landholding.* If a landholder has multidistrict landholdings, only one of those districts need amend its contract for the landholder's owned and/or leased land receiving irrigation water in all districts to become subject to full-cost pricing.

(g) *Calculating full cost.* (1) *What constitutes full cost.* As set forth in § 426.4, the term "full cost" means an annual rate as determined by the Secretary that shall amortize the expenditures for construction properly allocable to irrigation facilities in service, including all operation and maintenance deficits funded, less payments, over such periods as may be required under Federal Reclamation law or applicable contract provisions, with interest on both accruing from October 12, 1982, on costs outstanding at the date, or from the date incurred in the case of costs arising subsequent to October 12, 1982. Operation, maintenance, and replacement charges required under Federal Reclamation law shall be collected in addition to the full-cost payment.

(i) Amortization period. The amortization period for calculating the full-cost rate shall be the remaining balance of the repayment period for the district as specified in its repayment contract for water supply. However, in those cases, such as in water service contracts, where payment by a district through its existing contract term will not fully discharge its obligation for repayment of allocated construction costs and where, in accordance with the project authorization the district must renew its water service contract, the district may extend the amortization period for the calculation of full costs by renegotiating its current water service contract at the time it amends its contract to conform to title II. The amortization period may extend up to the expiration date of the new contract, and the term of the new contract cannot exceed the payback period authorized by Congress.

(ii) Allocable construction expenditures. For determining full cost, the construction costs properly allocable to irrigation are those Federal project costs which have been assigned to irrigation within the overall allocation of total project construction costs. Total project construction costs include all direct expenditures necessary to install or implement a project, such as planning, design, land, rights-of-way, water-rights acquisitions, construction expenditures, interest during construction, and when appropriate, transfer costs associated with services provided from other projects.

(iii) Facilities in service (irrigation). Facilities in service are those facilities which are in operation and providing irrigation services.

(iv) Operation and maintenance deficits funded. O&M (operation and maintenance) deficits funded are the annual O&M costs including project-use pumping power allocated to irrigation which have been federally funded and which have not been paid by the irrigation contracting entity.

(v) Payments. In calculating the payments which have been received, all receipts and credits applied to repay or reduce allocated irrigation construction costs in accordance with Reclamation law, policy, and applicable contract provisions shall be considered. These may include: (*a*) Direct repayment contract revenues, (*b*) net water service contract income, (*c*) contributions, (*d*) ad valorem taxes, and (*e*) other miscellaneous revenues and credits excluding power revenues.

(vi) Unpaid balance. The unpaid balance is the irrigation allocated construction costs plus cumulative federally funded operation and maintenance deficits, less payments.

(2) *Calculating the full-cost rate.* The Secretary will calculate a district's full-cost rate using accepted accounting procedures. The definition of "full cost" contained in title II does not recover interest charges retroactively before October 12, 1982, but interest charges on the unpaid full cost do accrue from the date of the act. The full-cost rate shall be determined and fixed in equal annual payments extending over the amortization period at the time a contracting entity enters into a contract or amends its existing contract or at the time an individual or entity elects to come under the provisions of title II that require full-cost pricing. The equal annual payments for full cost will be fixed at a higher rate as the period of time between the date of the new or amended contract or irrevocable election and October 12, 1982, lengthens because interest accrues from the date of the act and the amortization period is shortened. If there are additional construction expenditures or the cost allocated to irrigation changes, then a new full-cost rate will be determined.

(i) The application of this rule may be illustrated by the following:

Example (1). District A contains 90,000 irrigable acres. The construction costs allocated to irrigation for the project and assignable to the land in District A amount to $240 million. As of October 12, 1982, the district's accumulated repayments are $174 million, the unpaid obligation on District A's repayment contract is $66 million, and 11 years remain on its contract term. The established annual contract rate is $66.67 per acre. This amount repays the outstanding balance of the contractual obligation in 11 years. As of October 12, 1982, the unpaid balance for full cost is $66 million (allocated cost, less payments) or $733.33 per acre, and the applicable interest rate is determined to be 7.5 percent. Therefore, the equal annual payments for full cost would be $100.24. This payment is calculated using standard amortization tables and is equivalent to the annual payment necessary to retire a debt of $733.33 at a 7½ percent rate of interest over 11 years. Should District A amend its contract on October 12, 1983, the full-cost rate would be set at $105.13 per acre per year for the next 10 years. This increased payment is necessary because $55.00 per acre in interest accumulates on the original $733.33 per acre unpaid balance during the intervening 12 months and because the new unpaid balance (the sum of $733.33 and $55.00, less payments of $66.67 is $721.66) is amoritized over 10 years, instead of 11 years.

Example (2). District B has a water service contract which establishes a rate of $6.50 an acre-foot for 90,000 acre-feet of water delivered to the district, a rate which is fixed over the remaining 10 years of the contract term. Currently, $1.00 of the $6.50 rate is used to pay annual O&M charges. The remainder is credited to the repayment of irrigation construction costs, although inflation over the next 10 years is expected to leave a $5.00 per acre-foot payment to irrigation, averaged over the remaining 10 years. The construction costs to be repaid from irrigation revenues and assignable to the lands in District B are $24 million, and the district has paid $15.5 million of those costs to date. The expected water deliveries to District B of 90,000 per acre-foot per year are expected to yield about $4,500,000 in revenues for repayment of construction charges over the remaining 10 years of the original contract (90,000 x $5.00 x 10). This amount would not discharge the district's ultimate obligation to repay construction costs ($24 million), since total revenues collected by the date are expected to be $20 million.

As of October 12, 1982, the accumulated payments credited to repayment on construction are $15.5 million. The unpaid balance for full cost is $9.5 million ($24 million less $15.5 million), and the applicable interest rate is determined to be 7.5 percent. Amortizing the unpaid balance over the remaining contract term of 10 years results in an annual full-cost rate of $1,384,016, or $15.38 per acre-foot. Normal O&M charges would be collected annually in addition to this rate.

Upon expiration of the current contract, the district expects to enter into a subsequent water service contract in order to expand its water deliveries. If District B desires to amortize its unpaid balance for full cost over a longer period than 10 years, it can choose to renegotiate its existing contract before the current contract expires to bring it into conformance with current Bureau policy. When the district renegotiates its contract, the unpaid balance for full cost could be reamortized, at the district's option, for any period up to the term of the new water service contract, which cannot exceed the repayment period authorized by Congress. For example, suppose the new water service contract runs for 18 years and is executed immediately. If the district chooses to amortize full cost over the longest permissible repayment period (18 years), then the full-cost rate would be $10.86 per acre-foot. If the district chooses to amortize over 15 years, the full-cost rate would be $11.96 per acre-foot, assuming the unpaid costs remain the same.

Example (3). District C contains 90,000 irrigable acres, and the construction costs allocated to irrigation for the project and assignable to the land in District C amount to $240 million. As of October 12, 1982, the accumulated repayments of the district are $174 million. The district's repayment obligation is $200 million. (The $40 million difference between construction costs allocated to irrigation and the repayment obligation is scheduled to be paid from other project revenues.) The unpaid obligation on District C's repayment contract is $26 million, and 11 years remain on its contract term. The annual rate established by the contract is $26.25 per acre. This amount repays the outstanding balance of the contractual obligation in 11 years. As of October 12, 1982, the unpaid balance for full cost is $66 million (allocated cost, less payments) or $733.33 per acre, and the applicable interest rate is determined to be 7.5 percent. Therefore, the equal annual payment for full cost would be $100.24 per acre.

(h) *Interest rate calculations for full cost.* In determining full cost, the interest rates to be used will be determined by the Secretary of the Treasury as follows:

(1) *Qualified recipients and limited recipients receiving water before October 1, 1981.* (i) The interest rates for expenditures made *on or before October 12, 1982,* shall be the greater of 7½ percent per annum or the weighted average yield of all interest-bearing marketable issues sold by the Treasury during the fiscal year in which the expenditures were made by the United States.

(ii) The interest rate for expenditures made *after October 12, 1982,* shall be the arithmetic average of the rate as of the beginning of the fiscal year in which expenditures are made based on: (*a*) The computed average interest payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for 15 years from the date of issuance and (*b*) the weighted average yield on all interest-bearing marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made.

(2) *Limited recipients not receiving irrigation water on or before October 1,*

VOL 48 ISS 86 MAY 3 1983 UMI

1981. The interest rate shall be the arithmetic average of the rate as of the beginning of the fiscal year in which expenditures are made based on: (i) The computed average interest payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for 15 years from the date of issuance and (ii) the weighted average yield on all interest-bearing marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made: *provided,* that the interest rate for expenditures made before October 12, 1982, shall be determined as of October 12, 1982.

(3) *Landholdings in excess of 160 acres in districts which do not amend their contracts by April 12, 1987.* The interest rate shall be the arithmetic average of the rate as of the beginning of the fiscal year in which expenditures are made based on: (i) The computed average interest payable by the Treasury upon its outstanding marketable public obligations which are neither due nor callable for redemption for 15 years from the date of issuance and (ii) the weighted average yield on all interest-bearing marketable issues sold by the Treasury during the fiscal year preceding the fiscal year in which the expenditures are made: *provided,* that the interest rate for expenditures made before October 12, 1982, shall be determined as of October 12, 1982.

(i) *Proportional charges for full-cost water.* For those water delivery charges levied by a district per acre-foot of irrigation water delivered, as compared to per acre of land, the contract will establish provisions requiring payment of a proportional charge for water delivered to a landholding in that district which reflects the relative amounts of contract and full-cost water rate land in the farm operation. The proportional rate will be equal to the weighted average of the rate applicable under previous contracts and the full-cost rate in proportion, respectively, to the acres of land eligible for irrigation water at the contract rate and the acres of land designated to receive irrigation water at full cost. Use of the proportional rate removes the necessity of separately metering irrigation water deliveries to that portion of a landholding that is designated to receive water at full cost. Water bills will set forth the previous contract rate, the full-cost water rate, and the amount of acreage to which each applies, as well as the proportional rate.

(1) The application of this rule may be illustrated by the following:

Example. District A has a water service contract with a rate of $4.00 per acre-foot for irrigation water delivered. The full-cost rate plus annual O&M costs is determined to be $10.00. If Operator Y has a landholding of 1,000 acres, he or she will pay a proportional rate for water of $4.48 per acre-foot of water delivered anywhere in his landholding (90 percent of $4.00 plus 4 percent of $10.00). This rate is equal to the weighted average of the previous contract rate and the full-cost rate, where the weights are the respective acreages of land eligible to receive water at the contract rate and at full cost. If Operator Y uses 3 acre-feet of water per acre, total water charges will be $13,440 per year (1,000 x 3 x $4.48). If Operator Y reduces the size of his operation by 30 acres, then the proportional water charge will be $4.12 and his total water charges for using 3 acre-feet per acre will be $12,000, or $1,440 less that with the 1,000-acre operation. This reduction in water charges is equal to the full-cost rate of $16.00 x 3 x 30.

(j) *Disposition of revenues obtained through full-cost water pricing.* The interest and full-cost revenues, less the contract water rate, shall be credited to the Reclamation fund. The portion of the full-cost rate, which would have been collected if the land had not been subject to full cost, shall be credited to the annual payments due under contractual obligation from the district.

§ 426.8 Operation and maintenance charges.

(a) *Districts with new or amended contracts.* A district which enters into a new or amended contract will be required to pay annually all O&M costs due the United States. They are to be paid to the United States on a schedule that is acceptable to the Secretary. O&M costs shall include minor replacement costs for facilities funded during the year, but will not include replacement costs which are capitalized under generally accepted accounting practices. Such replacement costs include those caused by disaster, obsolescence, or otherwise. Each year the Secretary shall estimate and advise the district of its O&M charges, and the price of irrigation water will be modified annually to reflect any changes in operation and maintenance costs in a manner that conforms with current Bureau of Reclamation policy. Furthermore, the price of irrigation water shall be at least sufficient to pay the actual O&M costs chargeable to the district for that year. The district's contract shall be amended accordingly to reflect all such changes in costs. The difference between the estimated and actual O&M costs, as determined at the end of the annual period, will be reflected through adjustment of the following year's O&M charges.

(1) The principles of this rule may be illustrated by the following:

Example. The water service contract of a district obligates the district to pay a fixed rate of $8.50 per acre-foot for water for the remaining 10 years of its 30-year contract term. When the district amends its contract to conform to title II, the price of irrigation water will include a component for construction equal to the amount the district was paying for construction at the time its contract was amended. Assuming the current capital component is $3.00 and the O&M component is $3.50, the new rate will be $6.50 with provision for future adjustment. If 1 year after the contract is amended, O&M costs increased by $0.25, then the new rate would be $6.75.

Note.—Had the district amended its contract to gain additional or supplemental benefits, economic studies would have been conducted to determine if its construction charge of $3.00 should be modified.

(b) *Landholders who make irrevocable elections.* Landholders who make an irrevocable election (thereby becoming limited or qualified recipients) must pay their portion of the full O&M costs annually for land in their landholding receiving irrigation water. The district(s) in which the recipient's landholding is situated shall be required to collect from the recipient his or her portion of the full O&M charges due and to forward such collections to the United States.

(c) *Districts which do not amend their contracts.* Districts which do not amend their existing contracts will continue to pay O&M charges under the terms and conditions of their existing contract.

§ 426.9 Class 1 equivalency.

(a) *In general.* Upon the request of any irrigation district having a contract which conforms to the provisions of title II, the Bureau of Reclamation shall make a class 1 equivalency determination for that district. This determination will establish for the district the acreage of land with lower productive potential (classes 2, 3, and 4) that would be necessary to be equivalent in productive potential to the most suitable land in the local agricultural economic setting (class 1). Once these determinations have been made, individual landowners with classes 2, 3, and 4 land will have the right to an increased acreage entitlement equivalent in productive potential to 960 acres of class 1 land, in the case of a qualified recipient, or 640 acres of class 1 land, in the case of a limited recipient.

(b) *Data requirements and use.* Class 1 land and land in lower classes shall be identified on a district basis by the Bureau of Reclamation using a standard approach in which the land classification for the entire district is

considered. Equivalency factors shall then be computed for the district and applied to specific tracts within individual landholdings. If adequate land classification data are not available, they shall be developed using standard procedures as set forth in Reclamation Instructions Series 110, Part 115, Land Resources Investigations, and Series 510, Land Classification Techniques and Standards. Economic data will be developed using procedures found in Reclamation Instructions Series 110, Part 116, Economic Investigations.

(1) *Definition of class 1 land.* Class 1 land is defined and will be classified as that irrigable land within a particular agricultural economic setting which: (i) Most completely meets the various, parameters and specifications established for irrigable land classes; (ii) has the relatively highest level of suitability for continuous, successful irrigation farming; and (iii) is estimated to have the highest relative productive potential measured in terms of net income per acre (reflecting both productivity and costs of production). The objective is to establish the acreage of each of the lower classes of land which is equal in productive potential. (measured in terms of net farm income) to 1 acre of class 1 land. All land that has not been classified will be considered class 1 land for the purposes of determining acreage entitlement under these rules until such time as the land has actually been classified.

(2) *How land classes are determined.* The extent and location of class 1 land and land in lower land classes in a district have been, or will be, determined by the Bureau of Reclamation, taking into account the influence of economic and physical factors upon the productive potential of the land laying within the district. These factors include, but are not limited to: the physical and chemical characteristics of the soil, topography, drainage status, costs of production, land development costs, water quality and adequacy, and length of growing season and their affect on agricultural practices.

(3) *Level of detail.* Acceptable levels of detail for land classification studies to be utilized in making class 1 equivalency determinations for a given district shall be evaluated on the basis of the physical and agricultural economic characteristics of the area. In areas for which no current classification exists or the existing classification is unacceptable, the level of detail of the land classification to be made will never be greater than that required to make class 1 equivalency determinations where the sole purpose of the classification is such a determination.

(4) *Economic studies.* The economic studies related to class 1 equivalency determinations will measure net farm income by land classes within the district. Net farm income shall be determined by the disposable income accruing to the farm operator's labor, management, and equity from the sale of farm crops and livestock produced on irrigated land after all fixed and variable costs of production, including costs of irrigation service, are accounted for. Net farm income will be the measure of productivity to establish equivalency factors reflecting the acreage of each of the lower classes of land which is equal in productive potential to 1 acre of class 1 land.

(5) *Equivalency factors.* Equivalency factors shall be determined by comparing the weighted average farm size required to produce a given level of income on each of the lower classes of land with the farm size required to produce that income level on class 1 land.

(i) The principles of this rule may be illustrated by the following:

Example. Farmer X has a total landholding of 1,300 acres in District A. That acreage includes 800 acres of class 1 land, 300 acres of class 2 land, and 200 acres of class 3 land. The equivalency factors for the district have been determined to be: class 1=1.0, class 2=1.20, and class 3=1.50. Using these equivalency factors the following landholding in terms of class 1 equivalency would apply:

Class 1 800 acres divided by 1.0=800 acres class 1 equivalent
Class 2 300 acres divided by 1.2=250 acres class 1 equivalent
Class 3 200 acres divided by 1.5=133 acres class 1 equivalent

Thus, Farmer X's total landholding of 1,300 acres is equal to 1,183 acres of class 1 land in terms of productive capacity. It will be necessary for him to dispose of the equivalent of 223 acres of class 1 land (1,183 acres minus 960 acres). This can be accomplished in any of several ways. If he should desire to maximize his actual acreage, he would dispose of 223 acres of class 1 land, retaining 577 of class 1, 300 acres (250 acres class 1 equivalent) of class 2, and 200 acres (133 acres class 1 equivalent) of class 3. This would result in a total of 1,077 actual acres which would equal 960 acres of class 1 land in production capacity. Or, he could maximize his holding of class 1 and 2 lands by retaining 800 acres of class 1 land and 192 acres (192 divided by 1.2=160 acres class 1 equivalent) of class 2 land. This total landholding of 992 acres would, again, be equal in productive capacity to 960 acres of class 1 land. In the latter case, he would have to dispose of all 200 acres of his class 3 land and 108 acres of his 2 land.

(6) *Special considerations.* For equivalency purpose, all irrigable land will be classified as either class 1, class 2, or class 3; no other classifications are permissible. Class 4 and special-use land classes will be allocated to one of these three classes on a case-by-case basis.

(c) *Scheduling.* District requests for equivalency determinations will be scheduled by region, with the Regional Director of each of the seven regions of the Bureau of Reclamation having responsibility for such scheduling. Generally, requests will be honored on a first-come-first-served basis. However, if requests exceed the region's ability to fulfill them expeditiously, priority will be given on the basis of greatest immediate need.

(d) *Land classification costs.* The Bureau of Reclamation has provided basic land classification data as party of the profect development process since 1924. Where the Secretary determines that acceptable land classification data are not available for making requested class 1 equivalency determinations and where the provision of these data was the responsibility of the Bureau of Reclamation during the project development process, such data will be made available at Bureau of Reclamation expense. Districts in projects authorized for construction prior to 1924 must pay one-half the costs of new land classification studies required to make accurate equivalency determinations.

(e) *Economic study cost.* The cost of performing new or additional economic studies and computations inherent in the equivalency process shall be the responsibility of the requesting district.

(f) *Appeals.* When basic land classification data are available for a district, but the district does not agree with its accuracy or asserts that the data have become outdated, the district may request, and the Bureau of Reclamation may perform, a reclassification under the authority contained in the Reclamation Project Act of 1939 (Pub. L. 76–260). The requesting district shall pay for one-half of the cost of performing such reclassifications and the full cost of all other studies inherent in the equivalency process.

(g) *Individual requests.* Individual requests for class 1 equivalency determinations will not be accepted even though the individual landowner, in the absence of district action, may have made an irrevocable election to come under the provisions of title II. Requests for equivalency must be made by the district.

(1) The application of this rule may be illustrated by the following:

VOL
48
ISS
86
MAY
3
1983
UMI

Example (1). A district with an existing contract decides not to amend its contract to come under title II. However, an individual landowner within the district may make an irrevocable election to come under the new law. Such an election does not qualify the individual for a class 1 equivalency determination.

Example (2). A district decides to amend its contract to come under title II, but it elects not to request equivalency. Thus, individual landholders within the district are not entitled to equivalency until after the district makes the equivalency request and the Bureau of Reclamation has acted upon that request.

(h) *Excess land.* Until a final determination has been made by the Bureau of Reclamation on the district's request for equivalency, all land exceeding the basic ownership entitlement for qualified or limited recipients must be under recordable contract in order to be eligible for irrigation water. Once the determination has been made, the qualified recipient may withdraw land from the recordable contract in order to reach an acreage equivalent to 960 acres of class 1 land, and the limited recipient may withdraw land from the recordable contract in order to reach an acreage equivalent to 640 acres of class 1 land.

(1) *Protection during classification.* The Bureau of Reclamation will protect the excess landowner's property interests by ensuring that equivalency determinations are completed in advance of maturity dates on recordable contracts provided the district's request for an equivalency determination was made at least 6 months prior to the maturity of the recordable contract and the district fulfills its obligations under § 426.9 of these rules.

(2) *Protection during appeal.* In cases of equivalency determination appeals, the Secretary will not undertake the sale of the reasonable increment of the excess land under matured recordable contract which could be affected by a reclassification as long as that appeal is determined by the Secretary not to be an attempt to thwart the sale of excess land.

(i) *Full-cost charges.* Once the Bureau of Reclamation has acted upon the district's request and made a final equivalency determination, the full-cost water pricing structure would not come into effect until the total landholding westwide exceeds the qualified or limited recipient's landholding entitlement with equivalency. During the time when the determinations were being made, however, the full cost would be assessed on land receiving water in excess of the qualified or limited recipient's basic entitlement without equivalency.

(1) The principles of this paragraph may be illustrated by the following:

Example (1). Landholder X is a qualified recipient who owns no land, but leases 1,100 acres in a district which has requested equivalency. The land leased is a mix of classes 1, 2, and 3 land. During the time the equivalency determination was being made, Landholder X would be required to pay the full-cost water rate on 140 acres (1,100 acres leased minus the 960 acres basic entitlement at the contract water rate) if he or she elected to continue to receive irrigation water on that land. Once the equivalency determinations had been completed, Landowner X would be entitled to lease the equivalent of 960 acres of class 1 land at the contract water rate (something greater than 960 acres).

Example (2). Landholder Y is a limited recipient who owns 700 acres of land and leases another 160 acres in District A. District A has requested and received an equivalency determination. However, Landholder Y was, not receiving project water prior to October 1, 1981. Thus, even with equivalency, he would be required to pay the full-cost water rate for all land served in his landholding. (If Landholder Y had been receiving project water prior to October 1, 1981, he would have been entitled to receive water on the equivalent of 320 acres of class 1 land at the contract water rate. Deliveries on the remainder of something less than 540 acres would be at the full-cost rate.)

(j) *Multidistrict landholdings.* A landholder with holdings in more than one district is entitled to equivalency only in those districts which have requested equivalency (or are already subject to equivalency). That part of the landholding in a district or districts not requesting equivalency will be counted as class 1 land for purposes of overall entitlement.

(1) The application of this rule may be illustrated by the following:

Example (1). Landholder X is a qualified recipient and owns 320 acres in each of three districts. One of those districts, District A, requests and receives an equivalency determination. From the equivalency determination, Landholder X is shown to own the equivalent of 240 acres of class 1 land in District A. Landholder X is therefore entitled to buy an additional 80 acres receiving irrigation water in some other district or he could lease 80 acres in some other district and receive irrigation water for it at the contract rate. In District A itself, Landholder X could buy an additional 80 acres of class 1 land or something greater than 80 acres of class 2 or 3 land. If Landholder X preferred to lease in District A, he could lease 80 acres of class 1 land or something greater than 80 acres of class 2 or 3 land and receive irrigation water for that leased land at the contract water rate.

Example (2). Landholder Y owns 1,200 acres in District A and 160 acres in District B. Landholder Y is a qualified recipient and has designated 800 acres in District A as nonexcess and put the 400 acres of excess land under recordable contract so that it can be irrigated while still in his ownership. Subsequent to this nonexcess land designation, District A requests and receives an equivalency determination. Landholder Y is then free to withdraw excess land from recordable contract to take advantage of the equivalency determination in District A. Landholder Y, when able to show good cause, may even redesignate the nonexcess land under recordable contract [section 426.11(b)] if an appraisal of the excess land has not already been requested and performed. The maturity date as determined in the original contract, however, would not change.

(k) *Existing equivalency determinations.* In districts where equivalency was a provision of project authorization, those equivalency factor determinations will be honored as originally caluclated unless the district requests a reclassificaiton.

§ 426.10 Certification and reporting requirements.

(a) *Certification.* Landowners and lessees within a district which has a contract that conforms to title II shall furnish the district, in a form provided by the Bureau of Reclamation, a certificate that they are in compliance with the ownership and leasing provisions of that law.

(1) *Irrevocable electors.* Individual landowners or lessees who, in the absence of district action, have made an irrevocable election to be subject to title II must also certify through the nonamending district that they are in compliance.

(b) *Reporting.* Landholders who do not come under the expanded ownership entitlement and leasing provisions of title II, but who are subject to the ownership limitations of prior law, must report through the district on the land in their ownership receiving irrigation water and the extent and condition of leases held. They must also certify that they are in compliance with the ownership limitations imposed by the prior law. The reporting form will be provided to the district by the Bureau of Reclamation.

(c) *Data requirements.* Certification and reporting forms will require a full disclosure of land owned in all districts receiving or capable of receiving irrigation water, the identification of the operator or operators of that land, the number of acres leased, the terms of any lease, and certification that the rent paid reflects the reasonable value of the irrigation water to the productivity of the land. The Secretary may require any lessee to submit to him a complete copy of any lease.

(d) *Schedule for completing certification and reporting forms.* Certification and reporting forms will be required as a condition for the receipt of irrigation water except as provided in paragraph (e) of this section. They will be required on an annual basis. If, during the course of the year, there is any change in the information submitted on the certification and reporting form, a new declaration must be made and submitted to the district within 15 days of the change.

(e) *Exemptions.* Landholders of small tracts of less than 5 acres or of tracts which produce less than $5,000 of gross annual sales in agricultural commodities are exempt from the certification and reporting requirements.

(f) *District participation.* Each district shall be required to make the certification and/or reporting forms available to district members and to keep all certification and reporting forms on file and available for Bureau of Reclamation inspection. Additionally, each district will be required to summarize the information contained on these documents and submit the summary to the Bureau of Reclamation annually. The summary form to be used by the district will be provided by the Bureau of Reclamation.

(g) *Auditing.* The Bureau of Reclamation may conduct field audits, as necessary, to ensure compliance with title II.

(h) *False statements.* The following statement will be included in all certification and reporting forms.

"Under the provisions of 18 U.S.C. 1001, it is a crime punishable by 5 years imprisonment or a fine of up to $10,000, or both, for any person knowingly and willfully to submit or cause to be submitted to any agency of the United States any false or fraudulent statement(s) as to any matter within the agency's jurisdiction."

False statement by the landholder will result also in loss of eligibility. Eligibility could only be regained upon the approval of the Secretary.

(i) *Failure to report.* Failure to submit the required certification or reporting form to the district will result in loss of eligibility by the individual landholder. Eligibility will be regained once the required form is submitted to the district.

§ 426.11 Excess lands.

(a) *In general.* As set forth in § 426.4, "excess land" means irrigable land other than exempt land owned or controlled by any landholder in excess of the maximum allowable acreage under Reclamation law. In determining excess land, all land receiving or capable of receiving irrigation water in all districts held by any landholder shall be considered. Delivery of irrigation water to excess lands is allowed only under the following conditions: (1) The land is exempt from the acreage limitation and full-cost provisions of Reclamation law, (2) the excess land has been placed under recordable contract by the landowner, or (3) the land was involuntarily acquired into excess status through inheritance, foreclosure, or other similar involuntary process.

(b) *Designation of nonexcess land.* The owner of excess land shall designate that portion of his or her land that is to be considered nonexcess. Designation shall be in accordance with provisions in the district's repayment or water service contract, provided designation procedures are specified in the contract and the entire landholding is in one district.

(1) *Designation procedures when not established by contract.* If designation provisions are not specified in the district contract, the landowner must designate that portion of the land in the ownership which is to constitute the nonexcess entitlement within 30 days of Secretarial notification to the district and that landowner. The designation will take into account all land owned by the landowner which is receiving or is capable of receiving irrigation water on a regular basis. If the landowner fails to make the nonexcess designation within 30 days, the district shall make the designation within 30 days thereafter. If the district does not make the required designation, the Secretary shall then make the designation.

(2) *Designation procedures if land is owned in more than one district.* If the land in the ownership is situated in more than one district, the landowner has 60 days from the date of notification to the district and the landowner to make the designation. The Secretary shall make the designation for the landowner if designation is not made within 60 days.

(3) *Status of nonexcess land and redesignation.* The nonexcess designation, whether made by the landowner, the district, or the Secretary, will be binding on the land and will be filed with the district and the Bureau of Reclamation. These regulations governing excess land will apply to the excess land resulting from that designation. A landowner may redesignate his or her nonexcess land from excess land in the ownership with the approval of the Secretary. If the landowner is not eligible for equivalency, he or she must make an equal exchange of acreage through the redesignation. If the landowner is eligible for equivalency the redesignation may be made on the basis of equivalent acres. Furthermore, existing nonexcess land designations made prior to October 12, 1982, can be amended at the request of the landowner to conform with title II: *provided*, the district has a new or amended contract which conforms to title II or the landowner elects to come under title II through an irrevocable election.

(i) The application of this rule may be illustrated by the following:

Example (1). Landowner X is a qualified recipient by virtue of an irrevocable election. He owns 1,200 acres in District A, of which 960 acres have been designated nonexcess and are receiving irrigation water. With the approval of the Secretary, Landowner X may redesignate the 240 acres which are now excess as nonexcess and eligible to receive irrigation water, provided he redesignates 240 acres of presently nonexcess land as excess.

Example (2). Landowner Y is a U.S. citizen and a qualified recipient by virtue of District A's contract amendment to conform to title II. Landowner Y owns 1,400 acres of land of which 960 acres have been designated nonexcess and are receiving irrigation water. Subsequent to this designation the district requests and receives an equivalency determination. All 1,400 acres of Landowner Y's land is class 3 land, and in District A, 1 acre of class 1 land is equal to 1.4 acres of class 3 land. With equivalency, Landowner Y may irrigate 1,344 acres of class 3 land in District A. Thus, he may redesignate everything in his ownership as nonexcess except for 56 acres.

Example (3). Landowner Z is a resident alien and owns 480 acres in District A. Landowner Z has designated 160 acres as nonexcess, and it is receiving irrigation water. Following this designation, District A amends its contract to conform to title II. As a result of the district amendment, Landowner Z satisfies the requirements for a qualified recipient and may designate all 480 acres owned as nonexcess.

(c) *Treatment of land ineligible under prior law.* Land ineligible for irrigation water deliveries because it was acquired from excess status without Secretarial approval prior to October 12, 1982, the period provided for executing recordable contracts under the district repayment or water service contract has expired, or the landowner failed to comply with other requirements of prior law as determined by the Secretary, may be brought into eligible status if prior to April 12, 1987, either the district in which the land is located amends its contract to conform to title II or the present landowner of the ineligible land make an irrevocable election to come under title II.

(1) The principles of this rule may be illustrated by the following:

Example (1). Landowner X bought 160 acres in District A from excess status in 1975. Landowner X, however, failed to get sale approval from the Secretary. That land has

VOL 48 ISS 86 MAY 3 1983 UMI

been ineligible for service since 1975. Prior to April 12, 1987, the district in which the land is located amends its contract to conform to title II. Landowner X's 160 acres thereby become eligible for service provided he or she can meet the requirements of a qualified or limited recipient.

Example (2). Landowner Y and his wife own 1,200 acres in District B. Landowner Y and his wife are receiving irrigation water on 320 acres owned which was their maximum entitlement under prior law. The remaining 880 acres are ineligible for service and cannot ever be brought under recordable contract because the district contract stipulates a 10-year grace period from date of first water delivery to the district for bringing excess land under recordable contract. That period has long since expired.

Landowner Y makes an irrevocable election prior to April 12, 1987, to come under the provisions of title II. By that election Landowner Y, as a qualified recipient, is entitled to receive irrigation water on 960 acres owned. He and his wife may even place the remaining 240 acres in their ownership under a 5-year recordable contract. Had Landowner Y made the election after April 12, 1987, he would have still been entitled to receive irrigation water on 960 acres owned, but he could not have placed the remaining 240 acres under recordable contract.

(d) *Excess land not under recordable contract.* Excess land not under recordable contract must be conveyed to an eligible owner in a sale or transfer at a price and on terms and conditions approved by the Secretary in order to be eligible to receive irrigation water.

(e) *Recordable contracts.* Excess land becomes eligible to receive irrigation water if the owner enters into a recordable contract with the Secretary of the Interior. The excess owner must agree to dispose of the excess land, excluding mineral rights and easements, to an eligible owner under terms and conditions and at a sale price approved by the Secretary. The period allowed for the disposition of excess land under recordable contracts executed after October 12, 1982, may not exceed 5 years from the date the recordable contract is executed by the Secretary (except for the Central Arizona Project where the disposition period provided will be 10 years from the date water becomes available to the land). Water deliveries may begin on the date the secretary receives a written request from the landowner to execute a recordable contract. The landowner has 20 working days from that date to execute the recordable contract unless the Secretary waives the 20-day limitation. Land placed under recordable contract may receive irrigation water at the rate specified in the contract of the district so long as it is in the landholding of the landowner. Land under recordable contract which is leased to another, however, will be subject to the full-cost provisions of title II if the lessee's landholding exceeds the specified limitations.

(1) The principles of this rule may be illustrated by the following:

Example. Landowner X is a qualified recipient and owns 1,400 acres in District A. The landowner places 440 acres under recordable contract so that he may receive irrigation water at the contract water rate on all owned land in the district. Subsequently Landowner X leases the 440 acres under recordable contract to Landholder Y who is a limited recipient. Landholder Y was receiving irrigation water prior to October 1, 1981, and presently owns 320 acres receiving irrigation water. Under the circumstances, Landholder Y has already reached his full entitlement at the contract water rate; therefore, the full cost must be paid for any irrigation water delivered to the 440 leased acres. Leasing the land to Landholder Y does not affect other terms of the recordable contract.

(f) *Restriction on placing excess land under recordable contract.* A landowner who acquires land after October 12, 1982, which is receiving or capable of receiving irrigation water, and by so doing places himself in excess status shall not be permitted to place the land so acquired under recordable contract. In order for the excess land to regain eligible status, the sale would have to be canceled or the excess owner would have to sell the land at a price approved by the Secretary.

(g) *Recordable contracts in effect prior to October 12, 1982.* Recordable contracts executed prior to October 12, 1982, will continue in effect. However, landowners with such existing recordable contracts may request that their contracts be amended to conform to the ownership limitations contained in title II. The Secretary shall amend those contracts accordingly if: (1) The district enters into a new or amended contract which conforms to title II or (2) the excess landowner elects to conform his landholding to title II. The disposition period for such amended recordable contracts shall not be extended except as provided in paragraph (i) of this section.

(h) *Deed covenant.* In order to be eligible for water service, the following covenant shall be placed in all deeds of land acquired from excess status, whether bought under recordable contract or not:

For a period of 10 years from the date of this deed, sale by the landowner and his or her assigns of these lands is prohibited for any value that exceeds the sum of the value of newly added improvements plus the value of the land as increased by market appreciation unrelated to the delivery of irrigation water. This covenant is to satisfy the requirements in section 209(f)(2) of Pub. L. 97-293.

(i) *Extension of disposition periods for recordable contracts.* Owners of excess land under recordable contract who were prevented from selling their excess land because of Secretarial moratorium or court order shall be allowed an additional period of time to sell their excess land under recordable contract:

(1) *Westlands Water District, California.* After the order of the court in *National Land for People* v. *Andrus* is lifted, landowners with recordable contracts in the Westlands Water District, California, will be allowed a period of time equal to the time remaining on that recordable contract on August 13, 1976, to sell land under recordable contract.

(i) The principles of this rule may be illustrated by the following:

Example. A landowner in the Westlands Water District entered into a recordable contract on October 13, 1972. The recordable contract provided for a 10-year disposition period which would end on October 13, 1982. On August 13, 1976 (the date of the court-ordered moratorium on processing sales of excess land in the Westlands District), there were 6 years and 2 months remaining in the disposition period. Assuming the court-ordered moratorium is lifted on January 1, 1984, the disposition period for the recordable contract will be extended for 6 years and 2 months from that date or to March 1, 1990. The contract will mature at that time and the Secretary's power-of-attorney to sell the land will vest.

(2) *All other districts.* A moratorium on processing sales of excess land was issued by the Secretary of the Interior on June 24, 1977. This moratorium applied to all landowners with recordable contracts in all districts other than the Westlands Water District. The Commissioner of Reclamation delayed sales by other directives. Landowners affected by these actions will be given an additional period of time to dispose of their land. The extension shall be calculated from the date that processing sales of excess land is resumed and shall be equal to the time remaining on the recordable contract when the moratorium was imposed. The resumption date shall be determined by the Secretary.

(i) The principle of this rule may be illustrated by the following:

Example. A landowner in District A entered into a recordable contract on June 27, 1975. The recordable contract provided for a 10-year disposition period which would end June 27, 1985. The landowner was prevented from selling the land under recordable contract by the Secretarial moratorium of June 2, 1977. At that date, the recordable contract has a remaining disposition period of 8 years. The disposition period for the recordable contract will be extended 8 years from the date processing sales is resumed. The resumption date shall be determined by the Secretary.

(3) *How extensions of recordable contracts are to be accomplished.* The Secretary shall prepare and execute amendatory agreements to extend recordable contracts for the appropriate period of time. The amendatory agreement will establish the new maturity date for the recordable contract and will be recorded by the Secretary in the official records of the county in which the land covered by the recordable contract is located. A copy of the amendatory agreement will also be sent to the affected landowner by the Secretary.

(4) *Water rates for land under extended recordable contracts.* A landowner who has land under an extended recordable contract may continue to receive irrigation water for that land at the contract water rate for the full term of the original contract. However, the landowner must pay the full-cost rate during the entire extended contract period unless the original contract lapsed during the moratorium or matured within 18 months of the date the moratorium is lifted. If the maturity date under the original contract lapsed during a moratorium or if the original contract matures within 18 months of the date a moratorium is lifted, the landowner may receive irrigation water at the contract rate for no more than 18 months after the processing of excess and is resumes. Thereafter, the landowner must pay the full cost of the irrigation water delivered during the extension period.

(i) The principle of this rule may be illustrated by the following:

Example: A landowner entering into a recordable contract on June 27, 1972. The recordable contract provided for a 10-year disposition period which ended on June 27, 1982. However, the landowner was prevented from selling the land by the Secretarial moratorium of June 27, 1977. Since the landowner had 5 years remaining on the original recordable contract when the moratorium was imposed, the contract will be extended for 5 years from the processing of the sale is resumes. The resumption date will be determined by the Secretary. The landowner must pay the full cost, however, for any irrigation water delivered to the land under recordable contract beginning 18 months from the date the moratorium is lifted.

(j) *Sale of excess land under recordable contract by Secretary.* All recordable contracts shall provide that a power-of-attorney shall vest in the Secretary to sell the land under recordable contract if the landowner does not dispose of the excess land within the period specified. The Secretary shall conduct such excess land sales, once the power-of-attorney has vested. The Secretary shall use the following procedures:

(1) *Surveys.* A qualified surveyor shall make a land survey when determined necessary by the Secretary. The cost of the survey will be paid by the United States and added to the sale price for the land. The cost shall be reimbursed to the United States from the proceeds of the sale.

(2) *Appraisals.* The Secretary shall appraise the excess land to determine the approvable sale price. The cost of the appraisal shall be paid by the United States. Such cost shall be added to the approved sale price and shall be reimbursed to the United States out of the proceeds of the sale.

(3) *Advertising.* The Secretary shall advertise the sale of the property in the newspapers within the county in which the land lies, in farm journals, in other similar publications, and by other public notices he determines advisable. The notices shall state: (i) The minimum acceptable sale price of the property (which equals the appraised price plus the cost of the appraisal, survey, and advertising), (ii) that the land will be sold by auction for cash or on terms acceptable to the landowner to the highest bidder whose bid equals or exceeds the minimum sale price, and (iii), the date for such sale (which shall not exceed 90 days from the date of the advertisement). The advertisement costs for the sale will be added to the sale price for the land and reimbursed to the United States from the sale proceeds.

(4) *Distribution of proceeds.* The proceeds from the sale of the land will be disbursed first, to the United States to pay the cost of the survey, appraisal, and advertising; second, to the landowner in the amount of the appraised value of the land less costs due the United States; and third, to the United States any remaining proceeds, which will be credited to the Reclamation fund.

(5) *Closing.* The sale of the excess land shall be closed by the Secretary when all sale arrangements have been completed. The Secretary shall execute a deed conveying the land to the purchaser. There shall be no requirement for a convenant in the deed (h) restricting the resale of the land.

(6) *Water deliveries.* Excess land under matured recordable contracts will be eligible to continue to receive irrigation water until the land is sold by the Secretary.

(k) *Land with becomes excess because of Westwide application or enforcement of other requirements of law.* Land may become excess through the westwide enforcement of acreage limitation or because of restrictions on delivery of water to nonresident aliens. Owners may place such land under recordable contract as provided in § 426.11(e) of these regulations. The recordable contract in such situations shall be modified to permit the landowner to sell the excess land to an eligible purchaser without price approval by the Secretary. The deed conveying the excess land shall not contain the standard convenant paragraph (h) requiring sale price approval by the Secretary for a period of 10 years following initial sale. The land shall be sold in accordance with the procedures established in paragraph (j) if the Secretary's power-of-attorney to sell land vests.

(1) This rule may be illustrated by the following:

Example. Landowner X and his wife are U.S. citizens and own 320 acres receiving irrigation water in each of Districts A, B, C, and D. District A amends its contract to conform to title II. Landowner X and his wife automatically and without benefit of choice become a qualified recipient and as such as entitled to irrigate no more than 960 acres westwide with irrigation water. Since their present ownership exceeds 960 acres receiving irrigation water, 320 acres would have to be place under recordable contract if it were to remain eligible to receive irrigation water. Landowner X could sell the land at fair market value at any time within 5 years of the contract date.

426.12 Excess land appraisals.

(a) *In general.* The following regulations shall apply to all excess land placed under recordable contract after October 12, 1982. They shall also apply to all recordable contracts and/or repayment contracts entered into by the Secretary prior to October 12, 1982, if consistent with the provisions of those contracts.

(1) All appraisals of excess land will be based on the fair market value of the land at the time of appraisal without reference to the construction of the irrigation works. Standard appraisal procedures including but not limited to the income and comparable sales methods shall be used. Nonproject water supply factors as provided in (3) shall be considered as appropriate.

(2) Improvements shall be appraised on the basis of their contributory fair market value as of the date of appraisal, using standard appraisal procedures.

(3) Nonproject water supply factors such as: (i) ground-water pumping lift, (ii) surface water supply, (iii) water quality, and (iv) trends associated with

VOL
48
ISS
86
MAY
3
1983
UMI

a, b, and c shall be considered where appropriate. The Bureau of Reclamation shall develop the nonproject water supply and trend information and specify how that information is to be used in the appraisal. The district may request to participate. The excess landowner also may submit information relevant to these determinations through the district. The Secretary shall make all final determinations considering the data provided by the Bureau of Reclamation and the district if the Bureau and the district cannot reach agreement on the data and its use within 60 days. The Secretary shall provide available nonproject water data to the appraiser as he determines appropriate.

(4) The date of appraisal shall be the date of last inspection by the appraiser(s) unless there is an existing signed instrument such as an option, contract for sale, agreement for sale, etc., affecting the property, in which case the date of appraisal will be the date of such instrument.

(b) *When appraisals are to be made.* Appraisals of excess lands shall be made upon request of the landowner(s) or when required by the Secretary. If a request for an appaisal is not received from the landowner(s) within 6 months of the maturity date of the recordable contract, the Secretary may initiate the appraisal.

(c) *Appraiser selection and appraisal cost.* Each appraisal of excess land shall be made by a qualified appraiser selected by the Secretary except as provided in paragraph (d) of this section. The cost of the first appraisal of any excess land shall be paid by the United States. When the excess land is sold, the cost of the first appraisal shall be added to the sale price and reimbursed to the United States by the excess-land purchaser. Any costs associated with additional appraisals requested by the excess landowner shall be paid by that landowner provided the value of the land established by a reappraisal does not exceed the value established in the first by more than 10 percent. However, if the difference in the appraisal values exceeds 10 percent, the United States will pay for the reappraisal.

(d) *Appeals.* An excess landowner may request a second apparisal if the excess landowner disagrees with the first appraisal. The second appraisal shall be prepared by a panel of three qualified appraisers, one designated by the United States, one designated by the district, and the third designated jointly by the first two. This appraisal shall be binding on both parties after review and approval as provided in (e). As such it fixes the maximum value of the excess land.

(e) *Review process.* All excess land appraisals shall be reviewed by the Bureau of Reclamation for technical accuracy and compliance with these Rules and Regulations, applicable portions of Uniform Appraisal Standards for Federal Land Acquisition—Interagency Land Acquisition Conference 1973, Reclamation Instructions, and any detailed instructions provided by the Secretary setting conditions applicable to an individual appraisal.

§ 426.13 Exemptions.

(a) *In general.* The following are exempt from the ownership and pricing limitations of title II: Land receiving an agricultural water supply from projects constructed by the U.S. Army Corps of Engineers unless integrated with or made a part of a Federal Reclamation project, projects constructed under Federal Reclamation law for which the construction charge obligation of the district has been discharged, and land receiving a temporary water supply. Land determined to be an isolated tract is exempt from acreage limitation but is subject to full cost.

(1) *Corps of Engineers projects.* Land receiving an agricultural water supply from Corps of Engineers projects is exempt from title II and other provisions of Reclamation law unless it has been designated, made a part of, or integrated by statute with a Federal Reclamation project or the Secretary has provided project works for the control or conveyance of an agricultural water supply from the Corps project to the subject land. This exemption does not relieve district agricultural water users from repaying their share of construction, operation and maintenance, and contract administration costs of the Corps project allocated to conservation or irrigation storage. The Secretary shall determine the exemption status for land receiving an agricultural water supply from Corps of Engineers projects. He shall notify affected districts of the applicablilty of the ownership and pricing limitations of title II to that land. District repayment or water service contracts containing provisions imposing acreage limitation for those lands served from Corps projects which are exempt will be amended to delete those provisions at the request of the district.

(2) *Reclamation projects.* Districts shall be exempt which have repaid all obligated construction costs for project facilities. Payments by periodic installments over the contract repayment term, as well as lumpsum and accelerated payment allowed in the district's contract, shall qualify the district or individual for exemption. An individual landowner will be exempt upon repayment of construction charges allocated to that owner's land, if provided for in a contract with the United States. When a district has discharged its obligation to repay construction costs for project facilities, the Secretary shall notify the district that it is exempt from acreage limitation and the full-cost provisions of law. At the request of an owner of a landholding for which repayment has occurred, the Secretary shall provide a certificate to that owner acknowledging the landholding is free of the ownership and pricing limitations of title II. The continuation of the exemption will be considered on a case-by-case basis if additional construction funds for the project are requested.

(3) *Temporary supplies of water.* Temporary water supplies are water supplies which are not storable for project purposes. They may be infrequent or unmanaged floodflows of short duration. Such water supplies can be made available to land without regard to the acreage limitation and full-cost provisions of Federal Reclamation law for a temporary period not to exceed 1 year in the following manner:

(i) Unusually large water supplies or unmanaged floodflows can be made available by the Secretary as temporary supplies to excess land. The Secretary shall announce the availability of such temporary supplies to districts. Districts desiring deliveries of such temporary water supplies to excess land shall request the Secretary to make such deliveries. Upon approval by the Secretary, the district shall be notified of the availability of the temporary supply and the conditions for its use. The temporary supply of water shall be delivered under contracts not to exceed 1 year in accordance with existing policies and priorities. It may not have any adverse effect on other authorized project purposes or relieve the district from other water supply commitments. The Secretary shall determine the price a district is to be charged for such temporary water deliveries.

(4) *Isolated tracts.* Isolated tracts which can be farmed economically only if included in a larger farming operation shall not be subject to the ownership limitations of Federal Reclamation law. However, the full-cost provisions of title II shall apply to all applicable water deliveries to such isolated tracts that are in excess of the ownership limitation. Isolated tract determinations shall be made by the Secretary at the request of the landowner.

§ 426.14 Residency.

(a) Residency is not a requirement for the delivery of irrigation water from Reclamation project facilities. The residency requirement in section 5 of the Reclamation Act of 1902 was repealed and that portion of Solicitor's Opinion M–36919, dated December 6, 1979, which held that residency continued to be a requirement of Federal Reclamation law was thus nullified. Existing recordable contracts and certificates containing provisions requiring the purchaser of excess land to be a resident or agree to become a resident within a specified time period shall be revised to delete this requirement.

§ 426.15 Religious and charitable organizations.

(a) *Ownership entitlement.* Religious or charitable organizations which are exempt from taxation under section 501 of the Internal Revenue Code of 1954, including parishes, congregations, schools, wards, or similar organizations which own or operate landholdings in Federal Reclamation projects, will be treated as qualified recipients: *provided:* (1) That either the district in which the land is situated enters into a new or amended contract, or the religious or charitable organization or its subdivision owning or operating land in the district elects to come under title II, (2) that the agricultural produce and the proceeds of sales of such produce are used only for charitable purposes, (3) that the land is operated by the individual religious or charitable entity or organization (or subdivisions), and (4) that no part of the net earnings of the religious or charitable entity or organization (or subdivision) shall accrue to the benefit of any private shareholder or individual.

(b) *Ownership entitlement under prior law.* The provisions of the prior law will apply if neither the district nor the religious or charitable organization or its subdivision elects to come under title II. Each parish, ward, congregation, or other subdivision of the organization shall be considered an individual under prior law.

(1) The principles of this rule may be illustrated by the following:

Example (1). A charitable organization which meets the requirements of title II has subdivisions in each of five different districts. Each of these districts amends its contract to comply with title II. Therefore, each subdivision is entitled to own and farm 960 acres receiving irrigation water.

Example (2). A religious organization owns 960 acres in District A which has amended its contract to comply with title II. The religious organization farms 640 acres in its ownership and leases the remaining 320 acres to a private landholder. The 320 acres leased is ineligible for irrigation water until such time as it is farmed by the religious organization.

Example (3). A religious organization which meets the requirements of title II has subdivisions in each of Districts A, B, C, and D. Each subdivision operates 800 acres receiving project water. Districts A and B amend their respective contracts to comply with all provisions of title II; therefore, the subdivisions in Districts A and B are entitled to own or operate 960 acres receiving project water. Districts C and D do not amend their contracts to comply with title II and remain subject to the acreage restrictions contained in the prior law. The subdivisions in Districts C and D, however, make individual elections to come under all provisions of title II and are therefore entitled to own or operate 960 acres receiving Reclamation project water.

(c) *Affiliated farm management.* A religious or charitable organization or its subdivision which elects to come under title II or owns or operates land in a district which enters into a new or amended contract may retain its status as a qualified recipient and still affiliate with a more central organization of the same faith in farm operation and management. Affiliated farm management shall be permitted regardless of whether the subdivision is the owner of record of the land being operated.

(1) The principles of this rule may be illustrated by the following:

Example. A religious organization holds title to 1,280 acres in District A and 1,280 acres in District B. The acreage in District A is operated jointly by two subdivisions and the acreage in District B is operated by three subdivisions in separate farms of 300, 300, and 680 acres. Farm operations are coordinated by the religious organization through managers at each farm. Each subdivision is a qualified recipient and entitled to operate 960 acres receiving irrigation water. The religious organization is entitled to own the acreage being operated by its affiliated subdivisions in each district.

(d) *Leasing.* The full-cost provisions dealing with leased land shall apply to religious or charitable organizations or their subdivisions.

(1) The principles of this rule may be illustrated by the following:

Example. A charitable organization has subdivisions in each of Districts A, B, C, and D. Each of these districts has amended its contract to comply with title II. Each subdivision in Districts A, B, and C owns and operates 800 acres receiving irrigation water. The subdivision in District D owns and operates 960 acres and leases another 160 acres, all of which are receiving irrigation water. The subdivision in District D is obligated to pay the full cost for irrigation water delivered to the 160 acres leased.

§ 426.16 Involuntary acquisition of land.

(a) *Nonexcess land.* Nonexcess land which becomes excess because it is acquired through involuntary foreclosure (or similar involuntary process) in satisfaction of a debt, by gift, or inheritance is eligible to receive irrigation water in the new ownership for a period of 5 years. The new owner will be required during the 5-year period to pay the same price for water as the former owner. The price is established by the district's contract with the United States. Although land acquired from nonexcess status involuntarily may be sold at any time by the new owner without approval by the Secretary, it will become ineligible to receive irrigation water after 5 years and will remain ineligible until it has been sold to an eligible owner. Nonexcess land acquired involuntarily may not be placed under recordable contract by the new owner.

(b) *Excess land.* Excess land which is under recordable contract and which is acquired by involuntary foreclosure or other involuntary process may continue to receive irrigation water under the terms of the recordable contract. However, the new owner must agree to assume the recordable contract and execute an assumption agreement provided by the Secretary. Such land will be eligible to receive irrigation water for 5 years from the date it was acquired involuntarily or for the remainder of the recordable contract period, whichever is longer. The sale of such land shall be under terms and conditions set forth in the recordable contract and must be satisfactory to and at a price approved by the Secretary.

§ 426.17 Land held by governmental agencies.

(a) *Acreage limitation.* Land held by States, political subdivisions, or agencies thereof which are farmed primarily for a nonrevenue producing function, as determined by the Secretary, shall not be subject to the acreage limitation and full-cost provisions of Federal Reclamation law.

(b) *Sales.* Land held by States, political subdivisions, or agencies thereof may be sold without price approval. Once sold, such land will be eligible to receive irrigation water provided the purchaser meets the eligibility requirements to own land and receive irrigation water.

(c) *Leasing.* States, political subdivisions, or agencies thereof and agencies of the Federal Government may lease irrigable land they own or control to an eligible landholder up to that landholder's basic entitlement under Federal Reclamation law (960 acres for a qualified recipient, 640 acres for a limited recipient, or 160 acres for

VOL
48
ISS
86
MAY
3
1983
UMI

landholders in districts where the prior law applies unless otherwise provided by law).

(1) The principles of this rule may be illustrated by the following:

Example. Farmer X is a qualified recipient in the State of Colorado and owns and irrigates 160 acres of land with irrigation water. The State of Colorado may lease Farmer X an additional 800 acres of State-owned land which will make up the balance of Farmer X's basic entitlement. Farmer X is still entitled, however, to lease additional acreage which may be irrigated at full cost provided that additional acreage is not owned by a governmental agency.

§ 426.18 Commingling.

(a) *Existing commingling provisions in contracts.* Provisions in repayment and water service contracts entered into prior to October 1, 1981, which define project and nonproject water or describe the delivery of project water through nonproject facilities or nonproject water through project facilities, shall continue in effect. They shall apply to renewed contracts the district enters into with the United States as well.

(b) *Establishment of commingling provisions in contracts.* New, amended, or renewed contracts may provide that irrigation water can be commingled with or exchanged for water from other sources, whether federally or privately constructed facilities are involved, as determined on a case-by-case basis. When standards can reasonably be established to assure on a volumetric basis that the irrigation or exchange water is delivered only to lands eligible to receive irrigation water, the provisions of Federal Reclamation law and these regulations will not be applicable to the nonirrigation water or irrigation water delivered by exchange as the case may be.

§ 426.19 Water conservation.

(a) *In general.* The Secretary shall encourage the full consideration and incorporation of prudent and responsible water conservation measures in all districts and for the operations of all non-Federal recipients of irrigation water from Federal Reclamation projects.

(b) *Development of a plan.* Districts that have entered into repayment contracts or water service contracts according to Federal Reclamation law including the Water Supply Act of 1958, as amended (43 U.S.C. 390b), shall develop a water conservation plan which contains definite objectives which are economically feasible and a time schedule for meeting those objectives.

(c) *Federal assistance.* The Bureau of Reclamation will cooperate, to the extent possible, with the district in studies to identify opportunities to augment, utilize, or conserve the available water supply.

§ 426.20 Public participation.

(a) *In general.* The Bureau of Reclamation will publish notice of proposed irrigation or amendatory irrigation contract actions in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Form letters, media news releases, meetings, workshops, and hearings also will be used as appropriate to provide local publicity. The public participation requirements do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. The Secretary or the district, however, may invite public participation in any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act if the Bureau determines that the contract action may or will have "significant" environmental effects.

(1) Each public notice or news release shall include, as appropriate: (i) A brief description of the proposed contract terms and conditions being negotiated; (ii) date, time, and place of meeting or hearings; (iii) the address and telephone number of a Bureau employee to address inquiries and comments; and (iv) the period of time in which comments will be accepted.

(2) Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

(3) Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of the Bureau.

(4) All written correspondence regarding propose contracts will be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

(5) Written comments on a proposed contract or contract action must be submitted to the appropriate Bureau of Reclamation officials at locations and within time limits set forth in the advance public notices.

(6) All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

(7) Copies of specific proposed contracts may be obtained from the appropriate Regional Director or his designated public contact as they become available for review and comment.

§ 426.21 Small reclamation projects.

(a) *Small reclamation project loans entered into after October 12, 1982.* Qualified or limited recipients are entitled to own and irrigate 960 and 320 acres of land, respectively, in districts entering into contracts for Small Reclamation project loans after October 12, 1982. Irrigation water to these recipients shall be delivered at the repayment rate specified in the district's contract. If a recipient owns and irrigates land in excess of his respective entitlement he must pay the contract rate as well as interest on that portion of the loan attributable to the excess land served. The interest rate to be used in these computations is set forth in the Act of August 6, 1956 (43 U.S.C. 422e).

(b) *Small reclamation project loans entered into prior to October 12, 1982.* Districts with Small Reclamation project loans which were entered into prior to October 12, 1982 must continue to abide by the provisions in that loan contract.

§ 426.22 Decisions and appeals.

Unless otherwise provided by the Secretary, the Regional Director shall make any determination required under these rules and regulations. A party directly affected by such determination may appeal in writing to the Commissioner of the Bureau of Reclamation within 30 days of receipt of the Regional Director's determination. The time for appeal may be extended by the Secretary. The affected party shall have an additional 30 days thereafter within which to submit a supporting brief or memorandum to the Commissioner. The Regional Director's determination will be held in abeyance until the Commissioner has reviewed the matter and rendered a decision. Pertinent addresses are shown below:

Commissioner, Bureau of Reclamation, Department of the Interior, 18th and C Streets, NW., Washington, D.C. 20240;
Regional Director, Pacific Northwest Region, Bureau of Reclamation, 550 West Fort Street, P.O. Box 043, Boise, ID 83724;

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 82-832; RM-4254]

FM Broadcast Stations in Cascade Village, Colorado; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Withdrawal of proposed rule (report and order).

SUMMARY: Action taken herein denies a petition to assign FM Channel 297 to Cascade Village, Colorado, filed by Keith E. Lamonica. Petitioner failed to establish Cascade Village's status as a community for assignment purposes.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73.

Radio broadcasting.

Report and Order (Proceeding Terminated)

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Cascade Village, Colorado) MM Docket No. 82-832; RM-4254.

Adopted: April 8, 1983.
Released: April 26, 1983.
By the Chief, Policy and Rules Division.

1. Before the Commission is a *Notice of Proposed Rule Making*, 48 FR 1521, published January 13, 1983, proposing the assignment of Class C Channel 297 to Cascade Village, Colorado, as that community's first FM assignment, in response to a petition filed by Keith E. Lamonica ("petitioner"). Supporting comments were filed by petitioner reaffirming his intention to apply for the channel, if assigned. Additionally, opposing comments and a counterproposal [1] were filed by KDRW Radio ("KDRW"), licensee of AM Station KDRW, Silverton, Colorado. Comments were also filed by Fordstone, Inc. ("Fordstone"), licensee of Stations KIUP(AM) and KRSJ(FM), Durango, Colorado. Petitioner filed reply comments.

2. KDRW's comments not only address petitioner's proposal but also his relationship with its station. Specifically, KDRW advises that petitioner signed a one-year contract with its station, and, although he is no longer in its employ, the agreement is still effective. KDRW advises that the contract, *inter alia*, forbids petitioner herein from participating in any manner with other radio stations or possible radio stations in its market during the contractual period. Therefore, KDRW concludes that assignment of Channel 297 to Cascade Village would infringe on its market area in direct conflict with the terms of that agreement. KDRW advises that, in light of the above, if Channel 297 is assigned to Cascade Village and petitioner applies for the channel, it will seek a permanent injunction against him for violation of the terms of his contract.

3. Fordstone's comments allege that Cascade Village is not a community within the scope of the Commission's determination and thus urges denial of the proposal. Appended to Fordstone's comments is a brochure describing the recreational nature of Cascade Village. According to Fordstone, as the brochure depicts, Cascade Village is a private ski resort area located north of Durango. Further, Fordstone asserts that Cascade Village has few permanent residents, is unincorporated, and has none of the indicia commonly associated with community status, *i.e.*, civic and charitable organizations, schools, municipal services, post office, or print media.

4. Furthermore, Fordstone notes that the 1980 U.S. Census does not list Cascade Village as a place, much less an incorporated community. Fordstone thus urges that in view of petitioner's failure to reveal any communal characteristics of Cascade Village to justify his proposal, the petition should be denied.

5. Petitioner's reply comments addressed KDRW's counterproposal to assign Channel 297 to Farmington, New Mexico. However in light of our action with respect to that proposal (see footnote 1, *supra*), no discussion thereon is warranted here.

6. Petitioner concedes that although Cascade Village is not incorporated, it did not exist at the time the 1980 Census was taken. Petitioner submits that since opponents were able to precisely identify Cascade Village by location and population, it thereby demonstrates that it is a geographically identifiable population grouping.

7. Petitioner likewise disputes opponent's contention that Cascade Village's size should preclude it from obtaining its own FM allocation, particularly where, as here, a first service is involved, citing *Fruita, Colorado*, 48 RR 2d 1581 (1981), and *Washburn, Missouri*, 48 RR 2d 1783 (1981).

8. Further, petitioner claims that this area of Colorado is rapidly developing as a winter resort and that due to the vastness as well as remoteness of the area, an even greater need exists to provide the region with its first local aural broadcast facility for the essential dissemination of extreme weather and road conditions.

9. In conclusion, petitioner asserts that the basic undertone of opponent's arguments is their private desire to avoid competition, to the detriment of the public interest.

10. Appended to petitioner's reply comments were letters from Mr. Timothy G. Sarmo, Town-County Coordinator of Silverton, San Juan County, Colorado, and Congressman Ray Kogovsek of Colorado. Therein, Mr. Sarmo states that Cascade Village is a planned recreational project that is technically known as a "Planned Unit Development" which eventually will consist of condominium units, lodging facilities and commercial outlets. Further, he reports that although roads leading into the project were built by the developer, they will be maintained by the property owners association. Moreover, Mr. Sarmo advises that an independent security force "has been promised by the development." Additionally, Mr. Sarmo advises that Cascade Village has a ten-year construction plan although many buildings now exist. Overall, Mr. Sarmo concludes that although seasonal recreation appears to be the primary use of condominium purchasers at Cascade Village, in the long run, it will probably evolve into yearly residences, and may actually incorporate in the future.

11. Congressman Kogovsek states that Cascade Village is a viable and growing

[1] KDRW proposed the assignment of Channel 297 to Farmington, New Mexico. Since that proposal conflicted with the proposed assignment of Channel 297 to Cascade Village, the Commission found an alternate channel for Farmington which does not conflict with any other proposed assignment and therefore is being treated separately in another proceeding (see MM Docket No. 83-191; RM-4352).

VOL

1983
UMI

area which consists of nearly 500 condominium units at the present time. Moreover, he states that Cascade Village maintains its own sewage and treatment plant and is served by the San Juan County Sheriff's Office. Additionally, it is stated therein that Cascade Village is located one mile from a major ski area that is planning a $250 million expansion. In sum, Congressman Kogovsek asserts that this rapidly expanding area would be effectively served by the proposed station "whose 100,000 watt transmitter would cover an area extending from Farmington, New Mexico to Montrose, Colorado." In light of the fact that Cascade Village is isolated with little or no access to local news, Congressman Kogovsek reiterates petitioner's assertion that the proposed FM station would provide a valuable service reporting on extreme weather and road conditions common to the area.

12. KDRW's dispute with petitioner's proposal stems not only from the proposed assignment *per se*, but appears to also be of a private nature between the individuals. Therefore, the Commission takes no position with respect to KDRW's allegations except to state that this is the sort of matter that is more appropriately considered at the application stage. In any event, KRDW's allegations do not disqualify petitioner from expressing his interest in the proposed assignment to Cascade Village, nor any other proposal in the future. If, in fact, KDRW's underlying fear is that of economic harm, it will have an opportunity to address such issue at the application stage. See, *Medford and Klamath Falls, Oregon*, adopted March 4, 1983, BC Docket No. 82–308.

13. Initially, we must decide whether Cascade Village qualifies as a community for assignment purposes. In the *Second Report and Order* in BC Docket No. 80–130, *Revisions of FM assignment Policies and Procedures*, 90 F.C.C. 2d 88 (1982), the Commission eliminated many of its assignment requirements. However, it stressed that Section 307(b) necessitates that we continue to require assignments to "communities" as a geographically identifiable population grouping. If the community is incorporated or listed in the U.S. Census, that is generally sufficient to satisfy its status. In the absence of such recognizable community status, petitioner is required to supply the Commission with adequate information to demonstrate that such a place is a geographically identifiable population grouping and thus may qualify as a community for Section 307(b) purposes. See, *Yorktown, Virginia*, 38 Fed. Reg. 6695, released March 12, 1983 (*Notice*).

14. In the *Declaratory Ruling Concerning the Meaning and Effect of § 73.642(a)(3)*, 55 FCC 2d 187, 189 (1975), the Commission held that:

> Although broadly speaking, a community consists of an identifiable population grouping with common local interests, there is not hard and fast rule to apply in deciding whether a particular population grouping constitutes a community and all relevant facts in each case must be weighed. Incorporation is not a prerequisite, and while a community need not have a clearly delineated area and population, it is no doubt correct to state that in most cases a community is a city, town, village or other political subdivision, citing *Mercer Broadcasting Co.*, 22 FCC 1000 (1957); *Musical Heights, Inc.*, 37 FCC 62 (1964); *Holston Broadcasting Corp.*, 1 RR 2d 982; and *Hymen Lake*, 46 FCC 2d 562 (1974).

15. Even though Cascade Village may not have come into existence until after the 1980 U.S. Census was taken, that factor standing alone does not disqualify its status for assignment purposes. As the Commission has traditionally held, " * * * the term community means a specific locality, with defined boundaries, where the residents share common interests." See, *Naples, Florida*, 41 RR 2d 1549 at 1553 (1977). As we held in *Coker, Alabama*, 43 RR 2d 190 at 193 (1978), absent other evidence " * * * which demonstrates that the [local] businesses, organizations or services meet the needs of a recognizable group with common interests, we will not make an FM assignment."

16. Based on the facts presented, it appears that Cascade Village is solely a resort area that has a transitory population which fluctuates as the tourist season changes. Petitioner has not demonstrated that Cascade Village is comprised of any of the components which are traditionally considered under Commission criteria to determine community status for assignment purposes such as a post office, library, schools, shopping centers, churches, social and/or civic organizations, newspapers or other indicia.[2] Here, there are no officially recognizable boundaries, and thus there is no assurance that the requirements of § 73.315 of the Commission's Rules with respect to coverage of the proposed service area could be met.[3]

17. Neither do we find the decisions relied upon by petitioner in *Fruita, Colorado*, or *Washburn, Missouri, supra*, supportive of its position. Even though each of those assignments were made despite their small size, their status as a community was not in question, and therefore, under the Commission's assignment criteria at that time, they were entitled to receive a first local service.

18. In view of the above considerations, *it is ordered*, That the petition of Keith E. Lamonica, requesting the assignment of Channel 297 to Cascade Village, Colorado, *is denied*.

19. *It is further ordered*, That this proceeding *is terminated*.

20. For further information concerning the above, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

National Advisory Council on Child Nutrition; Meeting

Pursuant to the Federal Advisory Committee Act, Pub. L. 92–463, notice is hereby given that the National Advisory Council on Child Nutrition, established by Section 15 of the National School Lunch Act to make a continuing study of the child nutrition programs of the U.S. Department of Agriculture, has scheduled a meeting for May 16–17, 1983. The meeting will take place from 8:30 a.m. to 5:00 p.m. on Monday, May 16; and from 8:30 a.m. to 3:00 p.m. on Tuesday, May 17 at the Holiday Inn, 480 King Street, Alexandria, Virginia (Old Town-Alexandria) 22314. If time permits, the general public will be allowed to participate in the discussions.

The meeting will be devoted primarily to a discussion of current program issues. The agenda will be available 15 days prior to the meeting. Requests for the agenda should be sent to Mr. George A. Braley, Executive Secretary, National Advisory Council on Child Nutrition, United States Department of Agriculture, Food and Nutrition Service, 3101 Park Center Drive, Alexandria, Virginia 22303, (703) 756–3052.

Dated: April 26, 1983.

Robert E. Leard,

Administrator, Food and Nutrition Service.

Forest Service

San Juan National Forest Grazing Advisory Board; Meeting

The San Juan National Forest Grazing Advisory Board will meet on Friday, May 20, 1983, at 1:00 p.m. at the San Juan National Forest Office, Conference Room, 701 Camino del Rio, Durango, Colorado. The Board was established in accordance with provisions of the Federal Land Policy and Management Act of 1976.

The Agenda for the meeting will include: (1) Recommendations for the utilization of range betterment funds; (2) recommendations for the development of allotment management plans; (3) discussion of effects of the Draft San Juan National Forest Land and Resource Plan on allotment management plans and utilization of range betterment funds.

The meeting will be open to the public. Persons who wish to attend and participate should notify N. R. Bond, San Juan National Forest (303–247–4874) prior to the meeting. The public may participate in discussions during the meeting or may file a written statement following the meeting.

Dated: April 25, 1983.

P. C. Sweetland,

Forest Supervisor.

BILLING CODE 3410–11–M

Rural Electrification Administration

Washington Electric Cooperative; Environmental Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA) pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Parts 1500–1508), and REA's Bulletin 20–21:320–21, Environmental Policies and Procedures, has prepared a Finding of No Significant Impact (FONSI) with respect to proposed financing assistance to Washington Electric Cooperative, Inc., (WEC) of East Montpelier, Vermont. This financing assistance will be used by WEC for the purchase of development rights and the construction of a one MW hydroelectric facility at an existing flood control dam located on the North Branch of the Winooski River at Wrightsville, Vermont.

FOR FURTHER INFORMATION CONTACT: REA's FONSI and Environmental Assessment (EA) along with WEC's Borrower's Environmental Report (BER) and other related material can be reviewed in, or requested from, the Office of the Director, Northeast Area—Electric, REA, South Agriculture Building, Room 0243, Washington, D.C. 20250, telephone (202) 382–1420, or the Office of WEC, (Mr. Robert O. Toombs, General Manager) East Montpelier, Vermont 05651, telephone (802) 223–5245.

SUPPLEMENTARY INFORMATION: REA has reviewed the BER submitted by WEC and determined that it represents an accurate evaluation of the environmental impacts of the proposed project. REA has also determined that the proposed project will have no affect on threatened and endangered species, or known cultural resources, and no significant adverse affect of prime farmland, floodplains or wetlands. As a result of proposed project, the flood prone area of the Wrightsville Reservoir will rise a maximum of 4.58 meters (15 ft.) and 2.84 hectares (7 acres) of wetlands and 8.1 hectares (20 acres) of prime farmland will be inundated. However, REA has determined there are no practicable alterantives to involing these areas and the construction and operation of the proposed project will have no unacceptable impact to the environment.

The alternatives evaluated by REA included no action, conservation, purchasing other types of generating facilities, and purchasing from other sources. After evaluating these alternatives, REA has determined that construction of the project, as proposed, represents the prefarred alternative when environmental, economic, and technical factors are balanced.

Based upon the BER and other related data, REA prepared an EA and FONSI concerning the proposed construction. It is REA's view that the proposed financing assistance will not be a major Federal action that will significantly affect the quality of the human environment.

This program is listed in the catalog of Federal Domestic assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated: April 25, 1983.
Harold V. Hunter,
Administrator.
[FR Doc. 83-11625 Filed 5-2-83; 8:45 am]
BILLING CODE 3410-15-M

Rio Grande Electric Cooperative, Inc.; Construction of Transmission Facilities; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR Part 1500), and REA Bulletin 20–21:320–21, Environmental Policies and Procedures, has made a Finding of No Significant Impact (FONSI) with respect to financing assistance for the construction of 138 kV transmission facilities by Rio Grande Electric Cooperative, Inc., (Rio Grande) in Pecos and Terrell Counties, Texas.

FOR FURTHER INFORMATION CONTACT: REA's Finding of No Significant Impact and Environment Assessment (EA) and Rio Grande's Borrower's Environmental Report (BER) may be reviewed in the office of the Director, Southwest Area-Electric, Room 3862, South Agriculture Building, Rural Electrification Administration, Washington, D.C. 20250, telephone (202) 382–1940 or at the office of Rio Grande Electric Cooperative, Inc., (R.D. Gwartney, Manager) P.O. Box 125, Brackettville, Texas 78832, telephone (512) 563–2844 during regular business hours.

SUPPLEMENTARY INFORMATION: REA, in conjunction with a request for financing assistance from Rio Grande, has reviewed the BER submitted by Rio Grande and has determined that it represents an accurate assessment of the environmental impact of the proposed project. Rio Grande's project consists of a 138 kV transmission line about 34 km (21 mi) long between the proposed Sheffield switching station 6.1 km (3.8 mi) southeast of Sheffield, Texas, and the proposed Terrell distribution substation about 5 km (3 mi) southeast of the intersection of state roads 3166 and 349.

REA determined that the proposed project will have no effect on prime farmland and threatened and endangered species. Rio Grande's 138 kV line will traverse the floodplain and wetland associated with Independence Creek. REA determined that the project will have no effect on the floodplain and wetland. The State Historic Preservation Officer determined that the project will have no effect on cultural resources.

Alternatives examined for the Sheffield-Terrell 138 kV line included: (1) No action, (2) upgrading existing facilities, (3) energy conservation and load management, and (4) alternate station sites and routes.

Based upon the BER and support documents, REA prepared an EA concerning the proposed project and its impacts. REA concluded that the proposed financing assistance for Rio Grande would not be a major Federal action signficantly affecting the quality of the human environment.

In accordance with REA Bulletin 20–21:320–21, dated January 21, 1980, Rio Grande adversited and requested comments on the environmental aspects of the proposed project in local newspapers in Pecos, Terrell and Val Verde Counties, Texas. There were no comments.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850–Rural Electrification Loans and Loan Guarantees.

Dated: April 20, 1983.
Harold V. Hunter,
Administrator.

BILLING CODE 3410-15-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 11–83]

Foreign-Trade Zone 70; Application for Subzone at Ford Auto Plant, Dearborn, Michigan

An application has been submitted to the Foreign-Trade Zones Board (The Board) by the Greater Detroit Foreign-Trade Zone, Inc. (GDFTZ), a Michigan non-profit corporation and grantee of Foreign-Trade Zone 70, requesting authority for a special-purpose subzone at a Ford Motor Corporation auto assembly plant in Dearborn, Michigan, within the Detroit Customs port of entry. It was sumbitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on April 21, 1983. The applicant is authorized to make this proposal under Chapter 447, Act 154, Michigan Public Acts of 1983 (MSA 21.302(1)).

On July 21, 1981, the Board authorized GDFTZ to establish a foreign trade zone project in the Detroit area (Board Order 176, 46 FR 38941, July 30, 1981). General-purpose zone facilities are located at the Clark Street Port facility in Detroit and at a distribution complex in Dearborn. The project also includes subzones at Ford's tractor plant in Romeo, Michigan, at Chrysler's Jefferson Assembly Plant in Detroit, and at Ford's Wayne auto assembly plant.

GDFTZ now requests subzone status for Ford's Dearborn plant, which covers 72 acres at 3001 Miller Road in Dearborn, Michigan, some 12 miles from downtown Detroit. The facility is used for the assembly of compact automobiles. Although most of the parts and material used at the plant are produced domestically, about 6 percent of the components, such as radios, engines and transmissions, are imported.

Zone procedures will exempt Ford from paying duties on foreign components used for its exports. On its domestic sales, the company will be able to defer duty and to take advantage of the same duty rate available to importers of finished autos. The average duty rate for the foreign components Ford uses at its plant is 4.5 percent whereas the rate for finished autos is 2.8 percent. The savings from zone procedures are expected to contribute to Ford's efforts to reduce plant costs, helping to make it more competitive with auto production facilities offshore. This will encourage Ford to keep the Dearborn facility in operaton and create an environment which could lead to a possible increase in the plant's workforce, currently some 3200 persons.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Louis A. Mezzano, District Director, U.S. Customs Service, North Central Region, 447 Michigan Avenue, Detroit, Michigan 48226; and Colonel Raymond T. Beurket, District Engineer, U.S. Army Engineer District Detroit, P.O. Box 1027, Detroit, Michigan 48231.

Comments concerning the proposed subzone are invited in writing from interested persons and organizations. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before June 3, 1983.

A copy of the application is available for public inspection at each of the following locations:
U.S. Department of Commerce District Office, Federal Building, Room 445, 231 West Lafayette Street, Detroit, Michigan 48226
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, N.W., Washington, D.C. 20230

Dated: April 28, 1983.
John J. Da Ponte, Jr.
Executive Secretary.

BILLING CODE 3510-25-M

International Trade Administration

Non-Rubber Footwear From Argentina; Final Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of countervailing duty order.

SUMMARY: On December 15, 1982, the Department of Commerce published in the **Federal Register** the preliminary results of its administrative review of the countervailing duty order on non-rubber footwear from Argentina. The review covered the period January 17, 1979, through December 31, 1980. The notice stated that the Department had preliminarily determined the amount of the net subsidy to be 4.11 percent *ad valorem* for 1979 and 3.94 percent *ad valorem* for 1980.

Interested parties were invited to comment on the preliminary results. After review of all comments received, the final results of the review are the same as those presented in the preliminary results.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Edward Haley or Larry Hampel, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On December 15, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 56162) the preliminary results of its administrative review of the countervailing duty order on non-rubber footwear from Argentina (44 FR 3474, January 17, 1979). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are footwear described in Part 1A of Schedule 7 of the Tariff Schedules of the United States Annotated, excluding items 700.5100 through 700.5400, 700.5700 through 700.7100, and 700.9000, and imported directly or indirectly from Argentina. The notice of preliminary results of this review erroneously included items 700.5400 and 700.9000, which were not covered by the scope of the order and are not covered by these final results.

The review covers the period January 17, 1979 through December 31, 1980. We reviewed benefits available under an income tax reduction plan and the reembolso, an export rebate program, both found countervailable in the original final determination, and a system of preferential financing for exports, found countervailable in the final countervailing duty determination on leather wearing apparel from Argentina (46 FR 23090).

Analysis of Comments Received

Interested parties were invited to comment on our preliminary results. The Department received written comments from the Government of Argentina and from the petitioner, the Footwear Industries of America, Inc.

Comment 1

The Argentine government contends that the benefit attributed to the income tax reduction plan for 1979 is too large, because the Department assumed full use of the allowable tax deductions. Further, because the Argentine government never indexed or adjusted the benefit, the benefit was eroded by inflation. The program did not involve money refunds, could not be applied to other taxes, and was not transferable; therefore, the benefit was insignificant and not considered by footwear companies when pricing exports.

Department's Position

In the absence of any statistical data on the actual use of this program in 1979, the Department assumes full use of the program. Further, the impact of a benefit on an exporter's pricing policy is not relevant in determining whether that benefit constitutes a subsidy.

Comment 2

The Argentine government contends that the Department should verify and consider loan information for 1980 provided after the publication of the preliminary results. The new information indicates that the actual usage rate in 1980 of the preferential loan program was 9.15 percent, rather than the maximum allowable rate of 55 percent assumed by the Department. Multiplying the actual usage rate by the interest rate differential results in a lower benefit than that calculated by the Department.

Department's Position

Although the Department requested information for 1980 in the course of the review, it was not submitted prior to publication of our preliminary results. Therefore, we view the information ultimately submitted as untimely, and we have not considered it in calculating these final results.

Comment 3

The petitioner contends that the Department should verify the information submitted by the Argentine government. The verification should include a reexamination of the reembolso program to confirm that the program continues to meet the linkage test for the rebate of indirect taxes. The Department should not presume that linkage exists on the basis of prior investigations.

Department's Position

Neither section 751 of the Tariff Act of 1930 ("the Tariff Act") nor the Commerce Regulations require verification of information submitted in the course of an administrative review. Verification in section 751 administrative reviews is discretionary. *See, e.g.*, "Termination of Suspension Agreement and Issuance of Countervailing Duty Order" regarding leather wearing apparel from Argentina (48 FR 11480). During this review, we found linkage for this product based on a study of specific taxes used by the Argentine government to set the 1976 reembolso rate and our reviews of specific taxes levied on non-rubber footwear during 1979 and 1980. We did not rely on prior investigations. In the next administrative review of the order, the Department intends to verify the information received.

Comment 4

The petitioner maintains that controls on the export of Argentine hides results in a subsidy to Argentine footwear producers by artificially depressing the domestic price of raw materials.

Department's Position

The Department will consider in the next administrative review of the order any possible subsidies to non-rubber footwear manufacturers resulting from an export tax or other controls on the export of hides.

VOL
48
ISS
86
MAY
3
1983
UMI

Comment 5

The petitioner contends that from 1979 to 1980 a reported 50 percent decline in production capacity and a 25 percent decline in the number of manufacturers of non-rubber footwear suggest a planned reorganization of the industry. Such a reorganization would require government intervention and may imply additional subsidy programs, which the Department should investigate.

Department's Position

In its response to our questionnaire, the Government of Argentina stated that it provided no subsidies, not covered by the questionnaire, to manufacturers or exporters of non-rubber footwear. In the absence of stronger evidence to the contrary, we accept that statement.

Comment 6

The petitioner asserts that documentation supplied by the Argentine government regarding the income tax deduction for export-related income is insufficient to demonstrate its expiration on June 30, 1980. Further, if the program was significant enough to be extended through the first half of 1980, it is inconceivable that it was not used. The Department is therefore obliged to verify the Argentine government's claim that the program was not used during that period.

Department's Position

Decrees No. 138, 1467, 823, 3181 and 1053/80 are in the record of this review. Decree No. 138 of January 20, 1975 (amended by No. 1467), which established the program, contains an automatic expiration date. Decrees 823 of June 14, 1976, 3181 of October 19, 1977 and 1053/80 of May 16, 1980, extended the program for specific periods, the last ending on June 30, 1980. We have no evidence of any additional extension, and are relying on the respondent's statement that the program was not used in 1980. The Department's position with regard to our obligation to verify in section 751 reviews is set out in our response to Comment 3, above.

Final Results of the Review

After consideration of all comments received, the final results of our review are the same as those presented in the preliminary results of the review. We determine the net subsidy to be 4.11 percent *ad valorem* for the period January 17, 1979 through December 31, 1979, and 3.94 percent *ad valorem* for calendar year 1980. Accordingly, the Department will instruct the Customs Service to assess countervailing duties of 3.94 percent of the f.o.b. invoice price on all shipments of Argentine non-rubber footwear entered, or withdrawn from warehouse, for consumption on or after January 1, 1980 and exported on or before December 31, 1980.

The provisions of T.D. 79-16 and section 303(a)(5) of the Tariff Act, prior to the enactment of the Trade Agreements Act of 1979, apply to all entries made prior to January 1, 1980. The Department therefore will instruct the Customs Service to assess countervailing duties of 0.86 percent of the f.o.b. invoice price on all shipments of such merchandise entered, or withdrawn from warehouse, for consumption on or after January 17, 1979 and on or before December 31, 1979.

Further, as provided for by section 751(a)(1) of the Tariff Act, we will instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 3.94 percent of the f.o.b. invoice price on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department is now commencing the next administrative review of the order.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information in the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: April 27, 1983.

Judith Hippler Bello,

Acting Deputy Assistant Secretary for Import Administration.

[FR Doc. 83-11740 Filed 5-2-83; 8:45 am]

BILLING CODE 3510-25-M

DEPARTMENT OF COMMERCE

International Trade Administration

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Allocation of Duty-Free Quotas for Calendar Year 1983 Among Producers Located in the Virgin Islands and Guam

AGENCY: Import Administration, International Trade Administration, Commerce and Office of the Secretary, Interior.

ACTION: Allocation of duty-free quotas for calendar year 1983 among producers located in the Virgin Islands and Guam.

SUMMARY: Pursuant to Pub. L. 97-446, the Departments of the Interior and Commerce (the Departments) share responsibility for the allocation of watch quotas among watch assembly firms in the insular possessions. The criteria for the calculation of the 1983 watch quotas among producers in the Virgin Islands and Guam are set forth in the appendix to the regulations (15 CFR Part 303) published in the **Federal Register** dated April 25, 1983 (48 FR 17579 (1983)). The Departments have verified the data submitted on application form ITA-334P by producers in the Virgin Islands and Guam and inspected the current operations of all producers in accordance with § 303.4(b) of the codified rules. The verification established that in calendar year 1982 the Virgin Islands watch assembly firms shipped 1,441,879 watches and watch movements into the customs territory of the United States under General Headnote 3(a) of the Tariff Schedules of the United States. The dollar amount of corporate income taxes paid by all producers during calendar year 1982, less penalty payments and refunds and subsidies, plus the dollar amount of wages, up to a maximum of $28,000 per person, paid by all producers during calendar year 1982 to residents and attributable to the producers' headnote 3(a) watch and watch movement assembly operations totalled $1,667,618. The calendar year 1983 Virgin Islands annual allocations set forth below are based on the data verified by the Departments in the Virgin Islands and are made in accordance with the formula established for allocation of watch quota for calendar year 1983. The allocations include reallocations pursuant to the codified watch quota rules, as more fully explained in the Supplementary Information, below.

The duty-free watch quota allocations for calendar year 1983 in the Virgin Islands are as follows:

Name of firm	Annual allocation
1. Atlantic Time Products	110,625
2. Belair Watch Corp. & Belair Quartz Inc	500,000
3. Hampden Watch Co., Inc	250,000
4. Master Time Co., Inc	200,000
5. Progress Watch Co., Inc	800,000
6. Unitime Ind. Inc	500,000

The Guam allocation is made pursuant to Section 2 of the appendix and is shown below.

Name of firm	Annual allocation
Timewise Ltd.	500,000

FOR ADDITIONAL INFORMATION CONTACT: Frank Creel, who can be reached on 202-377-1660.

SUPPLEMENTARY INFORMATION: Pub. L. 97-446 established a 1983 quota of 4,800,000 units, 3,000,000 of which could be allocated to Virgin Islands producers, 1,200,000 to Guam producers, and 600,000 to American Samoa producers. Section 5(b) of the appendix to Part 303 set aside 500,000 units of the Guam quota for possible new firms. All of the quota for American Samoa, where there have been no watch producers for several years, has been set aside for new entrants.

The above allocation of quota among Virgin Islands producers reflects: (1) Adjustments made in data supplied on the producer's annual application forms (ITA Form-334P) as a result of the Departments' verification (which adjustments were reviewed by officials of the respective companies during the Departments' Virgin Islands verfication of data); and (2) Reallocation of quota which has been voluntarily relinquished by a number of producers pursuant to § 303.5(a)(2) of the codified watch quota rules. A portion of the Guam quota was also voluntarily relinquished.

The above allocation of Virgin Islands quota totals 2,360,625 units. The remaining 639,375 units of unallocated quota will be treated in accordance with § 303.9(b) of Part 303. The remaining 200,000 units of unallocated Guam quota will be treated in accordance with the same provision and with sections 3(b) and 6 of the appendix to Part 303.

The number of watches and watch movements authorized for shipment on or after January 1, 1983, under initial quotas previously allocated by the Departments, will be applied against the allocations above, which are for the full calendar year 1983.

Pedro A. Sanjuan,

Assistant Secretary for Territorial and International Affairs, Department of the Interior.

Richard M. Seppa,

Director, Statutory Import Programs Staff, Department of Commerce.

BILLING CODE 4310-10-M 3510-25-M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Modification No. 2 to Permit No. 335

Notice is hereby given that pursuant to the provisions of § 216.33(d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Permit No. 335 issued to Dr. James R. Gilbert, University of Maine at Orono, Orono, Maine 04469 on May 13, 1981 (46 FR 27514), as modified on February 5, 1982 (47 FR 6317) is further modified as follows:

Section A-1 is changed to read:

Of these, thirty (30) harbor seals of any age may be instrumented with epoxy-attached radio tags, provided that those animals are post-weaning.

This modification becomes effective on April 27, 1983.

The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: April 27, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-11741 Filed 5-2-83; 8:45 am]

BILLING CODE 3510-22-M

National Marine Fisheries Service; Receipt of Modification

Notice is hereby given that Minerals Management Service, Alaska OCS Region, Anchorage, Alaska requested a modification to Permit No. 283 issued to Bureau of Land Management under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216) on May 4, 1979.

Mineral Management Services requests authority to take by harassment up to 150 additional bowhead whales in Alaskan and Canadian waters of the Beaufort Sea and to conduct at sea seismic exploration sounds in the presence of the animals.

Concurrent with the publication of this notice in the **Federal Register** the Secretary of Commerce is forwarding copies of this request to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this request are summaries of those of the Applicants and do not necessarily reflect the views of the National Marine Fisheries Service.

Documentation pertaining to the above modification request is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802.

Dated: April 27, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

Intent To Grant Limited Exclusive Patent License; Celltech Ltd.

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Celltech Limited, having a place of business in Berkshire, England, a limited exclusive right in selected European countries and Japan to manufacture, use and sell products embodied in the invention, "Human Growth Hormone Produced by Recombinant DNA in Mouse Cells," U.S. Patent Application 6-452, 783 (filed December 23, 1982). The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The proposed exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 41 CFR 101-4.1. The proposed license may be granted unless, within sixty days from the date of this Notice, NTIS receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest.

Inquiries, comments and other materials relating to the proposed license must be submitted to the Office of Government Inventions and Patents, NTIS, Box 1423, Springfield, VA 22151.

Dated: April 19, 1983.

Douglas J. Campion,
Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, U.S. Department of Commerce.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Additional Change in the Textile Category System

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Additional change in the Textile Category System.

SUMMARY: The Correlation: Textile and Apparel Categories with the Tariff Schedules of the United States Annotated, provides for placement of Tariff Schedules of the United States, Annotated (T.S.U.S.A.) numbers in the Textile Category System. Amendments to the T.S.U.S.A. reflecting certain administrative changes require amendments to the Correlation. This change is cited below.

Category	New T.S.U.S.A. beginning April 1, 1983
659	Change 703.1515 (man-made fiber headwear not in part of braid, net knit) to 703.1600.

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Claire McDermott, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230.

Dated: April 28, 1983.

Sincerely,

Walter C. Lenahan,
Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

CONSUMER PRODUCT SAFETY COMMISSION

Meeting of Chronic Hazard Advisory Panel on Asbestos

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of meeting.

SUMMARY: A Chronic Hazard Advisory Panel, established by the Commission to provide advice about the potential chronic hazards presented by asbestos in consumer products, has scheduled a meeting which is open to the public.

DATES: The meeting will begin at 9:00 am on May 12, 1983, and will continue until 5:00 pm. The Panel will meet again on May 13, during the same hours.

ADDRESS: The meeting will be at 5401 Westbard Avenue, Bethesda, Maryland, in room 456.

FOR FURTHER INFORMATION CONTACT: Colin B. Church, Directorate for Health Sciences, Consumer Product Safety Commission, Washington, D.C. 20207, (301) 492-6957.

SUPPLEMENTARY INFORMATION: The Chronic Hazard Advisory Panel on Asbestos is a seven-member group which has been established to advise the Commission concerning the potential chronic hazard of cancer associated with the use of consumer products containing asbestos. The Panel, convened in January, 1983, is addressing the concern that the presence of asbestos in consumer products under certain conditions may present a risk of cancer and respiratory disease to consumers.

At its meetings on May 12-13 the Panel will be reviewing working papers proposed by Panel members which might be incorporated into a "Report to the Commission" which is expected in July 1983. It is anticipated that the public will have the opportunity to provide written and oral comments regarding the work of the Panel at a public meeting which will be announced in the Federal Register at a later time.

Dated: April 27, 1983.

Sayde E. Dunn,
Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Deputy Under Secretary for Management invites comments on the proposed information collection requests as required by the Paperwork Reduction Act.

DATE: Interested persons are invited to submit comments on or before June 2, 1983.

ADDRESSEES: Written comments or requests should be addressed to Arnold Strasser, Office of Management and Budget, 728 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, D.C. 20503 and/or Margaret Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, D.C. 20222.

FOR FURTHER INFORMATION CONTACT: William Wooten, (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The requirement for public consultation may be amended or waived by OMB to the extent that the public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform the statutory obligations.

The Deputy Under Secretary for Management publishes this notice containing proposed information requests prior to the submission of these requests to the Office of Management and Budget. Public comment is invited and copies of the requests may be obtained from the addressees named above.

Dated: April 28, 1983.

Charles L. Heatherly,
Deputy Under Secretary for Management.

Office of Postsecondary Education (OPSE)

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Lakeside Refining Co. and Crystal Refining Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of action taken on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department

of Energy (DOE) announces that it has adopted a Consent Order with Lakeside Refining Company and Crystal Refining Company as a final order of the Department.

EFFECTIVE DATE: April 14, 1983.

FOR FURTHER INFORMATION CONTACT:
David H. Jackson, Director, Kansas City Office, Economic Regulatory Administraiton, 324 East 11th Street, Kansas City, Missouri 64106–2466, (816) 374–2092.

SUPPLEMENTARY INFORMATION: On March 1, 1983, 48 FR 8533, the ERA published a notice in the Federal Register that it had executed a proposed Consent Order with Lakeside Refining Company and Crystal Refining Company of Southfield, Michigan, on February 14, 1983 which would not become effective sooner than 30 days after publication of that notice. The Consent Order settles regulatory violations alleged by the Department of Energy (DOE) against those companies concerning both petroleum product price overcharges and purchases and sales of crude oil entitlements during the period August 19, 1973 through January 27, 1981. Under the terms of the Consent Order, the companies will refund $675,000. The Consent Order provides a direct refund of $475,000 to identified purchasers for settlement of disputed price overcharges. The remaining $200,000 plus installment interest, which settles disputes under the crude oil entitlements regulations, is to be paid to the DOE for ultimate distribution in a just and equitable manner.

Pursuant to 10 CFR 205.199J(c), interested persons were invited to submit comments concerning the terms and conditions of the proposed Consent Order. Five comments were received from State offices. The commenting States suggested that funds not distributed to direct purchasers should be distributed to the States for use in energy related programs.

ERA has considered these comments and notes that the Consent Order does provide for direct restitution to identified purchasers of the settlement amount representing disputed overcharges. However, because appropriate recipients of the funds to be paid in settlement of the entitlements disputes are not as readily discernable, the ERA believes that depositing the funds into a suitable account for ultimate distribution in a just and equitable manner is an appropriate disposition of the funds at this time.

Issued in Kansas City on the 22d day of April 1983.

Robert J. Wehrle-Einhorn,

Office of Special Counsel, Kansas City Office, Economic Regulatory Administration.

[FR Doc. 83-11709 Filed 5-2-83; 8:45 am]

BILLING CODE 6450-01-M

Southwestern Power Administration

[Rate Order SWPA-9]

Order Approving Rates for Submission to the Federal Energy Regulatory Commission

AGENCY: Southwestern Power Administration, DOE.

ACTION: Notice of power rate order.

SUMMARY: The Assistant Secretary for Conservation and Renewable Energy, under Delegation Order No. 0204–33, as amended, has developed, acting by and through the Administrator, Southwestern Power Administration, increased system power rates and has approved these rates for submission to the Federal Energy Regulatory Commission (FERC) for its confirmation and approval on a final basis.

EFFECTIVE DATE: The increased rate is being submitted to the FERC for confirmation, approval, and placement in effect on a final basis by October 1, 1983.

FOR FURTHER INFORMATION CONTACT:
Walter M. Bowers, Chief, Division of Power Marketing, Southwestern Power Administration, Department of Energy, P.O. Drawer 1619, Tulsa, Oklahoma 74101, (918) 581–7529
and
John J. DiNucci, Office of Power Marketing Coordination, Department of Energy, Federal Building, 12th Street and Pennsylvania Avenue, NW., Washingotn, DC 20585, (202) 633–8336.

SUPPLEMENTARY INFORMATION: Rate Schedule P–4 for peaking power supersedes Rate Schedule P–2. Rate Schedule F–4A for firm power from the integrated system replaces Rate Schedule F–2. Rate Schedule F–4B (firm power through Oklahoma Utilities Companies) replaces Rate Schedule F–3. Rate Schedule EE–2 (Revised) for excess energy replaces Rate Schedule EE–2. Rate Schedule IC–2 (Revised) for interruptible capacity replaces Rate Schedule IC–2.

Issued in Washington, D.C. April 25, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

April 25, 1983

Pursuant to Sections 302(a) and 301(b) of the Department of Energy Organization Act, Pub. L. 95–91, the functions of the Secretary of the Interior and the Federal Power Commission under Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s, relating to the Southwestern Power Administration (SWPA) were transferred to and vested in the Secretary of Energy. By Delegation Order No. 0204–33, effective January 1, 1979, 43 FR 60636 (December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrator, and to confirm, approve and place in effect such rates on an interim basis and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, Delegation Order No. 0204–33 was amended, effective March 19, 1981, to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy. This rate order is issued pursuant to the delegation to the Assistant Secretary for Conservation and Renewable Energy.

Background

Federal Energy Regulatory Commission (FERC) confirmation and approval of the following system rate schedules was provided in FERC Docket No. EF79–4011–000 issued January 25, 1982 for the period April 1, 1979 through September 30, 1982:

Rate Schedule P–3, Peaking Power
Rate Schedule F–2, Firm Power
Rate Schedule F–3, Firm Power through Oklahoma Utility Companies
Rate Schedule EE–2, Excess Energy
Rate Schedule IC–2, Interruptible Capacity
Contract No. 14–02–001–864, Section 2, Tex-La Electric Cooperative, Inc.

A request for extension of these rates through September 30, 1983 was filed with the FERC July 27, 1982. Confirmation and approval of the rates was extended by the FERC on September 30, 1982 for the period ending October 30, 1982; extended on October 29, 1982 for the period ending November 29, 1982; extended on November 29, 1982 for the period ending January 28, 1983; extended on January 27, 1983 for the period ending February 28, 1983; and extended on February 25, 1983 for the period ending September 30, 1983.

SWPA's 1982 Current and Revised Power Repayment Studies indicate that the existing rates will not satisfy present financial criteria regarding repayment of investment in a 50-year period. The Power Repayment Studies indicate that an increase in average annual revenue from the Integrated System is necessary beginning in FY 1984 to accomplish System repayment in the required number of years. Accordingly, SWPA developed proposed system rate schedules in the 1982 Rate Design Study based on the additional revenue requirement. The proposed system rate schedules were as follows:

Rate Schedule P–3 (Revised), Peaking Power
Rate Schedule F–2 (Revised), Firm Power
Rate Schedule F–3 (Revised), Firm Power through Oklahoma Utility Companies
Rate Schedule EE–2 (Revised), Excess Energy
Rate Schedule IC–2 (Revised), Interruptible Capacity

The rate under Section 2 of Contract No. 14–02–001–864, for Tex-La Electric Cooperative, Inc., is allowed by contract terms to change no more often than once every five years.

Since the rate was increased April 1, 1979, the next change cannot be made until April 1, 1984. Therefore, SWPA proposes to continue charging the existing rate through the contract five-year period at which time a rate adjustment may be filed.

Title 10, Part 903, Subpart A of the Code of Federal Regulations, "Procedures for Public Participation in Power and Transmission Rate Adjustments," has been followed in connection with the proposed rate adjustment. More specifically, opportunities for public review and comment on proposed system power rates were announced by notice published in the Federal Register, September 30, 1982 (47 FR 43157). A Public Information Forum was held October 26, 1982, and a Public Comment Forum was held December 1, 1982. Written comments were due by December 29, 1982. During the comment period, interested parties reviewed SWPA's studies designed to produce an average annual revenue increase of $24,734,000, or 37.9 percent. In addition and prior to the formal public participation process, SWPA held informal meetings with customer groups during preparation of the September 1982 Current and Revised Power Repayment Studies and Rate Design Study. SWPA personnel met informally with representatives of the Committee on Power for the Southwest (COPSW) on the following dates at SWPA headquarters in Tulsa, Oklahoma, to explain the studies and answer questions concerning development of the proposed system rates: February 26, 1982; March 23, 1982; March 24, 1982; May 13, 1982; June 30, 1982; and August 25, 1982. Also, on April 1, 1982, SWPA personnel met with COPSW representatives and personnel of the U.S. Corps of Engineers (Corps) at the Dallas Division Office to discuss Corps operation and maintenance expense projections and estimates of major project replacement costs.

Following the conclusion of the comment period the Administrator in January 1983 modified the 1982 Power Repayment and Rate Design Studies and the proposed Rate Schedules based on comments received. An Administrator's Record of Decision and Executive Summary also were released. The proposed rate schedules resulting from these changes are designed to produce ultimate average annual revenue of $90.2 million, which is an increase of 38.3 percent over the revenue produced by the existing rates of $65.2 million.

A comparison of the existing rates and the rates proposed by the Administrator is shown below:

	Rates	
	Existing	Proposed
CAPACITY		
a. At Grid includ. 138/161KV [1]	1.40	[2] 2.22
b. At 69 kV [1]	1.60	[2] 2.47
c. At Below 69 kV [1]	1.95	[2] 2.97
d. Interruptible Capacity [3]	0.05	0.075
ENERGY (mills per kilowatt hour):		
a. First 100 hrs/mo	3.5	[4] 3.5
b. Next 340 hrs/mo	7.0	[4] 3.5
c. Over 440 hrs/mo	14.0	[4] 3.5
d. Excess Energy	3.0	3.5
e. Interruptible Capacity	3.5	3.5

[1] Dollars per kilowatt per month.
[2] Until Clarence Cannon becomes operational in FY 85, the proposed capacity rate will be $0.04 lower.
[3] Dollars per kilowatt per day.
[4] Plus purchased power adjustment for peaking (P–3, F–3) 2.0 mills/kWh in average year and from firm (F–2) 4.0 mills/mWh in average year.

On March 30, 1983 the Administrator and I met with representatives of the Committee on Power for the Southwest who restated their principal objections previously expressed in the record to the repayment studies and rate design features.

Disucssion

Purchased Power Expenses and the No-Deficit-Year Objective

Congress has established two basic requirements for judging the adequacy of rates for the sale of Federal power: First, that each increment of investment should be repaid with interest within a reasonable period of years, normally considered to be fifty years; and second, that annual operating costs should be recovered on a pay-as-you-go basis. See DOE Order RA 6120.2, paragraph 12; Solicitor's Opinion M–36874, 61 I.D. 72 (1974).

Over the years the Southwestern Power Administration has not been very successful in meeting either of these criteria. The 1982 Power Repayment Study, page E–6, columns 6 and 10, shows that during the first 36 years of its operations SWPA had a deficit, that is, failed to recover all operating expenses including interest, in 18 of those years; and that at end of the 36th year, 1981, SWPA had repaid only $28.9 million out of a total investment of $655.5 million.

Beginning in 1970 Southwestern has undertaken a number of actions to improve the agency's financial position through the revision of rates and contracts and the reduction of expenses. These actions have produced positive results and would have led to steady financial improvement had it not been for a number of adverse developments including unfavorable litigation, unexpectedly high rates of inflation, operating problems, and two unusually dry years, 1977 and 1981.

The Administrator of Southwestern is properly concerned about the continued inability of the agency to eliminate operating deficits in fact even though rate studies eliminate them in theory. To achieve this objective he has taken a number of worthwhile steps: He is continuing the policy of allowing all firm (load factor) power sales contracts to expire and to replace them with peaking power contracts obligating SWPA to supply only 1200 kilowatthours per kilowatt in a dry year; in his rate design study he has increased the capacity component of the rates relative to the energy component by more accurately assigning fixed and variable expenses, thereby assuring more consistent recovery of costs, particularly in dry years; and he has reevaluated estimates of future revenues and expenses in the power repayment study to assure adequate cost recovery. In addition he proposed to include in the new rates a feature for passing through to the customers on a three-month rolling average basis the actual direct purchased power expenses as they are incurred.

This would remove the fluctuating purchased power costs from impacting the net result shown on the annual financial statement and in column 6 of the historical portion of the current

power repayment study. This impact is illustrated by a comparison of the estimates in the 1978 power repayment study, upon which the 1979 rate increases were based, for the five-year period 1978–1982 with the actual results during this period. These results are shown on page A–11 of the 1982 study. The table shows for this five-year period that gross revenues were overestimated by $11.7 million and that, although Corps O&M expense and Corps and SWPA interest expense were overestimated by $.3 million and $3.4 million respectively, SWPA operating expense was underestimated by $18.4 million. The net result was that amortization was overestimated by $26.4 million (not to mention the adjustment of an additional $18.8 million reduction in amortization shown in column 6, page E–6, and referenced in footnote 1). This is an average overestimation of $5.3 million a year.

A comparison of the direct purchased power expenses forecast in the 1978 repayment study with the actual expenses during the 1978–1982 period set forth in the following table shows that $13.8 million of the $26.4 million shortfall, or about 52 percent, was attributable to higher-than-anticipated purchased power expense. Borderline purchased power costs are not shown in the table because they are billed on a passthrough basis, so revenues increase as costs increase, and the net effect on amortization is zero.

COMPARISON OF PREVIOUS FORECASTS OF PURCHASED POWER EXPENSE TO ACTUAL PERFORMANCE FOR PERIOD FISCAL YEAR 1978–1982

Year	Previous forecast [1]		Actual performance [2]		Total
	Direct	Net adjustment for banking	Direct	Net adjustment for banking	
	(1)	(2)	(3)	(4)	(5)
1978	$2,699,400	0	$3,066,563	($874,254)	$2,192,309
1979	3,248,000	0	7,096,052	0	7,096,052
1980	4,296,800	0	2,300,705	1,337,803	3,638,508
1981	4,950,100	0	15,062,681	4,443,992	19,506,673
1982	5,392,300	0	1,914,852	[3]0	1,914,852
Total	20,586,600	0	29,440,853	4,907,541	34,348,394

Difference: Column 1 minus Column 5: ($13,761,794).

[3] Estimate.

The customers have objected to the proposed purchase power passthrough feature of the rate design of substantial fluctuations from month to month and year to year in their bills for SWPA power and because of potential difficulty in revising their resale rates in a timely manner to avoid cash flow problems. The Administrator and I are sympathetic to these complaints. The question is whether SWPA or the preference customers are to bear the large swings in purchased power expense attributable to variable rainfall and streamflow which will continue to cause large fluctuations in the amount of hydro energy that SWPA can generate. We are willing to have the Government absorb these swings in purchased power expense if an appropriate ratemaking policy can be established which will segregate direct purchased power expense and the revenue to pay it from the other elements of the ratemaking process and if an appropriate accounting methodology can be utilized which reflects these principles in the financial statements and power repayment studies.

Fluctuation in annual rainfall is a certainty in the Southwest. Recorded hydrologic history provides a reasonable basis for estimating the frequency of annual run-offs at different levels of magnitude, and therefore the frequency of purchased power expense at different levels of magnitude. This information in turn permits reasonable estimates of the revenues necessary to cover the purchased power expense over a period of years. It therefore is possible and proper, as a ratemaking principle, to match designated purchased power revenues to meet these actual purchased power expenses incurred over an appropriate period of time. The needed revenues can be designated as a separate component of the energy charge in the rate schedule. The 1982 Power Repayment and Rate Design Studies show that this energy charge would be 2 mills per kilowatthour for the Peaking Energy sold under the proposed Rate Schedule P–3 (Revised) and the "Federal energy" component of the Federally generated Firm Energy sold to the Oklahoma Utility customers under the proposed Rate Schedule F–3 (Revised), and 5 mills per kilowatthour for the Firm Energy sold under the proposed Rate Schedule F–2 (Revised). This component would be substituted for the passthrough adjustment now contained in those rate schedules.

We believe that the newly adopted Statement of Financial Accounting Standards No. 71 [1] provides a basis for an accounting which tracks this ratemaking principle. The Statement applies, as noted in paragraph 5, to an enterprise (a) whose rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers; (b) whose rates are designed to recover its costs of providing the regulated services or products; and (c) when it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. SWPA's rates meet each of these tests: They are subject to final approval by the independent, third-party, Federal Energy Regulatory Commission, and they may be put into effect on an interim basis by the Assistant Secretary, who for this purpose is equivalent to the governing board.[2] As provided in Section 5 of the Flood Control Act of 1944, the rates are designed to recover the Government's costs. Lastly, there is not reason to doubt that the rates will not continue to be below the rates for alternative sources of power.

If the actual purchased power expense during the year is less than the revenues attributable to the purchased power component in the rate schedules, paragraph 11.b of the Statement permits crediting the excess to a deferred credit account similar to a liability account or an acccount payable. If the actual expense is greater than the revenues from the component, paragraph 9 and footnote 2 of the Statement permit the

[1] Although Statement 71 is new, the accounting principles it adopts have been recognized for some time. For example, the Accounting Principles Board (APB) adopted a statement in 1962 on "Accounting principles for regulated industries" which stated in part that "if a cost incurred by a regulated business during a given period is treated for rate-making purposes by the regulatory authority having jurisidiction as applicable to future revenues, it may be deferred in the balance sheet at the end of the current period and written off in the future period or periods in which the related revenue accrues. * * *" The Journal of Accountancy, December 1962, at page 67.

[2] The Financial Accounting Standards Board included the reference to the governing board of the enterprise so as not to preclude application by government utilities with rates set by their own governing board. See paragraph 64.

excess to be debited to a deferred or capitalized cost account similar to an asset account or an account receivable (a) where it is probable that future revenue at least equal to the deferred or capitalized cost will result from inclusion of that cost in allowable costs for ratemaking purposes, and (b) where, based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. Both conditions are satisfied here.

Subject to the approval of the FERC, we propose that two accounts be established, the first, a Deferred Credit for Purchased Power Account, the other a Deferred Cost for Purchased Power Account. Whichever account has a balance at the time will be credited with any excess of direct purchased power receipts over direct purchased power expense each year or debited to the extent of any deficit. The appropriate account also will be credited or debited with the net adjustment for banking. Depending on the sequence of low or high purchased power years, either account might at any time show a balance. The annual statement of revenues and expenses will always show that purchased power revenues and expenses are the same amount.

It will be necessary to monitor these accounts carefully. The purchased power component of the rates will be changed as necessary so that these revenues equal purchased power costs over an appropriate period of time. It will be possible to make these changes whenever rates are revised. To protect the financial interests of the Government it may be necessary to adjust the rate component on the basis of recent hydrologic experience rather than on the basis of the entire period over which hydrologic data is available. That is, if the deferred cost balance is high and it appears that SWPA is in an extended dry cycle or period of high depletion, the rate component may be increased; conversely, if the deferred credit balance is high and it appears that SWPA is in an extended wet cycle or period of low depletion, the rate component may be decreased.

We propose that the Deferred Credit account be established for fiscal year 1983. The purchased power component of receipts for this year is that which was the basis for the current rates, namely, $5,392,300, as shown on pages 40 and 41 of the 1978 PRS for direct purchased power expense. We assume that the borderline purchases and expenses are a wash, and therefore would not be included in the account.

The purchased power component will be separately identified in the rate schedules. Attached hereto are Rate Schedules F–4A (firm power, integrated system), F–4B (firm power, Oklahoma Utility Customers) and P–4 (peaking power) including the purchased power components of 5 mills in F–4A and 2 mills in F–4B and P–4. These are approved as substitutes for Rate Schedules F–2 (Revised), F–3 (Revised) and P–3 (Revised).

Estimates of Future Corps O&M Expense

The estimates included in SWPA's Power Repayment Studies for Corps of Engineers Operation and Maintenance (O&M) expenses have been criticized as excessive because they appear to be based on inflation factors exceeding the Government's own projections of inflation, and because they appear to be derived in a manner inconsistent with both SWPA's own GA&O and O&M expense projections and the Bonneville Power Administration's (BPA) O&M expense projections.

SWPA's estimates of Corps O&M expenses for the cost evaluation period are provided by the Corps and are based on a methodology which is intended to predict the total level of costs expected rather than predicting future costs at today's prices and adjusting for inflation. This methodology, while differing slightly in style from that used by SWPA in its estimates and by BPA to project O&M costs, does not appear to produce different results. Inherent in the Corps' estimates are components of both future inflation and anticipated levels of maintenance and operations, as has been documented both by SWPA in its responses to customer comments, and by the Corps in its responses to SWPA regarding justification for its O&M estimates. The Corps' method does not, however, segregate the rates of increase into components of inflation and levels of cost expected, but rather, incorporates both elements into a single rate of change percentage.

The Corps' approach does not appear inconsistent with the BPA method which adjusts increasing levels of O&M costs by anticipated inflation. Thus, the BPA study predicts unescalated total O&M cost increases of some 8.17 percent between FY 1982 and FY 1983 based on FY 1981 price levels. The unescalated figures were then further adjusted by use of the GNP Deflators to account for anticipated inflation. In fact, to adjust the 1981 price levels to 1983 levels the GNP deflators were compounded for both 1982 and 1983. The overall increase including inflation between 1982 and 1983 is some 28.4 percent.

The Corps' approach also is consistent with the SWPA approach. As stated by SWPA in its responses to customer comments, SWPA's estimates of its own system costs, both O&M and purchased power, are not based only on increases resulting from inflation, but also incorporate increasing levels of cost in excess of inflation. For the transmission system O&M, these levels of cost will increase substantially with increasing maintenance of the aging transmission system. As SWPA has pointed out, the actual levels of cost recently experienced are projected in the Power Repayment Study to increase at a rate of some 10 percent through fiscal year 1986, very comparable to the rate of increase predicted by the Corps in its estimates.

Page A–11 of the 1982 Power Repayment Study shows that the previous Corps estimate of O&M expense for the 1978–1982 period was extremely accurate, exceeding the actual by only .42 percent. In view of this recent demonstration of the accuracy of the Corps in predicting its future O&M estimates and the Corps' continued use of the same methodology and criteria upon which it based its previous estimates, it appears the estimates of future Corps O&M costs are reasonable, and there is no rational basis in the record for concluding otherwise.

Other Issues

Other repayment and rate design issues are discussed in the Administrator's Record of Decision.

Availability of Information

Information regarding this rate adjustment including studies, comments, transcripts, and other supporting material are available for public review in the offices of the Southwestern Power Administration, 333 W. 4th, Tulsa, Oklahoma 74101 and in the Office of the Director of Power Marketing Coordination, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Submission to the FERC; Effective Date

As explained by the Administrator in his Record of Decision, because of the pendency of unresolved litigation in the Claims Court, he proposed that the rates involved in this proceeding not be placed into effect on an interim basis, but that they be placed in effect upon confirmation and approval by the FERC on a final basis. The power repayment study is based upon the assumption that

they will be in effect beginning October 1, 1983.

Accordingly, the rates are not being placed into effect on an interim basis at this time but are approved for submission to the FERC for confirmation, approval and effectuation on a final basis, subject to further review of the matter if action by the FERC is delayed.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby approve the following Rate Schedules and Contract Rate for submission to the Federal Energy Regulatory Commission for confirmation, approval and placement in effect on a final basis to replace the rate schedules and contract rate named:

Service	Rate	Superseded rate
Peaking Power	P-4	P-3.
Firm Power from Integrated System.	F-4A	F-2.
Firm Power through Oklahoma Utility Companies.	F-4B	F-3.
Excess Energy	EE-2 (Revised)	EE-2.
Interruptible Capacity	IC-2 (Revised)	IC-2.
Contract No. 14-02-001-884, Section 2 Tex-La Electric Coop. (through TP&L).	1979 Contract Rate.	1979 Contract Rate.

Issued at Washington, D.C. this 25th day of April, 1983.

Joseph J. Tribble,

Assistant Secretary for Conservation and Renewable Energy.

Rate Schedule P-4 [1]

Wholesale Rates for Hydro Peaking Power and Seasonal Peaking Power

Effective:

During the period extending from October 1, 1983 to September 30, 1986, in accordance with the Order of the Federal Energy Regulatory Commission issued ———, (Docket No. ———).

Available:

In the marketing area of Southwestern Power Administration (SWPA), described generally as the States of Arkansas, Kansas, Louisiana, Missouri, Oklahoma, and Texas.

Applicable:

To wholesale power customers purchasing Hydro and/or Seasonal Peaking Power and Peaking Energy.

Character and Conditions of Service:

Three-phase, alternating current, delivered at approximately 60 hertz, at the nominal voltage and points of delivery, and in such quantities as specified by contract.

Energy Associated with Hydro and/or Seasonal Peaking Power:

Peaking Energy:

A minimum of 1,200 kilowatt-hours of Peaking Energy per kilowatt of Hydro Peaking and/or Seasonal Peaking Power will be furnished during each contract year.

Supplemental Peaking Energy:

Supplemental Peaking Energy (in addition to Peaking Energy) will be furnished if and when determined by SWPA to be available.

A quantity of Hydro and/or Seasonal Peaking Power without associated Peaking Energy may be purchased on a month-to-month basis for use in scheduling Supplemental Peaking Energy, if determined by SWPA to be available.

Monthly Rates:

Capacity Charge:

(a) During the period until the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.10 per kilowatt of Peaking Billing Demand.

(b) Commencing on the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.22 per kilowatt of Peaking Billing Demand.

Energy Charge:

(a) $0.0035 per kilowatt-hour of Peaking Energy and Supplemental Peaking Energy; plus,

(b) A purchased power adjustment of $0.002 per kilowatt-hour of Peaking Energy.

This adjustment does not apply to:

1. Sales under rates specified by contract, where the contract limits the dollar amount of a rate adjustment (Contract Rates); or,

2. Sales to any customer which, by contract, has assumed the obligation to supply energy to fulfill the minimum of 1200 kilowatt-hours of Peaking Energy per kilowatt of Peaking Power during a contract year (Contract Support Arrangements).

Capacity Charge Adjustments for Conditions of Service:

(a) A charge of $0.25 per month per kilowatt of Peaking Billing Demand will be added to the total monthly charge for Hydro and/or Seasonal Peaking Power Service if delivery of such power and energy is made at 69 kilovolts where SWPA has provided for such service from higher voltage, or

(b) A charge of $0.75 per month per kilowatt of Peaking Billing Demand will be added to the total monthly charge for Hydro and/or Seasonal Peaking Power service if delivery of such power and energy is made at low or intermediate voltages (less than 69 kilovolts) where SWPA has provided for such service from higher voltage, and

(c) A customer which receives Hydro and/or Seasonal Peaking Power at two or more delivery voltages will be charged the adjustment associated with the lower voltage, provided, however, that such charge shall not apply to the number of kilowatts of Peaking Billing Demand which exceed the Peaking Actual Demand recorded at the lower voltage for a particular month or for the preceding eleven months.

Billing for Unauthorized Overrun:

For each billing period during which there is a violation involving an unauthorized overrun of SWPA's capacity and/or energy obligation, such capacity overrun shall be billed and paid for at twelve times the above capacity rate adjusted for conditions of service and such energy overrun shall be billed and paid for at eleven times the rate for Peaking Energy set forth in (a), above.

Minimum Bill:

The minimum bill each month is the Peaking Contract Demand times the Capacity charge adjusted for conditions of service, plus minimum contract energy requirements.

Peaking Actual Demand:

The term "Peaking Actual Demand" for any month means the maximum rate in kilowatts that electric energy is delivered by SWPA to the customer during any 60-minute period of such month.

Peaking Contract Demand:

The term "Peaking Contract Demand" means the maximum rate in kilowatts which SWPA is, by contract, obligated to deliver Peaking Energy during any 60-minute period of any month.

Peaking Billing Demand:

Except as otherwise provided by contract, the "Peaking Billing Demand" each month means the "Peaking Contract Demand."

Adjustment for Reduction in Service:

If during any month the quantity of Hydro and/or Seasonal Peaking Power scheduled for delivery is reduced by SWPA for a period or periods of not less than two consecutive hours by reason of an outage caused by either an uncontrollable force, or the installation, maintenance, or replacement of equipment, the customer's capacity charge for such month will be reduced for each such reduction in service by an amount computed under the formula:

$$R = \frac{C \times K \times H}{100}$$

with the factors defined as follows:

R = the amount of reduction in the monthly capacity charge for a particular reduction of not less than two consecutive hours during any month, except that the total amount of any such reduction in the capacity charge for any month shall not be greater than the product of the capacity charge times the Peaking Contract Demand.

C = the capacity charge plus applicable adjustment for conditions of service for Hydro and/or Seasonal Peaking Power for such month.

K = the number of kilowatts of such particular reduction in Hydro and/or Seasonal Peaking Power.

H = the number of hours of such particular reduction.

Revised Schedule F-4A [1]

Wholesale Rates for Firm Power (Customers From SWPA Integrated System)

Effective:

During the period extending from October 1, 1983, to September 30, 1986, in accordance with the Order of the Federal Energy Regulatory Commission issued ——— (Docket No ———).

Available:

In the marketing area of Southwestern Power Administration (SWPA), described generally as the States of Arkansas, Kansas, Louisiana, Missouri, Oklahoma, and Texas.

Applicable:

To wholesale power customers purchasing Firm Power and Firm Energy at points of delivery from the transmission lines or facilities owned and operated by SWPA or which are defined by contract with the customer as part of the system of SWPA (SWPA Integrated System).

Character and Conditions of Service:

Three-phase, alternating current, delivered at approximately 60 hertz, at the nominal voltage and points of delivery, and in such quantities as specified by contract (Firm Contract Demand). All power requirements, other than peaking power from SWPA, which exceed the Firm Contract Demand shall be obtained from a source of power supply other than SWPA.

Energy Associated with Firm Power:

1. SWPA will furnish Firm Energy to a customer which has no alternative source of power supply, and which does not purchase peaking power and energy from SWPA, in such quantities as the customer requires to fulfill its system load requirements.

2. SWPA will during each billing period furnish Firm Energy to a customer which has an alternative source of power supply and/or which purchases peaking power and energy from SWPA, in such manner as to parallel the load factor and load pattern of such customer's system load. The quantity of Firm Energy during each billing period shall be computed under the formula

$$FE = \frac{FCD}{MAD} \times E,$$

with the factors defined as follows:

FE = the maximum number of kilowatt-hours of Firm Energy which SWPA is obligated to furnish and deliver to a particular customer during any billing period.

FCD = such customer's Firm Contract Demand.

MAD = such customer's system maximum 30-minute integrated demand during the preceding twelve months.

E = such customer's total system energy use during such billing period.

Monthly Rates:

Capacity Charge:

(a) During the period until the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.18 per kilowatt of Firm Billing Demand.

(b) Commencing on the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.22 per kilowatt of Firm Billing Demand.

Energy Charge:

(a) $0.0035 per kilowatt-hour of Firm Energy; plus,

(b) A purchased power adjustment of $0.005 per kilowatt-hour of Firm Energy.

This adjustment does not apply to:

1. Sales under rates specified by contract where the contract limits the dollar amount of a rate adjustment (Contract Rates); or,

2. Sales to any customer which, by contract, has assumed the obligation to supply energy to fulfill the minimum of 1,200 kilowatt hours of Peaking Energy per kilowatt of Peaking Power during a contract year (Contract Support Arrangements).

Capacity Charge Adjustments for Conditions of Service:

(a) A charge of $0.25 per month per kilowatt of Firm Billing Demand will be added to the total monthly charge for Firm Power service if delivery of such power and energy is made at 69 kilovolts where SWPA has provided for such service from higher voltage, or

(b) A charge of $0.75 per month per kilowatt of Firm Billing Demand will be added to the total monthly charge for Firm Power service if delivery of such power and energy is made at low or intermediate voltages (less than 69 kilovolts) where SWPA has provided for such service from higher voltage, and

(c) A customer which receives Firm Power and Firm Energy at two or more delivery voltages will be charged the adjustment associated with the lower voltage, provided, however, that such charge shall not apply to the number of kilowatts of Firm Billing Demand which exceed the Firm Actual Demand recorded at the lower voltage for a particular month or for the preceding eleven months.

Billing for Unauthorized Overrun:

For each billing period in which there is a violation involving an unauthorized overrun of SWPA's capacity and/or energy obligation, such capacity overrun shall be billed and paid for at eleven times the above capacity rate adjusted for conditions of service, and such energy overrun shall be billed and paid for at eleven times the rate set forth in (a), above.

Adjustment for Power Factor:

The customer will be required to maintain an average power factor at each point of delivery of not less than 95 percent (95%) lagging. Such average power factor will be determined at intervals or continuously at the option of SWPA and will be based upon measured quantities of kilowatt-hours and reactive kilovolt-ampere-hours during the 30-minute period of the customer's maximum rate of use of energy at each particular point of delivery during the month.

The average power factor during any month shall be computed under the formula

$$APF = \frac{KWH \times 100}{\sqrt{KWH^2 + RKVAH^2}}$$

with the factors defined as follows:

APF = the average power factor (in percentage) during any 30-minute period during any particular month.

KWH = the quantity of Energy delivered during the 30-minute period of the customer's maximum rate of use of energy at a particular point of delivery during such month.

RKVAH = the quantity of reactive kilovolt-ampere-hours (lagging) furnished at such particular point of delivery coincidental with factor KWH during the month.

For each 1 percent (1%), or major fraction thereof, by which the customer's average power factor is less than 95 percent, the customer's monthly bill for Firm Power will be increased by 1 percent (1%). Where a customer has more than one point of delivery, the lowest average power factor will determine such increase.

Minimum Bill:

The minimum bill each month shall be the Firm Contract Demand times the Capacity Charge adjusted for conditions of service.

Firm Actual Demand:

The term "Firm Actual Demand" for any month means the maximum coincidental 30-minute integrated demand recorded or computed by contract formula for such month.

Firm Contract Demand:

The term "Firm Contract Demand" means the maximum rate in kilowatts which SWPA is by contract obligated to deliver Firm Energy during any 30-minute period of any billing period.

Firm Billing Demand:

Unless otherwise provided by contract, the term "Firm Billing Demand" for any month means either the "Firm Contract Demand", or the "Firm Actual Demand", whichever is greater.

Adjustment for Reduction in Service:

If during any month SWPA is unable to fulfill its contract commitment to delivery Firm Power and Firm Energy for a period or periods of not less than two consecutive hours by reason of an outage caused by either an uncontrollable force, or the installation, maintenance, or replacement of equipment, the customer's capacity charge for such month will be reduced for each such reduction in service by an amount computed under the formula—

$$R = \frac{C \times K \times H}{TH}$$

with the factors defined as follows:

R = the amount of reduction in the monthly capacity charge for a particular reduction of not less than two consecutive hours during any month, except that the total amount of any such reduction in the capacity charge for any month shall not be greater than the product of the capacity charge times the Firm Contract Demand.

C = the capacity charges plus applicable adjustments for conditions of service for Firm Power for such month.

K = the number of kilowatts of such particular reduction in Firm Power.

[1] Supersedes Rate Schedule P-3.

[1] Supersedes Rate Schedule F-3 for customers receiving Firm Power and Firm Energy from the system of SWPA.

H = the number of hours of such particular reduction.
TH = the total number of hours in such month.

Rate Schedule F-4B [1]

Wholesale Rates for Firm Power (Customers thru Oklahoma Utility Companies)

Effective:
During the period extending from October 1, 1983, to September 30, 1988, in accordance with the Order of the Federal Energy Regulatory Commission issued ——— (Docket No. ———).

Available:
In the marketing area of Southwestern Power Administration (SWPA), and the service areas of the Public Service Company of Oklahoma and Oklahoma Gas and Electric Company (Oklahoma Utility Companies), described generally as the States of Arkansas and Oklahoma.

Applicable:
To wholesale power customers purchasing Firm Power and Firm Energy from SWPA (SWPA-Customer Contract) at points of delivery on transmission facilities owned by the Oklahoma Utility Companies which Companies have contracted with SWPA to deliver power and energy for the account of SWPA.

Character and Conditions of Service:
Three-phase, alternating current, delivered at approximately 60 hertz, at the nominal voltage and points of delivery, and in such quantities as specified in the SWPA-Customer Contract (Contract Demand). All power requirements which exceed the Contract Demand shall be obtained from a source of power supply other than SWPA.

Energy Associated with Firm Power:
1. SWPA will furnish Firm Energy to a customer purchasing such energy from SWPA from the system of the Oklahoma Utility Companies in such quantities as may be required to fulfill its system load requirements.

2. Where a customer has an alternative source of power supply, SWPA shall furnish each month the number of kilowatt-hours of Firm Energy as specified in the SWPA-Customer Contract.

Monthly Rates:
Capacity Charge:
(a) During the period until the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.99 per kilowatt of Billing Demand.

(b) Commencing on the first day of the month following the date the first power generating unit at the Clarence Cannon Dam is placed in commercial operation, the capacity charge shall be: $2.97 per kilowatt of Billing Demand.

Energy Charge:
(i) $0.0035 per kilowatt-hour for federally generated Firm Energy; plus,

(ii) A purchased power adjustment of $0.002 per kilowatt-hour of "Federal Energy" (defined as 1200 kilowatt-hours of energy per kilowatt of capacity during each contract year) delivered by SWPA to the Companies during such month; plus,

(iii) An amount in dollars equal to the actual cost to SWPA, of thermal-generated energy purchased by SWPA from the Oklahoma Utility Companies specifically for service to the customer.

Adjustment for Power Factor:
The customer will be required to maintain an average power factor at each point of delivery of not less than 95 percent (95%) lagging. Such average power factor will be that as defined and computed under the SWPA-Customer Contract.

For each 1 percent (1%), or major fraction thereof, by which the customer's average power factor is less than 95 percent (95%), the customer's monthly bill for Firm Power will be increased by 1 percent (1%). Where a customer has more than one point of delivery, the lowest average power factor will determine such increase.

Actual Demand:
The "Actual Demand" will be for any month the number of kilowatts equal to the sum of the highest 30-minute integrated demands recorded during such month at the point or points of delivery.

Contract Demand:
The "Contract Demand" will be for any month the highest 30-minute integrated demand in kilowatts at which SWPA is obligated during such month to cause energy to be delivered to the customer.

Billing Demand:
1. The "Billing Demand" for any month during the period when the system load requirements of the customer are fulfilled by power and energy purchased from SWPA will be either the "Contract Demand" or the "Actual Demand", whichever is greater.

2. The "Billing Demand" for any month during the period on and after the date when the system load requirements of the customer are fulfilled by power and energy from SWPA and from a source of power supply other than SWPA, will be the "Contract Demand".

Adjustment for Reduction in Service:
If during any month SWPA is unable to fulfill its contract requirement to deliver Firm Power and Firm Energy for a period or periods of not less than two consecutive hours by reason of an outage caused by either an uncontrollable force, or the installation, maintenance, or replacement of equipment, the customer's capacity charge for such month will be reduced for each such reduction in service by an amount computed under the formula–

$$R = \frac{C \times K \times H}{TH}$$

with the factors defined as follows:
R = the amount of reduction in the monthly capacity charge for a particular reduction of not less than two consecutive hours during any month, except that the total amount of any such reduction in the capacity charge for any month shall not be greater than the product of the capacity charge times the Firm Contract Demand.
C = the capacity charges for such month.
K = the number of kilowatts of such particular reduction in Firm Power.
H = the number of hours of such particular reduction.
TH = the total number of hours in such month.

[1] Supersedes Rate Schedule F-3 for customers receiving Firm Power and Firm Energy from transmission facilities owned by the Oklahoma Utility Companies.

Rate Schedule IC-2 (Revised) [1]

Wholesale Rates for Interruptible Capacity

Effective:
During the period extending from October 1, 1983, to September 30, 1988, in accordance with the Order of the Federal Energy Regulatory Commission issued ——— (Docket No. ———).

Available:
In the marketing area of Southwestern Power Administration (SWPA), described generally as the States of Arkansas, Kansas, Louisiana, Missouri, Oklahoma, and Texas.

Applicable:
To wholesale power customers purchasing Interruptible Capacity which is received by the customer at points of delivery from transmission lines or facilities owned and operated by SWPA.

Character and Conditions of Service:
Three-phase, alternating current, delivered at approximately 60 hertz, at the nominal voltage and points of delivery, and in such quantities as specified by contract.

Energy Associated with Interruptible Capacity:
Energy associated with Interruptible Capacity will be furnished by SWPA at such times and in such amounts as SWPA determines to be available.

Daily Rate:
Capacity Charge: $0.075 per kilowatt of Interruptible Billing Demand.
Energy Charge: $0.0035 per kilowatt-hour.

Interruptible Billing Demand:
The term "Interruptible Billing Demand" for any day means an amount equal to either:
1. the maximum rate in kilowatt which SWPA is obligated to deliver energy associated with interruptible capacity or the greatest 30-minute integrated demand recorded during such day, whichever is greater, if the customer scheduled and received only interruptible capacity from the Government during such day, or
2. the maximum rate in kilowatts for the delivery of energy associated with interruptible capacity scheduled during such day, if the customer scheduled and received firm or peaking power capacity from the Government during such day, or the maximum rate in kilowatts which SWPA is obligated to deliver energy associated with interruptible capacity, whichever is greater.

Energy Sale or Exchange:
At the option of SWPA, energy associated with Interruptible Capacity purchased by a customer shall be either:
(i) Paid for at the energy charge, or
(ii) Returned to SWPA, kilowatt-hour for kilowatt-hour in accordance with agreement of the parties at the time purchase, or in the absence of such an agreement, returned within 12 months after the date of such purchase, as scheduled by SWPA but at a rate of delivery within the excess available capability of the customer's generating facilities.

If a customer, for any reason, fails or refuses to return all or any portion of the energy as scheduled by SWPA under part (ii), above, the number of kilowatt-hours not so returned shall be billed and paid for at eleven times the energy charge.

[1] Supersedes Rate Schedule IC-2

Rate Schedule EE-2 (Revised) [1]

Wholesale Rate for Excess Energy

Effective:
During the period extending from October 1, 1983, to September 30, 1988, in accordance with the Order of the Federal Energy Regulatory Commission issued ——— (Docket No. ———).

Available:
In the marketing area of Southwestern Power Administration (SWPA), described generally as the States of Arkansas, Kansas, Louisiana, Missouri, Oklahoma, and Texas.

Applicable:
To wholesale power customers who by contract may purchase Excess Energy.

Character and Conditions of Service:
Three-phase, alternating current, delivered at approximately 60 hertz, at the nominal voltage and points of delivery specified by contract.

Energy Associated with Rate Schedule EE-2 (Revised):
Excess Energy will be furnished at such times and in such amounts as SWPA determines to be available.

Rate:
Energy Charge: $0.0035 per kilowatt-hour.

Wholesale Rates for Power and Energy Sold to Tex-La Electric Cooperative, Inc. (Contract 14-02-001-864) [2]

Effective:
As of April 1, 1979, and thereafter in accordance with the Order of the Federal Energy Regulatory Commission, dated January 25, 1982, Docket No. EF 79-4011, as extended.

Applicable:
To the power and energy purchased by Tex-La Electric Cooperative, Inc. from the Southwestern Power Administration under the Power Sales Agreement dated October 20, 1958, Contract No. 14-02-001-864, between Southwestern Power Administration (Government) and Tex-La Electric Cooperative, Inc. (Tex-La).

Capacity and Energy Charges:
Section 2, 3, and 35, respectively, of Contract No. 14-02-001-864, are amended to read as follows:

"Section 2. *Compensation by Tex-La to Government.* (a) Tex-La shall compensate the Government each month for firm power capacity and associated energy purchased under Section 1, hereof, at the following rates:

Capacity Charge:
(a) During the period until the twentieth day of the month following the date the first power generating unit at the Harry S Truman Dam is placed in commercial operation in the integrated system of SWPA, the capacity charge shall be: $1.73 per kilowatt per month of 'Billing Demand,' as defined in Section 3, hereof.

(b) Commencing on the twentieth day of the month following the date the first power generating unit at the Harry S Truman Dam is placed in commercial operation in the integrated system of SWPA, the capacity charge shall be: $1.86 per kilowatt per month of 'Billing Demand,' as defined in Section 3, hereof.

Energy Charge:
(i) $0.00309 per kilowatt-hour for the first 100 kilowatt-hours per kilowatt per month of 'Billing Demand.'

(ii) $0.00459 per kilowatt-hour for the next 340 kilowatt-hours per kilowatt per month of 'Billing Demand.'

(iiii) $0.00659 per kilowatt-hour for the each kilowatt-hour delivered to Tex-La during any month in excess of 440 kilowatt-hours per kilowatt per month of 'Billing Demand.'

"Section 3. *Billing Demand.* The 'Billing Demand' for any month for firm power capacity purchased by Tex-La from the Government under Section 1 hereof, shall be the number of kilowatts computed under the formula—

$$BD = \frac{A}{B} \times C,$$

with the factors defined as follows:
BD = Tex-La Billing Demand for any particular month.
A = The sum of the maximum 30-minute integrated demands recorded during such month at the points of delivery to the Tex-La members served from the system of the Company, but not less than 75% of the highest Factor 'A' established during the 12-month period ending with such month.
B = The greatest Factor 'A' established during the 12-month period ending with such month.
C = 15,000 kilowatts."

[FR Doc. 83-11704 Filed 5-2-83; 8:45 am]
BILLING CODE 6450-01-M

[1] Supersedes Rate Schedule EE-2.
[2] Marked "Rate Schedule 14-02-001-864" for reference purposes only; not so designated in proceedings before the Federal Energy Regulatory Commission.

Nevada Operations Office; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Dose Assessment Advisory Group (DAAG).

Date and time: Thursday, May 19, 1983—8:30 a.m.–4:30 p.m.; Friday, May 20, 1983—8:30 a.m.–2:30 p.m.

Place: Fine Arts Center Theater, Dixie College, 225 South 700 East, St. George, UT 84770.

Contact: Marshall Page, Jr., Off-Site Radiation Exposure Review Project, U.S. Department of Energy, Post Office Box 14100, Las Vegas, Nevada 89114, Telephone: 702/734-3194.

Purpose of the group: To provide the Secretary of Energy and the Manager, Nevada Operations Office (NV), with advice and recommendations pertaining to the Off-Site Radiation Exposure Review Project (ORERP). This project concerns the evaluation and assessment of the amount of radiation received by members of the off-site population surrounding the Nevada Test Site (NTS) as a result of the nuclear test operations conducted at the NTS.

Tentative Agenda

Briefings and discussions of:
May 19, 1983:
- Welcome and Introduction
- Report of DAAG Subcommittee on Coordination and Information Center
- Response to Prior DAAG Recommendations
- Summary of ORERP Progress
- Fallout Verification Progress Report
- PATHWAY Analysis Progress Report
- Internal Dose Progress Report
- External Dose Progress Report
- Data Analysis Progress Report
- Report of Progress by Environmental Measurements Laboratory (EML)
- Discussion and Comment by DAAG members
- Public Comments and Questions (5 minute rule)

May 20, 1983:
- BOLTZMANN Hot Spot Analysis
- EML Study of Pu Leaching Process
- Soil Sampling Progress Report
- DRI Report on Quality Assurance Program
- Timeline for ORERP
- Format Presentation of Final Report
- Discussion and Recommendations by DAAG to ORERP
- Public Comments and Questions (5 minute rule)

Public Participation

The meeting is open to the public. The Chairperson of the Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Marshall Page, Jr., at the

address or telephone number listed above.

Transcripts

Available for public review and copying at the Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC on April 28, 1983.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

[OPP-30226; PH-FRL 2341-8]

Certain Companies; Applications to Register Pesticide Products Containing New Active Ingredients

Correction

In FR Doc. 83-9083 beginning on page 15949 in the issue of Wednesday, April 13, 1983, make the following correction on page 15950: In the first column, sixth line, the word "Quintox" should read "Quintrox".

BILLING CODE 1505-01-M

[AMS-FRL 2360-1]

Fuel Economy Retrofit Devices; Announcement of Fuel Economy Retrofit Device Evaluation for Atomized Vapor Injector

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Fuel Economy Retrofit Device Evaluation.

SUMMARY: This document announces the completion of the EPA evluation of the "Atomized Vapor Injector" device under provisions of Section 511 of the Motor Vehicle Information and Cost Savings Act. This notice also announces the findings, conclusions, and availability of the report.

SUPPLEMENTARY INFORMATION:

I. Background

Section 511(b)(1) and Section 511(c) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2011(b)) require that:

(b)(1) Upon application of any manufacturer of a retrofit device (or prototype thereof), upon the request of the Federal Trade Commission pursuant to subsection (a), or upon his own motion, the EPA Administrator shall evaluate, in accordance with rules prescribed under subsection (d), any retrofit device to determine whether the retrofit device increases fuel economy and to determine whether the representations (if any) made with respect to such retrofit devices are accurate.

(c) The EPA Administrator shall published in the Federal Register a summary of the results of all tests conducted under this section, together with the EPA Administrator's conclusions as to—

(1) The effect of any retrofit device on fuel economy;

(2) The effect of any such device on emissions of air pollutants; and

(3) Any other information which the Administrator determines to be relevant in evaluating such device.

EPA published final regulations establishing procedures for conducing evaluations of fuel economy retrofit devices on March 23, 1979 [44 FR 17946].

II. Origin of Request for Evaluation, Device Descriptions and Report Identification

On July 6, 1982 the EPA received a request from Mr. Lewis J. Schneller for an evaluation of a fuel economy retrofit device termed Atomized Vapor Injector. Among other claims, this device is designed to save fuel and increase engine power. The device is a vapor air bleed device which bubbles air through a 50/50 mixture of water and alcohol. The resulting vapor is introduced into the combustion chamber.

Report: "EPA Evaluation of the Atomized Vapor Injector Device Under Section 511 of the Motor Vehicle Information and Cost Savings Act". Report Number EPA-AA-TEB-511-83-4 contains the analysis and conclusions. It consists of 38 pages including all attachments.

III. Availability of Evaluation Reports

Copies of this report may be obtained from the National Technical Information Service by using the above report number. Address requests to: National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161, Telephone: (703) 487-4650 or FTS 737-4650

IV. Summary of Evaluation

The evaluation of the Atomized Vapor Injector was based on the information submitted by the applicant, EPA's engineering judgment, and the results of EPA's evaluation of similar products. The overall conclusion from the EPA evaluation is that there is no reason to expect that the device will significantly improve the fuel economy or performance of a vehicle. Any changes in emission levels would be due solely to the air bleed aspect of the device.

FOR FURTHER INFORMATION CONTACT:

Merrill W. Korth, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105, Telephone: (313) 668-4298.

Dated: April 25, 1983.

Charles Elkins,

Acting Assistant Administrator for Air, Noise, and Radiation.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Technical Subgroup of Radio Advisory Committee; Resumed Meeting

The Technical Subgroup of the Advisory Committee on Radio Broadcasting resumes its continuing meeting Wednesday June 8, 1983 at 10 a.m. in the Vincent Wasilewski Room of the National Association of Broadcasters, 1771 N Street NW., Washington, D.C.

The Subgroup will continue its consideration of recommendations to the Federal Communications Commission concerning matters pertinent to the ongoing U.S.-Canadian discussions on the drafting of a new bilateral AM agreement which, it is expected, will replace the North American Regional Broadcasting Agreement (NARBA).

The Subgroup will also discuss preparations for bilateral discussions which have started with Mexico, looking toward post-Rio revision of the U.S.-Mexican AM Agreement.

The meeting, a continuing one, will be resumed after the June 8, 1983 session at such time and place as is decided at that session. It is open for participation by all interested persons.

For further information, please call the Subgroup Chairman, Mr. Wallace E. Johnson, at (703) 841-0500.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group, Income and Other Accounts Subcommittee; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group (TIAG) Income and Other Accounts Subcommittee scheduled for Wednesday and Thursday, May 18 and 19, 1983. The meeting will begin on May 18 at 9:30 a.m. in the offices of GTE Service Corporation, Suite 900, 1120 Connecticut Avenue, N.W., Washington, D.C., and will be open to the public. The agenda is as follows:

I. General Administrative Matters
II. Discussion of Assignments
III. Other Business
IV. Presentation or Oral Statements
V. Adjournment

With prior approval of Subcommittee Chairman Glenn L. Griffin, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Griffin (214/659-3484) at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Agreements Filed, Port of Seattle and Seacon Terminals, Inc., et al.

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the Federal Register in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No.: T-3985-2.

Title: Port of Seattle and Seacon Terminals, Inc. Terminal Lease Agreement Amendment.

Parties: Port of Seattle (Port)/Seacon Terminals, Inc. (Seacon).

Synopsis: Agreement No. T-3985-2 provides for the reduction in the lease area by 7.5302 acres with a corresponding reduction in rental, reduces the number of port-owned container cranes from three to two, and provides for the deletion of three Port-owned gantry cranes.

Filing Party: Frank H. Clark, Associate Director of Real Estate, Facilities, Port of Seattle, P.O. Box 1209, Seattle, Washington 98111.

Agreement No. T-4107.

Title: Port of Oakland and Malaysian International Shipping Corpn. Berhad. Terminal Use Agreement.

Parties: Port of Oakland (Port) and Malaysian International Shipping Corpn. Berhad. (MISC)

Synopsis: Agreement No. T-4107 provides that MISC shall have the nonexclusive right to assigned premises at the Port's Seventh Street Public Container Terminal for the berthing, loading and discharging of its vessels and related operations in its transpacific container service. MISC agrees that the assigned premises shall be the published regularly scheduled Northern California port of call for its transpacific service. The authority to manage these premises for the Port is vested in Marine Terminals Corporation, as separately provided for under the terms of Agreement No. T-4008. The provisions of the Port of Oakland Tariff No. 2 shall apply to MISC's use of the assigned premises. As a consideration for its regular use of the Port, MISC will pay to Port 90 percent of tariff dockage and wharfage revenues, instead of 100 percent of said charges, and if MISC's usage generates in excess of 31,000 revenue tons per acre in a year, any further wharfage payments in excess of this shall be refunded. The term of the agreement commences on the first of the month following Commission approval and runs for five years.

Filing party: John E. Nolan, Assistant Port Attorney, Port of Oakland, 66 Jack London Square, P.O. Box 2064, Oakland, California 94604.

Agreement No.: T-4108.

Title: Port of Oakland and Sea Winds Limited Terminal Use Agreement.

Parties: Port of Oakland (Port) and Sea Winds Limited (Sea Winds)

Synopsis: Agreement No. T-4108 provides that Sea Winds shall have the nonexclusive right to certain assigned premises at the Port's Seventh Street Public Container Terminal for the berthing, loading and discharging of its vessels and related operations in the transpacific service. Sea Winds agrees that the assigned premises shall be the published regularly scheduled Northern California port of call for its transpacific service. The authority to manage these premises for the Port is vested in Marine Terminals Corporation, as separately provided for under the terms of Agreement No. T-4008. The provisions of the Port of Oakland Tariff No. 2 shall apply to Sea Winds' use of the assigned premises. As a consideration for its regular use of the Port, Sea Winds will pay to Port 90 percent of tariff dockage and wharfage revenues, instead of 100 percent of said charges, and if Sea Winds' usage generates in excess of 31,000 revenue tons per acre in a year, any further wharfage payments in excess of this shall be refunded. The term of the agreement commences on the first of the month following Commission approval and concludes on June 30, 1987.

Filing Party: John E. Nolan, Assistant Port Attorney, Port of Oakland, 66 Jack London Square, P.O. Box 2064, Oakland, California 94604.

Agreement No. 3668-29

Title: Atlantic & Gulf/Panama Canal Zone, Colon and Panama City Conference.

Parties: Delta Steamship Lines, Inc., Lykes Bros. Steamship Co., Inc., Sea-Land Service, Inc. and United States Lines, Inc.

Synopsis: The basic agreement would be amended to require the countersignature of a representative of a member line of the Conference in addition to the signature of the Conference Chairman or Vice Chairman before the security deposit of a member line could be drawn upon.

Filing Party: Nathan J. Bayer, Esq., Freehill, Hogan & Mahar, 80 Pine Street, New York, N.Y. 10005.

Agreements Nos.: 9718-6, 9731-6, 9835-6, 9975-8, 10116-5 and 10274-2.

Titles:

Agreement No. 9718—Japan Line, "K" Line, Mitsui O.S.K. and Y. S. Containership Service Agreement

Agreement No. 9731—NYK and Showa Line Containership Service Agreement

Agreement No. 9835—Japanese Lines' Pacific Northwest Containership Service Agreement

Agreement No. 9975—Japanese Lines' Atlantic Coast Containership Service Agreement

Agreement No. 10116—U.S. Pacific Coast/Japan Revenue Pooling Agreement

Agreement No. 10274—U.S. Atlantic Japan Pooling Agreement

Parties:
Agreement No. 9718—Japan Line, Ltd.; Kawasaki Kisen Kaisha, Ltd.; Mitsui O.S.K. Lines, Ltd.; and Yamashita-Shinnihon Steamship Co., Ltd.
Agreement No. 9731—Nippon Yusen Kaisha and Showa Line Ltd.
Agreement No. 9835—Japan Line, Ltd.; Kawasaki Kisen Kaisha, Ltd.; Mitsui O.S.K. Lines, Ltd.; Nippon Yusen Kaisha; Show Line Ltd.; Yamashita-Shinnihon Steamship Co., Ltd.
Agreement No. 9975—Japan Line, Ltd.; Kawasaki Kisen Kaisha, Ltd.; Mitsui O.S.K. Lines, Ltd.; Nippon Yusen Kaisha; Yamashita-Shinnihon Steamship Co., Ltd.
Agreement No. 10116—Japan Line, Ltd.; Kawasaki Kisen Kaisha, Ltd.; Mitsui O.S.K. Lines, Ltd.; Nippon Yusen Kaisha; Showa Line Ltd.; Yamashita-Shinnihon Steamship Co., Ltd.
Agreement No. 10274—Japan Line, Ltd.; Kawasaki Kisen Kaisha, Ltd.; Mitsui O.S.K. Lines, Ltd.; Nippon Yusen Kaisha; Yamashita-Shinnihon Steamship Co., Ltd.
Synopsis: Agreements Nos. 9718–9, 9731–9, 9835–6, 9975–8, 10116–5 and 10274–2 are all proposals to extend the expiration date of the respective basic agreements from August 22, 1983 to August 22, 1988.
Filing Party: Charles F. Warren, Esquire, Warren & Associates, P.C., 1100 Connecticut Avenue, N.W., Washington, D.C. 20036.
Agreement No.: 7590–34.
Titles: East Coast Colombia Conference.
Parties: Lykes Bros. Steamship Co., Inc., Delta Steamship Lines, Inc., Flota Mercante Grancolombiana, S.A.
Synopsis: The geographic scope of the basic agreement would be amended to include all ports on the Caribbean Coast of Colombia, S.A.
Filing Party: Nathan J. Bayer, Freehill, Hogan & Mahar, 80 Pine Street, New York, New York 10005.

By Order of the Federal Maritime Commission.
Dated: April 28, 1983.
Francis C. Hurney,
Secretary.
[FR Doc. 83-11737 Filed 5-2-83; 8:45 am]
BILLING CODE 6730-01-M

Section 15 Agreements; Cancellation

The Commission has twice inquired of the parties to a number of seemingly inactive agreements, previously approved under section 15 of the Shipping Act, 1916, asking if these agreements were inactive and should be cancelled. No reply to these inquiries has been received. It is assumed that no good cause exists for the continued approval of these agreements, therefore, the following agreements between the parties designated are cancelled effective May 2, 1983:

Agreement No.	Parties
9694	American Mail Line Ltd., Shipping Corporation of India, Ltd.
9864	Atlantic Lines, Ltd., Pan American Mail Line, Inc.
9878	Hellenic Lines, Limited, Unicorn Shipping Lines (Pty) Limited.
9880	Moore-McCormack Lines, Inc., Durban Lines (Pty) Limited, Lamos Lines (Pty) Limited.
9897	American President Lines, Ltd., Everett Orient Lines.
9913	American Maritime Association, States Marine Lines, Inc., United States Lines, Inc.,

By Order of the Federal Maritime Commission.
Dated: April 28, 1983.
Francis C. Hurney,
Secretary.
[FR Doc. 83-11737 Filed 5-2-83; 8:45 am]
BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Formation of Bank Holding Companies; NCB Financial Corp., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *NCB Financial Corporation,* Williamsport, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of Northern Central Bank, Williamsport, Pennsylvania. Comments on this application must be received not later than May 27, 1983.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *1st Columbia Corp.,* Columbus, Wisonsin; to become a bank holding company by acquiring 80 percent of the voting shares of First National Bank of Columbus, Columbus, Wisconsin. Comments on this application must be received not later than May 27, 1983.

2. *Lakeland Financial Corporation,* Warsaw, Indiana; to become a bank holding company by acquiring 100 percent of the voting shares of Lake City Bank, Winona Lake, Indiana. Comments on this application must be received not later than May 27, 1983.

C. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Southern Bancshares Corp.,* St. Louis, Missouri; to become a bank holding company by acquiring 80 percent of the voting shares of Southern Commercial Bank, St. Louis, Missouri. Comments on this application must be received not later than May 27, 1983.

Board of Governors of the Federal Reserve System, April 27, 1983.
William W. Wiles,
Secretary of the Board.
[FR Doc. 83-11700 Filed 5-2-83; 8:45 am]
BILLING CODE 6210-01-M

Midlantic Banks, Inc.; Merger of Bank Holding Companies

Midlantic Banks, Inc., Edison, New Jersey, has applied for the Board's approval under section 3(a)(5) of the Bank Holding Company Act (12 U.S.C. 1842(a)(5)) to merge with Greater Jersey Bancorp, West Paterson, New Jersey. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Midlantic Banks, Inc., Edison, New Jersey, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Greater Jersey Mortgage Company, West Paterson, N.J.

Applicant states that the proposed subsidiary would engage in loan servicing activities. The geographic areas to be served by Greater Jersey Mortgage Company is New Jersey, Pennsylvania and Delaware. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of section 225.4(b).

Midlantic Banks, Inc., Edison, N.J., is also engaged in the following nonbank activities: factoring and leasing personal property. In addition to the factors considered under section 3 of the Act (banking factors), the Board will consider the proposal in the light of the company's nonbanking activities and the provisions and prohibitions in section 4 of the Act (12 U.S.C. 1843).

The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than May 27, 1983. Any comment on an applicaiton that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, April 27, 1983.
William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

Zions Utah Bancorporation; Proposed Acquisition of Republic Industrial Bank

Zions Utah Bancorporation, Salt Lake City, Utah, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Republic Industrial Bank Widefield, Colorado.

Applicant states that the proposed subsidiary would engage in the activities of industrial banking and selling credit insurance related to extensions of credit. These activities would be performed from offices of Applicant's subsidiary in Widefield, Colorado, and the geographic areas to be served are El Paso County, Colorado and the Colorado Springs, Colorado metropolitan area. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than May 18, 1983.

Board of Governors of the Federal Reserve System, April 27, 1983.
William W. Wiles,
Secretary of the Board.

Public Health Service

National Center for Health Services Research; Assessment of Medical Technology

The Public Health Service (PHS) through the Office of Health Technology Assessment (OHTA) announces that it is seeking additional responses to an announcement of assessment in Federal Register Volume 47, number 91, p. 20206, May 11, 1982, of what is known of the safety, clinical effectiveness, and current status of liver transplantation. This assessment is intended to address the medical and surgical indications for the procedure as well as the technical aspects of liver transplantation. Specifically, we wish to address that status of organ procurement, harvesting, preservation and transport, as well as issues of rejection and immunosuppression. Information addressing the status of cylosporin-A is also being sought, as are any recent updates or advances in liver transplantation since our previous Federal Register announcement (May 11, 1982).

For the purposes of this announcement, liver transplantation is defined as the surgical replacement of an irreversibly diseased liver in a patient with one obtained from a cadaver. The source of disease may be congenital or acquired and the patients may be pediatric or adult.

This assessment seeks to establish whether liver transplantation has advanced beyond investigational stages of development or remains experimental. We also seek to determine the degree to which this technology has gained widespread acceptance and application in the medical/surgical community, and the present and future demand for the subject technology relative to the ability of providers to deliver it.

The PHS assessment consists of a synthesis of information obtained from appropriate organizations in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than June 1, 1983, or approximately 30 days from the date of publication of this notice.

The information being sought is a review and assessment of past, current, and planned research related to this technology, a bibliography of published, controlled clinical trials and other well-designated clinical studies since 1980 and other information related to the characterization of the patient population most likely to benefit, the clinical acceptability, and the effectiveness of this technology. Proprietary information is being sought.

Written material should be submitted to: Office of Health Technology Assessment, Enrique Carter, M.D., Park Building, Room 3–10, Stop #2, 5600 Fishers Lane, Rockville, Maryland 20857.

For further information contact: Enrique D. Carter, M.D., Health Science Analyst, at the above address or by telephone (301) 443–4990.

Dated: April 25, 1983.

Harold Margulies,

Director, Office of Health Technology Assessment, National Center for Health Services Research.

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[M-55568]

Montana; Notice of Realty Action—Modified Competitive Sale of Public Land in Carter County, Montana

The following described land has been examined and identified suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($2,500).

Montana Principal Meridian

T. 3 N., R. 58 E.,
Sec. 17, SE¼SW¼.

The area described contains 40 acres. The land will be offered for sale utilizing modified competitive bidding procedures on July 6, 1983. The bidding is limited to the adjoining landowners, Mr. Dave Ness of Ekalaka, Montana, and Mrs. Gladys Mehling of Willard, Montana.

The land is isolated with no public access and has no unique public values. The sale will resolve an unauthorized grazing use that has existed for many years.

Detailed information concerning the sale, including planning documents, environmental assessment and public involvement, is available for review at the Miles City District Office, Box 940, Miles City, Montana 59301.

All minerals will be reserved to the United States together with the right to explore, prospect for, and remove same under applicable law and regulations. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C. 945. The sale will be subject to all valid existing rights and reservations of record.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, at the address shown above. Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination of the Department of the Interior.

Dated: April 25, 1983.

Ray Brubaker,

District Manager.

North Dakota; Termination of Classification of Public Lands for Multiple Use Management

April 25, 1983.

1. On February 25, 1967 (FR Vol. 32, No. 32, p. 3304) the public lands described in the notice, aggregating approximately 7914.09 acres in Divide, McHenry, McLean, Mountrail, Sheridan, Ward, Williams, Pierce, Barnes, Burleigh, Emmons, Kidder, Logan, McIntosh and Studsman Counties, were classified for multiple use management under the Act of September 19, 1964 (43 U.S.C. 1411–18). This classification segregated the land from appropriation under the agricultural land laws (43 U.S.C., Parts 7 and 9; 25 U.S.C. 334) and from sales under Section 2455 of the Revised Statutes (43 U.S.C. 1171). The lands remained open to all other applicable forms of appropriations, including the mining and mineral leasing laws.

2. Pursuant to the regulations set forth in 43 CFR 2461.5(c)(2), the classification referred to under paragraph 1 above is hereby terminated. At 8 a.m. on June 9, 1983, the lands described in said notice of February 25, 1967, shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8 a.m. June 9, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

Inquiries concerning these lands should be addressed to the Chief, Branch of Land Resources, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

Kannon Richards,

Acting State Director.

BILLING CODE 4310-84-M

[INT DEIS 83-22]

Proposed Livestock Grazing Management for the Redding Resource Area, Ukiah District, California

Pursuant to section 102(C) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared a draft environmental impact statement concerning a proposed grazing management program for the Redding Resource Area in Siskiyou, Modoc, Shasta, Trinity, Tehama, Butte and Glenn Counties in Northern California. The proposed action would continue present management of the approximately 90,000 acres of public land presently grazed by cattle, permitting the consumption of 7,261 AUMs of forage on 89 grazing leases. Alternatives analyzed include reapportioning among leases approximately the same total livestock allocation (7,385 AUMs), increased livestock grazing (11,740 AUMs), and no livestock grazing.

Comments on the Draft Environmental Impact Statement are being solicited from public agencies and interested individuals and entities. The Bureau of Land Management invites written comments on the statement to be submitted by June 27, 1983 to the Redding Area Manager. Bureau of Land Management, 355 Hemsted Drive, Redding, California 96002.

A limited number of copies of this document are available upon request at the Redding Resource Area Office and the California State Office, Bureau of Land Management, 2800 Cottage Way, Sacramento, California 95825, telephone (916) 484–4701.

In addition to the above offices, copies of this DEIS are available for public reading and review at: Division of Rangeland Management, Bureau of Land Management, Premier Building, 1725 I Street, NW., Room 909–H, Washington, D.C. 20006.

Dated: April 25, 1983.

Ed Hastey,

California State Director.

[FR Doc. 83-11714 Filed 5-2-83; 8:45 am]

BILLING CODE 4310-84-M

[R&PP Lease CA 12990 and CA 13100]

Realty Action—Public Lands in Shasta County, California

Notice is hereby given that the City of Redding has submitted an application to purchase 59.17 acres of public land for expansion of the Buckeye Park.

The following-described land has been examined and classified as suitable for sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.).

Shasta County, California, T. 32 N., R. 5 W., M.D.M.
Section 14, lots 11, 14–17, 20, 21, 23–25, and SW¼NW¼NE¼, SW¼NE¼SW¼NE¼, W½SE¼SW¼NE¼, W½SW¼N E¼SE¼, NE¼NW¼SE¼, S½N½ S½SE¼NW¼SE¼, S½S½SE¼NW¼ SE¼

The land described above will be leased to the city of Redding for a period of twenty (20) years with the option to purchase the land when the planned improvements have been constructed according to the City's approved plan of development.

This decision/notice is based on the following:

1. The lands have been found to be valuable for public purposes and recreational uses.

2. The land is not of national significance and not essential to any Bureau of Land Management program.

3. The proposed action is in conformance with the existing land use plan.

4. The proposed action will have no significant (including controversial) effects on the human and natural environment.

5. Leasing with option to purchase of the above-described lands to the City of Redding will serve an important public objective, i.e., provide badly needed park facilities to the residents of the Buckeye area.

6. The classification and sale of the land to the City of Redding are in conformance with the Secretary of the Interior's "Good Neighbor Program."

Classification of these lands to the City of Redding, California, under the provisions of the above cited authority segregates them from all appropriations including locations under the mining laws, except as to applications under the Mineral Leasing Laws and applications under the Recreation and Public Purposes Act.

Petition for classification CA 12990 and CA 13100 is approved. The petitioner is the City of Redding, California, through the provisions of the Recreation and Public Purposes Act.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Area Manager, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination.

Dated: April 25, 1983.

Robert J. Bainbridge,

Area Manager.

[FR Doc. 83-11716 Filed 5-2-83; 8:45 am]

BILLING CODE 4310-84-M

Wyoming and Montana; Intent To Prepare a Regional Environmental Impact Statement (EIS) for Proposed Leasing of Federal Coal in the Powder River Coal Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare an EIS.

SUMMARY: This notice advises the public that the Bureau of Land Management (BLM) intends to prepare an EIS addressing coal leasing in the Powder River Basin Coal Region in 1984. Public involvement to determine the scope and significant issues to be analyzed is invited. Public participation will be sought in public scoping meetings in Gillette, Wyoming, May 24, Sheridan, Wyoming, May 25 and Ashland, Montana, May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Charles F. Wilkie, Special Projects Team Leader, Casper District Office, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601, (307) 261–5566.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the National Environmental Policy Act and the Council on Environmental Quality regualtions (43 CFR 1508.22) that the Bureau of Land Management (BLM) will prepare an EIS to address potential affects of new competitive coal leasing in the Powder River Region of Wyoming and Montana.

This proposed leasing in needed to meet a Department of the Interior Federal coal leasing level, in accordance with the Federal Coal Management Program as announced by the Secretary of the Interior (43 CFR Part 3400).

Potential lease tracts have been delineated by the Minerals Management Service from land found acceptable for further consideration for coal

VOL

UMI

development during BLM land-use planning. The Casper District of BLM identified acceptable areas for Wyoming in supplements and amendments to the Eastern Powder River Basin Management Framework Plans for the Western Powder River, Recluse, Gillette and Highlight review areas in Sheridan, Johnson, and Campbell counties. The U.S. Forest Service (USFS) (Supervisor's Office) applied the unsuitability criteria and identified acceptable areas on the Thunder Basin National Grasslands in southern Campbell County. The Miles City District BLM identified acceptable areas in Montana in updates of the South Rosebud, Coalwood, and Decker-Birney Management Framework Plans covering parts of Power River, Big Horn and Rosebud counties.

Preparation of the EIS is scheduled to begin in May 1983. A draft EIS should be available for public review and comment in December 1983. A final EIS is to be filed with the Environmental Protection Agency in April 1983. A final EIS is to be filed with the Environmental Protection Agency in April 1984. The Secretary of the Interior is tentatively scheduled to make the leasing decision in June 1984. A lease sale is scheduled for August 1984.

The proposed action is the leasing of a combination of tracts within the Powder River Region to meet a regional leasing level. Alternatives to the proposed action include leasing different combinations of tracts and no additional Federal coal leasing (No Action). Prior to the preparation of the EIS, the tracts identified in accordance with the Federal coal management regulations (43 CFR 3420.4) will be ranked, selected and scheduled by the Powder River Regional Coal Team.

Public involvement is invited to determine the scope and significant issues to be analyzed in the EIS. Public participation will be sought by direct contact and mailings to interested and affected parties, announcements in local media, and review of the EIS and decision documents.

Public meetings will be held in areas that would be directly affected. These meetings are a part of the overall scoping process and they will be held in the County Building basement—Gillette, Wyoming on May 24, 1983, at 7:00 p.m.; Holiday Inn-Sheridan, Wyoming on May 25, 1983, at 7:00 p.m.; and the Elementary School—Ashland, Montana on May 26, 1983 at 7:00 p.m. Notices of date, time, and location will be published in local newspapers and by direct mailing to interested and affected parties.

Any individual company, group or agency who wishes to be included in the mailing list for notification, to submit information that would be useful in preparing the EIS, or to provide comments and suggestions should contact the BLM District Manager, Casper District Office, 951 Rancho Road, Casper, Wyoming 82601. Telephone inquiries should be directed to Charles F. Wilkie, EIS Team Leader at the following numbers: (307) 261–5598 (commercial phone) or 328–5598 (Federal Telecommunications System).

Maxwell T. Lieurance,

State Director.

BILLING CODE 4310-70-M

Golden Gate National Recreation Area Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 10:30 a.m. (PST) on Saturday, May 21, 1983, at the West Marin School, Point Reyes Station, California.

VOL
48
ISS
86
MY
3
1983
UMI

The Advisory Commission was established by Pub. L. 92–589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin and San Francisco Counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Margot Patterson Doss
Mr. Jerry Friedman
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. Burr Heneman
Mr. John Jacobs
Ms. Gimmy Park Li
Mr. John Mitchell
Mr. Merritt Robinson
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

Major agenda items for this meeting will be the draft Land Protection Plan for Golden Gate National Recreation Area and Point Reyes National Seashore, and the PG & E easement agreement for work within park boundaries.

The meetings are open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact John H. Davis, General Superintendent of the Golden Gate National Recreation Area, Fort Mason, San Francisco, California 94123; telephone (415) 556–2920.

Minutes of this meeting will be available for public information by June 21, 1983 in the Office of the Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, California 94123.

Dated: April 21, 1983.

James R. Mills,

Acting Regional Director, Western Region.

Privacy Act of 1974; Revision and Update of Systems of Records Notices

This notice updates and revises the information which the Department of the Interior has published describing systems of records maintained which are subject to the requirements of Section 3 of the Privacy Act of 1974, 5 U.S.C. 552a. Except as noted below, all changes being published are editorial in nature, and reflect organizational changes and transfers of functions which have occurred since the previous publication of the material in the Federal Register.

Routine uses providing for disclosures to members of Congress in response to inquiries by individuals of record have been added in records system notices for OS–46, OS–47, OS–51, OS–86 and OS–87. The statements describing the categories of individuals covered by the system notices for OS–47 and OS–50 have been clarified. System Number OS–86, Accounts Receivable, is revised to add a compatible disclosure to consumer reporting agencies to facilitate collection of debts owed the Government.

One system notice OS–53 titled "Classified Documents" (previously published at 45 FR 55836) is removed from the inventory of the Department's Privacy Act systems of records. Such records on classified documents are not retrieved by individual name or any identifier or symbol associated with an individual name.

The following system notices are updated and re-published in their entirety below:

1. System Name: Hearings and Appeals Files—Interior, OHA–1 (Published at 46 FR 12149).

2. System Name: Emergency Defense Mobilization Files—Interior, OS–15 (Published at 45 FR 55832).

3. System Name: Discrimination Complaints—Interior, OS–18 (Published at 42 FR 19018).

4. System Name: Secretarial Subject Files—Interior, OS–46 (Published at 45 FR 55834).

5 System Name: Parking Assignment Record—Interior, OS–47 (Published at 45 FR 55834).

6. System Name: Motor Vehicle Operator's Identification Card Applications—Interior, OS–50 (Published at 47 FR 27978).

7. System Name: Property Management Accountability—Interior, OS–51 (Published at 47 FR 27978).

8. System Name: Travel Management Records—Interior, OS–52 (Published at 47 FR 27979).

9. System Name: Safety Management Information System—Interior, OS–60 (Published at 45 FR 55837).

10. System Name: Applicant Files—Interior, OS–70 (Published at 46 FR 28520).

11. System Name: Accounts Receivable—Interior, OS–86 (Published at 42 FR 19033).

12. System Name: Cash Receipts—Interior, OS–87 (Published at 42 FR 19033).

Parts I, III, IV, and V of the Appendix containing addresses of facilities of the Department which pertain to the Office of the Secretary and Other Departmental Offices (published at 45 FR 55831 and 46 FR 12146) are updated and republished. Detailed listings of field facilities have been removed to reduce printing costs and eliminate the publication of obsolescent material.

These changes are being published pursuant to 5 U.S.C. 552a(e) (4). Written comments on this proposal may be addressed to the Department Privacy Act Officer, Office of the Secretary (PIR), U.S. Department of the Interior, Washington, D.C. 20240. Comments received within 30 days of publication in the Federal Register will be considered. The notice shall be effective as proposed without further notice unless comments are received which would result in a contrary determination.

Dated: April 26, 1983.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

(c) R.S. 2478 as amended, 43 U.S.C. 1201; 5 U.S.C. 101; 43 U.S.C. 315a; 43 U.S.C. 1701(a)(5). (d) Sec. 201, Pub. L. 95–87, 91 Stat. 445, 30 U.S.C. 1201. (e) R.S. 2478, as amended, 43 U.S.C. 1201; 5 U.S.C. sec. 301; 43 U.S.C. 1601–1624. (f) Lacey Act, 18 U.S.C. sec. 43; Endangered Species Act of 1973, 16 U.S.C. sec. 1531 et seq.; Endangered Species Conservation Act of 1969 (formerly) 16 U.S.C. sec. 668aa et seq.; Marine Mammal Protection Act of 1972, 16 U.S.C. sec. 1361 et seq.; Bald Eagle Protection Act, 16 U.S.C. 668 et seq.; 5 U.S.C. 301 (g) 42 U.S.C. secs. 4601–4655; 5 U.S.C. 301. (h) 5 U.S.C. 301; 5 CFR Part 771; 5 U.S.C. 1302, 3301, 3302, E.O. 10577; 3 CFR, 1954–1958 Comp., p. 218, E.O. 10987; 3 CFR, 1959–1963 Comp., p. 519. (i) 43 CFR 17.8; 5 U.S.C. sec. 301; Title VI of the Civil Rights Act of 1964 (section 602, 42 U.S.C. 2000d–1); 43 CFR Part 17, including Appendix A thereto. (j) Sec. 403, Pub. L. 93–153, 87 Stat. 576, 5 U.S.C. 301, and 43 CFR Part 27.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are for the adjudication and determination of issues in hearing and appeals proceedings. Disclosures outside the Department of the Interior may be made (1) to the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or license.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders.

RETRIEVABILITY:

Indexed by name of appellant, claimant, etc., and by OHA docket number.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

Case materials returned to operating bureau or office after completion of OHA functions. Records of decisions not authorized for disposal.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, VA 22203.

NOTIFICATION PROCEDURE:

System Manager or, with respect to records maintained in a field office for which he is responsible, an administrative law judge or chief administrative law judge in charge. A written and signed request stating that the requester seeks information concerning records pertaining to him is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access may be addressed to the System Manager or, with respect to records maintained in a field office for which he is responsible, an administrative law judge or chief administrative law judge in charge. The request must be in writing and be signed by the requester. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager must meet the requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Records in the system include information submitted by the appellants, claimants, and other persons involved in the hearings and appeals proceedings, as well as by the Government.

INTERIOR/OS–15

SYSTEM NAME:

Emergency Defense Mobilization Files—Interior, Office of the Secretary—15.

SYSTEM LOCATION:

(1) Office of the Assistant Secretary-Policy, Budget, and Administration. (2) Office of the Assistant Secretary-Energy and Minerals, (3) Office of the Assistant Secretary-Land and Water Resources. Addess for locations: U.S. Department of the Interior, 18th and C Streets, N.W.; Washington, D.C. 20240.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Members of the National Defense Executive Reserve and other individuals assigned responsibilities in the event of a national defense emergency.

CATEGORIES OF RECORDS IN THE SYSTEM:

Biographical and related records.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is to administer the NDER program. Disclosures outside the Department of the Interior may be made (1) to officials of participating departments and agencies relevant to reservists assigned to their units; (2) to the U.S. Department of justice when related to litigation or anticipated litigation; (3) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule regulation, order or license; (4) from the record of an individual in response to an inquiry from a Congressional office made at the request of that individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form.

RETRIEVABILITY:

Indexed by individual name.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51.

RETENTION AND DISPOSAL:

Records held for two years after individual's resignation or death.

SYSTEM MANAGER(S) AND ADDRESS:

(1) For records maintained in the Office of the Secretary, the Assistant Secretary-Policy, Budget and Administration. (2) For records maintained in the Office of the Assistant Secretary—Energy and Minerals, the Assistant Secretary—Energy and Minerals. (3) For records maintained in the Office of the Assistant Secretary—Land and Water Resources, the Assistant Secretary—Land and Water Resources.

NOTIFICATION PROCEDURE:

A written, signed request stating that the requester seeks information concerning records pertaining to him/her is required. The request shall be addressed to the appropriate System Manager. See 43 CFR 2.60 for submission requirements.

RECORD ACCESS PROCEDURES:

A request for access shall be addressed to the appropriate System Manager and shall meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the appropriate System Manager and shall meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individuals.

INTERIOR/OS–16

SYSTEM NAME:

Discrimination Complaints—Interior, Office of the Secretary—16.

SYSTEM LOCATION:

(1) Office for Equal Opportunity, U.S. Department of the Interior, 18th and C Streets, N.W., Washington, D.C. 20240. BILLING CODE 4310-10-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of Approved Exemptions.

SUMMARY: the motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effective on June 2, 1983. Petitions for reconsideration must be filed by May 23, 1983. Petitions for stay must be filed by May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood. (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW, Washington, D.C. 20423; or call (202) 289–4357 in the DC metropolitan area; or (800) 424–5403 Toll-free outside the DC area.

Decided: April 25, 1983.

Agatha L. Mergenovich,
Secretary.

[No. MC–F–15095]

BRADLEY FREIGHT LINES, INC.—Merger exemption—C & C TRANSPORT, INC. Addresses: Send pleadings to: (1) Motor Section, Room 3139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioners' representative, Henry E. Seaton, 929 Pennsylvania Bldg., 13th and Pennsylvania Ave., N.W., Washington, DC 20004. Pleadings should refer to No. MC–F–15095. Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(1), the merger of C & C Transport into Bradley Freight Lines. By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Sterrett would not have the exemption authority lapse after one year.

[No. MC–F–15096]

MAKO SERVICES INC.—purchase exemption—A & A TRANSPORT, INC. Addresses: send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423 and (2) Petitioners' representative, Arlyn L. Westergren, Westergren, Hauptman & O'Brien, P.C., Suite 201, 9202 W. Dodge Road, Omaha, NE 68114. Pleadings should refer to No. MC–F–15096. Under 49 U.S.C. 11343(e),

the Interstate Commerce Commission exempts from the requirements of prior review and approval under 49 U.S.C. 11343(a), the purchase by Mako Services, Inc. (No. MC–157834) of the authorities issued to A & A Transport, Inc., in No. MC–145679 (Sub-Nos. 18, 19, and 22).

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

BILLING CODE 7035-01-M

Motor Carriers; Decision-Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, (202) 275–7992.

Volume No. OP1–FC–155

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC–FC–81377. By decision of April 26, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1 approved the transfer to ALPHA VAN LINES, INC., Springfield, VA, of Certificate No. MC–36900 (Sub-No. 20), issued April 22, 1983, to CONTAINER IN TRANSIT, INC., Alexandria, VA, authorizing the transportation over irregular routes, of household goods, between points in the U.S. (except AK and HI). Representative: Martin R. Martino, 333 So. Glebe Rd., Arlington, VA 22204

MC–FC–81399. By decision of April 26, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1 approved the transfer to ALBERT N. WATERS, d/b/a/ NEAL'S TRUCKING, of Certificate No. MC–154581, issued April 22, 1982, to SANDPIPER CONTAINER TRUCKING, INC., Seattle, WA, authorizing the transportation of general commodities (except classes A and B explosives and household goods as defined by the Commission), in containers or trailers having a prior or subsequent movement by water, between points in WA and Multnomah County, OR, on the one hand, and, on the other, points in WA, and Multnomah, Washington, and Clackamas Counties, OR. An application for temporary authority has been filed. Representative: Larry C. Leonardson, 3530 Sea-1st Fifth Avenue Plaza, 800 Fifth Avenue, Seattle, WA 98104.

MC–FC–81409. By decision of April 26, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1 approved the transfer to AAA MOVING SERVICES, INC., Savannah, GA, of Certificate No. MC–1840, issued April 30, 1965, to GIVENS TRANSFER COMPANY, INC., Savannah, GA, authorizing the transportation of household goods, as defined by the Commission, between Savannah, GA, and points in GA within 50 miles of Savannah, on the one hand, and, on the other, points in GA, SC and FL. Applicants' representative: L. T. Givens, Jr., 8 Warner Street, P.O. Box 1965, Savannah, GA 31402.

[No. 39093 et al.] [1]

Motor Carriers; Joseph Moving & Storage Co.—Petiton for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Three motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisonally granted for future as well as existing contracts.

DATE: Comments are due on May 18, 1983. The sought relief will become final on June 2, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Elaine Dobbins, (202) 275–6272
or
Howell I. Sporn, (202) 275–7691.

[1] This proceeding embraces three petitions for exemption filed by motor contract carriers: No. 39093, Joseph Moving & Storage Co.; No. 39095, Allied Van Lines, Inc.; and No. 39096, Dutra Trucking Co., Inc.

SUPPLEMENTARY INFORMATION:
Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, 12th and Constitution Ave., N.W., Washington, DC, 20423, or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

(49 U.S.C. 10702(b), 10761(b), and 10762(f))

Decided: April 25, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich

Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

For the following, please direct status calls to Team 3 at 202–275–5223.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Fowarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed

VOL
48
ISS
86
MY
3
1983
UMI

by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Motor Carriers; Permanent Authority Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating right authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously notice in the **Federal Register.**

An original and one copy of an appropriate petition for leave to intervene, setting forth in detail the precise manner in which petitioner has been prejudiced, must be filed with the Commission within 30 days after the date of this **Federal Register** notice.

By the Commission.

Agatha L. Mergenovich,

Secretary.

MC 152183 (Sub-4) (Republication) filed April 28, 1982, published in the **Federal Register** issue of June 2, 1982, and republished this issue. Applicant: FLAMINGO TRANSPORT, INC., P.O. Box 890, Adairsville, GA 30103. Representative: Frank Linn (same address as applicant). A decision of the Commission, *Division 2,* Acting as an Appellate Division, Commissioners Andre, Gilliam and Taylor, decided December 21, 1982, and served December 28, 1982, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier,* by motor vehicle, over irregular routes, transporting *general commodities,* between Blanche and Blue Pond, AL., Bartlett, Cartago, Cosco, Inyokern, Little Lake, Lone Pine, Olancha, Pencilwood, and Swanston, CA, Dundee, Lake Hamilton, and Waverly, FL, Chelsea and Menlo, GA, Corral and Hill City, ID, Addison, Grand Tower, Mooseheart, and Sand Ridge, IL, LaOtto, IN, Orange City, IA, Viola and Wier, KS, Benton and Hardin, KY, Amesbury and Salisbury, MA, Alden, Bellaire, Bendon, Central Lake, Chief Lake, Interlochen, Kaleva, Norwalk, and Rapid City, MI, Key West, MN, Fairfax and Tarkio, MO, Huntley and Ragan, NE, Pactolus, Stokes, and Whichard, NC, Dunseith, ND, and Ehrhardt and Lodge, SC, on the one hand, and, on the other, points in the United States; that applicant is fit, willing, and able properly to perform the service authorized and to conform to statutory and administrative requirements. The purpose of this republication is to broaden commodity and territorial description.

MC 154782 (Sub-1) (Republication) filed March 23, 1981, published in the **Federal Register** issue of April 9, 1981.

and republished this issue. Applicant: M.C.H. TRUCKING CORP., 494 Howe St., Prattsburg, NY 14873. Representative: Kenneth M. Piken, Queens Office Tower, 96–25 Queens Boulevard, Rego Park, NY 11374. A Decision of the Commission, *Review Board 1*, decided February 2, 1983 and served February 14, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *contract carrier*, by motor vehicle, transporting *dairy products and such commodities* as are dealt in by dairies, between points in the United States, under continuing contract(s) with Kellogg Company, of Battle Creek, MI, and Elmhurst Milk & Cream Co., Inc., and subsidiaries, Worcester Creameries Corp., and Honeywell Farms, Inc., of Jamaica, NY; that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this is to include the phase "and its subsidiaries".

MC 164532 (Republication) filed November 2, 1982, published in the **Federal Register** issue of November 18, 1982, and republished this issue. Applicant: H & J TRANSPORTATION, INC., 801 East St., Memphis, TN 38104. Representative: Michael E. Doyle (same as applicant). A Decision of the Commission, *Review Board 2*, decided March 8, 1983 and served March 14, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common-carrier*, by motor vehicle, transporting (2) *chemicals and related products*, between points in the United States (except Alaska and Hawaii), that applicant is fit, willing, and able properly to perform the service authorized and to conform to statutory and administrative requirements. The purpose of this republication is to show broadening of authority.

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: April 27, 1983.

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was publised in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 2, at (202) 275–7030.

MC 133403 (Sub-6X), filed April 11, 1983. Applicant: HUDSON TRANSIT CORPORATION, P.O. Box 386, Montgomery, NY 12549. Representative: Samuel B. Jamieson, Jr. (same address as applicant), 201–529–3666. Lead: (A) remove restrictions (1) "No passenger shall be discharged at Corning, NY, on westbound trips or picked up at Corning, NY, on eastbound trips." (2) "Service at Vestal, NY shall be limited to that of tacking and/or joinder." (3) "No service shall be provided at any point intermediate to Binghamton NY, and Corning, NY, except Vestal, NY as stated immediately above," and (B) authorize service at all intermediate points over described regular route extending between junction NY Hwys 17(C) and 26 at Endicott, NY, and junction NY Hwys 17 and 26 at Vestal, NY.

Motor Carriers; RTC Transportation, Inc.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Eight motor contract carriers have each requested exemption from the requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on May 18, 1983. The sought relief will become final on June 2, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing the relief.

ADDRESS: Send an original and 15 copies of comments to: Room 2139, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Elaine Dobbins (202) 275–6272
or
Howell I. Sporn (202) 275–7691

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW., Washington, D.C. 20423, or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

Decided: April 25, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

National Institute of Justice

Solicitation; Development of National Baseline Information on Offender Processing Costs

The National Institute of Justice announces a competitive solicitation for a cooperative research agreement entitled, Development of National Baseline Information on Offender Processing Costs. It is anticipated that approximately $750,000 will be allocated for a single award with a 21-month study period. Funding recommendations will be made to the Director of the National Institute of Justice by a Peer Review Panel composed of internal staff and outside experts. To be eligible for consideration, proposals must be received by Friday, July 1, 1983.

Copies of this solicitation can be obtained by writing the Director, Office of Research and Evaluation Methods, National Institute of Justice, 633 Indiana Avenue, NW., Washington, DC 20531 or by calling the Project Manager, Dr. Edwin Zedlewski, at (202) 724–8265.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period April 18, 1983–April 22, 1983.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–13,784; Hawera Tool Manufacturing Co., Jackson, MS
TA–W–13,786; L.F. Fales Machine Co., Walpole, MA
TA–W–13,594; Republic Steel Corp., Central Alloy District, Basic Steel Plant Canton, OH
TA–W–13,596; Republic Steel Corp., Central Alloy District, Massillon Works, Massillon, OH
TA–W–13,690; W.T. Armstrong Co., Elkhart, IN
TA–W–13,624; Wheeling-Pittsburgh Steel Corp., Yorkville, OH
TA–W–13,666; Reynolds Metals Co., Plant #1, #3, #15, Louisville, KY
TA–W–13,667; Roma Printing & Finishing Corp., Paterson, NJ
TA–W–13,718; Monarch Machine Tool Co., Cortland, NY
TA–W–13,746; Shieldalloy Corp., Newfield, NJ
TA–W–13,793; Superior Electric Products Corp., Cape Girardeau, MO
TA–W–13,623; Wheeling-Pittsburgh Steel Corp., Beech-Bottom, WV
TA–W–13,792; Republic Street Corp., Southern District, Gadsden, AL
TA–W–13,816; Boris Smoler & Sons, Inc., Elkhart, IN
TA–W–13,379; Cleveland Pneumatic Co., Cleveland OH
TA–W–13,881; Metals Applied Co., Cleveland, OH

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA–W–13,828; Opelika Manufacturing Corp., Whitehouse Manufacturing Co. Div., Miami, FL
TA–W–13,747; AFA Corp., Miami Lakes, FL

In the following cases the investigation revealed that criterion (3) had not been met for the reasons specified.

TA–W–13,932; Ames Coal Co., Logan County, WV

Aggregate U.S. imports of coke did not increase as required for certification.

TA–W–13,934; Calgon Corp., South San Francisco, CA

Aggregate U.S. imports of magnesium oxide are negligible.

TA–W–13,988; Badger Coal Co., Grand Badger #1, Sago, WV

Aggregate U.S. imports of cola or coke did not increase as required for certification.

Affirmative Determinations

TA–W–13,661; Levi Strauss & Co., Laredo, TX

A certification was issued covering all workers of the firm separated on or after September 1, 1981 and before April 15, 1982.

TA–W–13,888; Friend Manufacturing Corp., Gasport, NY

A certification was issued in response to a petition received on October 2, 1982 covering all workers separated on or after October 15, 1981.

TA–W–13,861; U.S. Steel Corp., Clairton Works, Clairton, PA

A certification was issued covering all workers engaged in employment related to the production of hot rolled carbon steel bars, coke, & coal chemical by-products of the firm separated on or after October 15, 1981.

TA–W–13,556; Carpenter Technology, Steel Div., Reading, PA—Plant and Headquarters

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,557; Carpenter Technology, Steel Div., Bridgeport, CT

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,558; Carpenter Technology, Steel Div., Hapeville, GA

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,559; Carpenter Technology, Steel Div., Mansfield, MA

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,560; Carpenter Technology, Steel Div., Charlotte, NC

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,561; Carpenter Technology, Steel Div., Melrose Park, IL

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,562; Carpenter Technology, Steel Div., Cincinnati OH

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,563; Carpenter Technology, Steel Div., Cleveland, OH

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,564; Carpenter Technology, Steel Div., Dallas, TX

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,565; Carpenter Technology, Steel Div., Troy, MI

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,566; Carpenter Technology, Steel Div., Hartford, CT

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,567; Carpenter Technology, Steel Div., Houston, TX

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,568; Carpenter Technology, Steel Div., Indianapolis, IN

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,569; Carpenter Technology, Steel Div., Los Angeles, CA

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

TA–W–13,570; Carpenter Technology, Steel Div., Memphis, TN

A certification was issued in response to a petition received on June 11, 1982 covering all workers engaged in employment related to the production of alloy steel, stainless steel wire or stainless steel bar separated on or after August 28, 1981.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506:

Date: May 23–24, 1983.

Time: 8:00 a.m. to 5:30 p.m.

Room: 315

Program: This meeting will review applications submitted to the General Research: State, Local and Regional Studies Panel, Division of Research Programs, for projects beginning after January 1, 1984.

Date: May 26–27, 1983.

Time: 9:00 a.m. to 5:30 p.m.

Room: 415.

Program: This meeting will review applications submitted by state humanities committees, Division of State Programs, for activity beginning after November 1, 1983.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged of confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786–0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-293]

Boston Edison Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 69 to Facility Operating License No. DPR–35 issued to Boston Edison Company (the licensee) which revised the Technical Specifications for operation of the Pilgram Nuclear Power Station (the facility) located near Plymouth, Massachusetts. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications to incorporate revisions to reflect organizational changes at Boston Edison related to nuclear activities both at Pilgrim Station and offsite.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since it does not involve a significant hazards consideration.

The Commission has determined that the issuance of this Amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated October 25, 1982 as revised March 2, 1983 (2) Amendment No. 69 to License No. DPR–35, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 28th day of April 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

[FR Doc. 83-11704 Filed 5-2-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-146]

General Public Utilities System; Establishment of Local Public Document Room

Notice is hereby given that the Nuclear Regulatory Commission (NRC) has officially established a local public doument room (LPDR) for General Public Utilities System's Saxton Nuclear Experimental Facility at the Saxton Community Library, Saxton, Pennsylvania.

Members of the public may now inspect and copy documents and correspondence related to the decommissioning of the Saxton Nuclear Experimental Facility at the Saxton Community Library, 911 Church Street, Saxton, PA 16678. The hours of operation of the Saxton Community Library are Monday, Tuesday, and Wednesday, 7:00 pm–9:00 pm, Thursday, 12:00 noon–4:00 pm and 7:00 pm–8:30 pm, and Sunday, 2:00 pm–4:00 pm.

For further information interested parties in the Saxton area may contact the LPDR directly through Ms. Lila Pennell, Librarian, telephone number (814) 635–3533. Parties outside the service area of the LPDR may address their requests for records to the NRC's Public Document Room, 1717 H Street, N.W., Washington, DC 20555, telephone number (202) 634–3273. The cost of ordering records from the NRC Public Document Room is 5¢ per page, plus postage and handling.

Questions concerning the availability of documents at the Saxton LPDR and the NRC's local public document room program in general should be addressed to Ms. Jona L. Souder, Chief, Local Public Document Room Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone number, toll-free (800) 638–8081.

Dated at Bethesda, Maryland, this 26th day of April, 1983.

For the Nuclear Regulatory Commission.

Joseph M. Felton,

Director, Division of Rules and Records, Office of Administration.

[FR Doc. 83-11705 Filed 5-2-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light and Power Co., et al.; Exemption

I

Iowa Electric Light and Power Company, et al. (the licensee) is the holder of Facility Operating License No. DPR–49 which authorizes the operation of the Duane Arnold Energy Center at steady state reactor power levels not in excess of 1658 megawatts thermal. The facility consists of a boiling water reactor located at the licensee's site near Palo in Linn County, Iowa. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

II

Section 50.48 of 10 CFR Part 50 requires that licensed operating reactors be subject to the requirements of Appendix R of 10 CFR Part 50. Appendix R contains the general and specific requirements for fire protection programs at licensed nuclear facilities. On February 17, 1981, the fire protection rule for nuclear power plants, 10 CFR 50.48 and Appendix R, became effective. This rule required all licensees of plants licensed prior to January 1, 1979, to submit by March 19, 1981: (1) plans and schedules for meeting the applicable requirements of Appendix R, (2) a design description of any modifications proposed to provide alternative safe shutdown capability pursuant to Paragraph II.G.3 of Appendix R, and (3) exemption requests for which the tolling provision of § 50.48(c)(6) was to be invoked.

The licensee responded to these requirements by letter dated March 19, 1981, and supplemented its response by information contained in letters dated July 3, 1981, and June 22, 1982.

In these submittals, the licensee requested certain exemptions from the requirements of Section III.G of Appendix R to 10 CFR Part 50. Section III.G of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of the following means:

a. Separation of cables and equipment and associated non-safety circuits of redundant trains by a fire barrier having a 3-hour rating. Structural steel forming a part of or supporting such fire barriers shall be protected to provide fire resistance equivalent to that required of the barrier;

b. Separation of cables and equipment and associated non-safety circuits of redundant trains by a horizontal distance of more than 20 feet with no intervening combustibles or fire hazards. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area; or

c. Enclosure of cables and equipment and associated non-safety circuits of one redundant train in a fire barrier having a 1-hour rating. In addition, fire detectors and an automatic fire suppression system shall be installed in the fire area.

If these conditions are not met, Section III.G.3 requires alternative shutdown capability independent of the fire area of concern.

1. The licensee requested an exemption from the provisions of Section III.G of Appendix R for the reactor building torus area (fire zone 1–A) to the extent that it requires automatic fire detection and fire suppression throughout the fire area to protect redundant trains of safe shutdown related cables and equipment.

The licensee justified the exemption by stating that, with the exception of the redundant cables in the northwest half of the area, the separation distance between all other division one and division two cables in conjunction with the low combustible loading in the area reduces the probability of a fire causing damage to both trains. The licensee further contends that due to the low quantity of combustibles in the area, a potential fire could not be expected to propagate beyond the area of ignition.

Where redundant cables are located in close proximity, one-hour rated fire barriers, fire detections, and automatic suppression will be installed to provide the level of safety mandated by Appendix R.

We have reviewed the licensee's submittal and agree with the licensee's evaluation that the area does not comply with Section III.G because automatic fire detection and fire suppression is not available throughout the area. However, we find that the proposed means of protection and low quantity of combustibles in the area and the space between redundant components provides reasonable assurance that safe shutdown related cables will be maintained free of fire damage.

Therefore, we conclude that with the proposed modifications, the level of safety provided in the torus area will be equivalent to the technical requirements of Section III.G.2 of Appendix R and the licensee's request should be granted.

2. The licensee has requested an exemption from the provisions of Section III.G of Appendix R for the

VOL
48
ISS
86
MY
3
1983
UMI

reactor building north and south CRD module areas (fire zones 2A and 2B).

The licensee has justified the exemption request by stating that, because of the design of the scram system, any power interruption to the electrical solenoid controlling control rod motion after fire exposure will be an open or short circuit and will activate the scram signal and de-energize the solenoid, thus effecting a safe shutdown.

We have reviewed the licensee's submittals and agree with the licensee's evaluation that the area does not comply with Section III.G of Appendix R because the scram solenoid cables do not have one of the three specified fire protection measures. We find, however, that a fire which causes an open or short ciruit will not adversely affect safe shutdown and although individual scram solenoids could remain energized from a hot short, the probability of a significant number of control rods being affected in this way is low.

Therefore, we conclude that the alternate form of protection provided by the design of the scram solenoid system ensures a level of safety equivalent to the technical requirements of Section III.G of Appendix R and that the licensee's request for exemption should be granted.

3. The licensee has requested an exemption from the provisions of Section III.G of Appendix R for the reactor building RHR valve rooms (fire zone 2–D) to the extent that it requires 20 feet of separation without intervening combustibles between redundant trains.

The licensee has justified the exemption by stating that the area contains the RHR system injection valves and redundant trains of cables to the valves will be enclosed in a one-hour rated fire barrier and protected by fire detection and automatic suppression. The redundant injection valves will also be protected by fire detection and automatic suppression but will be enclosed in one-hour rated fire barriers. It is not considered practical to enclose the valves inside a fire rated barrier.

We have reviewed the licensee's submittals and agree with its evaluation that the area does not comply with Section III.G because it is not provided with protection for the RHR injection valves. However, the fire load in the area is low (425 BTU/sq. ft.). The fire load, if totally consumed, would correspond to a fire severity less than one minute on the ASTM E–119 standard time temperature curve. Due to the considerable heat sink provided by the concrete floor and walls, the probability is low that a fire could damage the injection valves before the actuation of the detection and suppression systems. One-hour rated barriers enclosing the cables to the equipment provide added margin of safety.

Therefore, we conclude that with the proposed modifications listed above the level of safety for this area will be equivalent to the technical requirements of Section III.G of Appendix R and the request for exemption should therefore be granted.

4. The licensee has requested an exemption from the provisions of Section III.G of Appendix R for the control room (fire zone 12A) to the extent that it requires a fixed fire suppression system in the area.

The licensee has justified the exemption by stating that the control room has a fire detection system, hose station, and fire extinquisher. In addition, an alternate safe shutdown system is also available independent of control room. The control room is continuously manned and the fire load is low.

We have reviewed the licensee's submittals and agree with the licensee's evaluation that this area does not comply with Section III.G because it is not provided with a fixed fire suppression system. However, since the fire hazard is light and the control room continuously manned, there is reasonable assurance that a fire would be promptly extinquished.

Therefore, we conclude that the installation of a fixed fire suppression will not significantly increase the level of fire protection in the control room and the request for exemption should therefore be granted.

5. The licensee has requested an exemption from the provision of Section III.G of Appendix R for the boundaries of fire areas to be separated by three-hour rated barriers.

The licensee has justified the exemption by stating that the 1979 fire hazard analysis was accepted as meeting staff guidelines and divisional boundaries of less than three hours were accepted on the basis of the combustible loading in the adjacent areas.

We have reviewed the licensee's submittal and agree with the licensee's evaluation that the areas do not comply with Section III.G because five of the fire boundaries contain ventilation duct penetration protected by one and a half-hour rated fire dampers.

However, the equivalent fire severity based on the combustible loading in the lower switchgear room (area 7B) is 0.35 hours, in the battery rooms (areas 10B and 10D) 0.52 hour, in the essential switchgear rooms (areas 10E and 10F) 0.18 and 0.23 hours, respectively. A fire in any of these areas would be comfortably less than the rating of the damper and therefore, the one and a half-hour rated fire dampers will provide adequate protection.

We conclude, therefore, that the level of fire protection provided by the fire area boundaries for the lower switchgear room (fire area 7B), the battery rooms (fire areas 10B and 10D) and the essential switchgear rooms (fire areas 10E and 10F) provide a level of safety equivalent to the technical requirements of Appendix R and the licensee's request for an exemption should be granted in these areas.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest.

Therefore, the Commission hereby approves the following exemption requests:

Exemption is granted from the requirements of Section III.G of Appendix R of 10 CFR Part 50 for the following areas to the extent described in Section II of this exemption:

1. Reactor building torus area (fire zone 1A)
2. North and south CRD module areas (fire zones 2A and 2B)
3. Reactor building RHR valve rooms (fire zone 2D)
4. Control room (fire zone 12A)
5. Lower switchgear room (fire area 7B), battery rooms (fire areas 10B and 10D), and essential switchgear rooms (fire areas 10E and 10F)

The NRC staff has determined that the granting of these exemptions will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 26th day of April 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-11798 Filed 5-2-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-333]

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant); Exemption

I

The Power Authority of the State of New York (the licensee) is the holder of Facility Operating License No. DPR–59 which authorizes the licensee to operate the James A. FitzPatrick Nuclear Power Plant (the facility) at power levels not in excess of 2436 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Oswego County, New York. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

II

Section 50.48 of 10 CFR Part 50 requires that licensed operating reactors be subject to the requirements of Appendix R of 10 CFR Part 50. Appendix R contains the general and some of the specific requirements for fire protection programs at licensed nuclear facilities. On February 17, 1981, the fire protection rule for nuclear power plants, 10 CFR 50.48 and Appendix R, became effective. This rule required all licensees of plants licensed prior to January 1, 1979, to submit by March 19, 1981: (1) Plans and schedules for meeting applicable requirements of Appendix R, (2) a design description of any modifications proposed to provide alternative safe shutdown capability pursuant to Paragraph III.G.3 of Appendix R, and (3) exemption requests for which the tolling provision of § 50.48(c)(6) was to be invoked.

The licensee responded to these requirements by letter dated March 19, 1981, and supplemented its response by information contained in letters dated June 22, 1981, February 26, 1982, and November 23, 1982.

In these submittals, the licensee requested certain exemptions from the requirements of Section III.G and III.L of Appendix R to 10 CFR Part 50. Section III.G of Appendix R requires that one train of cables and equipment necessary to achieve and maintain safe shutdown be maintained free of fire damage by one of three means described in that section. If the conditions of Section III.G are not met, the section requires an alternate shutdown capability independent of the fire area of concern. Section III.L states the requirements for alternative and dedicated shutdown capability.

The exemption requests we found to be acceptable are as follows:

1. The licensee requested an exemption from the provisions of Section III.G.2 of Appendix R for three-phase AC and two-wire DC circuits "to the extent that this would require further analysis and modifications to provide protection against the extremely unlikely occurrence of a two conductor (DC) or three conductor (three phase AC) power cable being severed by a fire and then reconnecting to cause maloperation of systems or equipment."

The licensee justified the exemption by stating the following: for the case of the three-phase AC circuits, the licensee indicated that two circuits—one energized, one deenergized—would need to be damaged by the fire such that power would be supplied to the nonenergized circuit. The licensee indicated that this event was not considered credible because of the extreme unlikelihood of fire-damaged cables reconnecting in the proper sequence.

For the case of the two-wire DC circuits, the licensee indicated that two circuits—one energized, one deenergized—would both need to be damaged by the fire and reconnect such that power would be supplied to the non-energized circuit. Since the DC power system is a non-grounded system, the short of the two circuits would have to occur prior to one of the circuits being shorted to ground. This event is considered highly unlikely.

We have reviewed the licensee's submittals and agree with the licensee's evaluatin that the AC and DC circuits described above do not meet the requirements of Section III.G.2 of Appendix R. However, based on the extremely unlikely occurrence of a three phase circuit short or a two-wire DC power circuit short before grounding, we conclude that the licensee's exemption request is accceptable and should be granted.

2. The licensee has requested an exemption from Sections III.G.1.a, III.G.2, III.G.3, and III.L of Appendix R to the extent that repairs are considered to include low voltage fuse pulling, lifting of leads, and cable cutting.

The licensee justified the exemption by stating that: procedures would identify the necessary corrective actions; that the actions can be accomplished in a timely manner (i.e., before unrecoverable plant conditions exist); and that the electrical connections are low voltage.

We have reviewed the licensee's submittals and have identified two areas for which this exemption request is justified: Fire Area CT–3, Cable Tunnel, and Fire Area Cr–4, Cable Tunnel. For Fire Area CT–3, a RCIC logic control power fuse must be removed to prevent spurious signals from affecting the use of RCIC. For Fire Area CT–4, a HPCI logic control must be removed to prevent spurious signals from affecting the use of HPCI. In each case, the repair is limited to the removal of a single fuse located in a panel in the relay room.

Based on the licensee's commitment to provide procedures detailing these repairs and the licensee's statement that the repairs can be accomplished in a timely manner, and that the repairs are performed on low voltage circuits, we conclude that the licensee's exemption request for Fire Area CT–3 and CT–4 is acceptable and should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption request:

1. Exemption is granted from the provisions of Section III.G.2 of Appendix R for three-phase AC and DC circuits such that no further analysis or modifications are required to provide protection for these circuits to prevent maloperation of systems or equipment.

2. Exemption is granted from Section III.G and III.L of Appendix R to 10 CFR Part 50 to the extent that repairs are considered to include low voltage fuse pulling in Fire Area CT–3 and Fire Area CT–4.

The NRC staff has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact appraisal need not be prepared in connection with this action.

(Dated at Bethesda, Maryland this 26th day of April 1983)

BILLING CODE 7590-01-M

[Docket Nos. 50-546 and 50-547 (ASLBP No. 83-487-02 OL)]

Public Service Company of Indiana, Inc. and Wabash Valley Power Association, Inc.; Establishment of Atomic Safety and Licensing Board To Preside in Proceeding

Pursuant to delegation by the Commission dated December 29, 1972, published in the Federal Register (37 FR 28710) and §§ 2.105, 2.700, 2.702, 2.711, 2.714a, 1.717, and 2.721 of the Commission's Regulations, all amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and requests for hearing and to conduct the proceeding in the event that a hearing is ordered.

Public Service Company of Indiana, Inc.

Wabash Valley Power Association, Inc.

Marble Hill Nuclear Generating Station, Units 1 and 2

Construction Permit Nos. CPPR-170 and CPPR-171

This Board is being constituted pursuant to a notice published by the Commission on March 25, 1983 in the Federal Register (48 FR 12806-09) entitled, "Public Service Company of Indiana, Inc. and Wabash Valley Power Association, Inc. (Marble Hill Nuclear Generating Station, Units 1 and 2); Receipt of Application for Facility Operating Licenses; Availability of Applicants' Environmental Report; Consideration of Issuance of Facility Operating Licenses; and Opportunity for Hearing."

The Board is comprised of the following administrative judges:

Ivan W. Smith, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Mr. Gustave A. Linenberger, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Dr. Oscar H. Paris, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Issued at Bethesda, Maryland this 26th day of April 1983.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[Docket Nos. 50-280 and 50-281]

Virginia Electric and Power Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 88 to Facility Operating License No. DPR-32 and Amendment No. 86 to Facility Operating License No. DPR-37 issued to Virginia Electric and Power Company (the licensee), which revised Technical Specifications for operation of the Surry Power Station, Unit Nos. 1 and 2, respectively, (the facilities), located in Surry County, Virginia. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications to change the schedule requirements for functional testing of the 50 KIPS and above category snubbers. The functional testing is rescheduled when an engineering evaluation determines the failure mode to be non-generic.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice was not required since these amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated March 8, 1983, (2) Amendment Nos. 88 and 88 to License Nos. DPR-32 and DPR-37, and (3) the Commissions related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Swem Library, College of William and Mary, Williamsburg, Virginia 23185. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of April, 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 22920; (70-6858)]

Arkansas Power Light Co.; Proposed Issuance and Sale of First Mortgage Bonds

April 25, 1983.

Arkansas Power & Light Company ("AP&L"), (First National Building, Little Rock, Arkansas 72201), an electric utility subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application with this Commission pursuant to Section 6(b) of the Public Utility Holding Company Act of 1935 ("ACT") and Rule 50 promulgated thersunder.

AP&L proposes to issue and sell at competitive bidding not more than $100 million in principal amount of its first mortgage bonds ("Bonds") to be issued in one or more series from time to time through May 31, 1984. The interest rate of each series of the Bonds will be a multiple of ⅛ of 1%. The price, exclusive of accrued interest, specified by AP&L in soliciting bids shall be in a range of not more than 5 percentage points, but shall not exceed 5 percentage points above or below 100% of the principal amount of the Bonds. The Bonds will be issued under a supplemental indenture to AP&L's Mortgage and Deed of Trust. Each series of Bonds will mature on a date from five to thirty years from date of issuance. The supplemental indenture will prohibit, for not more than five years, the refunding of the Bonds, directly or indirectly, with funds borrowed at a lower effective interest cost than the respective series of Bonds.

AP&L will issue and sell the Bonds by competitive bidding using alternative procedures authorized in the Commission's Statement of Policy Concerning Application of Rule 50 (HCAR No. 22623; September 2, 1982).

The application and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 19, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above. Proof of

service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application, as filed or as it may be amended, may be granted.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13184; (812-5405)(812-5406)]

Templeton Funds, Inc., et al.; Filing of Application

April 22, 1983.

In the Matter of Templeton Funds, Inc. (formerly, Templeton World Fund, Inc.), 405 Central Avenue, P.O. Box 3942, St. Petersburg, Florida 33731; Templeton Growth Fund, Ltd., 44 Victoria Street, Suite 800, Toronto, Ontario M5C 1Y2; and Securities Fund Investors, Inc., 405 Central Avenue, P.O. Box 3942, St. Petersburg, Florida 33731.

Notice is hereby given that Templeton Funds, Inc. (formerly named, "Templeton World Fund, Inc.")(hereinafter referred to as "Templeton Funds"), a Maryland corporation registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management company; Templeton Growth Fund, Ltd., ("Growth Fund"), a Canadian corporation registered as an open-end, diversified management investment company under the Act; and Securities Fund Investors, Inc. ("SFI"), the principal underwriter for Growth Fund and Templeton Funds (Templeton Funds, Growth Fund, and SFI are hereinafter referred to collectively as "Applicants"), filed applications on December 21, 1982 requesting that the Commission issue an order amending, thereby affirming and clarifying, certain orders which the Commission issued in 1978 which have permitted, respectively, Templeton Funds to offer its shares for certain shares of The Reserve Fund, Inc. ("Reserve"), and Growth Fund and Templeton Funds each to offer its shares in exchange for shares of the other, all such exchanges to be effectuated on the basis of the relative net asset values of the securities so exchanged, with the addition of a $5.00 exchange fee. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that on March 22, 1978, the Commission issued an order [Investment Company Act Release No. 10172] pursuant to Section 11(a) of the Act which permitted shareholders of Templeton Funds [then operating under the name of "Templeton World Fund, Inc."] to exchange their shares for shares of Reserve on the basis of the relative net asset values of the shares at the time of the exchange, subject to a $5.00 service charge, and, pursuant to Section 6(c) of the Act, exempted Templeton Funds and SFI from the provisions of Section 22(d) of the Act to permit the sale of shares of Templeton Funds in accordance with such no-load exchange privilege. Applicants further state that on September 30, 1982, shareholders of Templeton Funds approved Articles of Amendment to the fund's Articles of Incorporation, changing the name of the company from "Templeton World Fund, Inc." to "Templeton Funds, Inc.", and authorizing the fund's board of directors to reclassify the common shares of the fund into separate classes having separate portfolios and investment policies so as to constitute Templeton Funds a "series" investment company. Applicants further represent that the Articles of Amendment were duly filed in the State Department of Assessments of Maryland and that, by appropriate action of the board of directors, all of the previously outstanding shares of the company, plus additional authorized shares, were classified as "Templeton World Fund" (hereinafter referred to as "World Fund"), being in all respects a continuation of the former Templeton World Fund, Inc. In addition, it is stated, a new series of shares was classified and authorized for issue as "Templeton Foreign Fund" (hereinafter referred to as "Foreign Fund").

Applicants further state that the investment policy and investment restrictions of World Fund provide for investment in stock and debt obligations of companies and governments of any nation with the objective of long-term capital growth. Foreign Fund, Applicants state, has substantially the same investment policy and restrictions as World Fund, except that its policy excludes investments in United States companies for other than "defensive" purposes. It is further stated that the two classes of Templeton Funds have affiliated investment managers, owned and operated under the direction of John M. Templeton, Director and President of Templeton Funds and Growth Fund, and that they have the same principal underwriter (SFI), the same custodian (Bank of New England), and the same transfer agent (Securities Fund Services, Inc.).

Applicants represent that SFI, as principal underwriter, maintains a continuous public offering of the shares of World Fund and Foreign Fund at their net asset value plus a sales charge. On purchases of less than 10,000, it is stated, the maximum sales charge for shares of each of the funds is 8.5% of the public offering price, with the sales charge reduced on larger purchases at the same breakpoints for each series. Applicants state that there is no sales charge imposed on the reinvestment of dividends and capital gains from shares of World Fund or Foreign Fund.

Under the exchange privilege which Templeton Funds presently offers, Applicants state, shares of either series of the company—shares of World Fund or of Foreign Fund—may be exchanged for shares of Reserve without sales charge, on the basis of their relative net asset values at the time of exchange, subject to a $5.00 fee payable to Securities Fund Services, Inc. Applicants' purpose in filing the instant application is to obtain a Commission order extending the application and effect of the order of March 22, 1978 to the privilege Templeton Funds now offers to investors in World Fund and Foreign Fund to exchange their interests for shares of Reserve without the payment of additional sales charge.

Applicants submit that all of the material facts upon which the Commission's order of March 22, 1978 was based remain in existence, and should apply to the same extent with respect to Templeton Funds in its present form as a series company. Applicants further represent that the same facts and conditions would continue to apply with regard to any such additional classes of Templeton Funds shares as the board of directors of that company may in the future decide to authorize. Accordingly, Applicants assert that a continuation of the order of March 22, 1978 with respect to World Fund and Foreign Fund and to any future classes of shares of Templeton Funds is appropriate, and that the issuance of an order amending the prior order to affirm its continuing effectiveness with regard to Templeton Funds is in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants also request that the Commission issue an order amending its

order of April 6, 1978 (Investment Company Act Release No. 10192), pursuant to which shareholders of Growth Fund have been permitted to exchange their shares for shares of Templeton Funds (formerly named "Templeton World Fund, Inc.") and shareholders of Templeton Funds have been permitted to exchange their holdings for shares of Growth Fund. As described above, on September 29, 1982 Templeton World Fund, Inc. became "Templeton Funds, Inc.", a series fund having two separate classes of common shares, i.e., World Fund and Foreign Fund.

Pursuant to the exchange privilege presently offered by Templeton Funds, shares of either series of the company—i.e., shares of World Fund or shares of Foreign Fund—may be exchanged for shares of the other, or for shares of Growth Fund on the basis of their relative net asset values at the time of exchange, without sales charge but subject to a $5.00 fee payable to Securities Fund Services, Inc. as transfer agent. Applicants express purpose in filing the instant application is to obtain an order of the Commission amending the order of April 6, 1978 to extend the application and effect of the prior order to the no-load exchange privilege currently being offered by Templeton Funds, and to make such exemptive relief applicable with respect to any future series or class of shares that Templeton Funds may hereafter authorize and issue.

Applicants represent that Growth Fund and World Fund have substantially the same investment policy and investment restrictions, namely, a flexible policy of investing in stock and debt obligations of companies and governments of any nation with the objective of long-term capital growth. Foreign Fund, it is stated, has substantially the same investment policy and restrictions, except that its policy excludes investments in United States companies for other than "defensive" purposes. Applicants also state that the two classes of Templeton Funds have affiliated investment managers that are owned by and operated under the direction of John M. Templeton, Director and President of Templeton Funds and Growth Fund, and that they have the same principal underwriter, SFI, and the same custodian, Bank of New England. It is also stated that the shares of all United States shareholders of Growth Fund, and all shares of World Fund and Foreign Fund, have the same transfer agent, i.e., Securities Fund Services, Inc.

Applicants further state that SFI, as principal underwriter, maintains a continuous public offering of the shares of Growth Fund, World Fund and Foreign Fund at their net asset value plus a sales charge. On purchases of less than $10,000, it is stated, the maximum sales charge for shares of each of the funds is 8.5% of the public offering price, with the sales charge reduced on larger purchases at the same breakpoints for each fund. Applicants state that there is no sales charge imposed on the reinvestment of dividends and capital gains from shares of Growth Fund, World Fund, or Foreign Fund.

Lastly, Applicants submit that all of the material facts upon which the order of April 6, 1978, was granted remain in existence, and should provide a basis upon which the amended order sought herein can be issued, applying in all respects to Templeton Funds in its present status as a series fund, and to World Fund and Foreign Fund as separate classes thereof. Applicants represent, in addition that the same facts and conditions will continue to apply to the same extent with respect to any future series or classes of Templeton Funds which hereafter may be authorized. Thus, Applicants assert that the extension of the Commission's order of April 6, 1978 with respect to the exchange privilege presently available to Templeton Funds shareholders, and which would be offered to investors in any future series of Templeton Funds, is appropriate, and that the issuance of an order amending the existing order to affirm its continuing effectiveness with regard to Templeton Funds is in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 17, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

Agency Clearance Officer—Kenneth Fogash, 202–272–2700. Upon written request copy available from: Securities and Exchange Commission, Office of Consumer Affairs and Information Services, Washington, D.C. 20549.

Amendment

Item 404 of Regulation S–K, No. 270–2.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance final amendments to Item 404 of Regulation S–K under the Securities Act of 1933 and the Securities Exchange Act of 1934, which sets forth requirements with respect to disclosure of management transactions and relationships. The amendments were intended to provide uniform disclosure requirements with respect to registration statements, periodic reports and proxy statements and to streamline and simplify the disclosure of transactions and relationships in a manner consistent with investor protection.

Submit comments to OMB Desk Officer: Robert Veeder, 202–395–4814, Office of Information and Regulatory Affairs, Room 3235, NEOB, Washington, D.C. 20509.

[File No. 500–1]

Great American Financial, Inc.; Suspension of Trading

April 26, 1983.

In the matter of trading in the Securities of; Great American Financial, Inc.; File No. 500–1; Securities Exchange Act of 1934 Section 12(k) Order of Suspension of Trading.

It appearing to the Securities and Exchange Commission that because of recent unusual market activity, possible improper sale of restricted shares and

because of the apparent lack of adequate and accurate financial information relating to the company's valuation of its assets, the protection of investors require a summary suspension of trading in the securities of Great American Financial, Inc.

Therefore, it is ordered, pursuant to Section 12(k) of the Securities Exchange Act of 1934, trading in such securities on a national securities exchange or otherwise is suspended, for the period from 2:00 p.m. on April 26, 1983, through midnight May 5, 1983.

By the Commission.

BILLING CODE 8010-01-M

[Release No. 19700; File No. SR–MSTC–83–3]

Proposed Rule Change by Midwest Securities Trust Company; Notice of Filing and Immediate Effectiveness of

April 25, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 6, 1983, the Midwest Securities Trust Company ("MSTC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this otice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would increase MSTC's fee for the automatic Depository Delivery Instruction ("DDI") service from $50.00 per month to $100.00 per month. MSTC states tht this price increase would bring the fees for the DDI service up to the same level charged by MSTC for other similar services. MSTC believes that the proposal is consistent with Section 17A(b)(3)(D) of the Act in that it provides for the equitable allocation of dues, fees and other changes among its participants.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagaph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–MSTC–83–3.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentined self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–19699; File No. SR–MSRB–83–3]

Self-Regulatory Organizations; Proposed Rule Change; Municipal Securities Rulemaking Board; Relating to Syndicate Practices

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 29, 1983, the Municipal Securities Rulemaking Board filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

(a) The Municipal Securities Rulemaking Board ("Board") is filing herewith certain amendments to rule G–11, on syndicate practices (hereafter referred to as the "proposed rule change"). The text of the proposed rule change is as follows:

Rule G–11 [1] Sales of New Issue Municipal Securities During the Underwriting Period

(a) No change.

(i)-(ix) No change.

(x) *The term "qualified note syndicate" means any syndicate formed for the purpose of purchasing and distributing a new issue of municipal securities that matures in less than two years where:*

(A) the new issue is to be purchased by the syndicate on other than an "all or none" basis; or

(B) the syndicate has provided that:

(1) there is to be no order period;

(2) only group orders will be accepted; and,

(3) the syndicate may purchase and sell the municipal securities for its own account.

(b)-(c) No change.

(d) Disclosure of Group Orders. Every municipal securities dealer that submits a group order to a syndicate or to a member of a syndicate, shall disclose at the time of submission of such order the identity of the person for whom the order is submitted. *This section shall not apply to a qualified note syndicate as defined in paragraph (a)(x) above.*

(e)-(f) No change.

(g) No change.

(i) No change.

(ii) the identity of each person submitting a group order to which securities have been allocated as well as the aggregate par value and maturity date of each maturity allocated *except that this paragraph shall not apply to the senior syndicate manager of a qualified not syndicate as defined in paragraph (a)(x) above;* and

(iii) No change.

(h) No change.

(i) No change.

(ii) a summary statement showing the aggregate par values and prices (expressed in terms of dollar prices or yields) of all securities sold from the syndicate account. *This paragraph shall not apply to a qualified note syndicate as defined in paragraph (a)(x) above.*

II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of, and Statutory Basis for, the Proposed Rule Change

(1) Rule G–11 governs activities of underwriters in connection with sales of new issue municipal securities during the underwriting period. While the rule

[1] Italics indicate new language; [brackets] indicate deletions.

VOL
48
ISS
86
MY
3
1983
UMI

accords syndicate members great flexibility in structuring their syndicate agreements and practices, the rule does place certain requirements on underwriting syndicates. Generally, the rule requires syndicates to establish different categories of orders and to make certain disclosures within the syndicate to assure that allocations are made in accordance with those priorities. The rule also requires a syndicate manager to make an accounting of syndicate expenses and allocations of securities at final settlement of the syndicate account.

The Board recently examined the application of rule G–11 to tax-exempt notes and has determined that certain disclosure requirements, as noted below, should not be required of note syndicates that meet the definition of a "qualified note syndicate." A "qualified note syndicate" as defined by the proposed rule change is one formed to distribute municipal securities that mature in less than two years. In addition to the new issue either must be purchased on an other than all or none basis, *or* the syndicate's agreement must provide that there is to be on order period, that only group orders will be accepted and that the syndicate may purchase and sell the municipal securities for its own account. The Board has concluded that syndicates meeting these criteria are inherently different from other syndicates formed to distribute new issue municipal securities and are more analogous to secondary market trading accounts which are not subject to rule G–11. It further concluded that due to the relatively small number of note dealers and other special features of the new issue note market certain disclosures were not appropriate and were unduly burdensome.[2]

[2] These features include the fact that prices in the note market tend to be more sensitive to Treasury bill, money market, and federal funds rates than they are to price changes in the municipal bond market, and, as a result, prices in the note market fluctuate constantly. In addition, the methods of distributing new issue municipal notes can differ substantially from their bond counterparts. Note syndicates tend to be smaller than bond syndicatesin terms of the number of underwriters and typically are composed of one to three dealers. Note issues usually are not sold by the issuer on an "all or none" basis, and several different syndicates each may purchase portions of a new issue. These syndicates frequently run "two-way" or "trading accounts," that is, the syndicate will purchase notes in the secondary market and resell them at the same time is is distributing the newly-issued notes. For example, one syndicate might swap maturities with another syndicate in order to accommodate a customer. Moreover, note prices frequently will fluctuate within a syndicate.

In addition, newly-issued notes often are sold on a "first-come, first-served" basis and order periods may not be utilized.

The proposed rule change would exempt qualified note syndicate from the provisions of rule G–11 (d) and (g)(ii) which require the disclosure of the identity of customers placing group orders and the allocation of securities to customers who placed group orders. The current requirement that the identity of group orders be disclosed was adopted to assure that syndicates are run in a fair and open manner and, in particular, to minimize any advantage a syndicate manager might obtain over other syndicate members by virtue of its receipt of this information. The Board has concluded that these concerns do not exist in the case of qualified note syndicates since newly-issued notes frequently are not sold on an all or none basis. Such issue typically is sold to several syndicates and is resold to the public on a "first-come, first-served" basis; order periods are rarely established, particularly in competitive sales. In other qualified note syndicates all trades are done at group net. In these syndicates, except for presale orders, ordinarily there are no order priorities, and syndicate members do not receive a concession or take down. Nevertheless, compliance with the existing provisions of rule G–11(d) requires the disclosure of the identity of every order. And, under existing rule G–11(g)(ii), a manager must disclose within 10 days from the date of sale the identity of every order to which notes were allocated. The Board believes that since there are no priority concerns, these disclosure requirements do not seem to provide useful information to syndicate members and, therefore, are unduly burdensome.

The proposed rule change also would exempt qualified note syndicates from rule G–11(h)(ii) which requires at or before final settlement, delivery of a summary statement showing the aggregate par values and prices of all securities sold. This provision was intended to augment the requirement in subsection (h)(i) that syndicate expenses be disclosed. The Board has concluded that the proposed exemption is appropriate because in larger note offerings, such as an issue of project notes, the allocation disclosures required by the rule would be difficult to produce, would be many pages long, and would be of little practical value to syndicate members. Even in smaller issues, the required disclosures may be unduly burdensome because the prices at which new issue notes are sold by the syndicate typically are subject to numerous changes over an extended period of time.

(2) The proposed rule change has been adopted under section 15B(b)(2)(K) which provides that the Board shall adopt rules that, among other things,

"Establish the terms and conditions under which any municipal securities dealer may sell, or prohibit any municipal securities dealer from selling, any part of a new issue of municipal securities to a municipal securities investment portfolio during the underwriting period."

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board has concluded that the proposed rule change will impose no burdens on competition since the proposed exemptions would apply only to a discrete category of syndicates that distribute a discrete category of municipal securities, and would apply uniformly within all qualified note syndicates.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The proposed rule change was adopted pursuant to the recommendation of the Board's Advisory Committee on Tax-Exempt Notes.[3] The Board otherwise has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

With in 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

[3] That Committee, which is no longer active, was asked by the Board to report on the application of present Board rules to tax-exempt notes and on industry compliance therewith. The Board also asked for the Committee's recommendations concerning any compliance problems that might be cured by the adjustment of Board rules to better accommodate the mechanics of note trading. Based on that Committee's recommendations, the Board has issued a general notice regarding the applicability of Board rules to tax-exempt notes and has amended rule G–12, on uniform practice, to require acceptance of deliveries of notes in smaller denominations that those specified on the confirmation of the transaction.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 25, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19701; File No. SR-MSRB-82-16, Amendment No. 1]

Self-Regulatory Organizations; Proposed Rule Changes; Municipal Securities Rulemaking Board: Relating to Uniform Practice

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on December 22, 1982, as amended by the filing on March 7, 1983, the Municipal Securities Rulemaking Board filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Changes

(a) The Municipal Securities Rulemaking Board ("Board") is filing herewith certain amendments (the "proposed rule changes") to rule G–12 relating to uniform practice. The proposed rule changes are as follows:

Rule G–12. Uniform Practice.[1]

(a) through (g) No change.

(h) Close-Out. Transactions which have been confirmed or otherwise agreed upon by both parties but which have not been completed may be closed out in accordance with this section, or as otherwise agreed by the parties.

(i) Close-Out by Purchaser. With respect to a transaction which has not been completed by the seller according to its terms and the requirements of this rule, the purchaser may close out the transaction in accordance with the following procedures:

(a) Notice of Close-Out. If the purchaser elects to close out a transaction in accordance with this paragraph (i), the purchaser shall, not earlier than the fifth business day following the settlement date, notify the seller by telephone of the purchaser's intention to close out the transaction. The purchaser shall state that unless the transaction is completed by a specified date and time, which shall not be earlier than the close of the tenth business day following the date the telephonic notice is given (the fifth business day, in the case of a second or subsequent notice), the transaction may be closed out in accordance with this section at any time during the period of time, which shall not be more than five business days, specified by the purchaser for such purpose. The purchaser shall immediately thereafter send, return receipt requested, a written notice of close-out to the seller. Such notice shall contain the information specified in item (1) of subparagraph (C) below [, and shall be accompanied by a copy of the seller's confirmation of the transaction to be closed out or other written evidence of the contract between the parties.]

B. *(1)* Retransmittal. [as in current rule—no substantive change.]

(2) Transfer of Securities. If a selling dealer receiving an initial notice of close-out which has not been retransmitted has submitted the securities owed on the transaction to the registrar or transfer agent for transfer, the selling dealer may, upon notice to the purchaser, extend the dates for close-out by ten business days. The selling dealer must provide such notice by telephone, not later than the first businesd day following its receipt of the telephone notice of close-out, and must immediately thereafter send, return receipt requested, a written confirmation of such notice, stating the dates for close-out as extended due to such notice. The provisions of this item (2) of subparagraph (B) shall not apply to any notice of close-out initiated on or after January 1, 1985.

(C) and (D) No change.

(E) Close-Out Not Completed. If a close-out pursuant to a notice of close-out is not completed in accordance with the terms of the notice and the provisions of this rule, the notice shall expire. Additional close-out notices may be issued, provided that a close-out procedure with respect to a transaction may not be initiated later than the ninetieth business day following the settlement date of such transaction, regardless of the number of close-out notices issued. *Notwithstanding the foregoing, in the case of a transaction on which a delivery of securities has been reclaimed pursuant to the provisions of subparagraphs (g)(iii)(C) or (g)(iii)(D) of this rule and which remains uncompleted, the purchaser may initiate one or more close-out procedures with respect to such transaction at any time during a period of fifteen business days following the date of reclamation. The first such procedure shall be considered an initial procedure for purposes of subparagraph (A) above.*

(F) and (G) No change.

(i) through (l) No change.

[1] Italics indicate new language; [brackets] indicate deletion.

II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Changes

A. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Changes

(a) The Municipal Securities Rulemaking Board has recently received suggestions from members of the municipal securities industry as to several improvements in the application of the close-out provisions of rule G–12(h) to special circumstances; the proposed rule changes would amend the rule in accordance with certain of these suggestions. The proposed rule changes would also amend the rule to reflect the likely increase in the number of transfer items and related fails that may result from the impending requirement for issuance of most new issue municipal securities in registered form.

The specific provisions of the proposed rule changes are as follows:

1. *The proposed rule changes would permit the initiation of a close-out procedure on certain transactions reclaimed after the ninetieth business*

day following the original settlement date.

The Board is aware that, in certain instances in the past, the availability of the close-out procedure would have promoted more expeditious resolution of reclaimed transactions. Accordingly, the proposed rule changes would make the close-out procedure available, for a short period of time, in the event that a transaction is reopened due to a reclamation of securities, for certain specified reasons, after the ninetieth business day following the settlement date (the last date on which the rule would otherwise permit initiation of a close-out). The proposed rule changes would permit the purchaser to initiate one or more close-out procedures with respect to such a transaction, in accordance with the provisions of the rule, for a period of fifteen business days following the date of reclamation.

2. *The proposed rule changes would delete the requirement that a copy of the contra-dealer's confirmation be attached to close-out notices.*

The Board is of the view that this requirement is no longer necessary. Since the relevant information regarding the transaction is required to be specified on the written close-out notice, and since a dealer receiving a telephone notice of close-out must proceed based on such telephone notice, not awaiting receipt of the written notice, the requirement to attach the contra-confirmation to the written notice no longer appears to provide significant assistance in identifying the related transactions to the dealer receiving the notice.

3. *The proposed rule changes would permit the selling dealer receiving a close-out notice which it does not retransmit to obtain an extension of time if the securities owed on the transaction are in transfer.*

In August 1982 the Congress passed, as part of the Tax Equity and Financial Responsibility Act of 1982, a requirement that most new issues of municipal securities issued after December 31, 1982 must be made available solely in registered form; recent Congressional action defers the effectiveness of this requirement to June 30, 1983. As a result of this requirement an increasing number of transactions will involve registered securities, and dealers will be required to submit securities for transfer more frequently. Delays in the transfer process may become a more significant factor affecting the municipal clearance process, and more close-out procedures may be initiated on transactions on which the failure to deliver is caused by the need to transfer the securities. The Board therefore believes that it may be appropriate to alter the close-out process to take into account this substantial change in the manner in which the industry will be clearing securities and to provide additional time to permit the transfer process to be accomplished.

Accordingly, the proposed rule changes would provide that, if the selling dealer receiving an initial notice of close-out from the originating purchaser has submitted the securities which it is failing to deliver to be transferred, the selling dealer may delay the delivery deadline and the execution period specified on the notice for ten business days by advising the purchaser of the reason for its failure to deliver. The selling dealer must advise the purchaser of the reason for its failure to deliver by telephone not later than the close of business on the business day following its receipt of the telephone notice of close-out from the purchaser; the selling dealer must confirm this notice in writing, sent return receipt requested not later than the following business day, including in such notice a statement of the dates of the new delivery deadline and the new execution period, as extended by the seller's action. This time extension, however, would be available only to the selling dealer first receiving the notice of close-out from the originating purchaser. If the notice of close-out is retransmitted to another dealer, and this third dealer is the party which has submitted the securities for transfer, the third dealer would not be able to invoke an additional time extension attributable to the fact that the securities are being transferred.

The proposed rule changes provide that this time extension for securities in transfer shall be available only on close-outs initiated prior to January 1, 1985. The Board believes that, as more efficient transfer mechanisms become available on a wider range of municipal issues, there will be less need for additional time on a close-out procedure.

(b) The proposed rule changes have been adopted pursuant to section 15B(b)(2)(C) of the Securities Exchange Act of 1934, as amended, which authorizes and directs the Board to adopt rules which are:

"Designed * * * to foster cooperation and coordination with persons engaged in * * * clearing, settling, processing information with respect to, and facilitating transactions in municipal securities * * * and, in general, to protect investors and the public interest * * *."

The Board is of the view that the proposed rule changes will facilitate the settlement of reclaimed transactions, permit more efficient use of the close-out procedure, and protect the public interest by providing for an appropriate period of time to complete transfer processes.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board believes that the proposed rule changes will have no effect on competition inasmuch as they make certain technical and procedural changes to the closeout provisions that apply equally to all municipal securities brokers and dealers.

C. Self-Regulatory Organization's Statement of Comments on the Proposed Rule Changes Received from Members, Participants, or Others

On September 29, 1982 the Board released an exposure draft of several amendments to rule G–12(h), including amendments substantially similar to the proposed rule changes; the Board received seven letters of comment on the exposure draft.

The letters were generally supportive of the concepts reflected in the proposed rule changes. Certain of the commentators expressed the view that certain time periods were too short; the Board has addressed part of their concern in the proposed rule changes, and believes that any remaining concern may be attributable to misunderstanding of the manner in which the time periods would function.

With respect to the extension of time for securities in transfer, several commentators expressed the view that such an extension of time should also be available in the event that the close-out notice was retransmitted. While the Board is not unsympathetic to these commentators' concerns, the Board believes that making the extension also available in the event of a retransmittal would significantly hamper the efficient handling of a closeout procedure by including complicated requirements for determining such time extensions and notifying all parties to the retransmittal of changes in dates.

On balance, the Board believes that it is necessary to preserve a relatively simple and efficient close-out procedure, and not to complicate the procedure to provide for an extension for transfer on retransmitted notices.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule changes, or

(B) Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 25, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2078; Amdt. #6]

California; Declaration of Disaster Loan Area

The above numbered Declaration (48 FR 8167), Amendment #1 (48 FR 9810), Amendment #2 (48 FR 12881), Amendment #3 (48 FR 15207), Amendment #4 (48 FR 16565), and Amendment #5 (48 FR 18989) are amended to include the County of San Joaquin and the adjacent Counties of Yuba, Sacramento and Fresno to the previously declared disaster area in the State of California as a result of damage caused by severe storms, high tides, wave action, mudslides and flooding beginning on January 21, 1983. All other information remains the same, i.e., the termination date for filing applications for physical damage is close of business on April 11, 1983, and for economic injury until the close of business on November 9, 1983.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008)

Dated: April 1, 1983.

Heriberto Herrera,

Acting Administrator.

BILLING CODE 8025-01-M

[Declaration of Disaster Loan Area #081]

Louisiana; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration, I find that the Parishes of Ascension, East Baton Rouge, East Feliciana, Jefferson, Livingston, Orleans, Pointe Coupee, St. Bernard, St. Tammany, Tangipahoa and Washington, Louisiana, constitute a disaster area because of damage resulting from severe storms and flooding beginning on April 1, 1983. Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on June 20, 1983, and for economic injury until the close of business on January 20, 1984, at: U.S. Small Business Administration, Ford-Fisk Building, 1661 Canal Street, 2nd Floor, New Orleans, Louisiana 70112, or other locally announced locations.

Interest rates for applicants filing for assistance under this declaration are as follows:

Homeowners with credit available elsewhere—11½%

Homeowners without credit available elsewhere—5⅜%

Businesses with credit available elsewhere—10½%

Businesses without credit available elsewhere—8%

Businesses (EIDL) without credit available elsewhere—8%

Other (non-profit organizations including charitable and religious organizations)—11⅜%

It should be noted that assistance for agricultural enterprises is the primary responsibility of the Farmers Home Administration as specified in Pub. L. 96–302.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008).

Dated: April 25, 1983

James C. Sanders,

Administrator.

BILLING CODE 8025-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Request for Public Comments; Certain Silica-Coated Lead Chromate Pigments

The United States International Trade Commission (the Commission) has determined that there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, and in the sale, of certain silica-coated lead chromate pigments that were found to infringe the claims of U.S. Letters Patent 3,639,133, causing substantial injury to an efficiently and economically operated U.S. industry. The Commission ordered the product involved, when produced by those found to be in violation of section 337, excluded from entry into the United States.

Under section 337(g), the President may disapprove the determination of the Commission for policy reasons within sixty days following receipt of the determination and record. Disapproval by the President would cause the determination, and any order issued under its authority, to be without force or effect. The President also may approve the determination, making the determination, and any order issued under its authority, final on the date the Commission receives notice. The determination, and any related order, will become final automatically following the sixty day review period if the President has not disapproved it.

Interested parties are invited to submit comments concerning foreign or domestic policy issues that should be considered by the President in making his decision regarding the case. Parties submitting comments regarding domestic policy issues should refer to the portion of the Commission record in which information or comment concerning that issue was presented. If no presentation of the domestic policy issue being raised was made to the Commission, the party submitting the comment should include the reason for the lack of such presentation. The Trade Representative will be reluctant to

review comments concerning domestic policy issues not addressed in the record developed before the Commission. Interested parties need not refer to the Commission record in comments based upon foreign policy issues.

Comments submitted should not exceed 15 letter-sized pages, including attachments. The original and 19 copies of the submission must be delivered by the close of business, Friday, May 20, 1983, to the Secretary, Trade Policy Staff Committee, 600 17th Street, NW., Washington, D.C. 20506. Copies of comments received will be made available upon request and additional comments will be accepted through the close of business, Friday, May 27, 1983. For further information, call Alice Zalik (202) 395-3432.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190-01-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular, Public Debt Series—No. 12-83]

Treasury Notes of May 15, 1986; Series M-1986

April 28, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $6,500,000,000 of United States securities, designated Treasury Notes of May 15, 1986, Series M-1986 (CUSIP No. 912827 PL 0). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated May 16, 1983, and will bear interest from that date, payable on a semiannual basis on November 15, 1983, and each subsequent 6 months on May 15 and November 15 until the principal becomes payable. They will mature May 15, 1986, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered-or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Tuesday, May 3, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, May 2, 1983, and received no later than Monday, May 16, 1983.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal reserve banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average a yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determination of the Secretary of the Treasury shall be final. If the amount of non-competitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject a any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Monday, May 16, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Thursday, May 12, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Cassie J. Dixon,

Fiscal Assistant Secretary.

[FR Doc. 83-11280 Filed 5-2-83; 8:45 am]

BILLING CODE 4810-40-M

[Department Circular Public Debt Series—No. 13-83]

Treasury Notes of May 15, 1993; Series B-1993

April 28, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $4,750,000,000 of United States securities, designated Treasury Notes of May 15, 1993, Series B-1993 (CUSIP No. 912827 PM 8). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be dated May 16, 1983, and will bear interest from that date, payable on a semiannual basis on November 15, 1983, and each subsequent 6 months on May 15 and November 15 until the principal becomes payable. They will mature May 15, 1993, and will not be subject to call for redemption prior to maturity. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

VOL
48
ISS

UMI

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Wednesday, May 4, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, May 3, 1983, and received no later than Monday, May 16, 1983.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commercial bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, on the basis of a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 97.750. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, or allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Monday, May 16, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Thursday, May 12, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2 In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this cirular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Carole J. Dineen,

Fiscal Assistant Secretary.

[FR Doc. 83-11909 Filed 4-29-83; 3:00 pm]

BILLING CODE 4810-40-M

[Department Circular, Public Debt Series—No. 14-83]

10¾ Percent Treasury Bonds of 2007-2012

April 28, 1983.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $3,750,000,000 of United States Securities, designated 10¾% Treasury Bonds of 2007–2012 (CUSIP No 912810 DB 1). The securities will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the new securities may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The securities will be issued May 16, 1983, and are offered as an additional amount of 10¾% Treasury Bonds of 2007–2012 (CUSIP No. 912810 DB 1) dated November 15, 1982. Payment for the securities will be based on the price equivalent to the bid yield determined in accordance with this circular, plus accrued interest from May 15, 1983, to May 16, 1983. Interest on the securities offered as an additional issue is payable on a semiannual basis on November 15, 1983, and each subsequent 6 months on May 15 and November 15 until the principal becomes payable. They will mature November 15, 2012, but may be redeemed at the option of the United States on and after November 15, 2007, in whole or in part, at par and accrued interest on any interest payment date or dates, on 4 months' notice of call given in such manner as the Secretary of the Treasury shall prescribe. In case of partial call, the securities to be redeemed will be determine by such method as may be prescribed by the Secretary of the Treasury. Interest on the securities called for redemption shall cease on the date of redemption specified in the notice of call. In the event an interest payment date or the maturity date is a Saturday, Sunday, or other nonbusiness day, the interest or principal is payable on the next-succeeding business day.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Securities registered as to principal and interest will be issued in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of registered and book-entry securities, and the transfer of registered securities will be permitted. Bearer securities will not be available, and the interchange of registered or book-entry securities for bearer securities will not be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Daylight Saving time, Thursday, May 5, 1983. Noncompetitive tenders as defined below will be considered timely if postmarked no late than Wednesday, May 4, 1983, and received no later than Monday, May 16, 1983.

3.2. The face amount of securities bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender, and the amount may not exceed $1,000,000.

3.3. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.4. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and

1983
UMI

loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by full payment for the amount of securities applied for (in the form of cash, maturing Treasury securities, or readily collectible checks), or by a payment guarantee of 5 percent of the face amount applied for, from a commerical bank or a primary dealer.

3.5. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Competitive tenders at yields higher than 11.22% will not be accepted, because the equivalent prices would fall below the original issue discount limit of 92.750. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.6. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for allotted securities must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted, and must include accrued interest from May 15, 1983, to May 16, 1983, in the amount of $.28193 per $1,000 of securities allotted. Settlement on securities allotted to institutional investors and to others whose tenders are accompanied by a payment guarantee as provided in Section 3.4., must be made or completed on or before Monday, May 16, 1983. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Thursday, May 12, 1983. When payment has been submitted with the tender and the purchase price of allotted securities is over par, settlement for the premium must be completed timely, as specified in the preceding sentence. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer identifying number)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, and to receive payment for and make delivery of securities on full-paid allotments.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

Carole J. Dineen,

Fiscal Assistant Secretary.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459) and Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), I hereby determine that the objects in the exhibit, "Lucas Van Leyden and His Contemporaries" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to a loan agreement between the foreign lenders and the National Gallery of Art. I also determine that the temporary exhibition or display of the listed exhibit objects at the National Gallery of Art, beginning on or about June 5, 1983, to on or about August 14, 1983; and at the Museum of Fine Arts, Boston, Massachusetts, beginning on or about September 14, 1983, to on or about November 20, 1983, is in the national interest.

Public notice of this determination is ordered to be published in the Federal Register.

Dated: April 29, 1983.

Jonathan W. Sloat,

General Counsel and Congressional Liaison, United States Information Agency.

[FR Doc. 83-11805 Filed 5-2-83; 8:45 am]

BILLING CODE 8230-01-M

VETERANS ADMINISTRATION

Advisory Committee on Health-Related Effects of Herbicides; Renewal

This is to give notice in accordance with the Federal Advisory Committee Act (Pub. L. 92-463) of October 6, 1972, that the Advisory Committee on Health-Related Effects of Herbicides has been renewed by the Administrator of Veterans Affairs for a two year period beginning April 20, 1983 through April 20, 1985.

Dated: April 27, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

BILLING CODE 8320-01-M

Career Development Committee; Availability of Annual Report

Under section 10(d) of Pub. L. 92-4363 (Federal Advisory Committee Act) and OMB Circular A-63 of March 27, 1974, notice is hereby given that the Annual Report for the calendar year 1981 has been issued for the Veterans Administration, Medical Research Service, Career Development Committee.

The report summarizes the activities of the committee on matters related to the review and evaluation of Career Development applications. It is available for public inspection at two locations:

Library of Congress, Serial and Government Publications, Reading Room LM 133, Madison Building, Washington, D.C. 20540,

and

Veterans Administration, Medical Research Service, Career Development Program, Room 757, 810 Vermont Avenue NW., Washington, D.C. 20420.

Dated: April 25, 1983.

By Direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

[FR Doc. 83-11709 Filed 5-2-83; 8:45 am]

BILLING CODE 8320-01-M

Cooperative Studies Evaluation Committee; Meeting

The Veterans Administration gives notice under Public Law 92-463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 U.S.C. 4101, will be held in the Thomas Room, Washington Marriott Hotel, 1221 22nd Street, N.W., Washington, D.C. 20037, on June 27, 1983. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects. The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program, on its findings.

The meeting will be open to the public up to the seating capacity of the room from 8 to 8:30 a.m., on June 27, to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. James A. Hagans, Coordinator, Cooperative Studies Evaluation Committee, Veterans Administration Central Office, Washington, DC (202-389-3702), prior to June 17, 1983.

The meeting will be closed from 8:30 a.m. to 4:30 p.m. on June 27, for consideration of specific proposals in accordance with provisions set forth in subsection 10(d) of Pub. L. 92-463, as amended by section 5(c) of Pub. L. 94-409, and subsections (c)(6) and (c)(9)(B) of section 552b, title 5, United States Code. During this portion of the meeting, discussions and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Additionally, premature disclosure of the Committee's recommendations would likely frustrate implementation of final proposed actions.

Dated: April 22, 1983.

By direction of the Administrator.

Rosa Maria Fontanez

Committee Management Officer.

BILLING CODE 8320-01-M

Veterans' Advisory Committee on Rehabilitation; Meeting

The Veterans Administration gives notice that a meeting of the Veterans' Advisory Committee on Rehabilitation, authorized by 38 U.S.C., 1521, will be held in Room 1010 of the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C. 20420, May 25, 1983, at 9 a.m. The purpose of the meeting will be to review the administration of veterans' rehabilitation programs and provide recommendations to the Administrator as the Committee determines appropriate.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity, it will be necessary for those wishing to attend to contact Dr. Carole J. Westerman, Executive Secretary, Veterans' Advisory Committee on Rehabilitation (phone 202-389-2886) prior to May 16, 1983.

Interested persons may attend, appear before, or file statements with the Committee. Statements, if in written form, may be filed before or within 10 days after meeting. Oral statements will be heard at 2:30 p.m. on May 25, 1983.

Dated: April 26, 1983.

By direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

FEDERAL COMMUNICATIONS COMMISSION

Deletion of Agenda Item From April 27th Open Meeting

April 27, 1983.

The following items have been deleted at the request of the Office of Commissioner Jones from the list of agenda items scheduled for consideration at the April 27, 1983 Open Meeting and previously listed in the Commission's Notice of April 20, 1983.

Agenda, Item No., and Subject

Common Carrier—6—*Title:* National Association of Regulatory Utility Commissioners Petition for Declaratory Ruling that State Commissions Have Authority to Require Exchange Carriers to Provide and Maintain Basic Telephone Instruments and Associated Inside Wiring. *Summary:* The Commission will consider whether it is consistent with the *Second Computer Inquiry* for states to require telephone companies to provide customer premises equipment and related installation and maintenance services to their subscribers on a detariffed basis under a specific alternative regulatory scheme proposed by NARUC.

Common Carrier—7—*Title:* Adoption of Rules Relating to the Provision of CPE by the Florida Public Service Commission. *Summary:* In response to a petition for declaratory ruling filed by the Florida Telephone Association, the Commission will consider whether the *Second Computer Inquiry* has preempted the Florida PSC's requirements relating to the provision of customer premises equipment by carriers.

Deletion of Agenda Item From April 27th Closed Meeting

The following item has been deleted at the request of the Office of Commissioner Rivera from the list of agenda items scheduled for consideration at the April 27, 1983 Closed Meeting and previously listed in the Commission's Notice of April 20, 1983.

Agenda, Item No., and Subject

Hearing—4—Application for Review in the TV–8, Inc., Somerset, Kentucky UHF television comparative proceeding (BC Docket Nos. 80–454 and 455).

Issued: April 27, 1983.

William J. Tricarico,
Secretary, Federal Communications Commission.

DEPARTMENT OF ENERGY

Western Area Power Administration

[Rate Order No. WAPA-19]

Colorado River Storage Project; Order Confirming, Approving, and Placing Increased Power and Transmission Rates in Effect on an Interim Basis

AGENCY: Western Area Power Administration, Energy.

ACTION: Notice of Rate Order—Colorado River Storage Project.

SUMMARY: Notice is given of Rate Order No. WAPA-19 of the Assistant Secretary for Conservation and Renewable Energy placing power and transmission rates into effect with the June 1983 billing period on an interim basis for power marketed by the Western Area Power Administration (Western) from the Colorado River Storage Project (CRSP), Arizona, Colorado, New Mexico, Nevada, Utah, and Wyoming.

The wholesale firm power rate consists of a capacity charge of $2.09 per kW-month and an energy charge of 5.0 mills per kWh. At a 58.2-percent seasonal load factor, the composite rate is 9.92 mills per kWh. This is a 2.03 mills per kWh increase over the previous firm power rate. The new firm transmission rate is $10.27 per kW-year, which is a $3.67 per kW-year increase over the previous rate. The nonfirm transmission rate has been increased by 1 mill per kWh to a charge 2 mills per kWh.

The rate order discusses the principal factors leading to the decisions made and responds to the comments, criticisms, and alternatives offered during the public adjustment proceedings.

ADDRESSES: FOR FURTHER INFORMATION CONTACT:

Mr. Albert M. Gabiola, Area Manager, Salt Lake City Area Office, Western Area Power Administration, P.O. Box 11606, Salt Lake City, UT 84148, (801) 524-5493

Mr. Conrad Miller, Chief, Rates and Statistics Branch, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, (303) 231-1535

Mr. Fred Sheap, Office of Power Marketing Coordination, CE-90, Department of Energy, Mail Code 3353, Federal Building, Washington, DC 20461, (202) 633-8338.

SUPPLEMENTARY INFORMATION: By Delegation Order No. 0204-33, effective January 1, 1979 (43 FR 60636, December 28, 1978), the Secretary of Energy delegated to the Assistant Secretary for Resource Applications the authority to develop power and transmission rates, acting by and through the Administrators, and to confirm, approve, and place in effect such rates on an interim basis, and to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. Due to a Department of Energy organizational realignment, Delegation Order No. 0204-33 was amended, effective March 19, 1981 (46 FR 25426, May 7, 1981), to transfer the authority of the Assistant Secretary for Resource Applications to the Assistant Secretary for Conservation and Renewable Energy.

Rate adjustments on the CRSP are conducted consistent with the procedural rules applicable to Western. Final procedures for public participation in general adjustments were published in the **Federal Register** on March 23, 1978 (43 FR 12076), April 5, 1978 (43 FR 14359), and February 7, 1979 (44 FR 7796).

Proceeding on the new rates were initiated in April 1982, with an advance announcement that a power rate adjustment was being considered at a CRSP customer meeting in Salt Lake City, Utah. A **Federal Register** notice (47 FR 46369, October 18, 1982) officially announced the proposed rate adjustments. A public information forum was held on November 16, 1982, in Salt Lake City, Utah; and a public comment forum was held on December 16, 1982, in Salt Lake City, Utah. A 90-day consultation and comment period extended from October 18, 1982, to January 16, 1983. During this period, interested parties consulted with and made comments to Western concerning the proposed rate adjustments.

Customer comments received at the forums and during the consultation and comment period primarily related to the power repayment study (PRS). There were no rate design issues raised. After reviewing and considering the comments received, the records of the forums, and reevaluating the August 1982 PRS, a number of changes were made and a revised PRS prepared in April 1983. The public comments and Western's reevaluation addressed the following major issues:

1. Operation and maintenance (O&M) expense.
2. Repayment of the irrigation allocation of the storage units.
3. Projections of capacity sales.
4. Water depletions.
5. Revenue projections.
6. Stepped rates/participating project costs.
7. Replacement costs.
8. Interest expense.

Comments pertaining to O&M expenses, along with the inclusion of actual FY 1982 data, and the recalculation of the Central Utah Project and Seedskadee Project power revenues were the basis for the revised PRS of April 1983. The new rates will provide the revenues required as determined by this revised PRS. A discussion of the issues is in the rate order.

Therefore, Rate Order No. WAPA-19 confirming and approving increased power and transmission rates on an interim basis is hereby issued, and the rates will be promptly submitted to the FERC for confirmation and approval on a final basis.

Issued in Washington, DC, April 25, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Pursuant to section 302(a) of the Department of Energy (DOE) Organization Act of August 4, 1977 (42 U.S.C. 7101 et seq.), the power marketing functions of the Secretary of the Interior for the Bureau of Reclamation (BuRec) under the Reclamation act of 1902 (43 U.S.C. 372 et seq.), as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Act of 1939 (43 U.S.C. 485th (c)) and acts specifically applicable to the Colorado River Storage Project (CRSP), were transferred to and vested in the Secretary of Energy. By Delegation Order No. 0204-33, effective January 1, 1979, as amended March 19, 1981 (46 FR 25426, May 7, 1981), the Secretary of Energy delegated to the Assistant Secretary for Conservation and Renewable Energy, the authority to develop power and transmission rates, acting by and through the Administrator of the Western Area Power Administration (Western), and to confirm, approve, and place in effect such rates on an interim basis, and delegated to the Federal Energy Regulatory Commission (FERC) the authority to confirm and approve on a final basis or to disapprove rates developed by the Assistant Secretary under the delegation. This rate order is issued pursuant to the delegation to the Assistant Secretary and the rate adjustment procedures at 45 FR 86983 (December 31, 1980) as corrected at 46 FR 6864 (January 22, 1981) and amended at 46 FR 25426 (May 7, 1981).

Background

Existing and Increased Rates

The increased rates which are the subject of this order supersede the existing rates as follows:

	Existing rates	Increased rates
Firm Power		
Demand charge $/kW-month	1.955	2.09
Energy charge mills/kWh	4.00	5.00
Composite rate @58.2 percent seasonal load factor-mills/kWh	7.89	9.92
Effective date	Jan. 23, 1981	June 1983 billing period.
Rate schedule	SP-PF1	SP-PF2.
Peaking Power		
$/kW-month	1.955	2.09
Effective date	Jan. 23, 1981	June 1983 billing period.
Rate schedule	SP-PP1	SP-PP2.
Firm Transmission		
$/kW year	6.60	10.27.
Effective date	May 1974	June 1983 billing period.
Rate schedule		SP-FT1.
Nonfirm Transmission		
Mills/kWh	1.00	2.00
Effective date	October 1985	June 1983 billing period.
Rate schedule		SP-NFT1.

Project History

On April 11, 1956, the CRSP, including some participating projects, were authorized by Pub. L. 84-485. Subsequently, 10 additional participating projects have been authorized. By means of the four authorized storage units, the flow of the Colorado River is regulated in such a way that irrigation, municipal, industrial, and other water use developments in the Upper Colorado River Basin can be made while still maintaining water flows into the lower basin as required by the Colorado River Compact. Facilities have also been provided at the storage units for flood control, for recreation, and for other beneficial purposes. In order to maximize the use of water and to obtain revenues to assist in the repayment of the irrigation developments, power generating plants have been installed at three of the four storage units. A power generating plant has been installed on one of the participating projects, and generating plants will be included on other participating projects where such developments are found to be feasible. The table below lists the existing powerplants with their nameplate capacities and dates of initial service.

	Nameplate capacity MW	Inservice date
CRSP:		
Glen Canyon	1021	Sept. 1964.
Flaming Gorge Powerplant	108	Nov. 1963.
Wayne N. Aspinall unit:		
Blue Mesa Powerplant	90	Sept. 1967.
Morrow Point Powerplant	120	Dec. 1970.
Crystal Powerplant	28	Aug. 1978.
Subtotal	1,367	
Participating Projects:		
Seedskadee Project—Fontenelle Powerplant	10	May 1969.
Total	1,347	

Transmission facilities include a high-voltage transmission grid to deliver power to wheeling agents and to established delivery points in the market area, to provide interconnections among the plants of the CRSP units and participating projects, and to interconnect with other existing Federal and utility systems within the market area.

Power Repayment Studies

A power repayment study (PRS) for the CRSP storage units and authorized participating projects is prepared annually by Western with the cooperation of the BuRec to ensure that revenues will be adequate to repay costs. Basic river basin hydrology, water depletions, power generation, and project development data are provided by the BuRec. A PRS is prepared in accordance with CRSP authorizing legislation, the Reclamation Project Act of 1939, other applicable statutes, and with DOE Order No. RA 6120.2 on power marketing administration financial reporting.

The studies array historic income, expense, and investment to be repaid from power revenues, along with estimates for future years, and schedule the annual repayment of power production and transmission costs of a power system, as well as nonpower costs assigned to power for repayment, through the application of revenues over the repayment period of the project. The studies show, among other items, estimated revenues and expenses year-by-year over the remainder of the study period, the estimated amount of Federal investment repaid during each year, and the total estimated amount of Federal investment remaining to be repaid at the end of each year. The studies determine revenue requirements but do not deal with rate design.

Western is required to transmit and dispose of CRSP power and energy in such a manner as to encourage the most widespread use thereof at the lowest possible rates consistent with sound business principles. This rate increase is consistent with that requirement.

Public Notice and Comments

Published "Procedures for Public Participation in Power and Transmission Rate Adjustments" for power marketed by Western and other power marketing administrations have been followed in the development of this rate. The following discussion summarizes the steps Western took to assure involvement of interested parties in the rate process.

1. On April 30, 1982, an advance announcement was made at a CRSP customer meeting in Salt Lake City, Utah, that a power rate adjustment was being considered, and that a preliminary study indicated the firm power rate would need to be increased from the present composite rate of 7.89 to about 10 mills per kWh at 58.2 percent seasonal load factor.

2. A **Federal Register** notice (47 FR 46369, October 18, 1982) announced the proposed power and transmission rate adjustments and the public information and comment forums.

3. A press release was issued on October 18, 1982, announcing the proposed rate adjustments and the public information and comment forums.

4. Letters were sent to customers and other interested parties which announced the proposed rate adjustments and forums and transmitted copies of the rate brochure dated October 1982; the October 18, 1982, press release; and the October 19, 1982, **Federal Register** notice.

5. A public information forum was held on November 16, 1982, in Salt Lake City, Utah. Western explained the need for the rate increase and presented the results of the October 1982 PRS upon which proposed rate increases were based. The rates proposed were $2.15/kW-month for firm and peaking capacity and 5 mills/kWh for firm energy. The transmission rates were $10.27/kW-year for firm transmission and 2 mills/kWh for nonfirm transmission service. Questions were answered at this forum or later in writing by the Western and/or BuRec representatives.

6. A public comment forum was held on December 16, 1982, in Salt Lake City, Utah, to allow interested parties an opportunity to comment. Oral and written comments were accepted at this forum. Upon request, Western met with customer representatives during the comment period to answer their questions.

7. Written comments were accepted through the comment period ending January 16, 1983.

After reviewing and considering the comments received, the records of the forums, and reevaluating the October 1982 PRS, a number of changes were made and a revised PRS prepared in April 1983.

Discussion

Most of the issues discussed below relate to the PRS. There were no rate design issues raised during the public comment period. The issues that resulted in PRS modifications are discussed first.

Issues Resulting in PRS Modifications

Operation and Maintenance Expense. Comments received about operation and maintenance (O&M) expenses centered on: (1) Including the cost of construction of the Ault and Archer Substations as an O&M cost; (2) projecting too much for extraordinary or nonrecurring O&M expenses through the FY 1982-86 period and continuing the FY 1986 amount for the years thereafter; (3) including movable equipment such as an airplane as an O&M expense in the year such equipment is purchased instead of amortizing it over its service life; and (4) including unidentified replacements as an O&M cost.

Some commentors misunderstood information Western provided and thought that the construction costs of the Ault and Archer Substation additions were included as an O&M expense in the PRS. Actually, the PRS treated the aforementioned construction costs as part of the power investment cost and not as an O&M expense. At the time the two substation additions were expected to be placed in service, the estimated O&M costs in the PRS were increased for the additional labor and material costs associated with operating and maintaining the additional equipment. The estimated costs included in the PRS for O&M expenses that were identified as being associated with additions at the Archer and Ault Substations also included other CRSP substation O&M costs in the Loveland-Fort Collins Area. O&M program, it has been necessary to perform some special items of maintenance; i.e., items that are out of the ordinary. On program documents since FY 1977, expenses associated with such items have been termed "extraordinary maintenance" by the BuRec and "nonrecurring maintenance" by Western. Since there have been actual expenditures of this type each year, at least since FY 1977, it is logical to program funds for such expenditures for all future years. The specific item to be maintained is identified whenever possible, and this is normally possible for several future years. Beyond that period of specific plans, an estimated amount of money is programmed for extraordinary or nonrecurring maintenance based on general experience. In the program documents used for the FY 1981 PRS, expenses programmed for extraordinary or nonrecurring maintenance were based on specific items for the years through FY 1984 (for such maintenance work as road repairs, spillway repairs, rock bolting canyon walls, vibration dampers on transmission lines, and penstock repairs) and were based on general estimates for FY 1985 and FY 1986. The amount for FY 1986 was assumed to continue for the remainder of the study period. Following is a tabulation of the total expenses used in the FY 1981 PRS for extraordinary and nonrecurring maintenance (millions of dollars):

FY 1981	FY 1982	FY 1983	FY 1984	FY 1985	FY 1986 & after
2.170	1.079	2.494	3.445	0.634	0.510

Since there are identifiable items to be maintained associated with the FY 1981–84 amounts and the nonspecific estimates for FY 1985 and thereafter are relatively small, the expenses projected in the FY 1981 PRS for extraordinary or nonrecurring maintenance are consistent with reasonable forecasting techniques and were not reduced.

A close examination of the way movable equipment is treated in the PRS as compared to the way it is handled in the financial records revealed inconsistencies. The PRS included capitalized movable equipment historically as plant inservice to be repaid the same as any other plant investment while movable equipment projected in the future was treated as an O&M cost and repaid the same year the equipment was acquired. Financial records treat movable equipment as an O&M expense to be repaid over its service life. For consistency, Western is now treating future movable equipment as an O&M expense and repaying it over its service life in the CRSP PRS. The historical movable equipment was removed from the plant inservice and was amortized over its service life as an O&M cost. Subsequent to the October 1982 PRS, Western has learned that the BuRec airplane will be used only about 25 percent of the time on activities associated with CRSP power operations. In the revised PRS, only 25 percent of the the airplane's cost was included as a CRSP O&M expense; and all movable equipment, including the airplane, is scheduled for repayment over the service life of the property.

In the October 1982 PRS, about $5.2 million of cumulative miscellaneous unidentified replacements were treated as O&M expenses from FY 1983 through FY 1986; and the FY 1986 cost of $1.8 million was projected through the end of the repayment period. These replacements have been removed from the O&M expenses and included as capitalized replacements with an assumed service life of 20 years.

By making the aforementioned changes in movable equipment and unidentified replacement costs, the revenue requirements from firm energy and capacity sales were reduced by about 2.5 percent.

Central Utah project and Seedskadee Project Power Revenues. In accordance with the CRSP authorizing legislation, after the storage units irrigation allocation and all interest-bearing investments are repaid, the remaining net revenue available for repayment, plus any surplus CRSP municipal and industrial (M&I) revenue, is used to repay that part of the irrigation allocation of participating projects which is beyond the irrigators' ability to repay. The above legislation requires that power revenues of participating projects which are part of the aforementioned net revenue available for repayment be credited directly to that participating project for irrigation assistance.

In the October 1982 PRS, the power revenues attributed to the Central Utah Project (CUP) and to Seedskadee Project were in the same proportion to the total revenue as their projected energy and capacity are to the total projected CRSP energy and capacity that is used in the PRS. This method of determining the revenues that should be assigned to these participating projects was established when nearly all the revenue in the PRS was derived from firm energy and capacity sales. The method has continued to be used without reexamination. A significant amount of revenue is now derived from sources other than firm energy and capacity sales, such as from fuel replacement energy sales. Because the power facilities of participating projects are not required to make these other sales, Western decided that the power revenue attributable to the CUP and Seedskadee Project should be proportional to the revenue from firm energy and capacity sales, and not to the total revenue. By making this change, the revenue requirements from firm energy and capacity sales were increased slightly.

Inclusion of FY 1982 Actual Revenue and Expense. The October 1982 PRS was based on conditions as of the end of FY 1981. As stated on page 2 of the October 1982 rate brochure, Western planned to use actual costs and revenues for FY 1982 in a revised PRS if feasible. In addition, the October 1982 PRS assumed that the effective date of the proposed rate increases would be the April 1983 billing period. The substitution of actual in lieu of estimated FY 1982 costs and revenues, plus changing the effective date of the rate increases to the June 1983 billing period, increased the revenue requirements from firm energy and capacity sales by less than 1 percent.

Summary of Changes

A summary of the effect of the changes made in the April 1983 PRS are tabulated below:

Item	Change in proposed rate adjustment	
	(percent)	(mills/kWh
Changes in movable equipment and unidentified replacements	−2.5	−0.25
Changes in power revenues attributable to CUP and seedskadee Project	+0.5	+0.05
Inclusion of FY 1982 actual costs and revenues	+0.6	+0.06
Total	−1.4	−0.14

The net result of the above changes is to reduce the composite rate at 58.2-percent seasonal load factor from 10.06 mills/kWh to 9.92 mills/kWh for a reduction of 0.14 mills/kWh.

Other Repayment Issues

Repayment of the Irrigation Allocation of the Storage Units. Customers had two areas of concern about the repayment of the irrigation allocation of the storage units as follows:

1. The FY 1977 PRS which was the basis for the last rate adjustment showed that the ultimate allocation to storage units irrigation was $106,656,000 while the FY 1981 PRS, which is the basis for the current rate adjustment, shows $111,135,000. Since the storage units have been completed for some time, this increase in allocated costs was questioned.

2. In addition to the increased allocation to irrigation between the two studies, there is a decrease in the suballocation to M&I water users and a decrease in surplus M&I revenues available for repaying the irrigation allocation. This appeared to be inconsistent.

The actual plant investment allocated to irrigation for the storage units as of FY 1981 was $106,290,000. Multipurpose investments which are currently underway or scheduled include about $5,200,000 for grouting and drainage at the Navajo Dam and Reservoir, about $1,800,000 for the water system at the Dutch John Government Camp (Flaming Gorge), and about $700,000 for general property at Glen Canyon. Of this $7,700,00, slightly over $4,800,000 is allocated to irrigation which, when added to the present irrigation allocation, brings the total to $111,135,000.

The FY 1977 PRS recognized M&I water sales contracts which were in effect at that time. It included a contract for 102,000 acre-feet annually with the Resources Company for water to be used in a large coal-fired powerplant on the Kaiparowits Plateau near Glen Canyon. The plans for the plant have been cancelled and the contract is no longer in effect. The FY 1981 study does not include revenue from this contract, but it does still take into account all water sales contracts which are in effect, including a contract for the sale of 3,000 acre feet annually to the city of Page, Arizona, which was executed subsequent to the FY 1977 PRS. These changes reduced the M&I water use by 99,000 acre-feet annually. This, in turn, reduced the suballocation to M&I and the surplus M&I revenue available for repaying the storage unit's irrigation allocation. The rational basis for the changes in the irrigation allocation of the storage units since the FY 1977 PRS was prepared precluded the necessity for modifying these forecasts in the FY 1981 PRS.

Projections of Capacity Sales. Some customers expressed the view that Western's projections of capacity sales were too low. They noted that the comparison of the projected capacity shown in the FY 1977 PRS with actual capacity sales for the FY 1978–1981 period are within 0.8 percent of each other, but they claimed that such a comparison is misleading. They stated that the comparison should be between projected "saleable" capacity and actual "saleable" capacity (not actual sales) and that such a comparison shows the actual "saleable" exceeds the projected "saleable" by 7.8 percent for the above FY 1978–1981 period. They believe that this comparison demonstrates that the capacity projections are too low. No other support for a change in the projections of capacity sales was offered. In fact, the average capacity projection would be the most accurate projection to use for "saleable" capacity. However, projections of capacity sales in the PRS are meant to project the amount of capacity that can reasonably be expected to be sold at firm capacity rates not what is available for sale.

The long-term capacity commitments in the CRSP contracts, which terminate in FY 1989, were derived from the amount of capacity which hydrologic studies projected would be available 100 percent of the time. Some additional capacity is therefore available for sale most of the time. Historically, all of the available short-term capacity has not been sold. As shown on exhibit A, during the 16 seasons between FY 1975 and FY 1982, there were 2 seasons when no additional capacity was offered, and 8 seasons during which available capacity was offered sale but was not all sold. This means that for 50 percent of the time during the last 8 years, Western was unable to market all of its offered capacity. Assuming that the conditions of the last 8 years are representative of the future and that the 279,462 kilowatts that were offered but unsold during that period are valued at the monthly capacity charge of $2.00 (Rate Schedules SP–F2 and SP–FP2), the unrealized revenues from offered firm capacity can be expected to exceed $3,500,000 every 8 years. Revenues would be overstated for the study period by over $47,000,000 if the study assumed all offered capacity would be sold and actual results were similar to the past 8 years of experience.

Capacity projections in the PRS are used to project the amount of capacity that can reasonably be expected to be sold at firm rates, not what is available. In addition to not always selling all of the firm capacity offered, some available capacity is utilized to deliver such things as fuel replacement energy, interchange energy, and scheduled or emergency outage assistance. The benefits and revenues resulting from these transactions are reflected elsewhere in the PRS. It therefore would be inappropriate to assume that all available capacity will be sold as firm capacity, and that a comparison of projected capacity with actual firm capacity sales is a valid comparison.

In making projections of capacity sales, consideration is give to several factors among which are: (1) The amount of capacity which hydrologic studies indicate will be available, (2) the amount of capacity which is under contract, (3) the apparent market for short-term firm capacity sales as opposed to other services, and (4) the expected availability of the generating units. The following tabulation gives a comparison of the projected capacity sales with the acutal historical capacity sales for the FY 1976–82 period.

Fiscal year	Projected capacity sales		Actual[1] sales (kW)	Amount (projected sales exceeds actual sales (percent))
	Taken from	Sales (kW)		
1976	FY 1974 PRS	1,199,000	1,237,866	−3.3
1977	FY 1974 PRS	1,240,000	1,217,916	1.8
1978	FY 1977 PRS	1,237,000	1,214,009	1.8
1979	FY 1977 PRS	1,285,000	1,221,224	5.0
1980	FY 1977 PRS	1,305,000	1,328,961	−1.7
1981	FY 1977 PRS	1,309,000	1,351,296	−2.7
1982	FY 1981 PRS	1,393,500	1,354,312	2.8
Total		8,981,500	8,923,588	0.4

[1] The actual sales displayed here are taken from operating reports and are a refinement of those shown on page 23 of the October 1982 rate brochure.

Future capacity projections, based on past hydrologic conditions, are not precise, and Western has no conclusive evidence as to which capacity level would best approximate firm capacity sales over the study period. The relative impact on the rates of several alternatives is shown below:

Hydrologic capacity projection based on[1]	Average composite firm rate (at a 56.2 percent seasonal load factor) (mills/kWh)
Lower Envelope of Adverse	10.76
Lower Envelope of Lower Quartile	9.92
Smoothed Lower Quartile	9.77
Smoothed Average	9.60

[1] See exhibit D to CRSP substitute rate filing of March 21, 1983.

The October 1982 PRS utilized a hydrologic capacity projection based on the lower envelope of the lower quartile—the same level of sales anticipated in the FY 1977 PRS. The base hydrologic projection was adjusted for the period through 1986 to reflect expected unit outages at Glen Canyon to uprate the units. In the revised PRS (April 1983), the 1982 projection of 1,393,500 kW was reduced to the actual sale of 1,354,214 kW, and other minor adjustments were made such as revising the estimate of capacity sales for FY 1983 upward to 1,316,070 kW.

Western continued to use the lower envelope of the lower quartile hydrologic capacity as the base for its capacity sales projections for the following reasons:

1. About 980 to 1,580 megawatts of surplus thermal capacity are estimated to be available in the CRSP market area during the next 5 years, making it more difficult to market any available short-term capacity. In addition, the unit outages at Glen Canyon will substantially reduce the available capacity for the next 4 years.

2. During the 16 seasons between FY 1975 and FY 1982, there were 8 seasons during which all offered seasonal firm capacity was not sold and 2 seasons during which no short-term capacity was offered. Over the long term, it is reasonable to assume that there will continue to be periods when all offered capacity will not be sold.

3. While a comparison of the accumulated record of projected and actual capacity sales is short in hydrological terms and is not yet conclusive, it indicates that estimates have been anticipated in the very reasonable (within +5-percent accuracy). The projected sales exceeded actual sales by an average of 0.4 percent from 1976–1982.

4. Some available capacity is utilized to deliver fuel replacement energy and interchange energy, which are reflected elsewhere in the study.

Water Depletions. Some customers suggested that the water depletion schedule which affects projected revenues in the PRS is too high. They particularly questioned the inclusion of depletions for future participating projects whose status is questionable and depletions for unidentified developments. Including these depletions reduces the projected energy and capacity sales thereby increasing the revenue requirements in the PRS.

The State of Wyoming urged Western to continue using the water depletion schedule prepared by the BuRec with input from the four upper basin States of Colorado, New Mexico, Utah, and Wyoming.

The water depletion schedule that has been developed by the BuRec with input from the four upper basin States incorporates the assumption that the pressures of a growing population will eventually result in water developments utilizing each State's entitlement of the flow of the Colorado River. These developments may not necessarily be Federal projects, but anticipated water demands indicate that the water will be used. In fact, the four upper basin States do not accept the 5.8 million acre-feet limitation on upper basin depletions used by the BuRec in developing the depletion schedule. The States maintain that it is too low. The BuRec's depletion schedule, including a total of 5.8 million acre-feet of consumptive use by FY 2040, appears to be reasonable and Western has no basis for making any changes.

Revenue Projections. Some customers thought that Western's revenue projections were too conservative and that such understatement of projected revenues raises the rate needlessly high They pointed out that the projection in the FY 1977 PRS for FY 1978 through FY 1981 was nearly 32 percent lower than the actual revenue realized for the same period and that the projected revenues in the FY 1981 PRS for FY 1982 and FY 1983 were 23.0 and 16.4 percent, respectively, lower than the actual revenues in FY 1981.

A comparison of historical and projected revenues is meaningless unless an adjustment is made to account for the following differences: (1) Historical revenues are gross revenues, and (2) some projected revenues are gross revenues, but the projected fuel replacement energy revenues are net revenues (i.e., net of associated purchased power costs).

Therefore, an easier and more meaningful comparison is on the basis of the net revenues available for repayment. The term "net revenue available for repayment" means the gross revenue less operating expenses; i.e., the expenses associated with operation and maintenance, energy purchases, interest, wheeling, and salinity control. A comparison of projected net revenues in the FY 1977 PRS (November 1980 revision) and the FY 1981 PRS with the actual values for FY 1976–FY 1982 period is as follows:

NET REVENUES AVAILABLE FOR REPAYMENT
PROJECTED REVENUES

FY	As projected in	Amount ($1000)	Actual revenues ($1000)
1978	FY 1977 PRS	3,922	7,046
1979	FY 1977 PRS	9,234	−2,540
1980	FY 1977 PRS	20,983	35,561
1981	FY 1977 PRS	18,162	9,675
1982	FY 1981 PRS	19,481	10,034
Total		71,782	59,776
Average annual		14,356	11,955

% Projected Exceeds Actual=20%

As can be seen from this tabulation, the actual net revenue available for repayment has been less than the projected amount. For the last 5 years the projected net revenues exceeded the actual by an average of 20 percent. While revenue estimates were higher, in large part because of netting, than

actual revenues in some years, if is clear that actual annual expenses also have been higher than estimated expenses so that, overall, the net revenues have been lower than the projected repayment requirements. Western is endeavoring to improve the accuracy of all of its estimates. However, it is obvious that any increase in projected revenues as a result of the elimination of netting must be accompanied by an even greater increase in costs (including the cost of purchased power for fuel replacement sales) to improve forcasting accuracy.

Stepped Rates/Participating Project Costs. Some customers stated that since many of the authorized participating projects will not be completed until well into the future and some projects will quite likely never be completed, it is improper to include all authorized participating projects in the PRS to determine the power rate needed at the present time. These customers proposed instead that the presently needed power rate be based on a PRS which includes only those participating projects which will be completed within 5 years beyond the current fiscal year; i.e., with an initial water service before FY 1987. They base their argument on the clause in DOE Order No. RA 6120.2, specifying the use of a 5-year evaluation period in the PRS. These customers proposed further that if it is necessary to prepare an annual report showing full repayment of all participating projects to comply with section 6 of Pub. L. 84–485, additional studies be prepared to include the costs of all participating projects and to show stepped increases in the power rate at various times in the future.

The benefits claimed for stepping the rates are as follows: (1) Power repayment studies would show repayment of all authorized projects, (2) present rates would not be influenced by the cost of future projects which may not be built, and (3) current ratepayers would not be required to pay higher rates caused by future projects to be completed beyond the 5-year cost evaluation period.

Representatives of the four upper basin States urged Western to continue to set rates based upon the criteria which have been used historically. They pointed out that a major purpose of the CRSP power systems was to provide for a timely implementation of plans to develop the water resources of the Upper Colorado River Basin.

Paragraph 10k of DOE Order No. 6120.2 directs that a PRS should include all power investment costs for existing systems and for all authorized power system facilities which will be inservice within the cost evaluation period. The cost evaluation period is defined in paragraph 7b of the order as "a period of time during which estimates of future costs and revenues may be modified to reflect changing conditions, normally 5 years." Paragraph 12b of the order directs that revenues should also be sufficient to recover the assisted irrigation investment or payments to basin funds, participating projects, or States; but no time period is specified for the inservice dates of the irrigation investments or participating projects. More significantly, Pub. L. 84–485 sanctions the inclusion of participating project costs beyond a 5-year period in the future. The Assistant Secretary has approved rates with such participating project costs included, and with the execution of this rate order will continue their inclusion. The FERC recognized that the 5-year cost evaluation period does not apply to participating project costs in its order dated October 1, 1982.

The imposition of a limit on the inclusion of future construction costs in determining power rates for investor-owned utilities is evaluated on fairness. That is, there is a point of view that future construction costs should not be borne by present ratepayers until the benefits from these costs are available to them. While a limit on including future costs may be reasonable for utilities whose only costs are those associated with providing power for their customers, the same is not true for a Federal multipurpose project such as the CRSP. For such projects, the irrigation assistance to participating projects does not provide any power benefits to present or future ratepayers. Under these conditions, stepping the rates would unfairly benefit current ratepayers at the expense of future ratepayers.

The method for treating participating project costs referred to in the March 8, 1983, letter to the Administrator of Western from the Commissioner of the BuRec (exhibit A to the CRSP substitute power rate filing of March 21, 1983) was used in the FY 1981 PRS for the first time. This jointly developed method is consistent with both Western and BuRec policies. BuRec policies reflect an interpretation of their statutory responsibilities and are understood by Western to require that costs for all authorized participating projects be included in the PRS. The BuRec is considering alternate policies for determining how participating project costs should be included in the PRS. If adopted, these policies would refine the method that was used in the FY 1981 PRS which is described here:

1. Inservice dates for projects that are not in an active planning status and for which no satisfactory plan has been developed are scheduled by BuRec so that they do not affect PRS revenue requirements. The LaBarge, Fruitland-Mesa, San Miguel, Savery-Pot Hook, and West Divide Projects are in this category.

2. For project features that definitely will not be built, such as the Seedskadee irrigation feature, only costs already spent are included in the PRS.

3. Inservice dates for projects that are in the active planning process or have met the required conditions for construction are scheduled by the BuRec without considering their effect upon PRS revenue requirements. Exhibit B shows that status of these projects.

The PRS methodology permits these future participating project costs to be included without increasing revenue requirements to an excessive level.[1] This is possible because the investments in facilities that are already inservice do not have fixed annual repayment schedules. Within the constraints specified by statute, repayment schedules for the various features and units of a project are established in the PRS to minimize annual revenue requirements. This repayment flexibility also accommodates fluctuating net revenues of a hydroelectric system without requiring similarly fluctuating rate adjustments. Thus, rate stability—one objective of Federal ratemaking—has traditionally been achieved with the use of a PRS. The concept of a stepped rate undermines a basic raison d'etre of the PRS and is philosophically incompatible with the averaging that is fundamental to the PRS. A PRS was at one time called an average rate and repayment study. The introduction of a stepped-rate concept into the PRS would jeopardize the timely recovery of existing investment costs.

There are, therefore, two compelling reasons for rejecting the stepped-rate concept: (1) It would jeopardize the timely recovery of existing investment costs, and (2) it would unfairly benefit current customers at the expense of future customers.

Replacement Costs. The customers expressed the view that the large cyclic variation in replacement costs should be spread out, thereby shifting costs past the "ratesetting" year so that the revenue requirements would be reduced. They further noted that replacements do not appear to be capitalized after FY

[1] As long as rates return revenues that are not greater than would be required to amortize facilities already in service on a straight-line basis (a method commonly used by electric utilities), they could not reasonably be considered excessive. (See exhibit C to CRSP substitute rate filing of March 21, 1983.)

VOL 48 ISS 86 MY 3 1983 UMI

2006 except for FY 2014 and that had they been capitalized, the power rate could be reduced.

The replacements used in the PRS are based on the service lives of the items being replaced, and the projected cost of such items is shown in the year they are expected to be placed inservice. Western is taking the customers' suggestions under advisement and will consider some modifications in the projection of replacements in the next PRS. Western's effort will continue to be to estimate replacement investments as closely as possible to the manner in which the investments actually will occur. It may be possible to mitigate the large cyclic variations in the projected replacements, but it is questionable whether the power rates will be reduced as a result. The ratesetting year of 2057 had a very modest projection of $1,577,000 for replacements, as compared to over $28,000,000 in some years. It is just as likely that a redistribution of replacement costs would increase the revenue requirements as decrease them.

Replacements have been treated as capitalized investments in the PRS for about 10 years. During 1972, the BuRec adopted two PRS policies—that replacements would be capitalized and that the highest interest-bearing investments would be repaid first to the extent that this is possible while repaying all investments within their repayment periods. Since replacements often are the highest interest-bearing investments, they are normally repaid within a short period of time. The question of whether CRSP replacements must be paid as an annual expense or whether it is permissible to capitalize them has recently been evaluated. Western's Office of the General Counsel concluded that section 5(c) of the Colorado River Storage Act does not mandate annual repayment of replacements and does not prohibit the capitalization of replacement costs. Therefore, the administrative practice of amortizing CRSP replacements is lawful.

The historical interpretation of the CRSP Act has been that section 5(c) requires repayment of all CRSP costs, including replacements, prior to apportioning revenues in excess of the amounts needed to meet the requirements of the CRSP. The April 1983 CRSP adheres to that historical interpretation.

In the April 1983 PRS, the repayment of the storage units' costs allocated to power was completed in FY 2013 and costs allocated to irrigation was completed in FY 2014. Thereafter, replacement costs are paid each year before any revenue is made available for participating projects. Since the annual revenues are adequate to repay the costs of replacements at the time replacements are made, the effect of capitalizing replacements is the same as if replacements had been treated as an annual expense.

Interest Expense. The interest expense for the CRSP is determined by applying the interest rate to the unpaid investment which is inservice at the beginning of the year. In the CRSP PRS, no interest charges are made for the year in which investments are placed into service. This policy is a deviation from paragraph 10j(2) of Order No. RA 6120.2, but it is a continuation of the established practice for the CRSP. That practice was orginally established because the Department of the Interior's Solicitor advised the BuRec that using an interest credit (to recognize that CRSP power revenues are received monthly, rather than at the end of the year) would be inconsistent with the availability of CRSP revenues without further appropriation for the operation of CRSP (section 5(c) of the CRSP act). Consequently, these revenues could be spent for operations within a short period of time and would not be accruing interest. Since an interest credit was not used, the same concept was extended to interest charges on investments for the year they are placed in service. Recently, interest during construction has been included in the financial records through the fiscal year during which facilities are placed in service.

Western will be considering new interest rate policy in conjunction with its next CRSP rate adjustment and at that time will consider whether a charge of one-half year's interest should be made on investments placed inservice during the year as required by paragraph 10j(2) of Order No. RA 6120.2.

Other Comments. Some customers in southern Utah stated that the Secretary of the Interior's decision in the early 1980's to deliver power to them over existing transmission lines of others, instead of buidling Federal lines to deliver CRSP power, has not been fair to them. They also state that the existing system is not adequate and suggest that a line be built from Glen Canyon to St. George to solve the problem.

Western is studying the need for and feasibility of constructing additional transmission lines as needed for marketing CRSP power, but then need and feasibility of constructing transmission lines are outside the scope of this proposed rate adjustment.

Environmental Evaluation. As discussed on page 46 of the October 1982 rate brochure, section D of the DOE Regulations which were published in the February 23, 1983, Federal Register (47 FR 7976) state that the level of documentation for rate increases of power marketing administrations required under the National Environmental Policy Act of 1969 depends on the rate increase as it relates to the rate of inflation since the last rate increase.

Using the Consumer Price Index prepared by the Department of Labor as a measure of inflation, the estimated inflation from the date of the last rate increase to the planned date of the proposed rate increase is 22 percent. The power rate increase is 28 percent. From analyses of residential power rates of CRSP customers and of the effect of "passing through" the CRSP rate increase, it was determined that the effect on the ultimate consumer will be less than 11 percent.

The proposed rate increase would have no effect on the hydrologic operation of the Colorado River; consequently, there would be no change in reservoir fluctuations and river flows. Air quality, flora, and fauna will not be affected, nor will there be any effect on the cultural and/or recreational resources of the Colorado River Basin. Since the CRSP rate is below the cost of wholesale or self-generated firm capacity and energy in the CRSP market area or any other alternative sources of energy, it is unlikely that any CRSP customers will switch to another source of energy.

The proposed rate increase was discussed with the DOE Office of Environmental Compliance. They agree with Western's conclusion that the proposed rate increase will clearly have no significant environmental impacts. Therefore, neither an environmental impact statement nor an environmental assessment will be prepared. A memorandum addressing the environmental evaluation is on file in Western's offices.

Availability of Information

Information regarding this rate adjustment, including studies, comments, transcripts, and other supporting material, is available for public review in the Salt Lake City Area Office, Western Area Power Administration, 438 East 200 South, Suite 2, Salt Lake City, Utah 84111; in the office of the Director, Division of Marketing and Rates, Western Area Power Administration, 1627 Cole Boulevard, Golden, Colorado 80401; and in the Office of Power Marketing Coordination, Department of Energy, Room 5318, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, DC 20461.

Submission to the FERC

The rates herein confirmed, approved, and placed in effect on an interim basis, together with supporting documents, will be submitted to the FERC for confirmation and approval on a final basis.

Order

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm and approve on an interim basis, effective for the June 1983 billing period, Rate Schedules SP–F2, SP–FP2, SP–FT1, and SP–NFT1. These rates shall remain in effect pending the FERC confirmation and approval of them or substitute rates, on a final basis, or until they are superseded.

Issued in Washington, DC, April 25, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

[Rate Schedule SP–F2 (Supersedes Schedule SP–F1)]

Schedule of Rates for Wholesale Firm Power Service

Effective:
At the beginning of the June 1983 billing period.

Available:
In the area served by the Colorado River Storage Project.

Applicable:
To wholesale power customers for general power service supplied through one meter at one point of delivery.

Character and Conditions of Service:
Alternating current, sixty (60) Hertz, three-phase, delivered and metered at the voltages and points established by contract.

Monthly Rate:
Capacity Charge: $2.09/kW of billing demand.

Energy Charge: 5.0 mills/kWh for all energy use up to, but not in excess of, the energy obligation under the power sales contract.

Billing Demand: The billing demand will be the greater of (1) the highest 30-minute integrated demand established during the month up to, but not in excess of, the delivery obligation under the power sales contract, or (2) the contract rate of delivery.

Billing for Unauthorized Overruns:
For each billing period in which there is contract violation involving an unauthorized overrun of the contractual firm power and/or energy obligations, such overrun shall be billed at ten (10) times the above rate.

Adjustments:
For transformer losses:
If delivery is made at transmission voltage but metered on the low-voltage side of the substation, the meter readings will be increased to compensate for transformer losses as provided for in the contract.

For power factor:
None. The customer will normally be required to maintain a power factor at the point of delivery of between 95-percent lagging and 95-percent leading.

[Rate Schedule SP–FP2 (Supersedes Schedule SP–FP1)]

Schedule of Rates for Wholesale Peaking Power Service

Effective:
At the beginning of the June 1983 billing period.

Available:
Within and adjacent to the marketing area of the Colorado River Storage Project.

Applicable:
To wholesale power customers purchasing such service uner long-term contract. Because of he nature of this class of service, it is applicable only to customers with other resources enabling them fo utilize it.

Character and Conditions of Service:
As specifically established by contract. Delivery will be made from the transmission system of the United States at transmission voltage, and normally only during peak hours of the purchaser's load. Return of all energy furnished shall normally be required.

Monthly Rate:
Capacity Charge: $2.00/kW of the effective contract rate of delivery for peaking power or the maximum amount scheduled, whichever is the greater.

Energy Charge: 5.0 mills/kWh for all energy scheduled for delivery without return.

Billing for Unauthorized Overruns:
For each billing period in which there is a contract violation involving an unauthorized overrun of the contractual obligation for peaking capacity and/or energy, such overrun shall be billed at ten (10) times the above rate.

Adjustments:
For power factor:
None. The customer will normally be required to maintain a power factor at the point of delivery of between 95-percent lagging and 95-percent leading.

[Rate Schedule SP–FT1]

Schedule of Rates for Firm Transmission Service

Effective:
At the beginning of the June 1983 billing peiod.

Available:
In the area served by the Colorado River Storage Project transmission facilities.

Applicable:
To firm transmission service customers where power and energy are supplied to the Colorado River Storage Project system at points of interconnection with other systems and transmitted and delivered, less losses, to points of delivery on the Colorado River Storage Project system specified in the service contract.

Character and Conditions of Service:
Transmission service for three-phase alternating current at sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Rate:
Transmission Service Charge: $10.27 per kilowatt per year for each kilowatt contracted for as specified in the service contract; payable monthly at the rate of $0.8558 per kilowatt.

Adjustments:
For reactive power:
None. There shall be no entitlement ot transfer of reactive kilovolt-amperes at delivery points, except when such transfers may be mutually agreed upon by the Contractor and the contracting officer or their authorized representatives.

For losses:
Power and energy losses incurred in connection with the transmission and delivery of power and energy under this rate schedule shall be supplied by the customer in accordance with the service contract.

[Rate Schedule SP–NFT1]

Schedule of Rates for Nonfirm Transmission Service

Effective:
At the beginning of the June 1983 billing period.

Available:
In the area served by the Colorado River Storage Project transmission facilities.

Applicable:
To nonfirm transmission service customers where power and energy are supplied to the Colorado River Storage Project system at points of interconnection with other systems and transmitted and delivered subject to the availability of transmission capacity, less losses, to points of delivery on the Colorado River Storage Project system specified in the service contract.

Character and Conditions of Service:
Transmission service on an intermittent basis for three-phase alternating current at sixty (60) Hertz, delivered and metered at the voltages and points of delivery specified in the service contract.

Rate:
Transmission Service Charge: 2.0 mills per kilowatthour for each kilowatthour scheduled; payable montly.

Adjustments:
For reactive power:
None. There shall be no entitlement to transfer of reative kilovolt-amperes at delivey points, except when such transfers may be mutually agreed upon by the Contractor and the Contracting Officer or their auhrorized representatives.

For losses:
Power and energy losses incurred in connection with the transmission and delivery of power and energy under this rate schedule shall be supplied by the customer in accordance with the service contract.

Department of Energy

Office of Conservation and Renewable Energy

Federal Loan Guaranties for Geothermal Energy Utilization; Final Rule

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Part 790

[Docket No. CE-RM-82-701]

Federal Loan Guaranties for Geothermal Energy Utilization

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE) today issues final program rules which revise the Geothermal Loan Guaranty Program in accordance with amendments to Title II of the Geothermal Research, Development, and Demonstration Act of 1974, Pub. L. 93-410, which are set forth in Title VI of the Energy Security Act, Pub. L. 96-294.

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT:
As to geothermal loan guaranty matters: Pauline Labrie, Office of Conservation and Renewable Energy, Geothermal and Hydropower Division, 1000 Independence Avenue, S.W., Room 5G-030, Washington, D.C. 20585, (202) 252-5343.
As to legal matters: Diane Stubbs, Office of General Counsel, GC-44, 1000 Independence Avenue, S.W., Room 6B-158, Washington, D.C. 20585, (202) 252-2440.

SUPPLEMENTARY INFORMATION:

I. Background
II. Public Comments
III. Review Under Executive Order 12291
IV. Review Under Regulatory Flexibility Act
V. Review Under National Environmental Policy Act
VI. List of Subjects in 10 CFR Part 790

I. Background

The rules being issued today were published in a notice of proposed rule making which appeared in the January 12, 1982 **Federal Register** (47 FR 1302). During the public comment period, the DOE received one written comment. A public hearing was not held because no substantial issue of fact or law exists with respect to these rules and such rules are unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses.

The rules DOE adopts today provide generally that: (1) The loan guaranty ceiling be increased to 90 percent of project costs for municipalities and cooperatives; (2) the program be extended to the end of FY 1990; [1] (3) final decisions on loan guaranty applications be reached within four months of the date of filing; (4) project costs exclude the cost of constructing electric transmission lines to the extent that such costs exceed 25 percent of the estimated total aggregate cost of the project; and (5) duplication of actions taken pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 be minimized. These amendments are being issued in order to comply with section 644 of the Energy Security Act (Pub. L. 96-294).

II. Public Comments

In response to the notice of proposed rulemaking, DOE received one written comment from Pacific Power and Light Company (PPLC).

PPLC expressed support for and urged adoption of the proposed amendments, primarily because the commenter believes that the geothermal potential of the western United States has not been fully utilized and that the amendments constitute an extension of a program which has been instrumental in aiding in the identification and development of this potential without direct Federal funding.

III. Review Under Executive Order 12291

Today's rules were reviewed under Executive Order 12291 (February 17, 1981). DOE has concluded that they are not "major rules" because, if implemented, they will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

IV. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601 *et seq.*) requires that a final regulatory flexibility analysis be prepared with respect to final rules unless the agency certifies that the rules will not, if promulgated, have a significant economic impact on a substantial number of small entities. DOE believes that these rules, if implemented, would not have the requisite economic impact on small entities to necessitate a final regulatory flexibility analysis.

V. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of these regulations does not require preparation of an environmental assessment or of an environmental impact statement under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.* (1970)), the Council on Environmental Quality regulations (40 CFR Parts 1500-1508), and the DOE guidelines (45 FR 20694, March 28, 1980). Issuance of these rules is not a major Federal action significantly affecting the quality of the human environment within the meaning of NEPA. In the event that loans are guarantied under the Geothermal Loam Guaranty Program, DOE would complete any appropriate NEPA site specific documentation that may be required.

VI. List of Subjects in 10 CFR Part 790

Geothermal energy, Loan programs.

(Title II of the Geothermal Energy Research, Development, and Demonstration Act of 1974, Pub. L. 93-410, 88 Stat. 1088 (30 U.S.C. 1141 *et seq.*), as amended; Title VI of the Energy Security Act, Pub. L. 96-294, 94 Stat. 763 (30 U.S.C. 1501 *et seq.*); Department of Energy Organization Act, Pub. L. 96-91, 91 Stat. 565 (42 U.S.C. 7101 *et seq.*))

In consideration of the foregoing, 10 CFR Part 790 is amended as shown below.

Issued in Washington, D.C., April 27, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

PART 790—THE GEOTHERMAL LOAN GUARANTY PROGRAM

For the reasons set out in the preamble, Part 790 of Chapter III, Title 10 of the Code of Federal Regulation is amended as shown.

1. In § 790.6, paragraph (e) is revised to read as follows:

§ 790.6 Loan guaranty criteria.

* * * * *

(e) The maximum guaranty shall apply only to that amount of a loan that does not exceed 75 percent of the estimated aggregate cost of the project. However, any guaranty made for a loan to an electric, housing, or other cooperative, or to a municipality (as defined in section 3(7), Part I, of the Federal Power Act), may apply to that amount of the loan that does not exceed 90 percent of the estimated aggregate cost of the project.

[1] This extension of program authority is mandated by statute and does not affect DOE's decision, reflected in a notice published on March 1, 1982 (47 FR 8553), to accept no further applications for new projects at this time.

§ 790.9 [Amended]

2. Section 790.9 is amended by removing the words "September 3, 1984" wherever they appear and inserting, in their place, the words "September 30, 1990."

3. In § 790.20, paragraph (b)(1) is revised to read as follows:

§ 790.20 Filing.

* * * * *

(b)(1) Prior to receipt of an application, the Manager is authorized to conduct preliminary discussions with prospective lenders, borrowers or other interested parties wishing to obtain information or advice regarding eligibility for a loan guaranty and compliance with this regulation, and whether a lender should be obtained by the borrower prior to the submission of an application. To the maximum extent practical, and applicant should be advised (prior to the submission of an application) of all information which will be required by the Manager in processing the application. The date of filing shall be the date, as determined by the Manager, when all such required information has been submitted by the applicant. A final decision on the application shall be made by the Secretary within no more than four months of the date of filing established by the Manager.

4. Section 790.22 is amended by adding paragraphs (g) and (h) to read as follows:

§ 790.22 Project costs.

* * * * *

(g) The estimated total aggregate cost of a project shall exclude the estimated cost of constructing electric transmission lines to the extent that such construction cost exceeds 25 percent of the estimated total aggregate cost of the project. In determining this 25 percent limitation, the amount used in the denominator shall be the estimated total aggregate cost of the project including the estimated total cost of constructing the electric transmission line.

(h) The Secretary may waive or limit the 25 percent limitation imposed by paragraph (g) above for projects located in the State of Hawaii upon finding that the project is remote from the area of primary consumption, that a transmission line is required before the geothermal reservoir can be developed, and that the transmission line will be used for more than the plant which is the subject of the loan guaranty.

5. In § 790.23, paragraph (a) is revised to read as follows:

§ 790.23 Environmental considerations.

(a) The issuance of a Federal guaranty for a loan under these regulations is subject to the provisions of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C 4321 *et seq.* Pub. L. 91-190) and applicable regulations, rules and guidelines implementing NEPA. The Secretary shall ensure, to the maximum extent possible, that any action undertaken pursuant to section 102(2)(C) of NEPA which is associated with the granting of a loan guaranty under this regulation takes maximum cognizance allowable under law of any other action previously undertaken pursuant to NEPA section 102(2)(C) with respect to the project which is the subject of such loan guaranty. No action associated with the loan guaranty shall duplicate any action previously undertaken under NEPA section 102(2)(C) in connection with the project, so long as all requirements which are applicable to the project under NEPA section 102(2)(C) have been or will be satisfied.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

National Conservation and Recreation Areas in Alaska; Description of Boundaries

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Legal Descriptions of the Steese National Conservation Area and the White Mountains National Recreation Area Boundaries.

SUMMARY: This notice sets out the legal descriptions of the exterior boundaries of the Steese National Conservation Area and the White Mountains National Recreation Area established in Alaska under Sections 401 and 403 of the Alaska National Interest Lands Conservation Act (ANILA). Limited descriptions are included for Wild and Scenic Rivers established under Section 603 and rivers designated for study under Section 604. Publication of these legal descriptions is required by Section 103 of the ANILCA. Generalized location maps are included also.

EFFECTIVE DATE: Pursuant to Section 103(b) of ANILCA these boundaries were effective as of December 2, 1980.

FOR FURTHER INFORMATION CONTACT: Beaumont C. McClure, Bureau of Land Management, 18th and C Streets, N.W., Washington, D.C. 20240 (phone: (202) 343–6511) or Jules V. Tileston, Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513 (phone: (907) 271–5069).

SUPPLEMENTARY INFORMATION: Under Subsection 103(b) of the Alaska National Interest Lands Conservation Act (ANILCA, Pub. L. 96–487 (94 Stat. 2371)), the Secretary of the Interior is directed to publish legal descriptions and boundary maps for land status changes effected by the ANILCA. The official legal descriptions for the Steese National Conservation Area and the White Mountains National Recreation Area are included in this notice. While generalized location maps for these areas also are included in this notices, the 1:250,000 scale maps developed for public use under Subsection 103(b) are incorporated by this notice and are available for inspection at the Office of the Federal Register Information Center (Room 8301, 1100 "L" Street, N.W., Washington, D.C. 20408), U.S. Geological Survey map reference libraries in Alaska, and at the Bureau of Land Management Offices in Washington, D.C. and Anchorage, Alaska. The maps are also available for sale from the U.S. Geological Survey. Limited descriptions of Wild and Scenic Rivers under the Bureau of Land Management's (BLM) jurisdiction are also included, although they are not depicted on the 1:250,000 scale maps at this time.

The ANILCA established one National conservation area and one National recreation area.

Use of National Conservation and National Recreation Areas

The legal descriptions that follow are those of the external boundaries of the above listed units. State, Native, and other private landholdings within these boundaries cannot be accurately described at this time and thus have not been identified on the available maps. Inclusion of these nonpublic lands within the described boundaries should not be interpreted as authorizing public use of such lands. Uses of the public lands within the described boundaries are controlled by the provisions of the ANILCA, the Federal Land Policy and Management Act of 1976, other appropriate laws, and regulations governing land administered by the BLM. Persons desiring information on land status or use of land within the described areas may contact the Alaska State Director, BLM, 701 C Street, Box 13, Anchorage, Alaska 99513.

Note.—The term "public lands" as used throughout this notice is defined by the ANILCA as those lands, waters, and interests therein, the title to which is in the United States after December 2, 1980, except:

A. Land selections of the State of Alaska which have been tentatively approved or validly selected under the Alaska Statehood Act and lands which have been confirmed to, validly selected by, or granted to the Territory of Alaska or the State under any other provision of Federal law;

B. Land selections of a Native corporation made under the Alaska Native Claims Settlement Act which have not been conveyed to a Native corporation, unless any such selection is determined to be invalid or is relinquished; and

C. Lands referred to in Subsection 19(b) of the Alaska Native Claims Settlement Act.

Those lands selected by the State or a Native corporation within the exterior boundaries of a National conservation area or a National recreation area are to be administered by the Bureau of Land Management under applicable laws until conveyed.

Those lands validly selected by, but not ultimately conveyed to, the State or a Native corporation within the exterior boundaries of a National conservation area or a National recreation are become a part of that conservation or recreation area.

National Wild and Scenic Rivers

The ANILCA designated the following National wild rivers in Alaska: Alagnak, Beaver Creek, Birch Creek, Delta (a portion), Fortymile (a portion), Gulkana, and Unalakleet.

A portion of the Delta and Fortymile Rivers has been classified as a scenic river. Another portion of the Fortymile River has been classified as a recreation river.

The following rivers are designated for a 3–year study for possible addition to the National Wild and Scenic Rivers System: Colville, Etivluk-Nigu Utukok, Melositna, Yukon (Ramparts section), Squirrel, and Koyuk.

The ANILCA descriptions of National wild and scenic rivers are included in this notice but they are not depicted on the 1:250,000 scale maps at this time. These limited descriptions can be found following the description of the Steese National Conservation and the White Mountains National Recreation Areas.

Corridors for rivers designated for study include the public lands within the bed or bank of the river and the area extending 2 miles outward from each bank of the river channel. These corridors will be in effect for varying periods in accordance with Subsection 7(b) of the Wild and Scenic Rivers Act. Beginning and ending points of these study rivers have been included in this notice. At such time as management corridors are finalized for the designated Wild and Scenic Rivers, they will be described on the 1:250,000 scale maps. Use of these river areas is governed by the Wild and Scenic Rivers Act (16 U.S.C. 1271–1287), as amended by the ANILCA.

Availability of maps: The maps of the Steese National Conservation Area and the White Mountains National Recreation Area included in this notice are generalized depictions of the lands described. Maps at this scale cannot accurately depict the actual boundaries and should be used only as general location references. Persons desiring more detailed information on the National conservation and recreation area boundaries are directed to the maps at the scale of 1:250,000 which are available for review at U.S. Geological Survey map reference libraries in Alaska and at the following locations:

Department of the Interior Library, Room 1140, 18th and C Streets, N.W., Washington, D.C. 20240

Bureau of Land Management, 701 C Street, Anchorage, Alaska 99513

Additionally, the 1:250,000 scale maps are available for sale by the U.S. Geological Survey at the following locations:

U.S. Geological Survey, Alaska, Distribution Section, 101 12th Avenue, Fairbanks, Alaska 99701

U.S. Geological Survey, Public Inquiries Office, 503 National Center, Reston, Virginia 22092

U.S. Geological Survey, Western Distribution Branch, Box 25286—Mail Stop 306, Denver, Colorado 80226

Note.—The legal description in this notice were written from maps at the 1:63,300 scale, where available, and reflect greater detail and accuracy then that depicted on the 1:250,000 scale maps prepared for public use.

The large number of maps necessary to depict the conservation and recreation areas in Alaska at the 1:63,300 scale precludes their reproduction for public use. However, as the U.S. Geological Survey revises individual maps at this scale, the new boundary lines will be depicted. These revised maps will eventually be available through normal USGS sales outlets.

Dated: April 26, 1983.

STEESE NATIONAL CONSERVATION AREA

Subsection 401(b):

"The Steese National Conservation Area shall include approximately one million two hundred twenty thousand acres of public lands, as generally depicted on the map entitled 'Steese National Conservation Area - Proposed' and dated October 1978."

The Steese National Conservation Area consists of the public lands, as defined by the ANILCA within the following boundary:

NORTH UNIT

Beginning at a point between sections 1 and 12, T. 10 N., R. 6 E., Fairbanks Meridian; Thence easterly, between sections 1 and 12, approximately 3,000 feet to the corner of sections 1, 6, 7, and 12, T. 10 N., Rs. 6 and 7 E., Fairbanks Meridian; Thence northerly, between Rs. 6 and 7 E., approximately 1,800 feet to a point on the summit of a ridge between sections 1 and 6, T. 10 N., Rs. 6 and 7 E., Fairbanks Meridian; Thence northeasterly, easterly and southeasterly, along the divide between Beaver Creek, Discovery Creek, North Fork Preacher Creek, and Preacher Creek, approximately 26 miles to the summit of a mountain in the southeasterly portion of section 4, T. 11 N., R. 10 E., Fairbanks Meridian, approximate elevation 3,338 feet; Thence northeasterly and southeasterly, along a ravine and the centerline of an unnamed creek, approximately 4-1/2 miles to the centerline of Preacher Creek in the northwesterly portion of section 18, T. 11 N., R. 11 E., Fairbanks Meridian; Thence northeasterly, along the centerline of Preacher Creek, approximately 10-1/2 miles to the centerline of Rock Creek, located in section 35, T. 12 N., R. 11 E., Fairbanks Meridian; Thence southerly, along the centerline of Rock Creek, approximately 4 miles to a point between sections 14 and 23, T. 11 N., R. 11 E., Fairbanks Meridian; Thence easterly, between sections 14 and 23, 13 and 24, approximately 1-3/4 miles to the corner of sections 13, 18, 19 and 24, T. 11 N., Rs. 11 and 12 E., Fairbanks Meridian; Thence southerly, between Rs. 11 and 12 E., approximately 1/2 mile to the 1/4 section corner of sections 19 and 24, T. 11 N., Rs. 11 and 12 E. Fairbanks Meridian; Thence easterly, along the east and west centerlines of section 19, 20 and 21, approximately 3 miles to the 1/4 section corner of sections 21 and 22, T. 11 N., R. 12 E., Fairbanks Meridian; Thence southerly, between sections 21 and 22, approximately 1/2 mile to the corner of sections 21, 22, 27 and 28, T. 11 N., R. 12 E., Fairbanks Meridian; Thence easterly, between sections 22 and 27, approximately 1/2 mile to the 1/4 section corner of sections 22 and 27, T. 11 N., R. 12 E., Fairbanks Meridian; Thence southerly, along the north and south centerline of section 27, approximately 1/2 mile to the center 1/4 section corner of section 27, T. 11 N., R. 12 E., Fairbanks Meridian; Thence easterly, along the east and west centerlines of sections 27, 26, 25, 30 and 29, approximately 4-1/2 miles to the 1/4 section corner of sections 28 and 29, T. 11 N., R. 13 E., Fairbanks Meridian; Thence southerly between sections 28 and 29, 32 and 33, approximately 1 mile to the 1/4 section corner of sections 32 and 33, T. 11 N., R. 13 E., Fairbanks Meridian; Thence westerly, along the east and west centerline of section 32, approximately 1 mile to the 1/4 section corner of sections 31 and 32, T. 11 N., R. 13 E., Fairbanks Meridian; Thence southerly, between sections 31 and 32, T. 11 N., R. 13 E., 5 and 6, 7 and 8, 17 and 18, 19 and 20, T. 10 N., R. 13 E., approximately 4-1/2 miles to the corner of sections 19, 20, 29 and 30, T. 10 N., R. 13 E., Fairbanks Meridian; Thence westerly, between sections 19 and 30, approximately 1 mile to the corner of sections 19, 24, 25 and 30, T. 10 N., Rs. 12 and 13 E., and T. 9 N., Rs. 12 and 13 E., Fairbanks Meridian; Thence southerly, between T. 10 N., Rs. 12 and 13 E., approximately 8 miles to the standard corner of T. 9 N., Rs. 12 and 13 E., Fairbanks Meridian; Thence westerly, along the Second Standard Parallel North, approximately 2 miles to the standard corner of sections 34 and 35, T. 9 N., R. 12 E., Fairbanks Meridian; Thence northerly, between sections 34 and 35, approximately 3/4 mile to the summit of a ridge, between sections 34 and 35, T. 9 N., R. 12 E., Fairbanks Meridian; Thence westerly, southwesterly, northwesterly, southwesterly, northeasterly, northwesterly and northeasterly, along the divide between the drainages of Preacher Creek, Porcupine Creek, Birch Creek, Faith Creek, Champion Creek, Bear Creek and Beaver Creek, approximately 80 miles to a point between sections 1 and 12, T. 10 N., R. 6 E., Fairbanks Meridian, the place of beginning.

SOUTH UNIT

Beginning at the corner of Tps. 5 and 6 N., Rs. 17 and 18 E., Fairbanks Meridian; Thence northerly between Rs. 17 and 18 E., approximately 6 miles to the corner of Tps. 6 and 7 N., Rs. 17 and 18 E., Fairbanks Meridian; Thence westerly, between Tps. 6 and 7 N., approximately 48 miles to the corner of Tps. 6 and 7 N., Rs. 9 and 10 E., Fairbanks Meridian; Thence southerly, between Rs. 9 and 10 E., approximately 6 miles to the corner of Tps. 5 and 6 N., Rs. 9 and 10 E., Fairbanks Meridian; Thence westerly, between Tps. 5 and 6 N., approximately 6 miles to the corner of Tps. 5 and 6 N., Rs. 8 and 9 E., Fairbanks Meridian; Thence southerly, between Rs. 8 and 9 E., approximately 6 miles to the standard corner of T. 5 N., Rs. 8 and 9 E., Fairbanks Meridian; Thence easterly, along the First Standard Parallel North, approximately 11-1/4 miles to the closing corner of T. 4 N., Rs. 10 and 11 E., Fairbanks Meridian; Thence southerly, between Rs. 10 and 11 E., approximately 11-3/4 miles to the top of a ridge located between sections 31 and 36, T. 3 N., Rs. 10 and 11 E., Fairbanks Meridian, approximate elevation 2,900 feet; Thence easterly, northeasterly, southeasterly and northwesterly, along the crest of a ridge encompassing the southerly watershed of Birch Creek, approximately 86 miles to the point between sections 1 and 6, T. 5 N., Rs. 17 and 18 E., Fairbanks Meridian, approximate elevation 3,400 feet; Thence northerly, between Rs. 17 and 18 E., approximately 1/2 mile to the corner of Tps. 5 and 6 N., Rs. 17 and 18 E., Fairbanks Meridian, the place of beginning.

The above description was determined from the following U.S. Geological Survey 1:63,360 scale topographic maps:

UMI 1983 MAY 3 ISS 86 VOL 48

WHITE MOUNTAINS NATIONAL RECREATION AREA

Section 403:

"There is hereby established the White Mountains National Recreation Area containing approximately one million acres of public land, as generally depicted on the map entitled 'White Mountains National Recreation Area-Proposed,' and dated October 1978."

The White Mountains National Recreation Area consists of public lands, as defined by the ANILCA, within the following boundary:

Beginning at the corner of sections 25, 26, 35 and 36, T. 12 N., R. 1 W., Fairbanks Meridian; Thence easterly, between sections 25 and 36, approximately 1 mile to the corner of sections 25, 30, 31 and 36, T. 12 N., Rs. 1 E. and 1 W., Fairbanks Meridian; Thence northerly, between T. 12 N., Rs. 1 E. and 1 W., approximately 3,000 feet to a point on the summit of a ridge between sections 25 and 30, T. 12 N., Rs. 1 E. and 1 W., Fairbanks Meridian; Thence northeasterly and easterly, along the divide between the Yukon River and Victoria Creek drainages approximately 31 miles to the summit of a mountain located in the easterly portion of section 7, T. 12 N., R. 5 E., Fairbanks Meridian, approximate elevation 2,905 feet; Thence on an approximate forward bearing of N. 72° E., approximately 1/2 mile to the headwaters of Glacier Creek located near the center of section 8, T. 12 N., R. 5 E., Fairbanks Meridian; Thence southeasterly, along the centerline of Glacier Creek approximately 6-1/2 miles to a point on the right bank of Victoria Creek at the line of mean high water located in the northwesterly portion of section 2, T. 11 N., R. 5 E., Fairbanks Meridian; Thence southeasterly, along the right bank of Victoria Creek, approximately 1/2 mile to a point on the right bank of Beaver Creek at the line of mean high water located in the southerly portion of section 2, T. 11 N., R. 5 E., Fairbanks Meridian; Thence northeasterly, along the right bank of Beaver Creek approximately 3 miles to the centerline of Moose Creek located in section 31, T. 12 N., R. 6 E., Fairbanks Meridian; Thence southeasterly, along the centerline of Moose Creek, approximately 9 miles to a point between sections 2 and 11, T. 10 N., R. 6 E., Fairbanks Meridian; Thence easterly, between sections 2 and 11, 1 and 12, approximately 1/2 mile to the summit of a ridge between sections 1 and 12, T. 10 N., R. 6 E., Fairbanks Meridian; Thence southwesterly, southeasterly, southerly, westerly, and southwesterly along the ridge line between the Preacher Creek, Chatanika River and Beaver Creek drainages, approximately 79 miles to a point between sections 4 and 33, Tps. 4 and 5 N., R. 1 E., Fairbanks Meridian; Thence westerly, along the First Standard Parallel North, approximately 14-1/2 miles to the summit of a ridge on the south boundary of section 36, T. 5 N., R. 3 W., Fairbanks Meridian; Thence northerly, along the ridge line, between the Tolovana River and Wickersham Creek, Colorado Creek drainages, approximately 35 miles to a point between sections 16 and 17, T. 9 N., R. 1 W., Fairbanks Meridian; Thence northerly, between sections 16 and 17, 8 and 9, 4 and 5, T. 9 N., R. 1 W., and sections 32 and 33, 28 and 29, 20 and 21, 16 and 17, 8 and 9, approximately 7-1/2 miles to the 1/4 section corner of sections 8 and 9, T. 10 N., R. 1 W., Fairbanks Meridian; Thence easterly, on the east and west centerline of section 9, approximately 1 mile to the 1/4 section corner of sections 9 and 10, T. 10 N., R. 1 W., Fairbanks Meridian; Thence northerly, between sections 9 and 10, 3 and 4, approximately 1-1/2 miles to the corner of sections 3, 4, 33 and 34, Tps. 10 and 11 N., R. 1 W., Fairbanks Meridian; Thence easterly, between Tps. 10 and 11 N., approximately 1-1/2 miles to the 1/4 section corner of sections 2 and 35, Tps. 10 and 11 N., R. 1 W., Fairbanks Meridian; Thence northerly, on the northand south centerlines of sections 35 and 26, approximately 2 miles to the 1/4 section corner of sections 23 and 26, T. 11 N., R. 1 W., Fairbanks Meridian; Thence easterly between sections 23 and 26, approximately 1/2 mile to the corner of sections 23, 24, 25 and 26, T. 11 N., R. 1 W., Fairbanks Meridian; Thence northerly between sections 23 and 24, 13 and 14, 11 and 12, 1 and 2, T. 11 N., R. 1 W., sections 35 and 36, approximately 5 miles to the corner of sections 25, 26, 35 and 36, T. 12 N., R. 1 W., Fairbanks Meridian, the place of beginning.

Units of the National Wild and Scenic Rivers System

Section 603

"Alagnak, Alaska.—Those segments or portions of the main stem and Nonvianuk tributary lying outside and westward of the Katmai National Park/Preserve and running to the west boundary of Township 13 South, Range 43 West."

"Beaver Creek, Alaska.—The segment of the main stem from the vicinity of the confluence of the Bear and Champion Creeks downstream to its exit from the northeast corner of Township 12 North, Range 6 East, Fairbanks Meridian, within the White Mountains National Recreation Area, and the Yukon Flats National Wildlife Refuge."

"Birch Creek, Alaska.—The segment of the main stem from the south side of Steese Highway in Township 7 North, Range 10 East, Fairbanks Meridian, downstream to the south side of the Steese Highway in Township 10 North, Range 16 East."

"Delta, Alaska.—The segment from and including all of the Tangle Lakes to a point one-half mile north of Black Rapids."

"Fortymile, Alaska.—The main stem within the State of Alaska; O'Brien Creek; South Fork; Napoleon Creek; Franklin Creek; Uhler Creek; Walker Fork downstream from the confluence of Liberty Creek; Wade Creek; Mosquito Fork downstream from the vicinity of Kechumstuk; West Fork Dennison Fork downstream from the confluence of Logging Cabin Creek; Dennison Fork downstream from the confluence of the West Fork Dennison Fork; Logging Cabin Creek; North Fork; Hutchinson Creek; Champion Creek; the Middle Fork downstream from the confluence of Joseph Creek; and Joseph Creek."

"Gulkana, Alaska.—The main stem from the outlet of Paxson Lake in Township 12 North, Range 2 West, Copper River Meridian, to the confluence with Sourdough Creek; the south branch of the west fork from the outlet of an unnamed lake in sections 10 and 15, Township 10 North, Range 7 West, Copper River Meridian, to the confluence with the west fork; the north branch from the outlet of two unnamed lakes, one in sections 24 and 25, the second in sections 9 and 10, Township 11 North, Range 8 West, Copper River Meridian, to the confluence with the west fork; the west fork from its confluence with the north and south branches downstream to its confluence with the main stem; the middle fork from the outlet of Dickey Lake in Township 13 North, Range 5 West, Copper River Meridian, to the confluence with the main stem."

"Unalakleet, Alaska.—The segment of the main stem from the headwaters in township 13 south, range 3 west, Kateel River meridian extending downstream approximately 65 miles to the western boundary of township 18 south, range 8 west."

Wild Rivers: Subsection 605(b)

"The Alagnak, Beaver Creek, Birch Creek, Gulkana, and Unalakleet components as well as the segment of the Delta component from the lower lakes area to a point opposite milepost 212 on the Richardson Highway; the Mosquito Fork downstream from the vicinity of Kechemstuk to Ingle Creek, North Fork, Champion Creek, Middle Fork downstream from the confluence of Joseph Creek and Joseph Creek segments of the Fortymile component are hereby classified and designated and shall be administered as wild river areas pursuant to the Wild and Scenic Rivers Act. The classification as wild river areas of certain segments of the Fortymile by this subsection shall not preclude such access across those river segements as the Secretary determines to be necessary to permit commercial development in an environmentally sound manner, of asbestos deposits in the North Fork drainage."

Scenic Rivers: Subsection 605(c)

"The following segments of the Fortymile River component are hereby classified and shall be administered as scenic river areas pursuant to such Act: the main stem within the State of Alaska; O'Brien Creek; South Fork; Napoleon Creek; Franklin Creek; Uhler Creek; Walker Fork downstream from the confluence of Liberty Creek; West Fork Dennison Fork downstream from the confluence of Logging Cabin Creek; Dennison Fork downstream from the confluence of West Fork Dennison Fork; Logging Cabin Creek; and Hutchinson Creek."

Recreation Rivers: Subsection 605(c)

"The Wade Creek unit of the Fortymile component and the segment of the Delta River from opposite Milepost 212 on the Richardson Highway to a point one-half mile north of Black Rapids are classified and shall be administered as recreational river areas pursuant to such Act."

Note.—The boundaries of designated wild and scenic river corridors are to be identified and described by December 2, 1983.

Designated Study Rivers

The corridors withdrawn during the course of the study and consideration by Congress consist of those public lands which constitute the bed or bank or are within an area extending two miles from the bank of the river channel on both sides of the following rivers:

Subsection 604(a)

Colville, Alaska:—From the confluence of Storm and Thunder Creeks in T. 7 S., R. 35 W., Umiat Meridian to its outlet into the Arctic Ocean in T. 13 N., R. 6 E., Umiat Meridian.

Etiviluk-Nigu, Alaska:—The Etiviluk from its headwaters in T. 33 N., R. 9 E., Kateel River Meridian, to its confluence with the Colville River in T. 6 S., R. 17 W., Umiat Meridian; the Nigu from where it crosses the boundary of Gates of the Arctic National Park in T. 30 N., R. 14 E., Kateel River Meridian, to its confluence with the Etiviluk River in T. 10 S., R. 19 W., Umiat Meridian.

Utukok, Alaska:—From the confluence of Tupik and Kogruk Creeks in T. 10 S., R. 39 W., Umiat Meridian to its outlet into Kasegaluk Lagoon in T. 8 N., R. 42 W., Umiat Meridian.

Melozitna, Alaska:—From its headwaters in T. 14 N., R. 25 W., Fairbanks Meridian to its confluence with the Yukon River in T. 8 S., R. 17 E., Kateel River Meridian.

Yukon, Alaska:—From the east boundary of T. 12 N., R. 11 W., Fairbanks Meridian, to the west boundary of T. 4 N., R. 19 W., Fairbanks Meridian.

Squirrel, Alaska:—From its headwaters at the north boundary of sections 22 and 23, T. 23 N., R. 14 W., Kateel River Meridian, to its confluence with the Kobuk River in T. 18 N., R. 8 W., Kateel River Meridian.

Koyuk, Alaska:—From where it crosses the east boundary of Bering Land Bridge National Preserve in T. 1 S., R. 20 W., Kateel River Meridian, to its outlet into Norton Bay in T. 6 S., R. 12 W., Kateel River Meridian.

Federal Emergency Management Agency

Plan for Carrying Out Emergency Food and Shelter Program

FEDERAL EMERGENCY MANAGEMENT AGENCY

Plan for Carrying Out Emergency Food and Shelter Program

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice sets out the text of a plan by which the National Board, created by Pub. L. 98–8, will conduct a program for distributing $50,000,000 to local private voluntary organizations for the purpose of delivering emergency food and shelter to needy individuals.

The initial grant to the National Board was made April 20, 1983.

DATED: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Karen Keefer, Individual Assistance Division, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, D.C. 20472; (202) 287–0567.

Dennis H. Kwiatkowski,

Chairman, National Board.

Foreword

In accordance with Pub. L. 98–8, the Jobs Stimulus Bill, a National Board has been formed to distribute $50 million to local private voluntary organizations for the purpose of delivering emergency food and shelter to needy individuals. The National Board is composed of representatives of the United Way of America, the Salvation Army, the National Council of Churches, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross and the Federal Emergency Management Agency (FEMA).

This Plan has been developed by the National Board to outline the procedures, eligibility, roles and responsibilities in receiving the $50 million grant from FEMA and distributing it to local service providers.

A separate plan was prepared for the distribution of another $50 million awarded by FEMA in grants to States, for distribution to local entities involved in the delivery of emergency food and shelter to needy individuals.

1.0. Introduction

Public Law 98–8, signed by the President on March 24, 1983, provides for emergency expenditures that will meet urgent needs and protect and add to the national wealth by providing productive jobs, not make-work, for women and men; providing for the indigent and homeless through fiscal year 1983; and accomplishing other purposes. Under this law, the Federal Emergency Management Agency (FEMA) is responsible for carrying out an Emergency Food and Shelter Program.

A total of $100 million has been appropriated for this program. Half of this appropriation ($50 million) is to be provided as a grant for use by a National Board, which will be chaired by FEMA and consist of representatives of the United Way of America; the Salvation Army; the National Council of Churches; the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., the American Red Cross and FEMA. The remaining half ($50 million) will be used to provide food and shelter through grants to the States which will distribute funds to local recipients. All grants are to be awarded within 30 days after enactment of Pub. L. 98–8; all funds are to be expended by September 30, 1983.

1.1. Purpose

This plan details the National Board's roles, responsibilities and implementation procedures in regard to the $50 million grant award from FEMA. The funds will be used to provide emergency food and shelter to needy individuals through local boards and private voluntary organizations.

1.2. Scope

The program is nationwide in scope and will provide emergency food and shelter assistance to needy individuals in areas that are in highest-need.

Due to the emergency nature of this program, Congress designated the agencies named on this National Board because of their past longstanding service in this area. Since there are a number of local agencies that have the ability to deliver services and which are not associated with a national organization, local participation in the program is not limited to private voluntary organizations that are part of a national organization.

1.3. Objectives

A. National Board—To identify areas having the highest need for food and shelter assistance, to determine the amount and distribution of funds to these areas, and to ensure that funds are used to supplement existing programs, not replace them.

B. Local Board—To determine which private voluntary organizations in an area receive grants and recommend amount of the grants, based on the award by the National Board.

C. Local Private Voluntary Organizations—To expend all funds by September 30, 1983, on emergency food and shelter for needy individuals.

1.4. Lead Agency Responsibilities

A. The Director of the Federal Emergency Management Agency (FEMA) constituted a National Board consisting of seven members. The United Way of America, the Salvation Army, the National Council of Churches, the National Conference of Catholic Charities, the Council of Jewish Federations, Inc., The American Red Cross and the Federal Emergency Management Agency have each designated a representative to sit on the National Board. The representative of FEMA chairs the National Board, using parliamentary procedures as the mode of operation and consensus by the National Board.

B. The FEMA Director shall award a grant for $50 million to the National Board no later than April 23, 1983, for the purpose of providing emerency food and shelter to needy individuals through private voluntary organizations.

C. FEMA will conduct an audit of fund utilization after September 30, 1983, at which time all funds shall have been expended.

2.0. Concept of Operations

A. Funds distributed by the National Board will be to areas of greatest need. The formula for distribution is in section 2.1.B.

B. National Board funds will be distributed directly to local private voluntary organizations certified eligible by local boards. (Refer to section 2.1.D.)

C. There is an administrative cost limitation of 2% on the $50 million. The National Board and its member national agencies will not charge for administrative costs incurred, except for audit costs. The remainder of the $50 million will go directly to local private voluntary organizations, which will be advised of the amount available for administrative costs associated directly with their emergency food and shelter program. The National Board encourages local boards and service providers to waive administrative costs, where possible.

None of these monies may be used as reimbursement for administrative costs any of their parent organizations (or its chapters) might incur as a result of this additional funding. (See item 2.1.F.—Eligibility Costs.)

D. FEMA will award a $50 million grant to the National Board no later than April 23, 1983, which is thirty days after enactment of Pub. L. 98–8.

E. The National Board will begin to distribute funds to local private voluntary organizations no later then May 31, 1983. Unused or recaptured funds will be reallocated among the original communities of highest need by July 1, 1983.

F. All funds shall be expended by recipient entities by September 30, 1983.

2.1. General Guidelines

A. *Grant Award Process:* United Way of America has been designated by the National Board as fiscal agent of the Board. The grant awarded to the National Board will provide for an advance for checks to be written to local private voluntary organizations.

Funds distributed directly to local private voluntary organizations will be in accordance with terms and conditions established by the National Board.

B. *Designation of Target Areas:* Local areas of highest need will be selected to receive funds from the National Board based upon a series of considerations including the most recent available unemployment statistics by the Department of Labor and such other data as the National Board deems appropriate. A notice will be placed in the **Federal Register** listing the civil jurisdictions that are selected and the dollar amount each has been awarded.

The calculation for distributing funds to an area will be based on the number of unemployed expressed as a percentage of the total unemployed within the civil jurisdiction selected.

C. *Formation of Local Boards:* As provided in Pub. L. 98–8, each area designated by the National Board to receive funds shall constitute a local board with representatives, to the extent practicable, including, but not limited to, the same organizations represented on the National Board, except that the mayor or appropriate head of government will replace the FEMA member. The National Board has designated the local United Way to constitute and convene a local board as described above. In the event the local United Way does not convene the board, the local American Red Cross will be responsible for convening the initial meeting of the local board. The members of each local board will elect its chair.

Local boards will have 15 days after notification of selection by the National Board to receive funds in which to certify the capability of selected local private voluntary organizations. After 30 days, if a local board is unable to satisfy the National Board as to the local area's capability to utilize funds in accordance with this Plan, the National Board may reallocate the funds to areas of greatest need.

The chair of the local board will be the central point of contact between the National Board and the local private voluntary organizations selected to receive monetary assistance for the emergency food and shelter programs. To ensure program coordination, the chair of the local board will contact the State agencies through which surplus food is being distributed by the U.S. Department of Agriculture pursuant to authorities under Pub. L. 98–8 and other applicable authorities, and the chair will likewise contact the Governor's agency designated to distribute funds through FEMA's State Grant program for Emergency Food and Shelter authorized by Pub. L. 98–8.

The local boards also will be responsible for monitoring programs carried out by the local private voluntary organizations they have selected to receive funds. By October 31, 1983, local boards must provide the National Board with a detailed program report of accomplishments and accounting of all funds expended in that area.

D. *Selection of Recipient Organizations:* Due to the emergency nature of this program, Congress designated the agencies named on this National Board because of their past longstanding service in providing emergency food and shelter. In selecting local recipient organizations to receive funds distributed by the National Board, the local boards must consider the demonstrated capability of the organization to provide food and shelter assistance. The local board has the authority to determine which local organizations will receive and provide the assistance. For a local organization to be eligible for consideration it must: (1) Be non-profit, (2) have a voluntary board, (3) have an accounting system, conduct an annual audit and (4) practice nondiscrimination.

In case there is a local religious or service organization or agency with the capacity to deliver food or shelter, but which does not have an adequate accounting system but meets all the other criteria, the local board may authorize funds to be channeled through an agency which does have an adequate accounting system and meets all the criteria.

Each local board will complete a certification for the use of funding for food and sheltering purposes. A suggested certification form for local board use will be sent to the chair of the local board in care of the local United Way (or American Red Cross) when notified that the area has been selected as a target area for assistance.

E. *Program Funds:* FEMA will award $50 million to the National Board no later than April 23, 1983. The National Board has agreed that the United Way of Americal shall act as the Board's fiscal agent of the funds awarded to the Board. The Board has also agreed that the United Way of America shall act as the Board's secretariat and perform the necessary administrative duties that the Board must accomplish. The United Way of America has volunteered to provide these administrative services without reimbursement to ensure the maximum dollars available for local programs.

The calculation the National Board uses in determining its fund distribution to designated local areas is based on a ratio calculated as follows: Number of unemployed within an eligible area *divided by* the number of unemployed covered by the national program *equals* the area's percentage of $50 million (less audit costs).

$$\frac{\text{Number unemployed in area}}{\text{Number unemployed in all designated areas}} = \text{Area's \% of \$50 million less audit costs}$$

F. *Eligibility of Costs:* This appropriation is intended for the purchase of food and provision of shelter, to supplement and extend current available resources and not for substitution or reimbursement for ongoing programs and services. However, in supplementing current available resources, the following guidance is provided.

1. Eligible program costs include, but are not limited to—

a. Purchase of food and/or transportation expenses for mass feeding;

b. Purchase of supplies incidental to feeding (e.g., utensils or pots and pans);

c. Direct expenses associated with mass shelter (e.g., rent, cots, blankets and other supplies);

d. Emergency lodging or shelter costs (e.g., hotel or motel expenses, only if the local recipient organization provides emergency shelter by using a voucher or cash payment system and only where extreme need arises); and

e. Once only, limited, emergency rent or mortgage assistance (one-month maximum) to avoid immediate eviction when no other resources or assistance exists.

2. Eligible administration costs (limited to 2% of total finds received) include, but are not limited to,

a. Audit expenses;

b. Printing and reproduction costs (to advertise/publicize program availability); and

c. Overhead expenses associated with expanded services (e.g., utilities or leasing costs).

3. Ineligible costs include, but are not limited to,

a. Rent or mortgage subsidies, cash payments (except for emergency lodging costs as noted above), and real property and equipment purchases (land, building, vehicles, or major equipment); and

b. Indirect administrative costs, e.g., procurement services, travel, personnel services (salaries, overtime, fringe benefits), budgeting and payroll preparation.

4. No expenditures will be accepted as eligible costs if they are made prior to the date of the award (i.e., the date the National Board signs the award) to the local recipient organization.

5. In extreme cases, exemptions to the above may be requested in advance from the National Board.

2.2. Roles and Responsibilities

A. *FEMA's Responsibilities:*

1. Constitute a National Board.

2. Chair the National Board.

3. Provide guidance, coordination and staff assistance to Board.

4. Award $50 million to the National Board no later than April 23, 1983.

5. Conduct an audit of funds in accordance with the audit plan submitted by the National Board.

B. *National Board Responsibilities:*

1. Determine how funds are to be distributed to individual localities.

2. Develop this operational plan for distributing funds and establishing criteria for expenditure of funds.

3. Notify local United Way in areas selected for funding and send copies of the notification to local agencies which are represented on the National Board and to heads of government of areas selected to receive funds. Secure certification from local boards that funds will be used in accordance with established criteria.

4. Distribute funds to selected local private voluntary organizations.

5. Within 60 days following the grant award, submit to FEMA an audit plan.

6. Submit end-of-program report on localities' uses of funds to FEMA by November 30, 1983.

C. *Responsibility of Local United Way (or American Red Cross):*

1. Constitute a local board.

2. Convene initial meeting.

D. *Local Board's Responsibilities:*

1. Elect a chair.

2. Determine which local private voluntary organizations should receive grants and the amount of the grants.

3. Certify eligibility of local private voluntary organizations.

4. Provide technical assistance to potential service providers.

5. Monitor expenditures of funds at local level.

6. Coordinate local food distribution with state agencies which already administer the U.S. Department of Agriculture's surplus food distribution programs.

7. Coordinate any State grant allocations in the local area with the state agency designated to distribute those funds.

8. Submit reports to the National Board on expenditures and local private voluntary organizations' programs by August 15 (for period through July 31), September 15 (through August 31), and October 31 (through end-of-program, September 30).

9. Return any funds unexpended by September 30, 1983 to the National Board.

10. Advertise/publicize program and consider all private voluntary organizations providing emergency food and shelter assistance, not just those represented on the local board.

3.0. Reporting Requirements

Local boards will monitor local private voluntary organizations' expenditures of funds and submit interim reports on August 15 and September 15, and a detailed accounting of these expenditures in the form of an end-of-program report to the National Board by October 31, 1983.

The National Board will compile the reports it receives from the local boards and submit a detailed accounting of areas' use of monies in the form of a report to FEMA by November 30, 1983.

FEMA's Inspector General will conduct an audit of the expenditure of funds used under the appropriation for the food distribution and emergency shelter program. The SL/DA/IA program office in FEMA will prepare a report for the FEMA Director. The FEMA Director will prepare a report to Congress.

4.0. Amendments to Plan

The National Board reserves the right to amend this Plan at any time.

Annex 2.1—Financial Terms and Conditions

General Provisions for Assistance (Grant) Agreements

Provisions Applicable to the United Way of America Acting as Agent of the National Board

1. *Parties:* This instrument is entered into by the Federal Emergency Management Agency (FEMA), the National Board authorized by Pub. L. 98-8 to distribute money for the provision of food and shelter assistance, and the United Way of America, which is acting as the fiscal agent of the National Board in distributing these funds.

2. *Amendments:* This instrument may be amended at any time by a written modification. Amendments which reflect the rights and obligations of any of the parties shall be executed by FEMA, the National Board, and the United Way of America, acting as the fiscal agent for the National Board. Administrative amendments such as changes in appropriation data may be issued unilaterally by the Federal Emergency Management Agency (FEMA).

3. *Cash Depositories:*

a. Any money advanced to the United Way of America under the terms of this instrument must be deposited in an interest bearing account which will be segregated from all other accounts which the United Way of America maintains. In addition, such money must be deposited in a bank with Federal Deposit Insurance Corporation (FDIC) insurance coverage, and the balance exceeding FDIC coverage must be collaterally secured.

b. Consistent with the national goal of expanding the opportunities for minority business enterprises, the United Way of America and the local private voluntary organizations to which it distributes funds are encouraged to use minority banks (a bank which is owned at least 50 percent by minority group members). A list of minority owned banks can be obtained from the Office of Minority Business Enterprises, Department of Commerce, Washington, D.C. 20230.

4. *Retention and Custodial Requirements for Records:*

a. Financial records, supporting documents, statistical records, and all other records pertinent to this instrument shall be retained for a period of three years, with the following exceptions:

(1) If any litigation, claim or audit is started before the expiration of the three-year period, the records shall be retained until all litigation claims, or audit findings involving the records have been resolved.

(2) Records for nonexpendable property, if any, acquired with Federal funds shall be retained for three years after its final disposition.

(3) When records are transferred to or maintained by FEMA, the three-year retention requirement is not applicable to the United Way of America.

b. The retention period starts from the date of the submission of the United Way of America of the final expenditure report.

c. FEMA will request transfer of certain records to its custody from the United Way of America when it determines that the records possess long-term retention value. The United Way of America shall make such transfers as are requested. However, in order to avoid duplicate recordkeeping, FEMA may make arrangements with the United Way of America to retain records at the point of use, for those that are continuously needed during the progress of work.

d. The Director of FEMA and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any pertinent books, documents, papers, and records of the recipient, and its subgrantees, to make audits, examinations, excerpts and transcripts.

5. *Financial Management Systems:* The National Board and the United Way of America shall maintain a financial management system that provides for the following:

a. Accurate, current and complete disclosures of the financial results of this instrument.

b. Records that identify adequately the source and application of funds for Federally supported activities. These reports shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays and incomes.

c. Effective control over and accountability for all funds, property and other assets.

d. A comparison of actual outlays with budgeted amounts and the relationship of specific performance and costs incurred.

e. Procedures to minimize the time elapsing between the transfer of funds to the United Way of America and disbursement by the United Way of America when advances are used.

f. Procedures for determining reasonableness, allowability and allocability of costs in accordance with the provisions of the National Board's Emergency Food and Shelter Plan.

g. Accounting records that are supported by source documentation.

h. A systematic method to assure timely and appropriate resolution of audit findings and recommendations.

6. *Audit Requirements:*

a. The National Board shall use its own procedures to arrange for independent audits, and to prescribe the scope of audits.

b. The provisions hereunder do not limit the authority of Federal agencies to make audits of recipient organizations. However, if independent auditors arranged for by the National Board meet the General Accounting Office (GAO) principles and standards, the FEMA Inspector General shall rely on them, and any additional audit work shall build upon the work already done.

c. Audits shall be made in accordance with the GAO Standards for Audits of Governmental Organizations, Programs, Activities and Functions, the Guidelines for Financial and Compliance Audits of Federally Assisted Programs, and generally accepted auditing standards established by the American Institute of Certified Public Accountants.

d. The National Board shall complete an audit of the program to coincide with the next scheduled audit of the National Board's Fiscal Agent.

e. The auditor shall promptly notify FEMA and the National Board of any irregularities discovered. Irregularities include such matters as conflicts of interest, falsification of records or reports, and misappropriation of funds or other assets.

f. Work papers and reports shall be retained for a minimum of three years from the date of the audit report unless the auditor is notified in writing by FEMA of the need to extend the retention period. The audit workpapers shall be made available upon request to FEMA or its designees and the General Accounting Office or its designees.

g. Within 60 days of receipt of the award the National Board will submit to FEMA for its approval a plan for auditing the program.

7. *Payment:* Payment shall be made to the United Way of America, acting as agent for the National Board, through an advance by Treasury check. Cash advances shall be limited to the amounts necessary for the immediate disbursement needs and shall be timed to be in accord with the cash requirements of the United Way of America in carrying out the purposes of the program. The United Way of America shall initiate the cash advance by submitting Standard Form 270, Request for Advance or Reimbursement.

8. *Financial Reporting Requirements:* The United Way of America, acting as agent for the National Board, shall submit an original and two copies of a Financial Status Report (Standard Form 269) on the following dates:

a. June 10, 1983. This report will cover the period ending May 30, 1983.

b. Ninety (90) calendar days after the end date of the grant.

9. *Closeout Procedures:*

a. The following definitions shall apply:

(1) Closeout—the closeout of this instrument is the process by which FEMA determines that all applicable administrative actions and all required work of the instrument have been completed by the United Way of America and FEMA.

(2) Date of completion—the date on which all work under the instrument is completed or the date in the award document, or any supplement or amendment thereto (including termination notices subject to the clause entitled Suspension and Termination Procedures), on which Federal assistance ends.

(3) Disallowed costs—disallowed costs are those charges to the instrument that FEMA determines to be unallowable in accordance with the applicable Federal cost principles or other conditions contained in the instrument. The applicable cost principles are contained in OMB Circular A-122, "Cost Principles for Non-Profit Oganizations."

b. The parties shall close out this instrument in accordance with the following procedures:

(1) The United Way of America, acting as agent for the National Board, shall immediately refund any balance of unobligated (unencumbered) funds that FEMA has advanced or paid and that is not authorized by FEMA to be retained by the United Way of America for use in other instruments.

(2) The United Way of America, acting as agent for the National Board, shall submit to FEMA within 90 days after completion of this instrument all financial and other data required by FEMA to close out the instrument. FEMA may grant extensions when requested by the National Board.

(3) In the event a final audit has not been performed prior to the close out of the instrument, FEMA shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

10. *Suspension and Termination Procedures:*

a. The following definitions shall apply:

(1) Termination—termination of this instrument means the cancellation of Federal assistance, in whole or in part, under the instrument at any time prior to the date of completion.

(2) Suspension—the suspension of this instrument is an action by FEMA that temporarily suspends Federal assistance under the instrument pending corrective action by the National Board or pending a decision to terminate the instrument by FEMA.

Annex 2.2—Financial Terms and Conditions

Provisions Applicable to Local Private Voluntary Organizations

1. *Definitions:*

a. The term "Recipient" refers to the Local Private Voluntary Organization that will receive any award of funds from the National Board.

b. The term "Award" refers to the award of funds made by the National Board to a Local Private Voluntary Organization.

2. *Amendments:* An award may be amended at any time by a written modification. Amendments which reflect the rights and obligations of either party shall be executed by both the National Board and the recipient. Administrative amendments such as changes in accounting data may be issued unilaterally by the National Board.

3. *Cash Depositories:*

a. Any money advanced to the recipient under the terms of this award must be deposited in a bank account which will be segregated from all other accounts which the recipient maintains. Such account must be in a bank with Federal Deposit Insurance Corporation (FDIC) insurance coverage, and the balance exceeding the FDIC coverage must be collaterally secured.

b. The recipient is encouraged to use minority banks (a bank which is owned at least 50 percent by minority group members). This is consistent with the national goal of expanding the opportunities for minority business enterprises. A list of minority owned banks can be obtained from the Office of Minority Business Enterprises, Department of Commerce, Washington, D.C. 20230.

4. *Retention and Custodial Requirements for Records:*

a. Financial records, supporting documents, statistical records, and all other records pertinent to the award shall be retained for a period of three years, with the following exceptions:

(1) If any litigation, claim or audit is started before the expiration of the three-year period, the records shall be retained until all litigation claims, or audit findings involving the records have been resolved.

(2) Records for nonexpendable property, if any, acquired with Federal funds shall be retained for three years after submission of a final Financial Report. Non-expendable property is defined as tangible property having a useful life of more than one year and an acquisition cost of more than $300 per unit.

(3) When records are transferred to or maintained by the National Board, the three-year retention requirement is not applicable to the recipient.

b. The retention period starts from the date of the submission by the recipient of the final expenditure report.

c. The National Board may request transfer of certain records to its custody from the recipient when it determines that the records possess long-term retention value. The recipient shall make such transfers as are requested. However, in order to avoid duplicate recordkeeping, the National Board may make arrangements with the recipient to retain records at the point of use, for those that are continuously needed during the progress of work.

d. The Director of FEMA, the Comptroller General of the United States, and the National Board, or any of their duly authorized representatives, shall have access to any pertinent books, documents, papers, and records of the recipient, and its subgrantees, to make audits, examinations, excerpts and transcripts.

5. *Financial Management Systems:* The recipient shall maintain a financial management system that provides for the following:

a. Accurate, current and complete disclosures of the financial results of this instrument.

b. Records that identify adequately the source and application of funds for Federally supported activities. These reports shall contain information pertaining to Federal awards, authorizations, obligations, unobligated balances, assets, outlays and incomes.

c. Effective control over and accountability for all funds, property and other assets.

d. Procedures for determining reasonableness, allowability and allocability of costs in accordance with the provisions of the National Board's Emergency Food and Shelter Plan.

e. Accounting records that are supported by source documentation. As a minimum, the PVO's must maintain a register of cash receipts and disbursements and original supporting documentation such as purchase orders, invoices, cancelled checks and whatever other documentation is necessary to support their cost under the program.

f. A systematic method to assure timely and appropriate resolution of audit findings and recommendations.

6. *Audit Requirements:* The Local Private Voluntary Organization shall arrange for an audit of funds of coincide with the next scheduled annual audit of its financial affairs. An original and 2 copies of this audit will be provided to the National Board upon its requests.

7. *Payment:* Payment shall be made to the Private Voluntary Organization by the United Way of America, acting as the fiscal agent of the National Board, through issuance of a check drawn on funds advanced by FEMA.

8. *Financial Reporting Requirements:* Recipient shall submit a final Financial Status Report within 30 calendar days after the end date of the award. The National Board shall provide the recipient with the necessary forms.

9. *Closeout Procedures:*

a. The following definitions shall apply:

(1) Closeout—is the process by which the National Board determines that all applicable administrative actions and all required work of the award have been completed by the recipient and the National Board.

(2) Date of completion—the date on which all work under the award is completed or the date in the award document, or any supplement or amendment thereto (including termination notices subject to the clause entitled Suspension and Termination Procedures), on which Federal assistance ends.

(3) Disallowed costs—disallowed costs are those charges that the National Board determines to be unallowable in accordance with the National Board Plan and applicable Federal cost principles or other conditions contained in the award. The applicable cost principles are contained in OMB Circular A–122, "Cost Principles Applicable for Non-Profit Agencies." A copy of this document can be obtained from the Government Printing Office, Washington, D.C. 20401.

b. The parties shall close out this award in accordance with the following procedures:

(1) The recipient shall immediately refund any balance of unobligated (unencumbered) funds that the National Board has advanced or paid and that is not authorized by the National Board to be retained by the recipient for use in other award.

(2) The recipient shall submit to the National Board (NB) within 30 days after completion of the award all financial and other data required by the NB to closeout the award. The NB may grant extensions when requested by the recipient.

(3) In the event a final audit has not been performed prior to the close out of the award, the NB shall retain the right to recover an appropriate amount after fully considering the recommendations on disallowed costs resulting from the final audit.

10. *Suspension and Termination Procedures:*

a. The following definitions shall apply:

(1) Termination—termination of this award means the cancellation of Federal assistance, in whole or in part, under the award at any time prior to the date of completion.

(2) Suspension—the suspension of this award is an action by the National Board that temporarily suspends Federal assistance under the award pending corrective action by the recipient or pending a decision to terminate the award by the National Board.

Federal Highway Administration

23 CFR Ch. 1

[FHWA Docket No. 83-4, Notice No. 5]

Truck Size Policy Statement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of modifications to certain interim designated highway networks.

SUMMARY: The Federal Highway Administration (FHWA) made an interim designation of each State's Federal-aid Primary System highways on April 5, 1983. These roads were to be made available to certain size trucks from April 6 until issuance of the final regulation pursuant to the requirements of the Surface Transportation Assistance Act of 1982 (STAA). By this notice the FHWA provides modifications to the interim designated highway networks for the States of California, Delaware, Illinois, Iowa, Maine, Missouri, Nebraska, New York, Puerto Rico, South Carolina, West Virginia, and Wisconsin.

EFFECTIVE DATE: The modifications are effective May 3, 1983, and will expire upon designation of the final network.

FOR FURTHER INFORMATION CONTACT: Mr. Sheldon G. Strickland, Office of Highway Planning, (202) 426–0153, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426—0825, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are 7:30 a.m. to 4:00 p.m. e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On April 5, 1983, FHWA issued a policy statement (48 FR 14844) that provided an interim designation of highways on which commercial motor vehicles with dimensions authorized by sections 411 and 416 of the Surface Transportation Assistance Act of 1982 (STAA) (Pub. L. 97–424, as amended by Pub. L. 98–17) may be permitted to operate from April 6, 1983, until issuance of final regulations. The policy statement also provided that modifications to the interim designated network would be made under certain circumstances.

The designated routes in the Appendix to this notice supersede those routes designated in the April 5, 1983, policy statement. Puerto Rico's network is also listed because it was inadvertently omitted from the April 5, 1983, designations. Highlights of the State-by-State modifications follow:

—California—Routes US 199, CA 197, and portions of US 50 are removed from the interim system.
—Delaware—State Road 299 is replaced by State Truck Route 896 between Mt. Pleasant and Boyds Corner.
—Illinois—Routes US 136, US 52, and IL 26 are removed.
—Iowa—A large number of routes have been added at the State's request.
—Maine—Portions of US 1 and US 302 are removed from the interim system.
—Missouri—Portions of US 136, US 71, US 54, and US 60 are removed from the interim system. However, at the State's request, approximately 100 miles are added, including portions of US 136, US 59, US 24, US 60, and MO 37.
—Nebraska—At the State's request, the interim designated system will include all U.S. and State numbered highways with the four exceptions listed in the Appendix.
—New York—Routes US 20, US Alt. 20, NY 5, NY 78, NY 104, NY 13, and NY 278 have been removed from the interim system.
—Puerto Rico—Puerto Rico's designated system was inadvertently omitted from the April 5, 1983, Policy Statement.
—South Carolina—SC 18, US 176, US 1, and SC 557 have been deleted from the interim system and portions of US 78, US 378, US 76, US 321, US 52, and US 17 have also been deleted. SC 576 has been added to the system. Some other minor corrections are made.
—West Virginia—Routes US 250, US 50, and US 60 have been removed. Routes US 35 and WV 34 have been added.
—Wisconsin—US 151 through Madison has been removed from the interim system.

In the April 5, 1983, Policy Statement, we indicated that a notice of proposed rulemaking (NPRM) for the final system would be published later in April. The continuing discussions with several States concerning modifications of the interim system, and the legal challenges brought by several States have necessitated a delay in our anticipated schedule. The NPRM will be published in the near future, but at this time we are unable to estimate a publishing date. In the interim, we would again call attention to the Docket established in the February 3 Policy Statement, and we would encourage interested parties to continue to forward comments to that Docket.

Issued: April 29, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5057 of April 29, 1983

National Year of Voluntarism

By the President of the United States of America

A Proclamation

Voluntarism is a cornerstone of the American way of life and a fundamental characteristic of our American heritage. The generosity and civic-mindedness of the American people has long been a noted aspect of our Nation. Since its inception, this has been a country in which neighbor has lent a hand to neighbor, and families have banded together to help one another in times of adversity.

Voluntary service remains as important today as it was in earlier decades. We cannot rely solely on institutions of government to provide remedies for our problems. Many of the solutions must be devised and supported by other individuals and private groups. Greater emphasis must be placed on developing increased community commitment to voluntary service and on developing more volunteer leaders.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, in recognition of the vital contributions volunteers make to our society, do hereby designate the period beginning on May 1, 1983 until April 30, 1984 as the National Year of Voluntarism, and I call upon the people of the United States and interested groups and organizations to observe this celebration with appropriate activities of voluntary service and efforts to attract additional persons to this valuable and rewarding tradition.

IN WITNESS WHEREOF, I have hereunto set my hand this 29th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 87
Wednesday, May 4, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 360

[Docket No. 83-304]

Noxious Weeds

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document amends the noxious weed regulations in 7 CFR Part 360 by adding certain aquatic weeds, parasitic weeds, and terrestrial weeds to the list of noxious weeds. Listed noxious weeds may be moved into or through the United States only pursuant to a written permit and in accordance with conditions that would not involve a danger of dissemination of the weeds. This action is warranted in order to update the regulations and prevent the artificial spread of the weeds into noninfested areas of the United States.

EFFECTIVE DATE: June 3, 1983.

FOR FURTHER INFORMATION CONTACT: James Lackey, Staff Specialist, Biological Assessment Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 635 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-6805.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to the Federal Noxious Weed Act of 1974 (7 U.S.C. 2801 *et seq.*), a document was published in the **Federal Register** on October 2, 1981 (46 FR 48688-48692), proposing to amend the noxious weed regulations in 7 CFR Part 360 by adding certain aquatic weeds, parasitic weeds, and terrestrial weeds to the list of noxious weeds. Under the noxious weed regulations a listed noxious weed may be moved into or through the United States only pursuant to a written permit. The regulations provide for the issuance of a written permit only upon a determination that the movement of the noxious weed would not involve a danger of dissemination of the noxious weed in the United States.

The document of October 2, 1981, provided that a public hearing would be held if a request were received on or before November 2, 1981. Such a timely request was received and, pursuant to notification in a document published January 20, 1982, a public hearing was held in Miami, Florida, on February 4, 1982. The document of October 2, 1981, also invited the submission of written comments on or before December 1, 1981. However, after a public hearing was requested and scheduled, it was determined that the comment period should be extended for a period sufficient to allow responses to any statements presented at the public hearing. Accordingly, in the document of January 20, 1982, interested persons were invited to submit written comments on or before February 18, 1982.

Eighteen written comments were received in response to the proposal, and seven persons presented comments at the public hearing. Two of those who commented at the public hearing also submitted written comments.

Based on the reasons set forth in this document and in the proposal, the provisions of the proposal have been adopted in the final rule as proposed. Further, all of the comments submitted concerning the proposal have been carefully considered and are discussed below.

The document of October 2, 1981, proposed to add numerous weeds to the list of noxious weeds. Comments concerned the proposed addition of the aquatic weeds *Hygrophila polysperma* T. Anderson (Miramar weed) (referred to below as *Hygrophila polysperma*), and *Limnophila sessiliflora*) (Vahl) Blume (ambulia) (referred to below as *Limnophila sessiliflora*). Comments also concerned the proposed addition of the terrestrial weeds *Alternanthera sessilis* (Linnaeus) R. Brown ex de Candolle (sessile joyweed) (referred to below as *Alternanthera sessilis*); *Avena sterilis* Linnaeus (including *Avena ludoviciana* Durieu) (animated oat, wild oat) (referred to below as *Avena sterilis*); *Imperata cylindrica* (Linnaeus) Raeuschel (cogongrass) (referred to below as *Imperata cylindrica*); and twenty-five species of *Prosopis* which are listed in the text portion of this document (referred to below as the twenty-five listed species of *Prosopis*).

Four of the commenters stated that they were in favor of adding *Hygrophila polysperma* to the list of noxious weeds. The remainder of the comments, which are discussed below, expressed opposition to the addition of certain weeds to the list of noxious weeds.

Two commenters incorrectly assumed that the proposed rule, if adopted, would prohibit the interstate movement of *Hygrophila polysperma*. As stated in the proposal, the noxious weed regulations regulate the movement of listed noxious weeds into or through the United States, but do not affect the movement of listed noxious weeds that are moved solely interstate.

Three commenters asserted that because of geographical considerations *Hygrophila polysperma* should not be listed as a noxious weed. Two of the commenters asserted that *Hygrophila polysperma* is provided with natural geographical control because it grows only below the freeze line. The other commenter asserted that *Hygrophila polysperma* is not known to occur north of the 30th parallel of latitude, and based on this assertion, concluded that any laws regarding *Hygrophila polysperma* should be enacted by Florida, Louisiana, Texas, or Hawaii (States with areas below the 30th parallel) rather than by the federal government. It has been determined that it is necessary to list *Hygrophila polysperma* as a noxious weed. Based on field observation, it has been established, as indicated in the proposal (46 FR 48689), that this aquatic weed forms dense mats which impede water flow, inhibit passage, and clog irrigation pumps. Currently, within the United States, *Hygrophila polysperma* is known to occur only in Florida and there is no evidence to conclude that *Hygrophila polysperma* could become established above the 30th parallel of latitude or the freeze line. However, it appears that it is necessary to take action to prevent its spread into areas in the United States where it could become established. This includes areas in Florida, Louisiana,

UMI

Texas, Hawaii, and certain Territories of the United States. Further, it is necessary to establish federal regulations since States and Territories do not have authority to regulate the movement of the weed into or throughout the United States. In addition, it appears that the most effective means of keeping the weed out of areas where it could become established would be to restrict its importation into any area in the United States.

Another commenter opposed the addition of *Hygrophila polysperma* to the list of noxious weeds based on the assertion that *Hygrophila polysperma* has been present in Florida for thirty years and has never presented an environmental problem. The Department does not agree with the assertion that *Hygrophila polysperma* has not presented an environmental problem in Florida. As noted above, it has been established that *Hygrophila polysperma* is an aquatic weed which forms dense mats which impede water flow, inhibit passage, and clog irrigation pumps. Further, these findings were confirmed at the public hearing by comments based on personal observations of representatives of three Florida water districts.

One commenter also raised questions concerning the rationale for listing *Limnophila sessiliflora* as a noxious weed. It was proposed to list *Limnophila sessiliflora* as a noxious weed on the basis that it is an aquatic weed that forms dense mats which impede water flow, inhibit passage, and clog irrigation pumps; and that it is toxic to fish (46 FR 48689). The commenter indicated that a recent test conducted by a retired chemist and another recent test conducted by a trade association indicate that *Limnophila sessiliflora* is not toxic to fish. The Department has conducted a general review of all of the available information, including the scientific literature,[1] and it does not appear that there are published reports or other information sufficient to confirm or deny whether *Limnophila sessiliflora* is toxic to fish. However, it has been determined based on field observations that it is necessary to list *Limnophila sessiliflora* as a noxious weed because it forms dense mats which impede water flow, inhibit passage and clog irrigation pumps.

[1] A list of this literature and any of the other literature referred to in this document may be obtained from the Biological Assessment Support Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, USDA, Room 628 Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

With respect to *Alternanthera sessilis*, one commenter asserted that it does not grow in Hawaii, as indicated in the proposal, but is only grown in Florida in greenhouse conditions. Based on a review of the scientific literature,[1] it has been established that *Alternanthera sessilis*, is found in damp, shady regions of cultivated areas and wastelands in Hawaii.

Commenters also asserted that *Hygrophila polysperma, Limnophila sessiliflora, Avena sterilis, Imperata cylindrica*, and the twenty-five listed species of *Prosopis* should not be listed as noxious weeds because they have or may have beneficial uses. In this connection:

(1) It was asserted that *Hygrophila polysperma* and *Limnophila sessiliflora* are important plants in the aquatic plant industry,

(2) It was asserted that *Avena sterilis* represents a significant source of germplasm for expanding the gene pool and many crops, including oats,

(3) It was asserted that *Imperata cylindrica* may be useful for preventing erosion, and

(4) It was asserted that the twenty-five listed species of *Prosopis* may be shown by applied research to have beneficial uses.

The Department does not disagree with any of the assertions that these weeds have the beneficial uses stated or that these weeds may have beneficial uses. However, it has been determined in accordance with the rationale stated in the proposal (46 FR 48689–48690) that it is necessary to list all of these weeds as noxious weeds. As noted above, it is necessary to list *Hygrophila polysperma* and *Limnophila sessiliflora* as noxious weeds because these aquatic weeds form dense mats which impede water flow, inhibit passage, and clog irrigation pumps. It is necessary to list *Avena sterilis* as a noxious weed because it competes with and reduces yield of small grains. Further, it is necessary to list *Imperata cylindrica* as a noxious weed because it competes with and reduces yield of forage plants. In addition, it is necessary to list the twenty-five listed species of *Prosopis* as noxious weeds because they form spiny thickets that prevent use of rangeland for grazing. The conclusion that these weeds cause such damage is based on field observations and a review of the scientific literature. (See footnote 1 concerning the availability of this literature.)

However, it should be noted that listing these weeds as noxious weeds would not necessarily prohibit them from being imported for beneficial purposes. As noted above, a noxious weed may be moved into the United States pursuant to a written permit. The regulations provide for the issuance of a written permit upon a determination that the movement of the noxious weed would not involve a danger of dissemination of the noxious weed in the United States. Further, it appears that the listing of these weeds as noxious weeds would have almost no effect on the availability of these weeds for the stated beneficial uses. These weeds are available in the United States for these purposes and, as noted above, the listing of the weeds as noxious weeds only provides for regulation of the weeds into or through the United States.

With respect to the twenty-five listed species of *Prosopis*, one commenter asserted that the comment period should be extended in order to allow additional input from botanists who have worked with species of *Prosopis* in the field. A review of the scientific literature (see footnote 1 concerning the availability of this literature), including reports of field work of Argentine botanists, establishes that these weeds form spiny thickets that prevent use of rangeland for grazing. Accordingly, it is necessary to list them as noxious weeds. Therefore, it does not appear that a reopening of the comment period is warranted.

With respect to *Avena sterilis*, it was asserted that there is no evidence to establish that it has the characteristics of escape and survival that would make it become a nuisance to agriculture in the United States. The Department does not agree with this assertion. Based on departmental expertise and a review of the scientific literature (see footnote 1 concerning the availability of this literature), it has been established that *Avena sterilis* is a pest which occurs in at least nineteen countries, including Australia, Israel, Portugal, Spain, and Tunisia. In these countries, field observations indicate that *Avena sterilis* has spread as a serious weed under ecological conditions which are similar to those in Mediterranean areas of California and adjacent states. Further, based on departmental expertise it appears that if the weed were to become established in such areas in the United States, it would likely spread and cause damage by competing with and reducing the yield of small grains.

Executive Order 12291 and Regulatory Flexibility Act

This document amends the noxious weed regulations by adding certain aquatic weeds, parasitic weeds, and terrestrial weeds to the list of noxious weeds. A listed noxious weed may be moved into or through the United States only pursuant to a written permit. The regulations provide for the issuance of a written permit only upon a determination that the movement of the noxious weed would not involve a danger of dissemination of the noxious weed in the United States. It appears that the dissemination of any of the noxious weeds proposed to be added to the list could cause significant damage to interests of agriculture and that it is necessary to list them as noxious weeds in order to take action to prevent them from being disseminated in the United States.

Based on information compiled by the Department, it has been determined that this action would not have a significant effect on any small entity because currently there is almost no movement of these weeds as such, and these weeds are rarely carried by other articles offered for importation into the United States. Further, it appears that there is no feasible alternative to consider concerning the requirement that agencies choose the alternative that maximizes net benefits to society at the lowest net cost.

Under the circumstances explained above, James O. Lee, Jr., Acting Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 360

Imports, Plants (Agriculture), Quarantine, Transportation, Weeds.

PART 360—NOXIOUS WEED REGULATIONS

Accordingly, § 360.200 of the noxious weed regulations (7 CFR 360.200) is revised to read as follows:

§ 360.200 Designation of noxious weeds.[1]

Pursuant to the provisions of section 10 of the Federal Noxious Weed Act of 1974 (7 U.S.C. 2809) the Secretary of Agriculture, after publication of the required notice of proposal and after public hearing on the proposal when requested by any interested person, has determined based upon the information received at any such hearing and other information available to the Secretary, that the following plants are within the definition of a "noxious weed" in section 3(c) of the Act (7 U.S.C. 2802(c)) and that their dissemination in the United States may reasonably be expected to have, to a serious degree, an effect specified in said section 3(c) of the Act:

(a) *Aquatic Weeds:*

Azolla pinnata R. Brown (mosquito fern, water velvet)
Eichornia azurea (Swartz) Kunth (anchored waterhyacinth, rooted waterhyacinth)
Hydrilla verticillata (Linnaeus f.) Royle (hydrilla)
Hygrophila polysperma T. Anderson (Miramar weed)
Ipomoea aquatica Forsskal (water-spinach, swamp morning-glory)
Limnophila sessiliflora (Vahl) Blume (ambulia)
Monochoria hastata (Linnaeus) Solms-Laubach
Monochoria vaginalis (Burman f.) C. Presl
Sagittaria sagittifolia Linnaeus (arrowhead)
Salvinia auriculata Aublet (giant salvinia)
Salvinia biloba Raddi (giant salvinia)
Salvinia herzogii de la Sota (giant salvinia)
Salvinia molesta D.S. Mitchell (giant salvinia)
Sparganium erectum Linnaeus (exotic bur-reed)
Stratiotes aloides Linnaeus (water-aloe)

(b) *Parasitic Weeds:*

Cuscuta spp. (dodders), other than following species:
Cuscuta americana Linnaeus
Cuscuta applanata Engelmann
Cuscuta approximata Babington
Cuscuta attenuata Waterfall
Cuscuta boldinghii Urban
Cuscuta brachycalyx (Yuncker) Yuncker
Cuscuta californica Hooker & Arnott
Cuscuta campestris Yuncker
Cuscuta cassytoides Nees ex Engelmann
Cuscuta ceanothii Behr
Cuscuta cephalanthii Engelmann
Cuscuta compacta Jussieu
Cuscuta corylii Engelmann
Cuscuta cuspidata Engelmann
Cuscuta decipiens Yuncker
Cuscuta dentatasquamata Yuncker

DEPARTMENT OF COMMERCE

Office of the Secretary

15 CFR Part 4a

[Docket No. 304 27-68]

Classification, Declassification, and Public Availability of National Security Information

AGENCY: Office of the Secretary, Commerce.

ACTION: Final rule.

SUMMARY: U.S. Department of Commerce, Department Administrative Order (DAO) 207-2, signed by the Secretary of Commerce effective September 14, 1982, provides for the issuance of a Department of Commerce National Security Information Manual. The Manual comprises a complete set of guidelines and instructions for implementing Executive Order 12356, "National Security Information," and implementing directives. The guidelines and instructions will enable Department of Commerce employees to adequately safeguard national security information and to make available to the public that information which is releasable under these regulations.

EFFECTIVE DATE: March 4, 1983.

FOR FURTHER INFORMATION CONTACT: Alan F. Brown, 202-377-1722.

SUPPLEMENTARY INFORMATION:

Authority: This regulation shall be published in the **Federal Register** pursuant to Section 5.3(b), E.O. 12356.

Purpose: The National Security Information Manual, hereinafter called the "Manual," prescribes the Department of Commerce security policies, procedures and minimum requirements for safeguarding national security information. The Manual takes precedence over all supplemental regulations which prescribe additional or more stringent safeguards. It establishes throughout the Department of Commerce uniform policies, standards, criteria, and procedures for the classification, downgrading, declassification, and safeguarding of national security information.

Responsibility: The Director, Office of Security, has overall responsibility for security matters throughout the Department of Commerce. The Director is responsible for implementing within the Department the provisions of E.O. 12356. All Department of Commerce employees, components, offices, and contractors are bound by these regulations, unless specifically excepted in writing.

List of Subjects in 15 CFR Part 4a

Classified information.

Words of Issuance. For the reasons set forth in the preamble, 15 CFR Part 4a is revised as follows.

Table of Contents

Subpart A—Classification of National Security Information

Sec.
4a.1. General.
4a.2. Director, Office of Security.
4a.3. Classification levels.
4a.4. Classification authority.
4a.5. Duration of classification.

Subpart B—Declassification

4a.6. General.
4a.7. Systematic review for declassification.
4a.8. Mandatory review for declassification.
4a.9. Requests under the Privacy Act and the Freedom of Information Act involving classified records.
4a.10. Presidential information.
4a.11. Foreign government information.
4a.12. Public availability of declassified information.

Subpart C—Access to Classified Information

4a.13. Access by persons outside the executive branch.
4a.14. Access by industrial, educational, and commercial entities.
4a.15. Access by historical researchers and former presidential appointees.
4a.16. Access by foreign nationals, foreign governments, international organizations and immigrant aliens.

Authority: Sec. 5.3(b), E.O. 12356, 47 FR 14874, April 6, 1982, 47 FR 15557, April 12, 1982.

Subpart A—Classification of National Security Information

§ 4a.1 General.

Executive Order 12356 provides the only basis for classifying information within the Department of Commerce, except as provided in the Atomic Energy Act of 1954. The policy of the Department of Commerce is to make information concerning its activities available to the public consistent with the need to protect the national defense or foreign relations as required by the interests of the United States and its citizens. Accordingly, security classification shall be applied only to protect the national security.

§ 4a.2 Director, Office of Security.

The Director is responsible for (a) acting on all suggestions, complaints, and appeals not otherwise resolved, concerning the implementation and administration of E.O. 12356 and implementing directives, and (b) deciding all appeals from denials of requests for national security information under the Mandatory Review provision of E.O. 12356, when the initial denial was based on continued classification under the Order. When acting on such appeals the Director shall confer, as necessary, with the Offices of the General Counsel, Information Management, and Personnel. The Director may solicit advise from various operating units as required. All suggestions, complaints, or appeals should be addressed to the Director, Office of Security, Room 5044, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

§ 4a.3 Classification levels.

Information may be classified as national security information by a designated original classifier of the Department when it is determined that the information concerns one or more of the categories prescribed in E.O. 12356 and when the unauthorized disclosure of the information, either by itself or in the context of other information, reasonably could be expected to cause damage to the national security. The levels established by E.O. 12356 (Top Secret, Secret, and Confidential) are the only terms which may be applied to national security information. Except as provided by statute, no other terms shall be used within the Department of Commerce in conjunction with any of the three classification levels.

§ 4a.4 Classification authority.

Authority to originally classify information as Secret or Confidential may be exercised only by the Secretary of Commerce and by officials to whom such authority is specifically delegated. No official of the Department of Commerce is authorized to originally classify information as Top Secret.

§ 4a.5 Duration of classification.

Information shall remain classified as long as its unauthorized disclosure would result in damage to the national security. When it can be determined a specific date or event for declassification shall be set by the original classification authority at the time the information is originally classified. Automatic declassification markings applied under predecessor executive orders shall remain valid unless the classification is extended by an authorized declassification authority. Information classified under predecessor orders and marked for declassification review shall remain classified until reviewed for declassification under the provisions of E.O. 12356 governing systematic review or mandatory review for declassification.

Subpart B—Declassification

§ 4a.6 General.

Information that continues to meet the classification requirements prescribed in E.O. 12356 despite the passage of time will continue to be safeguarded. However, information which is properly classified at the time it is developed may not necessarily require protection indefinitely. National security information over which the Department of Commerce exercises final classification jurisdiction shall be declassified or downgraded as soon as national security considerations permit. When information is determined to be no longer damaging to the national security, it may continue to be exempt from public disclosure by law. If so, when the information is declassified the declassification authority shall indicate that all or portions of the information become FOR OFFICIAL USE ONLY and shall cite the authority which permits nondisclosure.

§ 4a.7 Systematic review for declassification.

Classified information constituting permanently valuable records of the Government, as defined by U.S.C. 2103, that is in the possession and control of the Department of Commerce or of the Archivist of the United States, shall be systematically reviewed for declassification. This review shall be in accordance with systematic review guidelines authorized by the Secretary of Commerce.

§ 4a.8 Mandatory review for declassification.

(a) *Requests.* Classified information under the jurisdiction of the Department of Commerce shall be reviewed for declassification upon receipt of a request by a United States citizen or permanent resident alien, a Federal agency, or a state or local government. A request for mandatory review of classified information shall be submitted in writing and describe the information with sufficient specificity to locate it with a reasonable amount of effort. Request shall be submitted to the Director, Office of Security, U.S. Department of Commerce, Room 5044, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230.

(b) *Processing requirements.* (1) The Director, Office of Security, shall acknowledge receipt of the request directly to the requester. When a request does not satisfy the conditions of paragraph (a) of this section, the requester shall be notified that unless additional identifying information is provided, no further action will be taken. The request shall be forwarded to the operating unit or office which originated the information or which has primary interest in the subject matter. The unit or office assigned action shall review the information within twenty working days as prescribed below.

(2) The action office shall determine whether, under the declassification provisions of the Department of Commerce National Security Information Manual, the entire document or portions thereof may be declassified. The action office shall also determine whether, if the document or portions are declassified, withholding the information is otherwise warranted under applicable statutes. Declassification of the information shall be accomplished by a designated declassification authority. Upon declassification the information shall be remarked. If the information may not be released in whole or in part, the reviewing official shall provide the reasons for denial by citing the applicable provision of section 1.3 of E.O. 12356. When the classification is a derivative decision based on classified source material of another Federal agency, the action office shall provide the information to the originator for review.

(3) The action office shall also determine if declassified information is otherwise available for public release under the Freedom of Information Act. If the information is not releasable, the reviewing official shall advise the Director, Office of Security, that the information has been declassified but that it is exempt from disclosure, citing the appropriate exemption of the Freedom of Information Act and applicable regulations.

(4) If the request for declassification is denied in whole or in part, the requester shall be notified of the right to appeal the determination within sixty days and of the procedures for such an appeal. If declassified information remains exempt from disclosure under the Freedom of Information Act, the requester shall be advised of those appellate procedures. All denials of information under the Freedom of Information Act must be approved by the Office of the Assistant General Counsel for Administration.

(c) *Fees.* If the request requires the rendering of services for which fees may be charged, the unit assigned action may calculate the anticipated amount of fees to be charged and ascertain the requester's willingness to pay the allowable charges as a precondition to taking further action on the request in accordance with § 4.9 of Department of Commerce Freedom of Information Act

VOL
48
ISS
87
MAY
4
1983

rules and § 4b.11 of the Department's Privacy Act rules.

(d) *Right of Appeal.* (1) A requester may appeal to the Director, Office of Security, when the requested information is not declassified and released in whole. The Director shall determine, within thirty days after receipt of an appeal, whether continued classification of the requested information is required in whole or in part, notify the requester of his determination, and make available to the requester any information determined to be releasable. If continued classification is required under the provisions of this manual, the requester shall be notified of the final determination and of the reasons for denial.

(2) During the declassification review of information under appeal the Director, Office of Security, may overrule previous determinations in whole or in part when, in his judgment, continued protection in the interest of national security is no longer required. If the Director determines that the information no longer requires classification, it shall be declassified and, unless it is otherwise exempt from disclosure, released to the requester. The Director shall advise the original reviewing Commerce office or unit of his decision.

§ 4a.9 Requests Under the Privacy Act and the Freedom of Information Act involving records.

(a) The Freedom of Information Act (FOIA), Title 5 U.S.C., Section 552(b)(1) and the Privacy Act of 1974 (PA), Title 5 U.S.C., Section 552a(k)(1), authorize withholding of records from public availability which are "(1) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (2) are in fact properly classified pursuant to such Executive order."

(b) Under the FOIA a determination on an initial request must be made within ten working days after receipt of the request. A determination on an appeal to an initial denial must be made within twenty working days after receipt of an FOIA appeal; or for a PA appeal, within thirty working days. Time limits are mandatory for an FOIA request, but are permissive for a PA request. Except for unusual circumstances, failure to make a determination within the stated time limits means that a requester has exhausted the administrative remedies and may bring suit immediately.

(c) Persons who request information under the provisions of these Acts, and whose requests are denied on appeal, may petition the courts to enjoin the Department of Commerce from withholding the record and, in this event, burden is on the Department of Commerce to sustain its actions.

(d) To assure that PA/FOIA requests involving classified records are subjected to a thorough classification review and that a response is made within the specified time limits, the procedures in paragraphs (e) and (f) shall apply as well as those of DAO 205–12 "Public Information," DAO 205–14 "Processing Requests Under the Freedom of Information Act," and DAO 205–15 "Implementing the Privacy Act of 1974."

(e) Initial requests involving classified records:

(1) The office determined to have primary interest shall conduct a declassification review of the information as prescribed in § 4a.8(b)(2), (3), and (4).

(2) If the information is subsequently declassified, the action office shall consult with the Office of the Assistant General Counsel for Administration to determine releasibility with consideration only for the legality of release within the purview of PA/FOIA.

(3) If the record warrants continued classification, the action office shall coordinate with the Office of the Assistant General Counsel for Administration and so advise the requester, and further advise the requester of the right of appeal.

(4) If the classification review cannot be completed within the prescribed time limit, due to unusual circumstances, the action office shall advise the requester. An extension of time shall be arranged in accordance with the FOIA and implementing Commerce PA/FOIA rules.

(f) Receipt of an appeal for reconsideration of denial of a classified record under PA/FOIA: Appeals under this section shall be addressed to the General Counsel who shall refer the record(s) to the Director, Office of Security, for a declassification review. The Director may overrule previous determinations in whole or in part when, in his judgment, continued protection in the interest of national security is no longer required. If the information under review no longer requires classification, it shall be declassified. The Director shall advise the General Counsel of his decision.

§ 4a.10 Presidential information.

Information originated by the President, by the White House Staff, by committees, commissions, or boards appointed by the President, or by others specifically providing advice and counsel to a President or acting on behalf of a President is exempted from the provisions of mandatory review for declassification, except as consistent with applicable laws that pertain to presidential papers or records.

§ 4a.11 Foreign government information.

Requests for mandatory review for declassification of foreign government information shall be processed as prescribed in § 4a.8(b). Consultation with the foreign source of the information through appropriate channels may be required prior to final action on the request.

§ 4a.12 Public availability of declassified information.

A fundamental policy of the Department of Commerce is to make information available to the public to the maximum extent permitted by law. Information which is declassified, for any reason, loses its protective status in the interest of national security. Accordingly, declassified information shall be handled in every respect on the same basis as all other unclassified information.

Subpart C—Access to Classified Information

§ 4a.13 Access by persons outside the Executive branch.

Department of Commerce classified information may be made available to persons outside the Executive Branch provided that (a) they are engaged in historical research projects or previously have occupied policy-making positions to which they were appointed by the President, or (b) the information is necessary for their performance of a function related to a contract or other agreement with the U.S. Government. The Director, Office of Security, shall determine, prior to the release of classified information under this provision, the propriety of such action in the interest of national security and obtain assurance of the recipient's trustworthiness and need to know.

§ 4a.14 Access by industrial, educational and commercial entities.

Bidders, contractors, grantees, educational, scientific or industrial organizations may receive classified information under the procedures prescribed in the Department of Defense Industrial Security Manual.

§ 4a.15 Access by historical researchers and former Presidential appointees.

(a) Persons who are engaged in historical research projects or who have previously occupied policy-making positions to which they were appointed by the President may be authorized access to classified information provided that the head of the component with classification jurisdiction over the information:

(1) Makes a written determination that access is consistent with the interests of national security;

(2) Is assured by the Director, Office of Security, that the requestors have an appropriate determination of trustworthiness as a precondition to access;

(3) Obtains written agreements from requestors to safeguard the information to which they are given access in accordance with these regulations;

(4) Obtains written consent to a review by the Department of Commerce of their resultant notes and manuscripts for the purpose of determining that no classified information is contained therein; and

(5) Limits access granted to former Presidential appointees to items that the person originated, reviewed, signed, or received while serving as a Presidential appointee.

(b) The material requested should be clearly identified so that it can be located and compiled with a reasonable amount of effort. If the access requested by historical researchers or former Presidential appointees requires the rendering of services for which fair and equitable fees may be charged, the requestor shall be notified.

(c) The provisions of this section apply only to classified information, or any part of it, originated by the Department of Commerce or information that is now in the sole custody of the Department. Otherwise, the researcher shall be referred to the classifying agency. Operating units providing information under this section shall maintain custody of classified information at a Commerce facility.

§ 4a.16 Access by foreign nationals, foreign governments, international organizations and immigrant aliens.

Foreign nationals employed by the Department of Commerce may be granted access to classified information originated within the Department only for the specific classified project to which they are assigned and only after they have met those requirements set forth in DAO 207–3, "Security Requirements for Research Associates, Guest Workers and Trainees," and Appendix B of DAO 207–4, "Security and Suitability Investigations of Personnel." If a need for access by foreign nationals (other than employees) is indicated, the Director, Office of Security, shall be consulted for decision on a case-by-case basis.

Michael N. Cassetta,

Director, Office of Security, U.S. Department of Commerce.

15 CFR Parts 369, 370, 375, 388 and 390

Export Administration Regulations; Editorial Amendments

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule, which neither expands nor limits the provisions of the Export Administration Regulations, makes minor editorial amendments to the Regulations. These amendments make the following changes: Insert new mailing addresses and room numbers; remove revision dates for forms used by the Office of Export Administration; insert the name changes of a licensing division; and correct typographical errors.

DATE: This rule is effective May 4, 1983. Although there is no formal comment period, public comments are welcome on a continuing basis.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, Department of Commerce, Washington, D.C. 20230 (Telephone: (202) 377–4811).

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. App. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

BILLING CODE 3510–25–M

FEDERAL TRADE COMMISSION

16 CFR Part 5

Amendments to Commission Standards of Conduct

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Commission has delegated to the General Counsel or his designee most of the duties currently assigned to the Executive Director under the Commission's Standards of Conduct, 16 CFR Part 5. This document amends 16 CFR Part 5 to reflect that transfer of duties and certain other organizational changes which the Commission has recently adopted. It also amends 16 CFR Part 5 to reflect the public financial disclosure reporting requirements of Title II of the Ethics in Government Act of 1978, Pub. L. 95–521, as amended.

DATE: Effective on May 4, 1983.

FOR FURTHER INFORMATION CONTACT: Jerome A. Tintle, Office of General Counsel, Federal Trade Commission, Washington, D.C. 20580 (202) 523–3487.

SUPPLEMENTARY INFORMATION: The Commission has designated the General Counsel or his designee to perform all of the duties of the Executive Director under the Commission's Standards of Conduct, 16 CFR Part 5, except as follows: (1) The Executive Director will continue to make the determinations required by § 5.8 with respect to employees classified at Grade GS–15 or below; and (2) the Executive Director will continue to receive and review the statements of employment and financial interests required by Executive Order 11222 with respect to those employees within the Office of the Executive Director who are under his immediate supervision.

In addition, § 5.32 is amended to reflect: (1) The creation of a Deputy Executive Director for Management, responsible for the Divisions of Administrative Services, Budget and Finance, Personnel, and Procurement and Contracting; a Deputy Executive Director for Planning and Information, responsible for the Divisions of Data Processing and Information Systems, Library, and Information Analysis; and an Executive Assistant to the Executive Director; (2) the abolishment of the position of Director of the Office of Policy Planning; and (3) the redesignation of the Office of Public Information as the Office of Public Affairs.

Finally, Subpart D of 16 CFR Part 5 is amended to reflect the public financial disclosure reporting requirements imposed on commissioners and certain employees of the Commission by Title II of the Ethics in Government Act of 1978, Pub. L. 95–521, as amended. These requirements are embodied in revised § 5.31. Conforming changes are also made to Subpart D's remaining provisions, all of which concern statements of employment and financial interests required of certain employees by Executive Order 11222, Sections 402–406 (May 8, 1965).

Since these amendments relate solely to matters involving agency management and personnel, they are not subject to the notice and comment requirements of the Administrative Procedure Act. 5 U.S.C. 553(a)(2). For the same reason, the requirements of the Regulatory Flexibility Act do not apply. 5 U.S.C. 601(2) (Supp. V 1981).

Lists of Subjects in 16 CFR Part 5

Administrative practice and procedure, Conflict of interests.

PART 5—[AMENDED]

Accordingly, the Commission amends 16 CFR Part 5 as follows:

1. A new paragraph (f) is added to 16 CFR 5.4 to read as follows:

§ 5.4 Definitions.

In this part:

* * * * *

(f) "General Counsel" means the General Counsel or the General Counsel's designee.

2. The final sentence of 16 CFR 5.5 is revised to read as follows:

§ 5.5 Interpretation and advisory service.

* * * Deputy counselors may seek advice or guidance concerning the interpretation of the regulations of this part from the General Counsel.

3. Paragraphs (c) and (d) of 16 CFR 5.6 are revised to read as follows:

§ 5.6 Procedures for reporting and resolving conflicts of interest.

* * * * *

(c) Except for determinations by the Executive Director pursuant to § 5.8, the General Counsel may resolve a conflict of interest or the appearance of a conflict of interest by such remedial action as is within the authority of the General Counsel.

(d) Where there is substantial doubt concerning the existence of a conflict of interest or the appearance of a conflict of interest, the type of remedial action which is required, or any other matter involving the interpretation of the regulations in this part, the matter may be referred to the General Counsel for advice and recommendations.

§ 5.19 [Amended]

4. Paragraph (b) of 16 CFR 5.19 is amended by removing the words "the Executive Director or".

5. The headings and table of contents of Subpart D of 16 CFR Part 5 are revised to read as follows:

PART 5—STANDARDS OF CONDUCT

* * * * *

Subpart D—Financial Disclosures

Sec.

5.31 Public financial disclosure reports under the Ethics in Government Act.
5.32 Statements of employment and financial interests under Executive Order 11222.
5.33 Time for submission of statements.
5.34 Supplementary statements.
5.35 Interests of employees' relatives.
5.36 Information not known by employees.
5.37 Information prohibited.
5.38 Review of employee's statements.
5.39 Confidentiality of employees' statements.
5.40 Effect of employees' statements on other requirements.
5.41 Specific provisions for special Government employees.
5.42 Reviewing statements of special Government employees.

6. 16 CFR 5.31 is revised to read as follows:

§ 5.31 Public financial disclosure reports under the Ethics in Government Act.

(a) The provisions of this section apply only to public financial disclosure reports required by Title II of the Ethics in Government Act of 1978, Pub. L. 95–521, as amended. Commission members and employees required to file under this section need not file statements of employment and financial interests under § 5.32 and they are not subject to the provisions of §§ 5.33–5.42.

(b) For purposes of this section, the Designated Agency Ethics Official is the Assistant General Counsel.

(c) The following Commission members and employees must file public financial disclosure reports pursuant to Title II of the Ethics in Government Act:

(1) The Chairman;

(2) Each Commissioner;

(3) Each employee (i) who is a member of the Senior Executive Service, or (ii) whose position is classified at GS–16 or above of the General Schedule, or (iii) whose rate of basic pay is fixed (other than under the General Schedule) at a rate equal to or greater than the minimum rate of basic pay fixed for GS–16 (Step 1);

(4) Each employee who is an administrative law judge appointed pursuant to 5 U.S.C. 3105;

(5) Each employee, regardless of grade or pay level, who is in a position which is excepted from competitive service by reason of being of a confidential or policymaking character (except individuals or groups excluded by action of the Director of the Office of Government Ethics); and

(6) The Designated Agency Ethics Official.

(d) Reports under this section must be filed on the form prescribed by the Office of Government Ethics and in accordance with the regulations promulgated, and from time to time amended, by the Office of Government Ethics as set forth in 5 CFR Part 734. Copies of the form are available from the Designated Agency Ethics Official.

(e) Reports under this section must be filed according to the time schedules set forth in 5 CFR Part 734.

(f) Reports under this section, except those filed by the Designated Agency Ethics Official, must be filed with the Designated Agency Ethics Official. The Designated Agency Ethics Official must file his report with the Chairman.

(g) The Designated Agency Ethics Official shall administer the public financial disclosure reports program under this section, shall receive the reports as indicated in § 5.31(f), shall review them, and shall provide advice and counsel regarding matters relating to Part II of the Ethics in Government Act and its implementing regulations. His duties and responsibilities are set forth in more detail in 5 CFR Part 738 which is promulgated, and from time to time amended, by the Office of Government Ethics.

7. 16 CFR 5.32 is revised to read as follows:

§ 5.32 Statements of employment and financial interests under Executive Order 11222.

(a) The provisions of this section and §§ 5.33–5.42 apply only to individuals required to file statements of employment and financial interests under Executive Order 11222, sections 402–406 (May 8, 1965) and its implementing regulations as set forth in 5 CFR Part 735, Subpart D.

(b) Individuals required to file financial disclosure reports under § 5.31 need not file statements under this section and are not subject to the provisions of §§ 5.33–5.42.

(c) If not required to file under § 5.31, the following employees, whether or not serving in an acting capacity, shall submit statements to the Executive Director:

(1) The Executive Assistant to the Executive Director;

(2) The Attorney Advisor to the Executive Director; and

(3) The Director of Equal Employment Opportunity.

(d) If not required to file under § 5.31, the following employees, whether or not serving in an acting capacity, shall submit statements to the General Counsel:

(1) The Director and Deputy Director of the Office of Public Affairs;

(2) The Chief Presiding Officer;

(3) The Director of the Office of Congressional Relations;

(4) Directors of the Regional Offices;

(5) Advisors to the Commissioners, except that each Commissioner in the Commissioner's discretion may direct otherwise;

(6) Deputy Assistant General Counsels; and

(7) Assistants to the General Counsel.

(e) If not required to file under § 5.31, the following employees of the Bureaus of Competition, Consumer Protection, and Economics, whether or not serving in an acting capacity, shall submit statements to their Bureau Director:

(1) Assistant Directors;

(2) Deputy Assistant Directors;

(3) Executive Assistants to the Director and Assistants to the Director; and

(4) Assistants to the Deputy Director.

(f) If not required to file under § 5.31, the following employees, whether or not serving in an acting capacity, shall submit statements to the Deputy Executive Director for Management:

(1) The Director of the Division of Administrative Services;

(2) The Director of the Division of Budget and Finance;

(3) The Director of the Division of Personnel; and

(4) The Director of the Division of Procurement and Contracting.

(g) If not required to file under § 5.31, the following employees, whether or not serving in an acting capacity, shall submit statements to the Deputy Executive Director for Planning and Information:

(1) The Director of the Division of Data Processing and Information Systems;

(2) The Director of the Library; and

(3) The Director of the Division of Information Analysis.

(h) Presiding Officers designated under § 1.13(c) of Part 1 shall submit

statements to the Chief Presiding Officer.

(i) Assistant Directors of the Regional Offices, whether or not serving in an acting capacity, shall submit statements to their Regional Office Director.

(j) The following persons may require employees subject to their supervision, in addition to those designated in paragraphs (c)–(i) of this section, to submit statements: The Executive Director, the General Counsel, and the Directors of the Bureaus of Competition, Consumer Protection, and Economics. Additional employees designated pursuant to this paragraph must be ranked at GS–13 or above, or at a comparable pay level under another authority, and must meet the requirements established by the Office of Personnel Management (5 CFR 735.403). The names of additional employees so designated must be reported to the General Counsel.

(k) An employee who feels that his or her position has been improperly designated as one requiring submission of a statement of employment and financial interests has recourse to the Commission's grievance procedures set forth in chapter 5–771 of the Commission's Administrative Manual.

§ 5.33 [Removed]

8. 16 CFR 5.33, entitled *Presidential appointees*, is removed.

§§ 5.34 through 5.43 Redesignated as §§ 5.33 through 5.42.

9. 16 CFR 5.34–16 CFR 5.43 are redesignated 16 CFR 5.33–16 CFR 5.42, respectively.

10. Paragraph (a) of newly designated 16 CFR 5.38, entitled *Review of employee's statements*, is amended by removing the final sentence thereof.

11. Paragraph (b) of newly designated 16 CFR 5.38, entitled *Review of employee's statements*, is revised to read as follows:

§ 5.38 Review of employees' statements.

* * * * *

(b) Upon completion of review, all statements received by the Executive Director, the Directors of the Bureaus of Competition, Consumer Protection, and Economics, the Deputy Executive Directors, the Chief Presiding Officer, and the Regional Office Directors shall be forwarded to the General Counsel for safekeeping.

12. Paragraph (a) of newly designated 16 CFR 5.39, entitled *Confidentiality of employee's statements*, is revised to read as follows:

§ 5.39 Confidentiality of employees' statements.

(a) Each statement of employment and financial interests, and each supplementary statement, shall be held in confidence. During the course of review, only the person to whom the statement is submitted or properly referred, the Chairman (or the Chairman's designee), the Executive Director (or the Executive Director's designee), and the General Counsel shall be permitted to view the statements.

* * * * *

13. In addition to the amendments set forth above, 16 CFR Part 5 is amended by removing the words "the Executive Director", "the Executive Director (or the Executive Director's designee)", or "the Executive Director, with the assistance of persons designated by the Executive Director," and inserting, in their place, the words "the General Counsel" in the following places:

(a) 16 CFR 5.5
(b) 16 CFR 5.6(b)
(c) 16 CFR 5.7(a)
(d) 16 CFR 5.9
(e) 16 CFR 5.12(f)
(f) Newly designated 16 CFR 5.38(a)
(g) Newly designated 16 CFR 5.38(c)
(h) Newly designated 16 CFR 5.39(b)
(i) Newly designated 16 CFR 5.41(c)
(j) Newly designated 16 CFR 5.42(a)

(Sec. 6(g), 38 Stat. 721 (15 U.S.C. § 46(g)); 80 Stat. 383, as amended; 81 Stat. 54 (5 U.S.C. § 552); 92 Stat. 1824, as amended; EO 11222 of May 8, 1965, (30 FR 6469; 3 CFR, 1964–1965 Comp., p. 306); 5 CFR 734.103; 5 CFR 735.104)

By direction of the Commission, dated April 7, 1983.

Emily H. Rock,

Secretary.
